# 1.1 Acknowledgements

I would like to express my gratitude to the following individuals, whom through their effort, made the publication of this study pack a success. First and foremost, there is Mr. C. Chiwara and M. Sibanda who assisted in various stages of the book. Also not to be forgotten is my secretary Miss Priscilla Phiri who typed the manuscript. Regretfully though unexpected, I accept any error that might have escaped my attention. Thank you very much for your support.

We have taken every effort to try and get hold of the copyright holders of any information we have reproduced without acknowledgement. We will appreciate the help from anyone to enable us contact the copyright holders whose permission we have not yet obtained.

S. Madzingira Bulawayo

## 1.2 Preface to the 8th Edition

Since the publication of our Advanced Level study pack in 2004, a lot of changes have been made in this edition

A student who is doing accounting for the first time is recommended to make use of both the O' and A' Level study packs. We have also added more questions multiple choice and structured and case studies. This book has also been recommended by users to be suitable for use in classroom and individual studies.

The vision of the Study Pack project is to create a self-sufficient information base for the student. With this aim in mind this Study Pack provides all the necessary topical material in a simplified manner. There after that the Study Pack provides a wide range of examination-type questions at the end of each topic area. After the adoption of the International Financial Reporting Standards (IFRSs), the following are some changes that will be noticed by the students, as compared to the previous versions which use the FRSs. The student must be familiar with the following terms which are used in this book. To aid the understandability of the terms, we have compared them, side by side with old terminology:

### FRSs (Used in the previous books) IFRSs (Used in this book)

Trading, profit and loss account

Statement of comprehensive income

Appropriation account Statement of changes in equity (refer to note below)

Balance sheet Statement of financial position

cash flow Statement Statement of cash flow

Fixed assets Property, plant and equipment

Net book Value (NBV) Carrying Amount( in short CA)

Stock Inventory

Debtors Accounts receivable

Creditors Accounts payable

Provision for bad/doubtful debts Allowance account for credit loses

**Note:** The statement of changes in equity however gives more information about the equity position of the company, as compared to the appropriation account.

# CHAPTER 1

# INTRODUCTION TO FINANCIAL ACCOUNTING

#### Revision

# Chapter objectives

After studying this chapter the student should be able to:

- Define the terms 'Accounting' and 'transaction'.
- *Identify the source documents and books of prime entry*
- Enter Transactions in the books of prime entry
- Post to the ledgers
- Extract a trial Balance
- Prepare Financial Statements

## 1.1 Financial accounting

**Andrew Thomas defines accounting** as a **process** of designing and operating an information system for collecting, measuring and recording business transactions, and summarizing and communicating the results of these transactions to users to facilitate financial / economic decisions.

#### 1.2 The Accounting process

The process of accounting starts with collecting namely receipts, invoices, etc. and then recording transactions in the **books of prime entry**, using source documents. Posting to the **Ledger accounts**, extracting a **Trial Balance**, making adjustments for other payables (accruals), other receivables (prepayments) and other year-end adjustments will then follow, before preparing **Financial Statements** and communicating them to users.

#### 1.3 Transactions

A transaction is an activity involving the exchange of money or anything with an ascertainable money value e.g. sale or purchases of goods on cash or credit. There are of two types, Cash transactions and Credit transactions.

Each transaction will result in two different accounts being affected. Whenever there is a transaction, one account is either gaining or the other one is losing. The one, which is gaining, should be debited and the one, which is losing, should be credited.

#### 1.4 Source documents

As the organisation conducts its business on a daily basis, it generates documents, which are used by the accountant to record transactions in the books of accounts. These documents are known as source documents in accounting. The examples of these documents include: receipt, invoice, credit note, debit note, cheque counterfoil, petty cash voucher and statement of account.

#### 1.1.1 Invoice

An invoice is a business document which is used for all credit transactions. It applies when the business acquires or sells assets on credit for example the purchase of goods on credit, acquisition of equipment on credit, purchase of delivery van on credit.

#### 1.1.2 Debit note

This document is issued by the customer to the supplier when returning goods. It is also used to report any shortages, overcharges or damages goods.

**Note:** A debit note can also be issued by the supplier to the customer when the goods have been undercharged that is to correct an undercharge.

#### 1.1.3 Credit note

A credit note is issued by the supplier to the customer to correct an overcharge. It is also used by the supplier to reduce the amount owed by the customer especially when the supplier does not have the right quality and/ quantity to replace the goods returned.

#### 1.1.4 Statement of account (Statement)

A statement is issued by the supplier to the customer at the end of each month to show the transactions for that period. Its main purpose is to remind the customers to pay their accounts.

## 1.5 Books of original entry/prime entry

These are the first books of accounts where transactions are recorded before being posted to the ledger. These books include: sales journal, sales returns journal, purchases journal, purchases returns journal, cash book and general journal, petty cash book.

#### 1.1.5 Cash book

The cash book is used to record cash and cheque transactions. It is a combination of the cash and bank accounts.

#### 1.1.6 The sales daybook/Sales journal

The sales day book is used to record sales on credit for goods initially bought for resale. It is written from the credit sales invoices issued to customers.

#### 1.1.7 The purchases day book/Purchases journal

This book is used to record purchases on credit for goods bought for resale. It is written from suppliers' credit invoices.

#### 1.1.8 Sales returns day book/Sales returns journal/Returns inwards journal.

This book is used to record credit notes issued when customers return goods or when they have been overcharged.

#### 1.1.9 Purchases returns daybook/Purchases returns journal/Returns outwards journal.

This book is used to record credit notes received from suppliers relating to goods that were initially bought for resale now returned back to suppliers.

#### 1.1.10 The journal (General Journal)

It is used to record the following transactions:

- a) Opening entries which are records prepared for the first financial period.
- b) Accounting adjustment e.g. corrections of errors and year end adjustments.
- c) Transfers between Ledger accounts.
- d) It is also used to record transactions that are not appropriate to any other book of prime entry e.g. the Purchase or sale of non-current assets on credit.

## 1.6 The ledger

A ledger is a main book of accounts. This is because all the other books of original entry are posted to the ledger at the end of each period for example at the end of every month.

#### 1.7 The trial balance

It is a list of all ledger balances at the end of a particular period. Each ledger account is balanced at the end of the month and the total transferred to the trial. The trial balance is therefore used as a control to check errors in the ledger.

## 1.8 Adjustments to the financial statements

These items are added as additional information to the trial balance. They include closing inventory, other payments (accruals), other receivables (prepayments), inventory taken by the owner for personal use, depreciation, Provision for credit loses and others.

#### 1.9 Financial Statements

Financial statements are sometimes known as final accounts and are prepared at the end of each financial year. A complete set of financial statements comprises of the following:

- 1. an Statement of comprehensive income
- 2. a Statement of Financial Position
- 3. a statement of changes in equity
- 4. a statement of cash flow (IAS 7)
- 5. notes to the financial statements, comprising a summary of significant accounting policies and other explanatory notes.

They are used to assess the financial performance (Statement of comprehensive income) and the financial status (Statement of Financial Position) of the business.

The following information relates to the books of A. Nyathi.

- Jan 1. Commenced Business with a capital of \$70 000 in cash.
  - 2. Opened a business bank current account with \$1 000.
  - 3. Paid Rent \$ 2 500 cash
  - 4. Bought stationery \$ 500 cash
  - 5. Purchased goods for resale \$10 000 paying in cash
  - 6. Sold goods for \$30 000 payment received by cheque.
  - 7. Paid wages \$ 5 000 cash
  - 8. Bought goods on credit from the following:
    - M. Mashava \$25 000
    - S. Mudzingwa \$19 000
    - L. Kusano \$8 000 less 10% trade discount.
  - 8. Purchased furniture for \$8 000 paying by cash
  - 9. Paid transport \$1 200 by cheque
  - 10. Paid M. Mashava \$23 750 by cheque having deducted 5% cash discount from the purchase made on 7 January.
  - 11. Paid water \$ 200 by cheque

- 12. Paid telephone \$1 900 by cheque
- 13. Paid wages \$ 5 000 by cheque
- 14. Sold goods on credit to :- W. Chivhengere \$42 000 less 20% trade discount

S. Ndlovu \$ 8 000 M. Zakeo \$ 3 000

- 15. Paid electricity \$1 300 cash
- 16. Paid L. Kusano \$6 840 in full settlement of his account by cheque.
- 17. We returned goods to S. Mudzingwa worth \$3 000.
- 18. The following returned goods: M. Zakeo \$ 500

S. Ndlovu \$1 000

19. Received cheques for payment of account from the following:-

W. Chivhengere \$31 920 in full settlement

M. Zakeo \$1 900 in full settlement

- 20. Paid stationary \$300 by cheque
- 21. Paid wages \$500 by cheque
- 22. Withdrew \$500 cash from the bank for personal use.
- 23. Received a loan of \$28 000 by cheque from J.B Motors for \$50 000.
- 30. Purchased equipment for \$30 000 cash.
- 31. Bought a motor vehicle from J.B Motors for \$50 000 on account.

## Required: -

- (a) Enter the following transactions in the books of prime entry
- (b) Post to the following ledgers:
  - i. General ledger
  - ii. Sales ledger
- iii. Purchases ledger and
- (c) Extract a trial balance.
- (d) Prepare the financial statements

Receivables are determined by adding all customers in the Sales Ledger with outstanding balances (i.e. those with balance brought down). And in this example total receivables is equal to \$7 000 of S. Ndlovu as there were no outstanding balances for W. Chivengere and M. Zakeo. The same procedure is used in determining payable figure in this example is equal to \$16 000 of S. Mudzingwa.

# **CHAPTER 2**

# ADJUSTMENTS TO FINANCIAL STATEMENTS

# 2.1 Chapter objectives

## After studying this chapter the student should be able to:

- 1. Explain why adjustments to final accounts are necessary
- 2. Explain and effect the treatment of accrued and prepaid expenditure at year end.
- 3. Explain and effect the treatment of accrued and prepaid income at year end
- 4. Make adjustments for expense stock and differentiate between stock in hand, prepaid expense stock and accrued expense stock, in the same account.
- 5. Explain the prudence concept and matching concept as well as the materiality concept with regards to year- end adjustments made on final accounts.
- 6. Distinguish between bad debts and provision for bad and doubtful debts.
- 7. Prepare the bad debts and Provision for credit loses accounts.
- 8. Prepare the provision for discount allowable account.
- 10 Show the amounts to be charged in the profit and loss account for bad debts, Provision for credit loses and provision for discounts allowable.
- 9. Describe the term consignment inventory and show how it is recorded in the financial statements.
- 11 Draw up the Statement of comprehensive income and Statement of Financial Position having been adjusted for Accruals and Prepayments, Provision for credit loses, Capital and Revenue Expenditure, Goods on sale or return basis, Goods for resale lost or destroyed by fire and Provision for depreciation.

#### 2.2 Introduction

The objective of preparing year-end financial statements is to measure as accurately as possible the results of trading, i.e. if the organisation has traded at a profit or loss in the period in question and also fairly in doing that the Accounting principles present the entity's standing financial position as objectively as possible. This justifies the need to apply the matching concept in the preparation of financial statements by ensuring that expenses and incomes are matched to the financial period to which they pertain. Furthermore prudence is exercised by ensuring that assets and profits are not overstated, by anticipating losses pertaining to the financial period. In addition only material adjustments need to be made e.g. If a box of office pins has remained in stock at the end of financial period, whose value is, say \$0,50. It is not material enough to warrant adjustments being made to the accounts.

## 2.3 Accrued Expenses

These are expenses pertaining to the financial period in question which ought to have been paid for by the end of the financial period but were not paid. They are also known as expenses owing as they are not paid by year end. The matching/ accruals concept demands that expenses pertaining to a financial period are accounted for in that period regardless of actual payments made, therefore the total expense for the period is recorded in the final statements by debiting the Statement of comprehensive income with the total expense and recording the amount outstanding in the statement of financial position (Statement of Financial Position) as a liability which could either be short-term (current liability) or long-term liability.

#### Example 1

Ngezi Distributors is in the process of constructing its own trading premises but has in the meantime rented premises from AB Ltd at a quarterly rental of \$3 600. The rent payment schedule for the year ended 31 December 2011 is as follows:

| Amount paid | <u>Date</u>    |
|-------------|----------------|
| \$3 600     | 1 January 2011 |
| \$3 600     | 1 May 2011     |
| \$3 600     | 1 Nov 2011     |

#### Required

Prepare the rent payable account as at 31 December 2011.

| Rent Payable a/c |           |               |        |           |               |  |
|------------------|-----------|---------------|--------|-----------|---------------|--|
| 2011             |           | \$            | 2011   | \$        |               |  |
| Jan 1            | Bank      | 3 600         | Dec 31 | SCI       | 14 400        |  |
| May 1            | Bank      | 3 600         |        |           |               |  |
| Nov 1            | Bank      | 3 600         |        |           |               |  |
| Dec 31           | Owing c/d | 3 600         |        |           |               |  |
|                  |           | <u>14 400</u> |        |           | <u>14 400</u> |  |
|                  |           |               | 2012   |           |               |  |
|                  |           |               | Jan 1  | Owing b/d | 3 600         |  |
|                  |           |               |        |           |               |  |

#### Note:

- 1) A year has 4 quarters and only 3 quarterly payments were made, meaning there is one quarter which was not paid for. Alternatively, you could calculate rent payable per month by  $(3\ 600:-3) = \$1\ 200/month$ , taking into account that a quarter of a year is 3 months long. Multiply  $\$1\ 200\ x\ 12$  months in the year to get the charge to the profit and loss  $a/c = \$14\ 400$ , then deduct total payments made in the year to establish amount outstanding by  $[4\ 400-(3\ 600\ x\ 3)] = \$3\ 600$ .
- 2) In the Statement of comprehensive income (Profit and Loss a/c the full amount for rent payable is recorded i.e. \$14 400, and the amount outstanding is treated as a current liability \$3 600, in the Statement of financial Position (Statement of Financial Position)

#### Exercise 1

The following information pertains to the motor insurance a/c for the year ended 31 December 2011. The insurance premium is \$450 per month, paid once at a time for 4 months at the beginning of the insured period in question.

| Amount paid | <u>Date</u>     |
|-------------|-----------------|
| \$1 800     | 1 October 2010  |
| \$1 800     | 1 February 2011 |
| \$1 800     | 3 June 2011     |

Due to a breakdown in communication, no further payments were made for the year.

#### Required

Prepare the Motor Insurance a/c for the year ended 31 December 2011.

#### **Prepaid Expenses**

These are expenses paid for in the current financial period but pertain to the next financial period. In other words, they are expense payments made in advance. In line with the matching concept, prepaid expenses are deducted from the total amount paid so that only the amount paid and due in the current period is recorded in the Statement of comprehensive income. The prepaid portion is then recorded in the Statement of financial position (Statement of Financial Position) as a current asset.

### Example 2

Using data in Example 1, suppose that Ngezi Distributors has finished the construction of its own premises and moves into them on 31 May 2011, ceasing to rent AB's premises on that date, prepare the rent payable a/c, assuming books will be closed on that date.

#### Rent payable a/c 2011 \$ 2011 \$ 3 600 6 000 Jan 1 Bank May 31 **SCI** May 1 Bank 3 600 Prepaid c/d 1 200 <u>7 200</u> 7 200 June 1 Prepaid b/d 1 200

#### Note:

- 1) Only the charge pertaining to the period in question is recorded in the (profit and loss) a/c. Statement of comprehensive income, that being 1200/m onth x 5 m on the 6000
- 2) Seeing that a total of  $\$3\ 600\ x\ 2=\$7\ 200\ had$  been paid, the difference  $\$7\ 200-\$6\ 000$  is a prepayment which is recorded as a current asset in the statement of financial position.

#### Exercise 2

In addition to the data supplied in Exercise 1, assume that a further payment of \$1 800 was made on 1 October 2011, prepare the Insurance account for the year ended 31 December 2011.

#### Prepaid and accrued income at the end of a financial period.

Income accounts may need to be adjusted in a similar manner as outlined above in the case of expense accounts, bearing in mind that when drafting ledger accounts, what is debited in an expense a/c will be credited in an income account and what is credited in an expense account will be debited in an income account.

#### Example 3

The premises constructed by Ngezi distributors are quite large and management decides to sub-let part of the premises to A. Another, at a monthly rental of \$300 with effect from 1 July 2011. The following receipts are made available as at 31 December 2011.

| Amount received | <u>Date</u>      |
|-----------------|------------------|
| \$600           | 15 July 2011     |
| \$300           | 3 September 2011 |
| \$600           | 1 November 2011  |

Prepare the rent receivable account for 31 December 2011

| Rent Receivable a/c |           |              |        |           |              |  |
|---------------------|-----------|--------------|--------|-----------|--------------|--|
|                     |           | \$           |        |           | \$           |  |
| Dec 31              | SCI       | 1 800        | July 1 | Bank      | 600          |  |
|                     |           |              | Sept 3 | Bank      | 300          |  |
|                     |           |              | Nov 1  | Bank      | 600          |  |
|                     |           |              | Dec 31 | Owing c/d | 300          |  |
|                     |           | <u>1 800</u> |        |           | <u>1 800</u> |  |
| Jan 1               | Owing b/d | 300          |        |           |              |  |
|                     |           | ı            |        |           |              |  |

#### Note:

- 1) There are 6 months from 1 July to 31 December and rent due per month is \$300, therefore the total rent receivable from A. Another by year end is  $$300 \times 6 = $1800$
- 2) Total rentals received in the period are (600 + 300 + 600) = \$1500, meaning \$300 is outstanding by year end.
- 3) In the Statement of comprehensive income, total rent due of \$1 800 is credited (i.e. added) to gross profit and the amount outstanding of \$300, is recorded in the statement of financial position under current assets as a debtor balance.

# Example 4

Trade alert sells advertising space on commission on behalf of various traders and the following data is available for the year ended 31 Dec 2011.

| <b>Commission Re</b> | eceivable due | Commission re | <b>Commission received</b> |  |  |
|----------------------|---------------|---------------|----------------------------|--|--|
| 28 February          | \$600         | 28 February   | \$500                      |  |  |
| 31 May               | \$900         | 1 June        | \$750                      |  |  |
| 31 June              | \$400         | 30 June       | \$500                      |  |  |
| 31 August            | \$800         | 31 Aug        | \$950                      |  |  |
| 31 December          | \$920         | 31 Dec        | \$950                      |  |  |

Prepare the Commission Receivable a/c for the six months ending 30 June 2011

## Commission Receivable a/c

|                           |             |       | Jan 1   | Prepaid b/d | 30         |  |

# Notes for Example 4 and 5

- 1) What is debited in the Commission Receivable a/c that is Profit and loss figure is the total commission due in the period in question. For example 4, it is derived for the six month period as  $(600 + 900 + 400) = $1\ 900$  and for example 5, it is derived as  $(600 = 900 + 400 + 800 + 920) = $3\ 620$ .
- 2) The balancing figure is either a prepayment or an accrual and you can figure this out by comparing the actual amount due to be received with what was actually received. If more was received than was required to be received in the period it is a prepayment, and if we received less than what ought to have been received in the period, it is an accrual.

## Example 6, a comprehensive example

The following balances were extracted from the books of Anthony Able at 30 June 2010. His financial year end.

|                       | DR        | Cr        |
|-----------------------|-----------|-----------|
|                       | <u>\$</u> | <u>\$</u> |
| Rates                 | 720       |           |
| Rent receivable       | 130       |           |
| Insurance             |           | 48        |
| Commission receivable |           | 127       |

The following payments were handled in the year ending 30 June 2011.

|                       | <u>DR</u> | <u>Cr</u> |
|-----------------------|-----------|-----------|
|                       | <u>\$</u> | <u>\$</u> |
| Rates                 | 1 650     |           |
| Insurance             | 1 020     |           |
| Rent receivable       |           | 2 110     |
| Commission receivable |           | 989       |

At 30 June 2011, the following was established

- i) Rates of \$220 were outstanding
- ii) Insurance of \$80 was paid for the period covering 1 July 2011 to 31 July 2011.
- iii) Tenants had paid \$75 as towards rental payments for the year July 2011- June 2012.
- iv) Commission worth \$150 is due.
- A. Prepare the following ledger accounts
- a) Rates a/c
- b) Insurance a/c
- c) Rent Receivable a/c
- d) Commission Receivable a/c
- B. Show the following extracts

# 2.4 Adjustments for expense stock

Expense stock refers to various tangible items of stocks or assets used in the day-to-day running of the business, such as stationary for use in the office fuel for the vehicles, packing materials etc. Essentially, when these things are bought they are an expense which ensure the effective and efficient day- to- day running of an entity, but if they happen to be in stock at the end of a given financial period, they are not really treated as an expense per as they exist and are tangible, but as assets classified as expense stock. If such stock were acquired on credit and there is an amount outstanding to a creditor, such amount will be shown in the relevant account as an accrual c/d. Conversely if prepayments were made, they will also appear in the account, such that the account will show at the end of a given period the amount prepaid or accrued as well as the balance of stock in hand.

Expense stock is not the same as trading inventory as it is not meant for resale but for the ordinary day-to-day operations of the business to ensure the smooth and efficient operation of the entity.

#### Example 7

The following details are given

- i) Jan 2009, stationary stock in hand amounted to \$1 345, and \$375 has been prepaid for stationery
- ii) During the year to 31 December 2009, stationery was purchased as follows
- \$6 300 by cheque
- \$850 on credit and has not yet been paid for by 31 December 2009
- iii) Stationery stock in hand is valued at \$668

#### Required

- a) Prepare the stationery account as at 31 December 2009
- b) Draft the Statement of comprehensive income (extract)
- c) Draft the statement of financial position (extract).

## Exercise 3

Ngundu's books show the following data in the year ended 30 September 2008.

1 October 2007

Rent in arrears \$200

Rates in advance \$55

The following payments were made during the period ended 30 September 2008.

| Date           | Payment details | Amount  |
|----------------|-----------------|---------|
| 1 October 2007 | Rent            | \$200   |
| 31 Dec 2007    | Rates           | \$95    |
| 1 Jan 2008     | Rates           | \$1 000 |
| 31 Jan 2008    | Rates           | \$150   |
| 1 June 2008    | Rates           | \$195   |
| 1 June 2008    | Rent            | \$1 400 |
| 1 August 2008  | Rent            | \$600   |

## **Notes**

- i) Monthly rent has remained at a rate of \$200 month for the last two years
- ii) Quarterly rates is a fixed charge which increased from \$150 to \$195 per quarter on the 1<sup>st</sup> of April 2008
- iii) All payments are made through the business bank account

## Required

- a) Prepare a combined Rent and Rates a/c for the year ended 30 September 2008.
- b) State how much should be charged to the Profit and Loss Account ( Statement of comprehensive income) for rent and rates separately.
- c) Prepare a Statement of financial Position (extract) to show the treatment of balances remaining in the account.

## Exercise 4

Mary- Anne has been carrying on her sole trader's business on premises she rents from Akim since 1 January 2009. She also sublets part of the premises to Joane a friend. The data is available.

| Rent Paid by Mary Anne | Rent paid to Mary-Anne   |
|------------------------|--|
| \$120 for two months   | \$100 for 5 months   |
| Ended 28 February      | ended 31 May   |
| \$240 for the 4 months | \$180 for the 6 months ended 30 Nov  |
| Ended 30 June          |  |
| \$525 for the 7 months |  |
| Ended 31 Jan 2010.     |  |
|                        | \$120 for two months  Ended 28 February  \$240 for the 4 months  Ended 30 June  \$525 for the 7 months |

#### Regired

- a) Prepare- Mary- Anne's i) Rent Payable a/c
  - ii) Rent Receivable a/c
- b) Show the amounts to be reported in the statement of Financial Position under the appropriate headings.

#### Exercise 5

Uniflex is a franchise which orders various type of goods from different manufacturers in bulk and packages in its own brand name. The following details pertaining to the Packaging materials account are available.

- i) Stock of materials as at 1 April 2010- \$340
- ii) \$5475 worth of packaging materials were purchased during the year ended 31 March 2011. Of this amount \$475 had not been paid for by 31 March 2011.
- iii) Closing inventories of packing materials was valued at \$280.

#### Required

Prepare the Packing materials account.

#### **Summary**

- 1. Remember that accounting is a language used to communicate business information. The communication needs to be absolute, complete and clear, thus when preparing ledger accounts dates must be recorded accurately; they are of utmost importance.
- 2. Adjustments need to be made so as to determine the actual expense/income in the financial period in order to measure true profit and establish the financial position of the entity.
- 3. It is mandatory for adjustments to be made line with the prudence and matching concept. In sodoing, materiality of what is reported should be considered
- 4. A good understanding of the concepts discussed in this chapter will go a long way in the mastery of the subject in general.

### **Suggested Solutions**

# 2.5 Bad debts and provisions

# Distinguish between bad and doubtful debts.

Any bad debts written off represent debts which the business is reasonably certain they cannot be recovered. However, there may also be debts outstanding at the year-end which are uncertain of recovery but which cannot be categorized as bad debts at the year end. There are categorized as doubtful debts.

Thus, the distinction lies in the degree of certainty which exists concerning non-payment.

#### Outline the double entry required to account for bad debts.

Bad debts arising in the period in which the associated revenue was recognized

Dr - Bad debts a/c

Cr - Individual debtor a/c

At the end of the financial period the balance on the bad debts a/c will be transferred to the profit and loss a/c

Dr - Profit & loss a/c

Cr - Bad debts a/c

Bad debts arising in a period subsequent to that in which the associated revenue was recognized

Dr - Provision for credit loses a/c

Cr - Debtors' a/c

#### Outline the double entry required to account for bad debts recovered.

The accounting entries will be

Dr - Cash/ bank a/c

Cr - Bad debts recovered a/c with the amount recovered.

At the end of the accounting period the balance on the bad debts recovered a/c will be transferred to the profit & loss a/c. Hence, the accounting entries will be:

Dr - Bad debts recovered a/c

Cr - SCIa/c with the total amount recovered during the period.

# Example 1

The following details were extracted from the books of A. White on 31 December 2004.

\$

Debtors – before any adjustments for bad debts 90 000

Provision for credit loses 8 400

Amount of bad debts 2 400

It is White's policy to make a Provision for credit loses of 10% on debtors at the year end and a provision for discounts allowable of 5% on debtors at the year end.

# **Prepare**

- (a) The Provision for credit loses account.
- (b) The provision for discount allowable account.
- (c) Show the amounts to be charged in the profit and loss account for bad debts, Provision for credit loses and provision for discounts allowable.

# **ANSWER:**

| (i)                | Provision for | Provision for credit loses a/c |              |  |

Bad debts written off 2 400

Provision for discounts allowance (W2) 3 942

# Workings:

Debtors

1. Increase in Provision for credit loses

|    | Bad debts   | 2 400  |
|----|---|--------|
|    |   | 87 600 |
|    | Provision @ 10% of 87 600                           | 8 760  |
|    | Less opening balance                                | 8 400  |
|    | Change for the year                                 | 360    |
| 2. | Provision for discount allowable for bad debts      | 87 600 |
|    | Less Provision for credit loses                     | 8 760  |
|    |   | 78 840 |
|    | Provision for discount = 5% x 78 840 = <b>3 942</b> |        |

Page 40

#### Example 2

The following is a comprehensive example covering all the aspects discussed earlier

C. Chiwara set up in business on January 1999 as a building contractor at the end of the his first year of trading, 31 December 1999 the amounts owing to him from customers totaled \$18 350, after some consideration, he decided that of these debts a total of \$350 was unlikely to be recovered and should be written off as bad. The figure of receivables also includes amounts of \$250 owed by C. Moyo. \$550 owed by E. Nkiwane and \$200 owed by N. Nyathi of which are regarded as doubtful debts.

He also instructed his accountant to make a general provision of 5% of the remaining receivables. During the year ending 31 December 2000 C. Moyo was declared to bankrupt and his trustee paid the Payable 60 cents in a dollar. N. Nyathi paid his debt in full. On 31 December 2000 his Receivables totaled \$40 500. This figure is after recording all money received but does not take into account an amount of \$500 owed by F. Chino which considered irrecoverable. He decided to maintain a Provisition for credit loses at 5% of receivables.

During the year ending 31 December 2001 an amount \$350 was received in respect of bad debts written off in 1999. At 31 December 2001, his receivables totaled \$25 000 after recording all cash received except for a cheque of \$350 that was received on 31 December 2001. He decided to make a general provision of 5% of the receivables after writing off a debt of \$900 owed by J. Millo and a provision for discount allowed of 2%.

#### **REQUIRED:**

Show the ledger entries in respect of the above transaction and relevant Statement of Financial Position extract for each of the years.

# 2.6 Goods on Sale or Return Basis or Consignment Inventory

These are goods sent for approval. They should not be treated as sales until accepted by the customers. Goods on sale or return can be to our customers or from suppliers. Care should be taken when determining the value of closing inventory. The correct treatment is that goods sent on sale or return to customers should be included in closing inventory because goods on sale or return basis are not treated as sales. If a question states that they have been treated as sales after the trial balance has been prepared we should correct it by **Debiting the Sales Account** and **Crediting the Debtors Account** with the **Selling Price** of the goods and the Closing inventory should be adjusted to include those goods at **Cost Price**.

Goods on sale or return basis from suppliers should be excluded because they are part of the supplier's inventory. If a question states that they have been treated as purchases we should correct it by **Debiting Creditors** and **Crediting Purchases** with the cost price of the goods and closing inventory should be adjusted to exclude those goods if included in our closing inventory.

#### Example 3

The following information was taken from the books of Edith for the month of January 2000:

- a) Sales amounted to \$40 000.
- b) Opening and closing inventories balances were \$3 000 and \$5 000 respectively for the month of January 2002.
- c) Inventories amounting to \$4 000 were sent to a customer as a sample. The goods are included in the above sales figure and debtors ledger despite the fact that the customer did not show some intention to buy the goods.
- d) 25% was added to the cost price to arrive at the selling price of these goods.
- e) Purchases of goods amounted to \$21 000.
- f) Debtors on 31 January 2000 amounted to \$25 000.

You are required to prepare Edith's Statement of comprehensive account for the month ending 31 January 2000.

# Solution

| Sales                          |              |               | 40 000        |
|--------------------------------|--------------|---------------|---------------|
| Less goods sent as a sample    |              |               | 4 000         |
|                                |              |               | 36 000        |
| <u>less</u> cost of sales      |              |               |               |
| Opening inventory              |              | 3 000         |               |
| Add purchases                  |              | <u>21 000</u> |               |
|                                |              | 24 000        |               |
| less closing inventory         |              | 5 000         |               |
| Add inventory sent as a sample | <u>3 200</u> | 8 200         | <u>15 800</u> |
| Gross profit                   |              |               | 20 200        |

# **Notes**

- a) Goods sent to customers as a sample should be subtracted from both sales revenue and the total of debtors by debiting the sales account and then crediting the debtors account. The same goods should be converted back to their cost price using either mark up or margin and then add it back to inventory by debiting (increasing) inventory and crediting (reducing) the cost of sales. In this case debtors figure should be reduced by \$4 000 whilst the closing inventory is increased by \$3 200.
- b) Goods taken for personal use should be debited to a drawings account and credited to the cost of sales or purchases account.

# Example 4

The following accounts were taken from the books of J. Zimuto for the financial year ended 31 December 1999.

|                     | DR            | CR      |
|---------------------|---------------|---------|
|                     | \$            | \$      |
| Sales               |               | 309 000 |
| Land                | 96 100        |         |
| Rent received       |               | 8 200   |
| Stationery          | 2 000         |         |
| Discount allowed    | 900           |         |
| Discount received   |               | 1 200   |
| Debtors             | 47 500        |         |
| Creditors           |               | 36 900  |
| Carriage inwards    | 1 700         |         |
| Bank                |               | 21 100  |
| Cash on hand        | 540           |         |
| Rent paid           | 11 200        |         |
| Electricity & water | 14 300        |         |
| Drawings            | 15800         |         |
| Capital             |               | 50 540  |
| Purchases           | 176 400       |         |
| Opening inventory   | 24 400        |         |
| Wages               | <u>36 100</u> |         |
|                     | 426 940       | 426 940 |

# The following additional information is available as at 31 December 1999.

- a) Inventory on 31 December 1999 was valued at 36300.
- b) Rent received in advance amounted to \$1200
- c) Unused stationery \$ 700
- d) Goods sent to customers that were on sale or return basis for \$16 000 were treated as sales. The cost price of the goods was \$12 800
- e) Included in electricity & water is an amount of \$4 300 relating to Zimuto's private residence.
- f) Wages owing \$1 100

# Required

- a) Prepare a Statement of comprehensive income for the year ended 31 December 1999.
- b) Prepare a Statement of Financial Position as at 31 December 1999.

# 2.7 Accounting standards

Standards are practical accounting guidelines to be observed by accountants when preparing financial statements. The main objective of accounting standards is to enhance the usefulness of the financial information for economic decision-making process by requiring appropriate disclosures and by reducing a variety of alternative treatments. In situations where accounting fails to observe the applicable standards in such accounts and where material, a note to the effect of the departure should be disclosed in the accounts.

It is important for financial accountants to prepare financial statements in accordance with the relevant and applicable Generally Accepted Accounting Practice. In Zimbabwe, it is recommended to prepare financial statements in accordance with the International Financial Reporting Standards (IFRS). These standards are issued by the International Accounting Standard Board (IASB), which is based in London. The IASB began

operations in 2001. It is committed to developing, in the public interest, a set of single high quality, global accounting standards that that requires transparent and comparable information in general purpose financial statements.

IASB publishes its Standards in a series of pronouncements called International Financial Reporting Standards (IFRS). Upon its inception, the IASB adopted the body of International Accounting Standards issued by its predecessor, the Board of the International Accounting Standard Committee (IASC). The term IFRSs includes IFRSs issued by the IASB and the IASs issued by the predecessor, the IASC. As at 1 January 2007, the IASB had issued 8 IFRSs, in addition to those adopted from the IASC.

IFRSs are developed through an international due process that involves accountants, financial analysts, and other users of financial statements, the business community, inventory exchange regulators, and legal authorities, academics, and other interested individuals and organizations from around the world. The IASB corporate with national accounting standard setters to achieve convergence in accounting standards around the world.

The IASB's objective is to require like transactions and events to be accounted for and reported in a like way and unlike transactions and events to be accounted for and reported differently both within an entity over time and among entities.

The following standards are however examined at this level of studies. The material in this book has been prepared in accordance with the latest IFRSs statements as published by the IASB

- IAS 1: Presentation of financial statements
- IAS 2: Inventories
- IAS 7: Statements of cash flow
- IAS 10: Events after a Statement of Financial Position date
- IAS 16: Property, plant and equipment
- IAS 33: Earnings per share

Each of the above IFRS standard is dealt with in the relevant section of this book, except for IAS 1 which is illustrated in this chapter. The information thereto is considered adequate. Students are therefore recommended to understand the fundamental principles entailed in each of the above standard.

# 2.8 IAS 1: Presentation of financial statements

This standard shall be applied to all general-purpose financial statements prepared and presented in accordance with the IFRSs.

The following businesses must prepare their accounts, in accordance with this standard and following the above layout:

- limited liability companies (Private & Public)
- partnerships
- sole traders
- non-profit making organizations
- private business corporations

**Statement of comprehensive** income can be prepared either by nature or function of the items shown thereto. The following is an illustration of both methods of preparation of financial statements. Statement

of comprehensive income classified by function provides more relevant information to users of financial statements. The choice between the two methods depends on many factors, which includes the following, among others

The closing balance from the statement of changes in equity is disclosed on the face of the Statement of Financial Position.

# 2.9 Accounting bases and Policies

Accounting policies are the specific accounting bases judged by business enterprise to be most appropriate to their circumstances and adopted by them for the purpose of preparing their final accounts. Accounting bases are methods developed for applying fundamental accounting concepts to financial transactions, e.g. method of depreciation i.e. straight-line method, reducing method & sum of digits methods etc. First In First Out (FIFO) etc. while policies are the best bases chosen by a business at the best in preparing its financial statements.

Example 5

The following is a trial balance of C. Mlambo as at 31 December 2001.

|                       | Debit   | Credit  |
|-----------------------|---------|---------|
| Capital               |         | 98 900  |
| Sales                 |         | 220 000 |
| Purchases             | 140 000 |         |
| Opening inventory     | 30 000  |         |
| Wages & Salaries      | 23 000  |         |
| Rent & Rates          | 9 100   |         |
| Machinery             | 40 000  |         |
| Stationery            | 3 200   |         |
| Debtors               | 20 000  |         |
| Creditors             |         | 26 000  |
| Commission receivable | 2       | 5 800   |
| Carriage outwards     | 13 200  |         |
| Bank                  | 20 000  |         |
| Light & Heat          | 32 000  |         |
| Drawings              | 20 200  |         |
| -                     | 350 700 | 350 700 |
|                       |         |         |

# **Additional Information**

On 31 December 2001 the following was discovered

- (a) Light and heat accruing amounted to \$800.
- (b) Inventory at 31 December 2001 was valued at \$31 600.
- (c) During the year Mr. Mlambo took goods cost \$1 500 from the business for his own use.
- (d) Rent & Rates prepaid \$900.
- (e) Commission receivable due but not paid \$1 000.

# You are required to:-

- a) Prepare Statement of comprehensive income for C Mlambo for the year ended 31 December 2001 and
- b) Prepare a Statement of Financial Position as at that date.

# **Solution**

Statement of comprehensive income for C. Mlambo for the year ended 31 December 2001.

|                                    | \$             | \$             |
|------------------------------------|----------------|----------------|
| Sales                              |                | 220 000        |
| <u>Less Cost of sales</u>          |                |                |
| Opening inventory                  | 30 000         |                |
| Add Purchases                      | <u>140 000</u> |                |
|                                    | 170 000        |                |
| Less drawings in goods             | <u>1 500</u>   |                |
|                                    | 168 500        |                |
| Less closing inventory             | <u>31 600</u>  | <u>136 900</u> |

# Statement of changes in equity for the period ending 31 December 2001

|                                | <u>Capital</u> |
|--------------------------------|----------------|
| Balance at 1 January 2001      | 98 900         |
| Add net profit                 | 9 500          |
|                                | 108 400        |
| Less drawings (20 200 + 1 500) | (21 700)       |
| Balance at 31 December 2001    | 86 700         |

Please note that an alternative, the ledger accounts explained above can be prepared as workings for amounts accrued or prepaid.

# 2.10 Examination type questions

# 2.11 Multiple choice questions

- 1. An accounting period is
  - A. An twelve month period
  - B. Any period for which an entity chooses to prepare its accounts.
  - C. A calendar year
  - D. The duration in which the business has been trading.
- 2. A company's financial year ends on 31 December. At 31 December Year 1, the company carried forward a debit balance of \$18 100 on the Rent account. During year 2 payments made for 12 months' rent, to 31 March year 3 were \$78 600.

What is the amount of rent to be charged against profit in the year ended 31 December year 2?

- A. \$60 500
- B. \$96 700
- C. \$80 100
- D. \$77 050
- 3. B Ltd rents its building to C Ltd owed \$4 500 for rent, but at 31 December 2002 had paid \$3 200 in advance. During the year B Ltd had received \$17 100 in rental from Y Ltd. What is the rental income to be shown in B Ltd's Profit and Less Account for the year ended 31 December 2002?
  - A. \$18 400
  - B. \$24 800
  - C. \$9 400
  - D. \$15 800
- 4. Which item is revenue expenditure?
  - A. Cost of painting new office premises during construction
  - B. Cost of repairs to factory plant and machinery
  - C. Legal fees for the purchase of new factory premises
  - D. Wages of a company's own workmen for building an office extension.
- 5. Which item should be treated as capital expenditure?
  - A. Cost of carriage on the purchase assets
  - B. Cost of replacement of part of a property, plant and equipment
  - C. Depreciation of a property, plant and equipment
  - D. Repairs to a property, plant and equipment
- 6. The rationale for making a provision in respect of doubtful debts is that the provision...
  - A. Is an estimate of future debts.
  - B. Records the expense of bad debts as they are incurred.
  - C. Matches the estimated cost of future bad debts against the revenue earned in giving rise to the potential bad debts.
  - D. Records bad debts without taking them out of the 'books' of an entity; thus showing the full amount owed by debtors as a current asset.
- 7. A company does not include the value of skills gained by its employees from training programmes in its financial statements. Which accounting principle is being applied?
  - A. Consistency
  - B. Materiality
  - C. Money measurement
  - D. Substance over farm

- 8. What does a credit balance on an expense account represent
  - A. A debtor for expenses owing
  - B. An overdrawn expense account
  - C. A prepaid amount paid for the expense
  - D. An accrued amount owing for the expense
- 9. A Statement of Financial Position is
  - A. A ledger account proving that the accounting records 'balance'
  - B. A Statement showing the market value of a business.
  - C. A listing in a special format, of the balances brought down remaining in the double entry accounts after the profit and loss account has been prepared.
  - D. A statement showing the market value of assets and liabilities.
- 10. "Payments and accruals have to be adjusted for in the preparation of final accounts."

On what accounting convention is this statement based.

- A. Going concern
- B. Matching
- C. Prudence
- D. Consistency
- 11. Expenditure on a mining plant during a year has included the following.

\$

| Insurance costs                               | 24 000  |
|---|---------|
| New engine – plant will increase productivity | 220 000 |
| Installation cost of new engine               | 3 000   |
| Cleaning costs                                | 72 000  |

How much of this expenditure should be treated as capital expenditure?

- A. None
- B. \$223 000
- C. \$247 000
- D. \$319 000
- 12. Executive Link (Pvt) Ltd, whose financial year ended on 30 September 2006, sent goods costing \$12 000 to A. Smith on a sale or return basis. None of these goods were sold by A. Smith until late October 2006. However, in preparing the draft accounts for the year ended 30 September 2006, closing inventory was recorded as \$124 000 after having made the assumption that the goods sent to A. Smith had been sold. The company obtains a gross profit of 25% on all sales. What is the correct amount of closing inventory to be recorded in the books of the company

- A. \$112 000
- B. \$124 000
- C. \$136 000
- D. \$140 000
- 13. The inventory at 31 March 2007 in the books of Alice Apple includes goods received in February 2007 from Betty Bee Ltd on a sale or rerun basis. These goods, which remained unsold at 31 March 2007 had been recorded as purchased from Betty Bee Ltd at the pro- forma invoice price of \$3 000. The adjusting entries necessary to amend the closing figure are:
  - A. \$Debit inventory \$3 000 and credit trade creditors with \$3 000
  - B. \$ Credit inventory \$3 000, and debit trade creditors \$3 000
  - C. \$Debit inventory \$6 000, credit trade creditors \$3 000
  - D. \$ Credit inventory \$3 000, Debit trade creditors \$6 000

# 2.12 Structured questions

# **Question 1**

What do you understand by each of the following accounting concepts and how they are applied in the preparation of Financial Statements?

- A. Prudence
- B. Accrual
- C. Going concern
- D. Consistency
- E. Entity

#### **Question 2**

The following trial balance was extracted from the books of J. Banda for the year ended 30 June 2003

|                       | Dr      | Cr      |
|-----------------------|---------|---------|
|                       | \$      | \$      |
| Capital               |         | 500 000 |
| Purchase and sales    | 156 000 | 354 000 |
| Rent                  | 35 000  |         |
| Discount allowed      | 12 000  |         |
| Discount received     |         | 3 500   |
| Sales returns         | 14 000  |         |
| Carriage inwards      | 23 000  |         |
| Motor vehicles        | 100 000 |         |
| Computers             | 80 000  |         |
| Machinery             | 375 000 |         |
| Debtors and creditors | 56 000  | 45 000  |
| Salaries and wages    | 50 000  |         |
| Inventory             | 16 000  |         |
| Sundry expenses       | 1 500   |         |
| Carriage outwards     | 6 000   |         |
| General repairs       | 12 000  |         |
| Bank overdraft        |         | 23 000  |
| Cash                  | 14 000  |         |

| Drawings | 15 000  |         |
|----------|---------|---------|
| Loan     |         | 40 000  |
|          | 965 500 | 965 500 |

#### Additional information

- (a) Inventory on 30 June 2003 was valued at \$26 500.
- (b) The following balances were available on 1 July 2002

Rent (Dr) \$1 200

Rent (Cr.) \$ 800 Sundry \$1 000

- (c) \$2 000 of the general repairs balance relate to an amount that was paid as the cost of installing the computers.
- (d) Salaries and wages of \$4 000 relate to managers' salary for July 2003, which was paid in advance at the year-end.

# You are required to:

- (a) Prepare a Statement of comprehensive income for the year ended 30 June 2003 and
- (b) A Statement of Financial Position as at that date.

#### **Question 3**

Benjamin Blue commenced business on 1 January 2004 and prepares his financial statements to 31 December every year. For the year ended 31 December 2004, bad debts written off amounted to \$28 000. It was found necessary to create a Provisition for credit loses of \$4 800. Debtors on that date stood at \$182 000 after the adjustments for bad debts written had been made.

In 2005, debts amounting to \$24 000 proved to be bad and were written off. In addition, a report was received that S. Phiri, a debtor who owed \$5 300 has been declared insolvent and can only pay \$0.30 every dollar he owes. In addition, the provision – for doubtful debts was to be increased to 5% of remaining debtors. Furthermore, Benjamin decided to create a provision for discounts allowable of \$1 400 on debts which could be settled within one month. Total debts, before any adjustments were made in the year ended 31 December 2005 stood at 4202 500.

In 2006 a debtor J. White, whose debt of \$1 200 was written off as bad in December 2005, settled his account in full on 30 November 2006 recoveries of \$780 was made in respect of debts written off in 2004. As at 31 December 2006, bad debts written off totaled \$7 250 but no adjustments have yet been made to the accounts. Total debtors for the year were \$225 000 and a reduction in Provisition for credit loses of \$2 450 was considered reasonable. The provision for discounts was to be adjusted to 2% of debts less than 30 days of totaling \$32 000. Furthermore a specific Provisition for credit loses of \$3 100 was to be incorporated into the accounts for a debtor who had left the country.

# **REQUIRED:**

#### **Prepare**

- a) The bad debts account
- b) Provision for credit loses account
- c) Provision for discount allowable a/c
- d) S. Phiri's account
- e) Bad debts recovered a/c
- f) Profit and loss account extracts for the years 2004, 2005 and 2006.

Statement of Financial Position extracts for the years 2004, 2005 and 2006.

# **Question 4**

The following trial balance was extracted from the books of L. Nixon at 28 February 2007.

|   | \$             | \$      |
|---|----------------|---------|
| Capital account 1 March 2006                      |                | 60 720  |
| Freehold premises at cost                         | 40 000         |         |
| Fixtures and fittings at cost                     | 9 000          |         |
| Provision for depreciation on fixtures & fittings |                | 900     |
| Inventory on 1 March 2006                         | 11 368         |         |
| Purchases and sales                               | 22 526         | 45 482  |
| Returns inwards and outwards                      | 382            | 246     |
| Debtors and creditors                             | 6 760          | 3 388   |
| Salaries  | 4 780          |         |
| Lighting and heating                              | 1 024          |         |
| Rent, rates and insurance                         | 3 240          |         |
| Bad debts   | 420            |         |
| Sundry expenses                                   | 408            |         |
| Discounts allowed and received                    | 720            | 560     |
| Cash at Bank                                      | 5 228          |         |
| Cash in hand                                      | 240            |         |
| Drawings  | <u>5 200</u>   |         |
|   | <u>111 368</u> | 111 368 |

#### **Additional Information:**

- 1. Inventory at 28 February 2007 \$9 344
- 2. Prepaid rates \$600
- 3. Rent accrued due \$800
- 4. L. Nixon sold some goods on behalf of a friend as earned a commission of \$3 000. No record of this transaction has been made in the books.
- 5. Freehold premises are to be depreciated at the rate of 5% per annum on cost.
- 6. Depreciation of 10% is to be charged on fixtures and fittings on their written value.
- 7. It has been discovered that debts amounting to \$600 e not recoverable.
- 8. Create a Provision for credit loses of \$360 and a provision for discount allowable of 2½ of remaining debtors.

# **REQUIRED:**

Prepare a Statement of comprehensive income for the year ended 28 February 2007 and a Statement of Financial Position at that date.

#### **Question 5**

The following trial balance relates of to the business of Joseph Benjamin as at 31 December 2003, extracted after his first year of trading.

|                    | Dr      | Cr      |
|--------------------|---------|---------|
|                    | \$      | \$      |
| Capital            |         | 127 600 |
| Drawings           | 5 000   |         |
| Sales              |         | 324 000 |
| Purchases          | 213 000 |         |
| Heating & lighting | 9 600   |         |
| Stationery         | 4 000   |         |
| Rent               | 15 000  |         |
| Motor vehicles     | 40 000  |         |
| Buildings          | 60 000  |         |
| Repairs            | 12 000  |         |
| Cash on hand       | 2 000   |         |
| Insurance          | 7 000   |         |
| Bicycle            | 84 000  |         |
|                    | 451 600 | 451 600 |
|                    |         |         |

# **Additional information**

- a) Inventory on hand was valued at \$13 000 on cost.
- b) During the year Benjamin's ware house was broken into and inventory worth \$10 000 was stolen. The insurance company agreed to pay \$9 000 as compensation for inventory loss. No entry has been made in the books of accounts.
- c) Mr. Benjamin bought a bicycle shown in the trial balance for his son's use.
- d) Included in the repairs is an amount of \$2 000 spent on the extension of the building.
- e) Non current assets are depreciated at the following rates using the straight line method:
  - i. Motor vehicle 20%
  - ii. Buildings 2%
  - iii. Furniture and Fittings 10 %

- f) Heating and lighting owing \$400
- g) Rent prepaid \$ 1000
- h) Mr. Joseph Benjamin brought an office desk valued at \$5000 on 31 May 2003 for office use no entry has been made in the books

# Required

- a) Prepare a Statement of comprehensive income for the year ended 31 December 2003
- b) Prepare a Statement of changes in equity
- c) Prepare a Statement of Financial Position as at that date

# **CHAPTER 3**

# **BANK RECONCILIATION**

# 3.1 Chapter objectives

After studying this chapter the student should be able to:

- 1. Explain why bank reconciliations are prepared.
- 2. Outline likely causes of differences between the bank statement and the cash book
- 3. Reconcile the cashbook balance with the bank statement balance
- 4. Update the cashbook and prepare a bank reconciliation statement

# 3.2 Introduction

When a business opens a bank account, the bank becomes the custodian of the company's funds and treats the account as a creditor. On the other hand, the money deposited in the bank is an asset to the business. The business keeps its own record of its bank account and so does the bank keep the same record. Often, however, the two balances i.e. the one shown on the bank statement and the one shown by the cash book, do not agree. This is not necessary because errors have been made by either party, but it's because of transactions that have not been reflected by either party e.g. Cheques written by the business which have not been presented to the bank for payments or bank charges which have not been communicated to the business so that the cash bank is updated. Their differences, therefore, often arise because of the timing, factor and rarely errors.

To reconcile means to bring to an agreement

The purpose of bank reconciliation is to explain the differences at a given date between the balance of the bank account as shown in the firm's cash book and the balance of the bank account as shown in the bank statement, and get the bank statement and cash book balances to agree.

# 3.3 Reasons why the bank balance shown by the bank statement and cash book do not agree.

- 1. Transactions made by the bank on behalf of the business have not been recorded in the firm's cash book namely.
  - i) Bank charges
  - ii) Interest on overdraft
  - iii) Standing orders, i.e. a regular amount paid through the bank on a regular basis, e.g. 24<sup>th</sup> of every month. This is an automatic deduction.
- (iv) Direct debits- a creditor is given permission by the account holder, e.g. rates electricity and any other bills, to obtain the money directly from the firm's bank account direct debits apply where the amount of money to be paid varies from time to time.
- Amounts received directly by the bank and have not been recorded in the firm's cash book e.g.
  when the firm received payments in the form of standing orders and direct debits, such as
  dividends received.
- 3. Cheques drawn by the firm in favour of its creditors which have been presented to the bank for payment. These are known as unpresented cheques
- 4. Cheques or cash paid into the bank by the business and recorded as such in the firm's cash book, but not yet entered on the bank statement

- 5. Charges levied by the bank which have not yet been entered in the cashbook, such as bank charges, bank service fees, interests charged on an overdrawn bank account.
- 6. Dishonoured cheques not yet entered in the cash book. In this case, the bank indicates a credit entry when a cheque is deposited and when it subsequently dishonored, the account is debited on the bank statement to cancel the cheque. The cash book therefore needs to be updated by making a credit entry showing the dishonoured cheque.
- 7. Sometimes an error is made by the bank on the bank statement and this rarely occurs but an examination question may be presented with this type of problem.

Whenever the bank balance as per the cash book and bank statement do not agree a bank reconciliation needs to be done. It is important to note, however, that the bank reconciliation is not part of double entry. Its function is to reassure owners of the business and auditors that the difference between the bank statement and cashbook is due to genuine reasons and is clearly verified.

# 3.4 Reconciling the cashbook with the bank statement

A detailed examination of the cashbook (bank columns) and the bank statement is necessary to identify each individual cause of a difference. The debit side of the bank column of the bank statement and the credit side of the bank column of the bank account (cash book) is compared with the debit column of the bank statement.

#### Step 1

When doing the above mentioned comparison, tick similar items in both the cash book and bank statements.

# Step 2

Update the cash book by entering any items remaining unticked in the bank statement. What is unticked on the debit column will be updated on the credit side of the cashbook and what remains unticked n the credit column on the credit column of the bank statement will be updated on the debit side of the cashbook.

#### Step 3

Once the cashbook has been updated, balance it

# Step 4

Prepare a bank reconciliation statement using items remaining unticked in the cash book. If you start with the balance as per updated cash book, add unpresented cheques, i.e. items unticked on the credit side of the cash book and deduct uncleared deposit, i.e. items remaining unticked on the debit side of the cash book, in order to arrive at the balance as per bank statement.

#### Note

When the bank erroneously debits firm's bank account, in practice when a query is raised it is confirmed with the bank manager and a correcting entry on the bank statement would be made to reverse the transaction. For the purpose of this syllabus, it will simply be recorded in bank reconciliation statement.

An extract of both the cash book and bank statement is not always provided n the examination particularly at this level. Often information indicating that the cashbook and bank balances do not agree will be given, and the question may not purely be on bank reconciliation but it may be incorporated in another question, say incomplete records.

#### Example

Billy Joseph's cash book showed a balance at the bank of \$1710 in hand on 30 August 2011. At the same date, his bank statement balance was \$1356, overdrawn.

The following discoveries were made.

- i) Cheques paid to creditors amounting to \$4665 on 29 August were not paid by the bank until 8 September
- ii) Cheques amounting to \$7 560 paid into the bank were not credited by the bank until 2 September
- iii) A standing order for rent payment of \$180 had been paid by the bank on 28 August but no entry had been made in the cash book.
- iv) A cheque paid by Billy Joseph for electricity \$45 had been entered in the cash book as \$54.

# Required

Update the cashbook and prepare a bank reconciliation Statement

#### Solution

| Up-dated cash book |                       |             |           |                 |              |
|--------------------|-----------------------|-------------|-----------|-----------------|--------------|
|                    |                       | \$          |           |                 | \$           |
| Aug 30             | Balance b/d           | 1710        | August 28 | Stop Order-rent | 180          |
|                    | Correct of error (iv) | 9           | 30        | Balance c/d     | <u>1 539</u> |
|                    |                       | <u>1719</u> |           |                 | <u>1 719</u> |
| Sept 1             | Balance b/d           | 1 539       |           |                 |              |

| <b>Bank Reconciliation Statement</b> | \$           |
|--------------------------------------|--------------|
| Balance as per updated cash book     | 1539         |
| Add unpresented cheques              | 4 665        |
|                                      | 6 204        |
| <u>Less</u> uncleared deposits       | <u>7 560</u> |
| Overdraft as per bank statement      | 1 356        |

#### 3.5 Exercises

Ntando Dube, a sole trader discovers that her bank statement balance and cashbook balance do not agree on 30 June. The cashbook balance is \$1 843 on that date and the bank statement shows an overdraft. Upon investigation, she ascertains the following.

i) The following cheques issued by Ntando have not yet been presented to the bank for payment.

| Cheques No. | 87 | \$328 |
|-------------|----|-------|
| Cheque No.  | 96 | \$403 |
| Cheque No.  | 97 | \$192 |

- ii) Cash and cheques amounting to \$3 650 had been entered in the cash book but not yet credited by the bank
- iii) A cheque for \$143 received from a debtor, has been returned by the bank marked R/D
- iv) Regina, debtor paid \$78 direct to Ntando's bank and this appears on the statement
- A cheque for \$200 drawn by Ntando for drawings has been correctly entered in the cash book but debited twice in the bank statement
- vi) A standing order of \$80 for business rates has not been entered in the cash book
- vii) Ntando received dividends form her investment of \$52 which were credited directly to the bank account. No centuries were made in the book.

# Required

- i) A statement showing the adjusted cash books balance
- ii) A bank reconciliation statement showing the overdraft appearing n the bank statement.

# Suggested Solution

| Updated Cash book  |              |                            |              |
|--------------------|--------------|----------------------------|--------------|
| Balance b/d        | 1843         | (iii) Dishonoured cheques  | 143          |
| Regina-debtor      | 78           | (v) Drawings duplicated    | 200          |
| vii) Dividends red | 52           | (vi) Standing Order- Rates | 80           |
|                    |              | Balance c/d                | <u>1 550</u> |
|                    | <u>1 973</u> |                            | <u>1 973</u> |
| Balance b/d        | 1 550        |                            |              |

#### **Bank Reconciliation Statement**

|                                 |    | \$         | \$          |
|---------------------------------|----|------------|-------------|
| Balance as per cash book        |    |            | 1 550       |
| Add unpresented cheque cheq no. | 87 | 328        |             |
|                                 | 96 | 403        |             |
|                                 | 97 | <u>192</u> | 923         |
|                                 |    |            | 2473        |
| Less uncleared deposits         |    |            | <u>3650</u> |
| Overdraft as per bank statement |    |            | <u>1177</u> |

#### **Correction of Errors**

The bank reconciliation statement can be used in the correction of errors. The nature and extend of such errors affect the bank entries, such as in the example below.

#### **Example:**

The summary of the bank column in the cash book of Chandipa Ltd for the year ending 30 June 2001 is as follows:

| Opening balance | 1654           |
|-----------------|----------------|
| Receipts        | <u>332 478</u> |
|                 | 334 132        |
| Payments        | <u>316 735</u> |
| Closing Balance | 17 397         |

Your investigation of the accounting records for this period reveals the following information.

- a) Cheques paid to suppliers of \$1 435 have not yet been presented at the bank, and cheques paid into the bank \$1 620 on 30 June 2001 have not yet been payable to the company's account.
- b) Standing orders entered in the bank statement have been omitted from the cash book in respect of lease payments on company car, 12 months at \$96 per month, and annual insurance of \$150.
- c) Bank Charges of \$452 shown in the bank statement have not been entered in the cash book.
- d) A cheque drawn for \$127 has been entered in the cash book as \$172, and a cash book page on the receipts side has been under added by \$200.
- e) A cheque for \$238 has been receivable to the company's bank account in error by the bank.
- f) The bank statement shows a favourable balance as at 30 June 2001 of \$15 465.

#### Required:-

Bank reconciliation statement as at 30 June 2001, together with a corrected cash book position.

# **Solution**

| Correct | ted ( | Cash | Book |  |
|---------|-------|------|------|--|
|         |       |      |      |  |

| Uncorrected balance b/d       | 17 397 | Standing order         |               |
|-------------------------------|--------|------------------------|---------------|
|                               |        | Lease Payments (12x96) | 1 152         |
| Overstated Cheque (172 – 127) | 45     | Insurance              | 150           |
| Undercast Total               | 200    | Bank Charges           | 452           |
|                               |        | Balance c/d            | <u>15 888</u> |
|                               | 17 642 |                        | 17 642        |
|                               |        |                        |               |

# **Chandipa Ltd Bank Reconciliation statement as at 30 June 2001**

| Balance as per bank statement             |      |             | 15 465 | CR |
|---|------|-------------|--------|----|
| Cheque receivable in error by bank        | 238  | <u>1858</u> |        |    |
| Less Deposits not yet cleared by the bank | 1620 |             |        |    |
|   |      |             | 17 323 |    |
| Add Unpresented cheques                   |      | 1435        |        |    |
| Balance as per corrected cash book        |      | 15 888      |        |    |

# 3.6 Examination type questions

# **CHAPTER 4**

# PROPERTY PLANT AND EQUIPMENT (IAS 16)

# 4.1 Chapter objectives

After studying this chapter the student should be able to:

By the end of this chapter you should be able to:

- 1. State the meaning of historical cost of assets as well as the depreciation of property, plant and equipment.
- 2. Explain the fundamental principles which are applied when depreciating property, plant and equipment.
- 3. To what extent, if at all, does proving depreciation ensure that a business can afford to replace its property, plant and equipment.
- 4. State what is meant by the terms, 'residual value' and 'useful life' of property, plant and equipment.
- 5. Describe the methods which are used in the depreciation of property, plant and equipment.
- 6. Draw up the journal entries to record the disposal of property, plant and equipment.
- 7. Prepare the following accounts as they would appear in the general ledger: property, plant and equipment account, its provision for depreciation and its disposal account
- 8. Describe the disclosure requirements for property, plant and equipment in the financial statements.

This standard superseded IAS 4.

# Acquisition cost / cost of an asset

Cost means historical cost, which includes the purchase price less trade discount and all directly attributable costs involved in bringing the asset into use. This includes non-recurring costs (capital expenditures) e.g. transport cost, railage cost/carriage inwards cost, import duty, site preparation cost Installation cost and professional fees like architects and engineers.

# 4.2 Depreciation

Which is the subject of this chapter is also covered

It defines it as the allocation of depreciable amount of property, plant and equipment over its useful life. Depreciable amount is equal to historic cost or revalued amount less scrap value (residual value). The depreciation charge allocated to a period should be recognised as an expense in the Statement of comprehensive income.

It requires all assets with a finite life to be depreciated even if the market price is more than the CA. It also requires that when an asset is revalued, depreciation should be based on the revalued amount over the remaining useful life.

All property, plant and equipment with a finite life must be depreciated. The only exception is land, which is not depreciated. Depreciation must be charged even if the market price of the asset is more than the carrying amount (net book value).

Property, plant and equipment are used in business for a number of years to produce goods or services because of this reason, their cost cannot be charged to the Statement of comprehensive income in one year but should be charged over their useful life in order to match the cost (depreciation) and income generated by the assets in line with the accrual concept (matching concept) and going on concept. From this point of view, the standard treats property, plant and equipment as deferred expenses and the depreciation process is simply a method of allocating the deferred expenses to the relevant accounting periods.

The purpose of depreciation is to match the cost (depreciation) with the income generated by the asset. It is not a way of valuing assets. Depreciation does not provide cash for the replacement of assets. It is a non-cash expense. The other purpose is to reduce profits and Statement of Financial Position values.

# 4.3 Fundamental principles

As noted in Chapter 1, financial statements are prepared under 4 fundamental assumptions, all are explained in that chapter. The allocation of depreciation expense is therefore in accordance with the following fundamental principles:

#### • Going concern concept

When depreciation is charged, it is assumed that the organization will continue operating in the future. If the organization is not a going concern, depreciation should not be charged in the Statement of comprehensive income.

#### • Matching concept

Depreciation expense is matched with revenue generated by the assets being depreciated.

#### Example 1

Mr. T Chiroora, a photographer bought a motor vehicle on 1 March 2006. The following are the cost incurred on the purchases of the motor vehicle.

| i.   | Invoice price                                    | \$600 000 |
|------|--|-----------|
| ii.  | Petrol (Full tank)                               | \$ 20 000 |
| iii. | License fees for 1 year paid to the City Council | \$ 5 000  |
| iv.  | Sign writing on the sides of the motor vehicle   | \$ 21 000 |
| v.   | Insurance for 1 year, up to 28 February 2007     | \$ 18 000 |
| vi.  | Cost of number plates                            | \$ 7500   |

You are required to calculate the amount to be capitalized as the cost of the motor vehicle as at 1 March 2006, assume Mr. T Chiroora's year end is 31 December.

#### Solution

| Invoice price                                  | \$600 000 |
|--|-----------|
| Sign writing on the sides of the motor vehicle | \$ 21 000 |
| Cost of number plates                          | \$ 7500   |
| Total cost of the motor vehicle                | \$628 500 |

#### Notes

- The remaining costs will the expensed in the Statement of comprehensive income, as follows, since they are not of capital. License fees and insurance premium must however be apportioned between the 2006 and the 2007 financial years, in the ratio 10: 2 because there are 10 months up to year end in 2006 and there are 2 months in 2007.
- Depreciation should be based on the cost of the motor vehicle, of \$628 500. if the motor vehicle has a useful life of 5 years depreciation for the year ended 2006 can be calculated as follows, assume the method of depreciation is the straight line method:

$$\frac{628\ 500}{5}\ X\frac{10}{12} = \$104\ 750$$

#### Example 2

To what extent, and in what way, if at all, does providing depreciation ensure that a business can afford to replace its property, plant and equipment?

- There is a no direct connection between depreciation and providing funds for replacement.
- Depreciation is the allocation of the cost of an asset over its useful life/ the charge for the wear and tear of using a property, plant and equipment.
- As such, there will be an expense charged in the profit and loss a/c which will not require a
  cash outflow.
- If an amount equal to the depreciation charged were to be set aside as a cash reserve, it is unlikely that the amount provided would enable the asset to be replaced, given inflation.
- In any case, technological changes mean that the asset would be replaced by something fundamentally different from the original.

If an asset is bought part way through the year e.g. 1 July for a Company whose year end is 31 December each year, it should not be charged a full year depreciation but a 6 months' depreciation i.e. annual depreciation x 6/12 the same principle applies to assets sold part way through the year. This means depreciation on asset acquired or sold partway through the year should be time apportioned. However, in an examination you may be given an accounting policy, which provides that a full year's depreciation is charged in the year of purchase and none in the year of sale, follow this policy.

#### **Useful life**

This is the expected useful life / economic life and not technical life (maintained to keep on working). It is then that period expected to be useful in the profit earning operations of the firm. If revised, allocate the balance of cost over, the remaining useful life. s:

#### a) Residual value

Residual value is the expected/estimated realisable value of the asset at the end of its useful life. It depends on the manner and length of time that the asset is to be used, as well as its physical condition and market prices for periods; it is then likely to be difficult.

# 4.4 Methods of providing for depreciation

Depreciation to be allocated over the period expected to benefit from the use of the asset. Thus, managers should select method regarded as the most appropriate to the type of asset and its use in the business. There are several methods of providing for depreciation but the most common are: -

- a) Straight-line method
- b) Reducing balance method
- c) Sum of digits method
- d) The production (usage method)

The first two methods have been illustrated fully in our ordinary level in this book we look the remaining method in detail

# Sum of digits Method

It is an alternative to the reducing balance method which involves a less rapid pattern of depreciation allocations but retains the principle of higher depreciation charges in early years than in later years. Thus very high depreciation is charged in the first two years but declining rapidly.

# **Procedure**

1. Each year of an asset is assigned a number or digit in reverse orders to the year of life e.g. if the economic life is five years, this can be shown below.

| Years of life | No. Assigned |
|---------------|--------------|
| 1<br>2        | 5<br>4       |
| 3             | 3            |
| 4             | 2            |
| 5             | <u>1</u>     |
|               | <u>15</u>    |
|               |              |

Sum of digits = 
$$\frac{n (n + 1)}{2}$$

Where n = 5

- 2. Depreciation cost is then divided by the sum of the digits to obtain a depreciable cost for each digit.
- 3. Annual depreciation is then calculated by multiplying the digit assigned to that year by the depreciable cost per digit.

Thus, depreciation Provision  $= \frac{\text{Number Assigned x depreciable cost.}}{\text{sum of digits}}.$ 

Or Depreciation charged = 
$$\frac{t(c-s)}{n(n+1)\frac{1}{2}}$$

Where t - number assigned n - economic life c - Cost s - residual value

# 4.5 Sum of digits method of depreciation

# Example 3

Extra Investments Pvt. Ltd. acquired assets at a cost of \$5 000 with an estimated residual value of \$500 after its economic life of 5 years. Calculate depreciation charge for each year.

| No. of years of economic lif | ĉe . | Digit Assigned     |
|------------------------------|------|--------------------|
| 1                            |      | 5                  |
| 2                            |      | 4                  |
| 3                            |      | 3                  |
| 4                            |      | 2                  |
| 5                            |      | 1                  |
|                              |      | 15 (sum of digits) |
|                              |      |                    |
| Depreciation per digit       | =    | $(5\ 000 - 500)$   |
|                              |      | 15                 |

$$\frac{4500}{15} = 300$$

Depreciation in years

```
$\) = 300 x 5 = 1 500
2 = 300 x 4 = 1 200
3 = 300 x 3 = 900
4 = 300 x 2 = 600
5 = 300 x 1 = 300
```

The provision for depreciation account must now be entered using these amounts. Using this method, the written down value of an asset declines at a much less rapid rate than calculated using the reducing balance method.

# 4.6 The Production (usage) Method.

Depreciation is calculated on estimated usage of the asset e.g. units produced, hours worked or mileage in case of motor vehicles. Depreciation given assumes the benefit obtained is the same for each unit usage. For example if total output expected during five years of the asset is 30 000 units and output occurred as follows:

| Year                          | <u>Output</u>                     |
|-------------------------------|-----------------------------------|
| 1                             | 6000                              |
| 2                             | 7000                              |
| 3                             | 8000                              |
| 4                             | 5000                              |
| 5                             | 4000                              |
|                               |                                   |
| Depreciation expense per unit | =(5000-500)                       |
|                               | 30 000 units                      |
|                               | = 15 cents/ unit                  |
|                               |                                   |
| →Thus depreciation in : ye    | ar 1 $6000 \times 15c = $900$     |
| :                             | Year 2 $7000 \times 15 c = $1050$ |
| :                             | e.t.c.                            |

Again the provision for depreciation account must be entered with these values.

The accounting procedure required to generate information for inclusion in the Statement of Financial Position is to debit, under any method, the acquisition account, or valuation as the case may be, in the asset account and to accumulate depreciation yearly in provision for depreciation account. The annual provision for the depreciation must be charged to the profit and loss account for that period.

Change from any one method to another is only allowed/permissible where the new method will give a fair presentation of the result and financial position. The effect of such change must be disclosed in the year of change if material. The un-depreciated cost should, however be written off over the remaining useful life on the new basis commencing with the period in which the change is made. Where assets are revalued depreciation must be based on the revalued amount and current estimate of remaining useful life with the effect, if material,

<u>Note</u>: Depreciation policy is such that it accumulates evenly during the year. It must then be allocated for acquisition part – way through the year. If full depreciation is charged irrespective of when the asset was brought then full depreciation must be charged. If no depreciation is charged in the year of disposal, it must also be observed.

# Example 4

The following is a Statement of Financial Position extract of E. Madory Ltd.

#### STATEMENT OF FINANCIAL POSITION AS AT 31 DECEMBER 2000

|                   | Cost   | Acc. Dep | <u>CA</u> |
|-------------------|--------|----------|-----------|
| Plant & Equipment | 30 000 | 5 000    | 25 000    |

# **Notes:**

The plant and equipment was revalued upwards to \$32 000 on 1 March 2001. The company uses the straight-line method of depreciation at a rate of 10% assuming a residual value of zero.

# Required:-

Calculate the annual depreciation for year 2001.

# **Solution**

$$10\% \times 32\ 000 = \$3\ 200$$

**Also state that when** a business changes from one method to the other, the unamortised cost should be depreciated over the remaining useful life using the new method.

#### Example 5

Assuming the facts are the same as above, the company changes from straight-line to reducing balance method at 15% in year 2001 but there is no revaluation.

# Required

Calculate **depreciation for annual depreciation** assuming it is independent of the illustration above.

# Solution

15% (30 000-5 000) = \$3 750

It is also stated that when the useful life of the assets is revised, the remaining book value should be depreciated over the revised useful stated with the year of charged.

#### Example 6

The trial balance of Mutero is shown at 31 December 2000 (Extract)

|                          | DK     | CI     |
|--------------------------|--------|--------|
| Plant & machinery        | 60 000 |        |
| Accumulated Depreciation |        | 18 000 |

# **Notes:**

The useful life of the Plant and Machinery was reviewed on 31 December 2001 and it was established that it still had a life of only 5 years instead of 8 years. The company uses the straight-line method of depreciation assuming a zero residual value.

CP

#### Required:-

Calculate depreciation for the years ending, 31 December 2000 and 2001.

#### **Solution**

To get this correct, you should always add 1 year to the remaining useful life.

Depreciation 
$$= 60\ 000 - 18\ 000 = $7\ 000$$

#### Example 7

Equipment Suppliers is a well-established company specializing in the distribution of agricultural buildings, equipment and fertilizers, commenced a machinery repair service on 1 January 2002. From the beginning of the new venture, the repair service used a building which the company had bought with the intention of selling it. In fact, the building was included in trading inventory at cost 31 December 2001, at \$500 000 and was then displayed for retail sale at \$650 000. In preparing the building for use as a workshop on 1 January 200, the following expenditure was incurred:

\$

| Foundation and erection costs  | 50 000  |
|--------------------------------|---------|
| Interior and exterior painting | 3 000   |
| Heating and lighting systems   | 150 000 |

On 1 January 2003, further work was undertaken the repair service buildings' heating system at a total cost of \$70 000 half of which related to repairs and the rest concerned the installation of additional thermostatic controls. On 30 June 2003, the following work was complete on the workshop building:

|                                 | \$     |
|---------------------------------|--------|
| Installation of partition walls | 80 000 |
| Renewal of wooden window frames | 50 000 |

Early in 2004, following the closure of the machinery repair service the workshop building including the heating and lighting systems, was sold \$400 00. it is company policy to provide depreciation annually on buildings at the rate of 10% of cost on assets held at the end of each financial year (31 December).

Prepare the following ledger accounts as they would appear in the books of Farm Suppliers Equipment for each of the financial years ended 31 December 2002, 2003 and 2004.

- (i) Repair service workshop building.
- (ii) Repair service workshop building provision for depreciation.
- (iii) Repair service workshop building disposal a/c

Repair service workshop building a/c

|                        |                     |         |                    |         |

# 4.7 Disposal of fixed assets

The cost of the benefit derived from the use of assets cannot be ascertained until the assets have completed their useful life and have been sold or otherwise disposed of. The standard provides that when an asset is disposed of, the difference between the net sales proceeds and the carrying amount (net book value) should be recognised as income or expenses in the Statement of comprehensive income

The method is to open the asset realization (disposal account) and to reverse the existing entries in the asset and provision for depreciation accounts in respect of the asset disposed of. e.g. On 31 December 2001, plant and machinery acquired at cost \$120 000 in 1992 was sold for \$40 000. The accumulated depreciation to date was \$70 000.

The journal and ledger entries will be as follows:

|      |               |   | DR.       | CR.                                     |
|------|---------------|---|-----------|---|

#### Example 8

Mulambo (Pvt) Ltd. is company registered in Zimbabwe on 1 January 1998. The company's records revealed that motor vehicles were purchased as follows: -

| 1 January 1998   | No. 30 | 50 000 | Cash   |
|------------------|--------|--------|--------|
| 1 January 1999   | No. 31 | 60 000 | "      |
| 1 March          | No. 32 | 65 000 | "      |
| 1 September 1999 | No. 33 | 70 000 | ٠.     |
| 30 June 2000     | No. 34 | 80 000 | Note 3 |

# Additional information

- 1. Vehicle No. 30 was sold for \$60 000 on January 1999.
- Vehicle No. 33 was involved in an accident on 30 April 2000 and the insurance company agreed to pay \$42 000
- 3. Vehicle number 34 was purchased on 30 June 2000 for \$80 000. The amount was settled by trading in Vehicle 31 at an agreed value of \$52 000 the balance being paid for in cash.
- 4. The company depreciates vehicles using the straight-line method at the rate of 20% per annum on cost. The policy of the company is to provide for a full year's depreciation in the year of purchase and none in the year of sale. Its financial year-end is 31 December.

# Required

Prepare the following accounts as they would appear in the general ledger of Mulambo (Pvt) Ltd. for the years ending 31 December 1998, 1999, 2000

- (i) Vehicles at Cost
- (ii) Provision for depreciation of motor vehicles
- (iii) Vehicle disposal account

#### **Solution**

(a)

#### Motor Vehicle account (at cost)

| -                  |               |                  |                |

# 4.8 Disclosure of property, plant and equipment in the financial statements

The term Property, plant and equipment refer to all tangible, long-term assets held by organizations. Before the adoption of the IFRSs, Property, plant and equipment would be referring to property, plant and equipment. This section is focusing on the disclosure of Property, plant and equipment in the published financial statements of public limited company. Students should note that a Property, plant and equipment disclosure note is one of the requirements of the A level syllabus. If the note is required in a question, the total net amount should be disclosed in the Statement of Financial Position. The following example will illustrate this disclosure requirement.

#### Example 9

Chiwara Tours (Pvt) ltd is a Zimbabwean registered company, whose operations are based in the Masvingo province of the country. The following is a summary of the tangible assets owned by the company as at 31 December, the financial year end of the company.

|                          | 2006    | 2005    |
|--------------------------|---------|---------|
| Asset, at cost           |         |         |
| Land                     | 150 000 | 150 000 |
| Buildings                | 200 000 | 150 000 |
| Motor vehicles           | 90 000  | 140 000 |
| Computer equipment       | 25 000  | 25 000  |
| Accumulated depreciation |         |         |
| Land                     | -       | -       |
| Buildings                | 65 000  | 50 000  |
| Motor vehicles           | 55 000  | 60 000  |
| Computer equipment       | 10 000  | 5 000   |

#### Other information

- Land is not depreciated
- Additional buildings were erected during the year at a cost of \$50 000
- During the year, a motor vehicle which was bought for \$50 000 was sold for \$49 000. The accumulated depreciation at the time of disposal was \$30 000

### Required

Prepare the property, plant and equipment note, as it would appear in the financial statements of the company as at 31 December 2006.

Solution

Notes to the financial statements as at 31 December 2006

# Property, plant and equipment

# **Note**

The total amount that should be disclosed on the face of the Statement of Financial Position is the net a carrying amount of \$335 000. It is not necessary to show the detailed movement of property, plant and equipment, if the above note is shown as part of the notes to the financial statements.

# 4.9 Examination type questions

# 4.10 Multiple choice questions

- 1. Depreciation is
  - A. A way of setting aside money to provide for the eventual replacement of property, plant and equipment.

- B. A way of writing off the cost of property, plant and equipment over their estimated revenue generating period.
- C. The writing off of the cost of property, plant and equipment evenly over their estimated useful economic life.
- D. The writing off of the cost of property, plant and equipment over their estimated useful economic lives in ever decreasing amounts.
- 2. During the year a business sells a property, plant and equipment. The following information is known

Original Cost \$500 000

Accumulated depreciation at the date of sale \$240 000

Profit on sale \$70 000

What were the proceeds from the sale of the property, plant and equipment?

- A. \$170 000
- B. \$190 000
- C. \$310 000
- D. \$330 000
- 3. A Company acquired a new computer system for \$500 000 on 1 November 2001. The computers' estimated useful life is five years, at the end of which it is expected to have a scrap value of \$45 500. If the company's financial year ends on 31 March, and straight line depreciation is applied on a time-apportioned basis, what is the depreciation charge on the computer in the profit and loss account for the year to 31 March 2002?
  - A. \$37 880
  - B. \$41 670
  - C. \$90 900
  - D. \$100 000
- 4. Which asset does not normally need to be depreciated?
  - A. land
  - B. an oil well
  - C. a quarry
  - D. A revalued property.

#### 4.11 Structured questions

#### Question 1

Plant & Equipment which cost \$16 000 has an estimated useful life of four years and a salvage value of \$10 000 at the end of that time. Calculate the annual depreciation expense, Statement of Financial Position value at the end of each year of useful life using the following methods.

- 1. Straight line
- 2. Reducing balance (or double declining balance).
- 3. Sum of the digits

#### **Question 2**

At the beginning of the financial year commencing on 1 April 1995, a company had a balance on plant account of \$744 000 and on provision for depreciation of plant account of \$410 800. The company's policy is to provide depreciation using the reducing-balance method applied to the property, plant and equipment held at the end of the financial year at the rate of 20% per annum.

On 1 September 1995 the company sold for \$27 400 some plant which it had acquired on 1 31 October 1991 at a cost of \$72 000. Additionally, installation costs totaled \$8 000. During 1993, major repairs costing \$12 600 had been carried out on this plant and, in order to increase the capacity of the plant, a new motor had been fitted in December 1993 at a cost of \$8 800. A further overhaul costing \$5 400 had been carried out during 1994.

The company acquired new replacement plant on 30 November 1995 at a cost of \$192 000, inclusive of installation charges of \$14 000.

#### Calculate:

- a) The balance of plant at cost at 31 March 1996.
- b) Calculate the provision for depreciation of plant at 31 March 1996.
- c) Calculate the profit or loss on disposal of plant.

#### **Question 3**

Zola is in the luxury car line business for safari tours in the holiday resort area of Victoria Falls and Kariba. His property, plant and equipment register on 1 June 2004 shows the following information.

| Toyota Landcruiser No | Cost Price | Date of Purchase |
|-----------------------|------------|------------------|
| AAA 142 Q             | \$156 250  | 1 June 2000      |
| AAB 369 B             | \$125 000  | 23 March 2001    |
| 330-787 A             | \$137 000  | 26 August 2001   |
| ABB 111 Z             | \$150 000  | 23 January 2003  |

On 18 May 2005, a new Landcruiser, number MVD 346 J, was purchased on credit from Bulawayo Cars Ltd for \$175 000. Bulawayo Cars Ltd agreed a trade-in price of \$6 000 for AAA369B, which the new Landcruiser replaced. All the vehicles are depreciated at 40% per annum using the reducing balance method. A full year's depreciation is charged in the year of purchase and none in the year of disposal, regardless of the date of purchase or sale.

#### You are required to:

- a) Prepare the Toyota Landcruiser Account for the year ended 31 May 2005. [4
- b) Draw up the Provision for Depreciation of Toyota Landcruiser Account for the year ended 31 May 2005. [12]
- c) Draw up the Disposal of Toyota Landcruiser Account for the period ended 31 May 2005. [4]

# CHAPTER 5

# ERRORS AND SUSPENSE ACCOUNTS

# 5.1 Chapter objectives

After studying this chapter the student should be able to:

- 1. Explain the purpose of suspense accounts
- 2. Prepare the journal entries necessary to record the adjustments for the correction of errors
- 3. Write up the suspense account to eliminate the difference on a trial balance
- 4. Draw up the trial balance after the correction of errors.
- 5. Prepare a statement showing the effect of these adjustments on the gross or net profit for the year.
- 6 Prepare a Statement of Financial Position after the correction of the errors.

#### 5.2 Introduction

A suspense account is a temporary account which is opened when the causes of differences on the trial balance cannot be established and corrected immediately. Where a transaction cannot be identified or classified at the time of entry the amount causing a difference in the trial balance is recorded in this nominal account as the suspense account, pending investigation which will then determine the final and proper destination of the transaction or transactions in question.

There are two main reasons why a suspense account could be opened

- 1) A book-keeper is not sure where to post an item and enters it in the suspense account pending clarification on the transaction. Once the correct account to be posted has been properly identified and classified, correct posting how to be undertaken and the suspense account is then closed.
- 2) There is a difference in the Trial Balance and attempts to find the causes of the difference have been unsuccessful so a suspense account is opened with the amount of the difference so that the Trial Balance agrees pending investigation into the Trial Balance difference. Once the errors causing the Trial Balance difference have been discovered, they are corrected and the suspense account is subsequently eliminated.
  - Under examination conditions, it should be noted that some errors discovered may not necessarily affect the suspense account. There may be corresponding errors which affect two already existing accounts and such errors will not affect the suspense account.

# 5.3 Correction of error

Errors which affect the trial balance are errors which are corrected through the suspense account. The suspense account is opened as a temporary measure to balance a trial balance. There are some errors; however which may be discovered during the cause of the year before a trial balance is extended. Such errors may be corrected by simply altering the relevant accounts. Where the error affects more than one account, the correction will usually be made through a journal entry.

# 5.4 Types of errors

# 1) Errors not affecting trial balance agreement

When a trial balance is in correct balance, it is not evidence of absence of errors. A trial is not evidence of absence of errors. A trial balance only tests the arithmetical accuracy of double entry and in addition, is used as a worksheet for preparing final accounts. This means that there are some errors that could be present in the books of account but may not be detected by a trial balance. Such errors which may not create an imbalance in the trial balance are classified as:

- a) Error of omission This is where a transaction is completely left out or is not recorded at all in the books of account
- b) Error of principle this is where an item is posted to the correct side of the wrong class of account e.g. cash paid for machinery repairs is debited to machinery account.
- c) Error of commission- an item is entered on the correct side but a wrong account of the same class e.g. sale of goods to E Watanga debited in error to E.F. Watonga's account.
- d) Error of original entry- an incorrect figure is entered in the records and double entry is completed using the same incorrect figure e.g. cash sales of \$ 910 recorded in both accounts as \$190.00 NB: if double entry is completed using the same wrong amount, it is not an error of transposition.
- e) Complete reversal of entries- This is where double entry is completed using the correct amount but entries are made on the wrong side of each of the two accounts e.g. Wage of \$ 900 cash paid recorded as

Dr. Cash a/c \$900 Cr Wages a/c \$900

f) **Compensating errors** – two equal and opposite errors have been made in the books and these errors are not related e.g. a debtors account has been under-cast by \$70 and a rent receivable a/c has been under-cast by \$70.

NB: this type in practice is rare and will not be revealed by a trial balance. Sometimes this type or error can be because a deliberate second error has been made to force the balancing of the records to conceal fraud.

#### 2 Errors which affect the trial balance agreement

- a) Addition / casting errors: figures are incorrectly added in the books resulting in the total / balance being overcast or under-cast.
- b) Failure to complete double entry/ single entry errors: the dual aspects of a transaction is not revealed in the books. Only one side of the transaction is recorded and double entry is not completed
- c) Completing double entry using different amounts / error of transposition: Double entry can be completed using different figures where an error of transposition has taken place e.g. goods worth \$127 sold to A. Andrews recorded as

Dr A. Andrews \$172.00 Cr Sales \$127.00

- d) Double entry completed on the same side e.g. 2 debits or 2 credits
- e) A balance wrongly brought forward
- f) Trial balance errors; a balance is omitted, or incorrectly extracted in preparing the trial balance. This type error which is only found in the trial balance is corrected by a single sided journal entry to simply amend the trial balance itself as there is no error in the ledger.

The examiner can ask candidates to correct these errors in one of the following ways: -

- a) Correcting of errors during the accounting period
- b) Correcting errors after the preparation of trial balance.

*In this situation the examiner requires* candidates *to:* 

- i) Write journal entries to correct the errors
- ii) Prepare the suspense account clearly showing how the trial balance difference is cleared
- iii) Draw up the corrected trial balance.
- c) Correction of errors after the preparation of final accounts.

In this situation the examiner requires students to: -

- i) Write journal entries correcting the errors
- ii) Prepare the suspense account and how it is cleared.
- iii) Prepare a statement of revised gross profit and / or Net profit
- iv) Prepare a corrected Statement of Financial Position(Statement of Financial Position)

#### 5.5 How to correct errors

Type 1 errors are corrected by means of a journal entry between the accounts affected and no entry is made in the suspense account. It is important to note that errors which are not reflected by the trial balance will not be corrected through the suspense account.

Type 2 errors also require journal entries to correct them.

One side of the journal entry will be to the suspense account and the other to the account affected by the error. Generally type 2 errors are those which affect 1 of the 2 accounts in the double entry except errors in the trial balance itself.

One has to decide how to correct an error by seeking answers to the following questions:

- 1 How the transaction has been recorded?
- 2 How the transaction should have been correctly recorded?
- 3 What adjustments are required to be made in order to correct the error?

#### 5.6 Helpful hints in the correction of errors which affect the trial balance

When an error is made to an item written on the wrong side of an account with the amount being correct, double the amount on the correct side.

The first half cancels the error and the second half records the correct answer.

- When an error is made to an item written on the wrong side of an account with an incorrect amount, make an entry of the same wrong amount on the correct side to cancel the error and then make another entry on the correct side with the correct amount to record the correct thing.
- When a wrong amount has been recorded on the correct side, if the amount is less than the correct amount record the difference on the same side. If the recorded amount is more than the correct amount, record the difference on the opposite side so that it reflects the correct amount which should have been recorded in the first place.
- 4 There are some errors which if corrected will necessitated the correction of other accounts e.g. correction of debtors' figure will result in the correction of Provision for credit loses, correction of error on depreciable non-current will cause the provision for depreciation to adjusted.

# Example 2: correction of errors and the suspense a/c

The trial balance of Tamboedza Limited was unable to balance on 30 September 2011 and the totals where: debit \$3 592 200

Credit \$3 705 634

On the same day, draft accounts were prepared having included the trial balance difference as suspense account balance. The draft Statement of comprehensive income showed a profit of \$282560 for the ended 30 September 2011.

Consequently, the following errors were discovered:

- 1. \$1 160 Electricity prepaid at 30 September 2010 had not been brought down as an opening balance.
- 2. Discount allowed \$1 672 and discount received \$1 838 for the month of September 2011 had not been posted from the cash book to the general ledger.
- 3. \$19 200 paid upon the acquisition of some item of office furniture on 1 April 2011 had been debited in error to office furniture repairs accounts. It is company policy to depreciate office furniture using the straight line method at 20% on a pro rata basis.
- 4. Returns inwards totalling \$17 960 had been credited in error to the returns outwards accounts.
- 5. the balance of \$76 520 for motor expenses had been omitted from the trial balance.
- 6. A motor Vehicle with a net book value of \$8 000 had been sold during the year for \$9600. The proceeds of the sale had been entered in the cash book and to complete double entry, a credit was made in the sales account in the general ledger. Motor vehicles are depreciated at 25% per annum with proportionate depreciation in the year of acquisition and none in the year of sale.

#### Required:

- a) Journal entries to correct the errors (Narratives are not required)
- b) A suspense account showing how the initial balance has been eliminated

#### **Suggested solution:**

|                          | Dr     | Cr     |  |
|--------------------------|--------|--------|--|
| a) i) Electricity        | 1160   |        |  |
| Suspense                 |        | 1160   |  |
| ii) Discount allowed     | 1672   |        |  |
| Suspense                 |        | 1 672  |  |
| iii) Suspense            | 1 838  |        |  |
| Discount Received        |        | 1 838  |  |
| iv) Office furniture     | 19 200 |        |  |

# Example 2

Mr. Tafara extracted the following trial balance as at 31 December 1999

|                   | \$     | \$     |
|-------------------|--------|--------|
| Discount allowed  | 9 500  |        |
| Discount received |        | 11 000 |
| Creditors         |        | 32 000 |
| Debtors           | 26 500 |        |
| Inventory         | 19 400 |        |

| Wages and salaries         | 28 600  |         |
|----------------------------|---------|---------|
| Stationery                 | 5 600   |         |
| Plant and equipment        | 40 000  |         |
| Provision for depreciation |         | 4 000   |
| Sales                      |         | 316 000 |
| Purchases                  | 178 000 |         |
| Drawings                   | 16 000  |         |
| Insurance                  | 18 200  |         |
| Balance at bank            | 96 000  |         |
| Rent and rates             | 24 000  |         |
| Capital                    |         | 105 800 |
| Commission paid            | 9 000   |         |
| Commission received        |         | 6 000   |
| Suspense account           | 4 000   |         |
|                            | 474 800 | 474 800 |
|                            |         |         |

On checking the books of accounts to eliminate the suspense account, you discover the following errors:

- a) Discount received of \$1 500 was posted to the debit of the discount allowed account.
- b) Credit purchases of \$1 700 had been correctly debited to a purchases account but had been credited to the supplier's account as \$7 100.
- c) The total of one page of the sales daybook had been carried forward as \$6 800 whereas the correct amount was \$8 600.
- d) An amount of \$200 paid for stationery had been entered in the insurance account in error.
- e) A cheque of \$2 500 received from a debtor was debited to the customer's account and credited to the bank account
- f) The debit side of stationery account was overcast by \$600.
- g) A cheque payment for rent of \$2 000 was correctly entered in the cash book but not posted to the rent account.

# Required

| a) | Prepare journal entries to correct the above entries (narratives are not required). | [7] |
|----|---|-----|
| b) | A suspense account  | [8] |
| c) | Prepare a corrected trial balance.  | [6] |

#### Correction of net profit in the draft final accounts

If errors are found and corrected after the daft income has been prepared, it goes without mentioning that the draft net profit has to be amended. All items which affect the trading account and the Statement of comprehensive income in general will have to be used in the correction of the net profit. Only items of revenue income and items of revenue expenditure are considered in the correction of net profit. The rule to help you correct net profit is:

Debit entries to nominal accounts in the journal to decrease profit and must therefore be deducted from the draft net profit.

Credit entries to nominal accounts in the journal to increase profit and must therefore be added to the draft net profit.

It therefore goes without mention at this stage that you should have a thorough understanding of the division of the ledger at this level for you to master particularly this topic and the chapter on control accounts.

#### Example 2 – correction of draft net profit/loss

Using information in example 1, draw up a statement showing the revised profit after the errors in Example 1 have been corrected.

#### Suggested solution

#### Statement of amended net profit for the year ended 30 September 2011

|   | Decrease (Dr) | Increase (Cr)   |
|---|---------------|-----------------|
|   | \$            | \$              |
| Net Profit per draft Final a/c                |               | 282 560         |
| Electricity opening balance omitted           | 1160          |                 |
| Discount allowed                              | 1172          |                 |
| Discount received                             |               | 1 838           |
| Office furniture reduction in repairs         |               | 19 200          |
| Depreciation -6/12 x 20% 19200                | 1920          |                 |
| Returns inwards                               | 17 960        |                 |
| Returns outwards                              | 17960         |                 |
| Cash on disposal of F- a (reduction in sales) | 9 600         |                 |
| Profit on disposal                            |               | <u> 1600</u>    |
|   | 126 792       | 305 198         |
|   |               | (126 792)       |
| Revised net profit                            |               | <u> 178 406</u> |

At this level, errors involving opening inventory and closing inventory and their effects on profit give students a challenge. Students need to understand the relationship between profit and inventory.

# Opening inventory and profit

The relationship is indirect that is if opening inventory is overstated profit will be understated or (viceversa).

Closing Inventory and profit

The relationship is direct i.e. if closing inventory is overstated profit will be overstated.

# Example 2

The accounts of M K Moyo showed a profit of \$98 000. The auditor discovered the following errors:

- a) The correct valuation of opening inventory was \$13 000 whereas the figure used in the accounts was \$9 000.
- b) The closing inventory figure used was \$19 000, the correct figure which should have been used was \$29 000.

#### Required

Calculate the revised profit

#### **SOLUTION**

|                                    | \$             |
|------------------------------------|----------------|
| Profit as per draft                | 98 000         |
| Add closing inventory understated  | <u>10 000</u>  |
|                                    | 108 000        |
| Less opening inventory understated | 4 000          |
| Revised profit                     | <u>104 000</u> |

#### Exercise 1

Android Ltd's trial balance for the year ended 31 October 2010 has failed to balance. An examination of the company books has revealed the following errors.

- i) An invoice amounting to \$600 for goods purchased has not been recorded in the purchases day book but has been posted directly to the purchases account and the creditor's account. The creditor's figure in the trial balance is derived from the control account.
- ii) The sales day book has been under-cast by \$1440
- iii) Discount allowed for the month of October \$2934 has not been posted to the nominal ledger
- iv) Goods totaling \$14 460 have been received from a supplier and included in stock, but the invoice has not yet been received.
- v) A cheque of \$1152 received from Andrew, a debtor has been posted direct to the sales account
- vi) The sales account has been credited with \$1 500, a credit note for trade- in allowance given on a company van. This amount has already been correctly dealt with when dealing with the replacement of the motor van.

#### Required

- a) Journal entries to correct the above errors
- b) A statement showing the effect of the corrections on the company's profit for the year.

#### **Correction of a draft ( Statement of Financial Position ).**

The correction of profit ultimately affects statement of financial position as profit is included in the statement of financial position. In addition, the correction will affect balances of assets and liabilities such as Trade receivable and trade payables among other balances should also be corrected in the Statement of financial position.

#### Example 3

Agatha's trial balance failed to agree on 31 December 2010, the difference being entered in a suspense account. A Draft Statement of comprehensive income was then prepared and it showed a net profit of \$10 000 upon investigation, the following errors were discovered.

- i) The balance of opening inventory of \$76 000 had been entered in the trial balance as \$67 000
- ii) Closing inventory at 31 December 2010 had been overstated by \$3200
- iii) Motor expenses of \$4800 had been posted to Motor van account in the sales account
- iv) Goods worth \$2 300 invoiced to Kasandra have been correctly posted to her account but have not been entered in the sales account.

v) A credit balance of \$47 in the sales ledger has been extracted as a debit balance in the trial balance.

# Required

- a) Prepare journal entries to correct the above errors
- b) Prepare a suspense account showing the trial balance different and the subsequent correction of the errors
- c) Show A Statement of Financial Position extract sheet containing the amended balances.

|   |                                    |                           |
| Equity and liabilities                            |                                    |                           |
| Capital   |                                    | 190 000                   |
| Add Net Profit                                    |                                    | 30 000                    |

| Less drawings       |        | 220 000<br><u>20 000</u><br>200 000 |
|---------------------|--------|-------------------------------------|
| Current liabilities |        |                                     |
| Creditors           | 25 000 |                                     |
| Bank overdraft      | 52 000 |                                     |
| Suspense            | 14 000 | 91 000                              |
|                     |        | <b>291 000</b>                      |

Further investigation of the suspense account balance revealed the following errors: -

- i. Bank charges of \$400 had been omitted from the cash book.
- ii. Cash sales of \$3000 made on 31 December 2000 were debited to sales and credited to Debtors account.
- iii. The total of discount allowed was under cast by \$2 000.
- iv. An amount of \$86 paid for transport was debited to stationery account.
- v. An inventory sheet totaling \$1 200 was omitted from the closing inventory
- vi. A Provision for credit loses of 5% of the Debtors is to be created.
- vii. Returns outwards was debited to returns inwards account of \$8 000.

#### **Required:**

- a) Journal entries (Narratives are not required)
- b) Write up suspense account
- c) A statement of corrected Net Profit
- d) A corrected Statement of Financial Position

#### **Solution**

# 5.8 Examination type questions

# 5.9 Multiple choice questions

- 1. A trial balance will fail to agree if:
  - A. A sales invoice is omitted from the Sales Journal
  - B. A sales invoice for \$978 is entered in the sales Journal as \$987.
  - C. A sales invoice for \$770 entered in the sales journal but not included in the monthly total
  - D. A credit note has been entered in the sales journal.
- 2. A business discovers that two errors have been made after the draft final accounts had been prepared
  - Office expenses, \$420 were debited in the office equipment account.
  - Purchase of a machine \$3 400 was debited in the purchases account.

How do these errors affect the net profit and the total property, plant and equipment shown in the Statement of Financial Position?

#### Property, plant and equipment in the

| Net profit  | Statement of Financial Position  |  |
|---|--|--|
| A. Reduce by \$2 980 B. Reduce by \$3 820 C. Increase by \$2 980 D. Increase by \$3 820 | increase by \$3 820<br>reduce by \$3 820<br>increase by \$3 820<br>increase by \$3 820 |  |

3. A trial balance failed to agree and the difference was entered in a Suspense Account. A credit balance of \$10 710 in the Sales Ledger had been wrongly extracted as a debit balance. Which journal entry will correct this error?

| Debit                | Credit            |  |
|----------------------|-------------------|--|
| A. Suspense \$21 420 | -                 |  |
| B. Suspense \$10 710 | Sales \$10 710    |  |
| C. Suspense \$21 420 | Sales \$21 420    |  |
| D. Sales \$21 420    | Suspense \$21 420 |  |

- 4. A trial balance has failed to agree. An investigation has revealed three errors.
  - A cheque of \$300 paid to L. Lewis had been correctly entered in the Cash Book but had not been entered in L. Lewis account.
  - The purchases account had been under cast by \$40
  - A cheque of \$186 received from K. Keith had been correctly entered in the Cash Book but had not been entered in K. Keith's account.

What was the suspense account balance before the error were corrected.

- A. \$154 credit
- B. \$154 debit
- C. \$446 credit
- D. \$226 debit
- 5. After a trial balance had been prepared, four errors were discovered.
  - Sales overcast by \$210
  - Insurance under cast by \$120
  - Cash received from a debtor entered in the cash book only 150
  - A purchase of 59 is entered in the books, debit and credit as \$95

Which of the above errors does not affect trial balance agreement.

- A. 1 and 4
- B. 1, 2 and 3
- C. 1, 2 and 4
- D. 4 only
- 6. The following errors in the accounting records have been found and corrected:
- A purchase invoice for \$250 was omitted from the books of account.
- A credit sale for \$120 to X was debited to the account of Y.
- The sales day book was over- added by \$100
- 7. The gross profit for the year before correcting the errors was \$60 200. What is the correct gross profit for the year?

- A. \$59 850
- B. \$59 970
- C. \$60 350
- D. \$60 550
- 8. The directors of a company are completing the accounts for the year ended 30 April 2004. They discover that the inventory at 1 May 2003 was over-valued by \$150 000. What is the effect of correcting the error in the accounts?

|    | Net profit for year – end | Reserves brought forward |
|----|---------------------------|--------------------------|
|    | 30 April 2004             | at 1 May 2003            |
| A. | Decrease                  | Decrease                 |
| B. | Decrease                  | Increase                 |
| C. | Increase                  | Decrease                 |
| D. | Increase                  | Increase                 |

# 5.10 Structured questions

#### **Question 1**

When preparing a trial a balance, the bookkeeper found that it disagreed. The difference was entered in a suspense account prior to the discovery of the following errors:

- 1. The purchases daybook had been under cast by \$4 000.
- 2. A payment of \$8 100 to Moyo, a supplier has been correctly entered in the cash book but was not posted to his account.
- 3. The total of discount allowed had been overcast by \$980.
- 4. A balance in the rent account of \$9 600 was brought down as \$6 900.
- 5. A payment of \$6 000 for the purchase of stationery was entered in the cash book and credited to the stationery account.
- 6. Mr. Moyo, the proprietor advised his accountant that rent paid includes a payment of \$600 for his private residents.

You are required to:

- a) Prepare journal entries to correct the above entries.
- b) Prepare a suspense account, showing clearly the original balance as per trial balance.

#### **Ouestion 2**

The following trial balance at 31 September 2004 has been drawn up for a business after preparation of draft final accounts:

\$

Land and buildings at cost 234 000

Equipment at cost 150 200

| Provision for depreciation: Land and buildings |         | 40 600  |
|--|---------|---------|
| Equipment                                      |         | 61 720  |
| Inventory at 30 September 2004                 | 32 600  |         |
| Bank   | 10 700  |         |
| Creditors                                      |         | 44 280  |
| Loan   |         | 50 000  |
| Debtors  | 51 000  |         |
| Provisition for credit loses                   |         | 1 020   |
| Capital  |         | 251 580 |
| Profit for the year to 30 September 2004       |         | 77 400  |
| Drawings                                       | 44 000  |         |
| Suspense account                               | 4 100   |         |
|  | 526 600 | 526 600 |
|  |         |         |

#### **Additional information**

- i. Purchases for \$2 940 from a supplier had been received on 30 September 2004 and included in inventory figures on that date but the invoice had not been entered in the purchases day book.
- ii. A photocopier costing \$8 000 which had been bought for the business has been debited to the purchases account.
- iii. Provision for depreciation had not been made for the new photocopier referred to above in (b). The depreciation is to be 20%.
- iv. The photocopier in (b) above replaced an existing piece of equipment costing \$6 000 which was sold for \$1 800, and the proceeds of sale debited to the bank account and credited to the equipment account. No other entries have been passed. At the date of sale, the accumulated provision for depreciation for this item was \$4 800.
- v. A credit note for \$250 received from a supplier, was entered in the returns outward daybook and credited to the suppliers' account.
- vi. The proprietor's electricity bill of \$1 120 for his private house has been paid by the business and debited to the business' electricity account.
- vii. The creditors' figure in the trial balance includes a balance of \$15 000, which should have been listed as \$11 400.
- viii. A long overdue debt of \$4 000 should have been written off.
- ix. It is the policy of the business to provide for doubtful debts at the rate of 2% of total debtors.

#### You are required to:

Prepare the journal entries necessary to record the adjustments for the above items. Narratives are not required. [12]

Write up the suspense account to eliminate the difference.

[2]

Prepare a statement showing the effect of these adjustments on the profit for the year ended 30 September 2004. [7]

Prepare a Statement of Financial Position after the correction of the errors as at 30 September 2004. [6]

#### **Question 3**

Bangani Ltd is preparing its year end accounts. The accountant is on sick leave, there are numerous minor discrepancies to be dealt with before the accounts can be finalised. You are initially given the following balances:

|  | \$      |
|--|---------|
| Debtors  | 254 700 |
| Creditors  | 169 500 |
| Inventory  | 183 900 |
| Profit for the year                              | 151 410 |
| Bank overdraft                                   | 89 100  |
| Ordinary share capital (50c shares)              | 150 000 |
| Retained profits (beginning of year)             | 156 000 |
| Investments                                      | 132 600 |
| Provisition for credit loses                     | 5 940   |
| Plant and machinery at cost                      | 420 000 |
| Provision for depreciation – Plant and machinery | 189 000 |
| Suspense account (credit balance)                | 5 250   |

# You discover the following errors

- i) An inventory sheet had been under cast by \$3 000 and two different inventory sheets had been overcast by \$300 each.
- ii) A sale of \$180 000 had been correctly recorded in sales but not posted to the account of the debtor concerned. Sales returns of \$5 250 had not been recorded at all. A contra item of \$4 350 between a debtor and a creditor had been recorded in the debtors' ledger but not in the creditors' ledger.
- iii) The sales included the sale of some plant and machinery for \$9 600. This plant and machinery had been bought for \$19 800 some years ago and had a written down value of \$7 200.
- iv) No entries have been made in the accounts for:

- An electricity bill for \$1 800 which has been paid.
- A bill for audit services for \$16 800 which has not yet been paid
- An entry on the bank statement for an overdraft interest of \$22 200
- An overpayment to a creditor of \$2 250.
- v) The debit side of the cash book has been overcast by \$6 600.
- vi) During the year investments which had cost \$51 600 were sold for \$63 000. The cash receipt had been recorded in the cash book but not posted.
- vii) The following balances were omitted from the list of balances given above:

Delivery vehicle at cost \$96 000

Provision for depreciation – vehicles \$54 000

- viii) Provisition for credit loses is to be adjusted to be 2% of debtors' balances at the year-end.
- ix) Depreciation at the rate of 10% on cost is to be provided on all property, plant and equipment at the end of the year.
- x) A dividend of 6 cents per share is to be provided.

#### You are required to:

a) Prepare a suspense account, after making the relevant corrections.
b) Calculate the revised net profit for the year
[15]

# **CHAPTER 6**

# CONTROL ACCOUNTS

#### 6.1 Chapter objectives

### After studying this chapter the student should be able to:

- 1 Define a control account
- 2 State the uses of control accounts
- 3 Draw up a sales and purchases ledger control account
- 4 Identify the sources of information for control accounts
- 5 Prepare an amended sales ledger control account and purchases ledger control account.
- 5 Draw up a statement reconciling the amended sales ledger control account balance with the total of the sales ledger.
- 6 Explain the purpose of control accounts.
- 7 Outline the benefits that accrue from maintaining a control account system.

#### 6.2 Introduction

A control account, also known as a total account, is a summary of all the individual accounts in the ledgers they control, namely the Trade receivables/debtors ledger which keeps records of all credit sales to trade debtors, and Trade Payables/creditors ledger which keeps records of all credit purchases from trade suppliers. A control account is therefore a summary account in the general ledger of all transactions pertaining to trade receivables (debtors) and trade payables (creditors)

# 6.3 Purpose of Control accounts.

The purpose of the control account is to keep the general ledger free of details, thus it summarises information in the subsidiary ledgers (debtors' and creditors' ledgers) although it uses a different source to compile that information. This enables the control account to act as an independent check of the arithmetical accuracy of the ledgers it controls. Where a trial balance fails to agree, a control account makes the localisation of errors easy. In addition, control accounts provide instant totals for trade debtors and creditor balances, which are useful and enable the statement of financial position (Statement of Financial Position) to be prepared quickly. The use of control accounts may also reduce the incidence of fraud as control accounts provide an internal check on the sales/purchases ledger.

#### 6.4 Sources of information for control accounts

The information for constructing each control account is taken from both the personal accounts of trade debtors and creditors, as well as from the main daybooks/books of original entry. The table below summarises, information for the construction of a debtors control a/c.

#### Trade receivables/debtors control a/c

<u>Information</u> <u>Source</u>

Opening debtors balances

Trial balance and Debtors account in the sales ledger

Credit Sales Sales day book

Returns Inwards Returns inwards day book

| Refunds from creditors              | Cashbook  |  |
| Interests charged on overdue a/cs   | General journal                                   |  |
| Other charges                       | General journal                                   |  |
| Closing balance of creditors        | Creditors accounts in the ledger                  |  |
|                                     | _   |  |

#### **Layout of control Accounts**

A control account takes the appearance and form of the personal accounts it controls with the amount relating to purchases and sales, returns discounts and payments made and received, among other things being recorded in the control account on the same sides as the personal accounts, as shown below.

#### Sales Ledger Control account

| Debtors balances b/d        | xxx | Cash and Cheques received from debtors | XXX |
|-----------------------------|-----|--|-----|
| Credit Sales                | XXX | Returns Inwards                        | XXX |
| Interest charged on         |     | Discount allowed                       | XXX |
| Overdue accounts            | XX  | bad debts written off                  | XXX |
| Dishonoured cheques         | XXX | Set offs/contra entries                | XXX |
|                             |     | Cash/bank recovered from bad debts     |     |
|                             |     | Balances owed by debtors c/d           | XXX |
| Bad debts recovered         | XXX |  |     |
| Refunds to customers        | XXX |  |     |
| Balance owed to debtors c/d | XX  |  |     |
|                             | XXX |  | XXX |
| Debtors balances owing b/d  | XXX | Balances owed to debtors b/d           | XXX |
|                             |     |  |     |

# 6.5 What not to include in the sales ledger control account

1. Cash Sales- the control account only controls the accounts of debtors who buy on credit. Cash sales are therefore not recorded in the debtors account but are posted from the cashbook to the general ledger, sales account and not the debtors account.

- 2. Provisions for bad and doubtful debts as well as provisions for discounts allowed- provisions do not affect the control account as they are posted from the general journal to the general ledger
- 3. Trade discounts- these are never recorded in any books of accounts as the total sales recorded are net of the trade discount calculated on the sales invoice.

NB: The sales ledger control account only controls the debtors ledger, therefore balances which are posted to the general ledger and not the sales ledger will not affect the sales ledger control account. This understanding of this concept is necessary to enable you to correct errors affecting the control account and the reconciliation of the ledger it controls.

| Purchase ledger control    | a/c  |                                |     |     |  |
|----------------------------|------|--------------------------------|-----|-----|--|
| Cash & Bank payments       |      | Balances owed to creditors b/d |     | XXX |  |
| Made to creditors          | XXX  | Credit Purchases               |     | XXX |  |
| Returns outwards           | XX   | refunds from creditors         |     | XXX |  |
| Discounts received         | XX   | Interest charged by            |     |     |  |
| Sets offs/ contra entries  | XXX  | Suppliers on overdue a/cs xxx  |     |     |  |
| Balances owed by us        |      | Dishonoured cheques xxx        |     |     |  |
| To creditors c/d           |      | Balances owed to us by         |     |     |  |
|                            |      | creditors                      | c/d | XX  |  |
|                            | XXX_ |                                |     | XXX |  |
| Creditors balances owed to |      | Creditor balances owed         |     |     |  |
| Us b/d                     |      | xx to them b/d                 |     | XXX |  |

NB: Cash purchases are not recorded in the creditors control account as they do not pass through the purchases ledger but go through the general ledger. The creditors control account only controls that section of the ledger- the purchases ledger.

#### **Set offs or contra Entries**

Sometimes in business it happens that some firms have customers who are also suppliers e.g. where the electricity company ZESA is a customer of the local authority which supplies it with water. There is intertrading between these two companies and at the end of each month the local authority owes ZESA money for electricity and ZESA owes the local authority money for water supplies. In such an instance, it makes more sense to offset these accounts against each other, and the company owing the other more money then gets to write a cheque for the difference owed, rather than have both companies sending cheques to each other. If ZESA owes the local authority \$30 and the local authority owes ZESA \$50, it is sensible for the local authority to offset the \$30 owed by ZESA and only write out a cheque to ZESA for \$20. This offsetting is in full settlement of both debts by ZESA to the local authority and local authority debts to ZESA.

NB: Set offs appear in both control accounts as follows:

- In the sales ledger control account- on the credit side
- In the purchase ledger control account- on the debit side and the amount in both accounts are the same.

#### 6.6 Control accounts with balances on either side.

Sometimes a control account may have both a debtor and credit balance either at the beginning of a period end of a period, or in both instances. It is important to note that in each case, the debtor balance always represents debtor balances i.e. those balances owed by outsiders to the business, even if its in a purchases ledger control account as anything owed by creditors constitutes debtors. On the other hand, the credit balances in either control account will represent monies owed by the business to the outside world i.e. creditors, including a credit balance on the debtors control account.

#### 6.7 Reasons for a credit balance in a debtors control account.

A debtors control account will usually carry a debit balance at the end of a given accounting period, which represents amounts owed by debtors. However it can happen that the debtors control account will have both

a debit and credit balance, usually the credit balance being smaller. The credit balance in a debtors control account may arise because of any of the following reasons:

- i) A customer could have over paid his account and this over payment cannot be offset against other customers' outstanding balances.
- ii) A customer may have not been refunded for goods returned to the business after he had paid for them in full.
- iii) Customer paid for the goods in advance.
- iv) Error of commission where a payment posted is made to a wrong debtor
- v) Discount allowed was not taken into account when the account was settled.

#### Reasons for a debit balance in a creditors control account

A creditors/purchases control account generally carries a credit balance but may sometimes carry a debit balance due to the following reasons.

- i) Goods are returned to a supplier after the account has been settled, thus the supplier owes the business to the value of goods returned.
- ii) The account of the creditor has been overpaid
- iii) Discount received was not taken into account when the account was settled.

### Example in the preparation of simple control accounts

The following relates to the books of Ann Brooks

|                                 | \$     |
|---------------------------------|--------|
|                                 |        |
| Total Creditors on 1 April 2003 | 7 241  |
| Total debtors on 1 April 2003   | 12 437 |
| Credit Sales                    | 16 483 |
| Cash Sales                      | 5 122  |
| Credit purchases                | 11 312 |
| Cash purchases                  | 1 219  |
| Cash paid to creditors          | 14 120 |
| Cash received from debtors      | 13 166 |
| Discounts received              | 896    |
| Discounts allowed               | 649    |
| Returns Inwards                 | 543    |
| Returns outwards                | 714    |

### Required

#### Prepare

- i) The debtors control account for the month of April 2003
- ii) The creditors control account for the same month

|                     | Debtors Co    | ntrol a/c             |               |
|---------------------|---------------|-----------------------|---------------|
|                     | \$            |                       | \$            |
| April 1 Balance b/d | 12 437        | April 30 Bank         | 13 166        |
| 30 sales            | 16 483        | Discount allowed      | 649           |
|                     |               | Returns inwards       | 543           |
|                     |               | Balance c/d           | <u>14 562</u> |
|                     | <u>28 920</u> |                       | 28 920        |
| May 1 Balance b/d   | 14 562        |                       |               |
|                     |               |                       |               |
|                     | \$            | Creditors Control a/c | \$            |
| Apr 30 Cash         | 14 120        | April 1 Balance b/d   | 7 241         |
| Discount received   | 896           | 30 Purchases          | 11 312        |
| Returns outwards    | 714           |                       |               |
| Balance c/d         | <u>2 823</u>  |                       |               |
|                     | 18 553        |                       | 18 553        |
|                     |               | May 1 Balance b/d     | 2 823         |

NB: The debit balance on the debtors control account generally reflects amounts owed by debtors to the business i.e. an asset and the credit balance on the creditors control account reflects amounts by the business to trade creditors i.e. a liability.

#### Exercise 1

The following information has been obtained from the books of Claudia fashions Ltd for the month of October 2011.

|   | \$     |
|---|--------|
| Sales ledger balances on 1 October      | 6 483  |
| Purchases ledger balance on 1 October   | 3 241  |
| Receipts from customers                 | 27 486 |
| Payments to suppliers                   | 22 107 |
| Sales                                   | 29 212 |
| Purchases                               | 25 243 |
| Returns Inwards                         | 1 420  |
| Returns Outwards                        | 1 324  |
| Bad debts written off                   | 528    |
| Discounts allowed                       | 888    |
| Discounts received                      | 783    |
| Sales ledger balances on 31 October     | ?      |
| Purchases ledger balances on 31 October | ?      |

#### Required

- i) Prepare the sales ledger Control account and
- ii) The Purchases Ledger control account for the month of October 2011 from the above information.
- iii) Explain the meaning and use of the sales ledger balance and purchases ledger balance on 31 October.

#### 6.8 Control accounts as memorandum records

Where the control account is not kept as part of double entry, it is used as a check on the arithmetical accuracy of the sales and purchases ledger. In this case, the control accounts would be known as memoranda records as they are simply there as a back up to the normal double entry system and the users derive the benefits emphasised below. However, where the sales and purchases ledgers are not maintained and the control account is used to complete double entry, the control account is not regarded as a memoranda record but the sales and purchases ledgers would be as they would not be used for the completion of double entry. Examination questions often assume that the sales and purchases ledgers are maintained as part of the double entry system and the control accounts are only kept as memoranda records.

#### Exercise 2

The following information has been extracted from the books of Tight Controls Ltd for the month of September 2011.

| \$   |         | \$     |
|--|---------|--------|
| 1 September 2011: Sales ledger balances- debit     |         | 32 600 |
| -Credit  |         | 840    |
| 1 September 2011: Purchases ledger balances- debit |         | 987    |
|  | Credit  | 18 416 |
| Transactions during the month of September:        |         |        |
| Purchases day book total                           |         | 86 000 |
| Sales day book total                               | 107 500 |        |

| Returns inwards day book total                         | 2 400  |
|--|--------|
| Returns outwards day book total                        | 5 720  |
| Cash book receipts from customers                      | 99 150 |
| Cash book payments to suppliers                        | 73 212 |
| Discounts received                                     | 1 800  |
| Discounts allowed                                      | 3 400  |
| Dishonoured cheques from debtors                       | 4 200  |
| General journal: Bad debts written off September       | 2 600  |
| Bad debts (2010) recovered in 2011)                    | 1 650  |
| Sales ledger balances set off against                  |        |
| Purchases ledger balances                              | 5 500  |
| On 30 September debit balances in the purchases ledger | 6 120  |
| Credit balances in the sales ledger                    | 4 400  |

#### Note:

Bad debts recovered in September 2011 have been included in cash receipts form customers.

#### Required:

Prepare the Purchases Ledger and Sales Ledger control accounts of Tight controls Ltd for the month ended 30 September 2011.

# 6.9 Advantages and Uses of Control accounts

- 1. Control accounts make the detection and correction of errors easier as they help to identify the ledgers in which errors may have been made.
- 2. They are used to check the reliability and accuracy of all postings made to the personal ledgers, thus control accounts provide an independent check on the entries in the sales and purchases ledger as the balance on control account must equal the total of balances in the ledgers they control.
- 3. Control accounts can be kept by a person who is not the same person who maintains personal accounts of debtors and creditors. This segregation of duties helps in the prevention of fraud and increases the likelihood of errors being discovered
- 4. Control accounts allow the quick calculation of debtors and creditors totals enabling a trial balance and data for final accounts to be prepared quickly.

# 6.10 Limitations of Control Accounts.

- 1. Not all errors in the ledgers will be revealed by the preparation of a control account as control accounts do not guarantee the accuracy of individual ledger accounts where errors such as compensating errors, errors of omission, commission, original entry will not be revealed.
- 2. Control accounts may themselves contain errors thus compromising their reliability.

#### 6.11 Control accounts and errors

It sometimes happens that the control account balance does not agree with the list of balances extracted from the ledger it controls. In such a case, the reasons for the non-agreement must be found and the necessary corrections made. This is known as <u>reconciling</u> the control accounts.

#### Reasons for non-agreement between the control account and the list of balances.

| or    |  | Correction Required    |
|-------|--|------------------------|
| i)    | Item correctly recorded in book of original entry and correctly posted to the personal account but no entry made in the control account  | amend the control a/c  |
| ii)   | Item correctly recorded in book of of prime entry, correctly posted to the personal account but incorrectly recorded in the control a/c. | amend the control a/c  |
| iii)  | Item correctly recorded in book of prime entry and correctly entered in the control account but not posed to the personal account.       | amend list of balances |
| iv)   | Item correctly recorded in book of Prime entry, correctly entered in control Account but incorrectly posted to the Personal account.     |                        |
| v)    | Item correctly posted to a personal Account but not entered in the book of prime entry.  | amend control account  |
| vi)   | Item correctly posted to a personal Account but entered incorrectly in Book of prime entry.  | amend the control a/c  |
| vii)  | A book of prime entry is incorrectly<br>Cast i.e. under cast or overcast   | amend the control a/c  |
| viii) | A personal account balance is incorrectly Cast   | amend list of balances |
| ix)   | A correct personal account balance is listed incorrectly   | amend list of balances |
| x)    | A personal account balance is omitted from the list of balances.   | amend list of balances |

# <u>Summary points to remember on the correction of errors and reconciliation of the control account and the list of balances.</u>

- 1. Because a control account is prepared from books of original entry, if a total in the book of original entry is incorrect, the control account will also be incorrect as totals are posted from the books of original entry to the control account. However the sales or purchases ledgers will not be affected as individual entries are posted there thus a casting error in a book of original entry will not affect the personal ledgers
- 2. If an item is posted incorrectly from the book of original entry to the personal ledger, the list of balances will be incorrect and therefore will need amending but the control account will be correct.
- 3. If an item is incorrectly entered in the book of original entry, the error will be reflected in the personal ledger and the control account. Both records will be equally wrong and the control

account will not reveal the error. However, once the error is discovered, both the personal ledger and the control account will need to be corrected.

If an item is omitted form the book of original entry (error of omission), it will not appear in both the personal ledger and control account and so the control account cannot reveal the error. Once discovered however, the control account and the personal ledger will have to be amended.

An example on the correction of errors and reconciliation of the control account to the ledger below.

At the end of the month of January 2011, a routine comparison showed that the trade receivables (debtors ledger) control account balance amounted to \$7 795 and the schedule of debtors in the ledger totaled \$7 591. An examination of the books revealed the followed errors.

- Discounts allowed \$103 had been entered correctly in all other accounts except the control account
  where the balance had been omitted.
- 2) The returns inwards day book had been overcast by \$97
- 3) A credit customer A Rinamonzi, had been credited with goods returned valued at \$172 but no entry had been made in the returns inwards day book
- 4) Janice's account had been overcast in the ledger by \$127 whist that of Tonderai had been undercast by \$153.

#### Required

- i) Prepare a statement amending the trade receivables (debtors) balance.
- ii) Prepare an amended sales ledger control account.

#### **Solution**

| i) Statement amending schedule of d  | lebtors    |
|--------------------------------------|------------|
|                                      | \$         |
| Original balance in the sales ledger | 7 591      |
| Less Janice overcast                 | 127        |
| <del>_</del>                         | 7 464      |
| Add Tonderai undercast               | <u>153</u> |
| Amended Sales ledger balance         | 7 617      |
| ii) Amended sales ledger control a/c |            |
| •                                    | Ф          |

|                                  | <u>7 892</u> |              |                 | <u>7 892</u> |  |
| Balance b/d                      | 7 617        |              |                 |              |  |
|                                  |              |              |                 |              |  |

# Exercise 3

The following has been extracted from the books of Howard Ltd at 31 December 2012

|                                  | \$          |
|----------------------------------|-------------|
| Total purchases ledger balances  | 640 (dr)    |
|                                  | 72 170 (cr) |
| Purchases ledger control account | 78 470 cr)  |

The following errors have been discovered.

- 1. An invoice for \$1 000 has been entered twice in the purchases day book.
- 2. A total of \$840 has been omitted from both the discount received account and the purchases ledger control account.

- 3. A debits balance of \$500 has been entered in the list of purchase ledger balances as a credit balance.
- 4. An amount of \$7 100 owing to Thandiwe, a supplier has been offset against her account in the sales ledger but no entry has been made in the creditors control account.

#### Required

- a) Prepare a statement correcting the purchase ledger balances
- b) Prepare a corrected purchases ledger control account
- c) Show how the balances pertaining to creditors would be reported in the Statement of Financial Position (Statement of Financial Position).

Note: Where the ledger has both a debit and a credit balance, these balances are corrected independently. The smaller balance is not offset against the bigger one.

iii) The sales and purchases ledger balances at the end of the month represent amount owed by debtors and amounts owing to creditors respectively. These figures are used in the extraction of a trial balance as well as in the preparation of a Statement of Financial Position (Statement of Financial Position) at the end of a trading period as Trade receivables (debtors) from the sales ledger control account and as Trade Payables (creditors) from the Purchases Ledger control account.

# 6.12 Examination type questions

# 6.13 Multiple choice questions

1. A business provides the following information:

|   | \$      |
|---|---------|
| Opening creditors                       | 20 000  |
| Cash paid to creditors                  | 110 000 |
| Purchases on credit                     | 120 000 |
| Balances set – off against sales ledger | 2 000   |
| Discount received                       | 3 000   |

What is the closing creditors balance?

- A. \$31 000
- B. \$30 000
- C. \$29 000
- D. \$25 000
- 2. A credit balance on Sibanda's account in a firm's debtor's ledger means that...
  - A. The amount owed by Sibanda is a bad debt.
  - B. One or more of Sibanda's cheque has 'bounced'.
  - C. The firm owes Sibanda some money.
  - D. A provision should be made specifically against Sibanda's account.
- 3. A trial balance at 30 April 2003, before making end of year adjustments, showed:

|                            | Debit  | Credit |
|----------------------------|--------|--------|
| Trade debtors              | 35 600 |        |
| Provision for credit loses |        | 1 160  |

At 30 April 2003 it was decided to write off a bad debt of \$1 600 and to make a Provision for credit loses of 2% of trade debtors. During the year an amount of \$400 was received from a customer relating to a debt that was written off in the year ended 30 April 2002. What was the total bad and doubtful debts expense for the year ended 30 April 2003?

- A. \$720
- B. \$1220
- C. \$1880
- D. \$2280

# 6.14 Structured questions

#### **Question 1**

The following information relates to the books of Martin Moyo in the month of August 2005. He maintains total accounts as part of his double – entry system.

|  | \$      |
|--|---------|
| Balances on debtors accounts as at   |         |
| 1 August 2005 : Debit  | 124 740 |
| Credit   | 1 800   |
| Balances on creditors' accounts as at 1 August 2005                                | 81 060  |
| Credit sales invoiced during the month   | 140 850 |
| Invoices for goods purchased during the year                                       | 79 140  |
| Contra settlements between customers' and suppliers accounts                       | 2 250   |
| Cash sales during the month  | 42 250  |
| Cash paid to suppliers for credit transactions                                     | 75 780  |
| Cash discounts deducted from payments to suppliers                                 | 1 770   |
| Provision for credit loses at 1 August 2005  | 2 850   |
| Customers' balances written off as bad during August                               | 1 350   |
| Goods returned to suppliers  | 1 860   |
| Credit notes issued to customers for goods returned                                | 3 660   |
| Cash received from credit customers in full settlement of debts totaling \$126 690 | 124 890 |
| Cash at bank on 31 August  | 15 300  |
| Debit balances on suppliers accounts at 31 August 2005                             | 690     |
| Credit balances on customers' accounts at 31 August 2005                           | 360     |

- a) Using much of the above data as is relevant, prepare debtors total account and a creditors total account, both for the month of August 2005. [18]
- b) Explain the ways in which control accounts can be of use to the management of the business. [7]

## **Question 2**

A company maintains control accounts as a way of improving their internal control system. The following information is available from the books of the company for the year ended 30 June 2004.

|  | \$        |
|--|-----------|
| Sales ledger balances at 1 July 2003               | 211 120   |
| Credit sales for the year                          | 6 595 680 |
| Credit sales returns                               | 79 240    |
| Cash and cheques received from credit customers    | 5 970 160 |
| Cash sales   | 59 780    |
| Interest charged on customers' overdue accounts    | 46 760    |
| Bad debts recovered during the year                | 16 940    |
| Debit balances transferred to the purchases ledger | 52 920    |
| Bad debts written off                              | 32 340    |
| Discounts allowed to credit customers              | 39 480    |
|  |           |

- (a) From the data given above, prepare the Sales Ledger Control Account for the year ended 30 June 2004.
- (b) The total of the balances in the Sales Ledger at 30 June 2004 amounted to \$654 300 which does not agree with the closing balance on the control account.

<u>Investigations revealed the following errors:</u>

- 1. A credit sale of \$45 600 had been recorded in the sales journal as \$46 500.
- 2. The total of the discounts allowed column in the cash book had been under cast by \$14 000.
- 3. A sales ledger account had been overstated by \$16 800.
- 4. A debit balance of \$2 940 had been set off against a balance in the purchases ledger but no entry had been made in the control account for this item.
- 5. A debit balance of \$44 940 had been omitted from the schedule of debtors.
- 6. The total of a page in the sales journal had been carried forward as \$35 000 when the correct amount was \$53 000.
- 7. A receipt of \$8 680 had been recorded in the bank account but omitted from the customers' account.
- 8. A debtor owing \$6 720 had been declared bankrupt. The customer's account was closed but this debt had not been written off in the control account.

#### You are required to:

- (i) Starting with the balance brought down in your answer to (a), prepare an amended sales ledger control account and balance it off.
- (ii) Draw up a statement reconciling the amended sales ledger control account balance with the total of the sales ledger.
- (iii) Explain the purpose of control accounts and outline the benefits that accrue from maintaining a control account system.

#### **Question 3**

The following figures appeared in the purchase ledger control account of XY Ltd Co. on 30 April 2006.

|                                | \$        |
|--------------------------------|-----------|
| Creditor balances 1 May 2005   | 73 692    |
| Debtor balances 1 May 2005     | 2 296     |
| Discount received              | 13 699    |
| Purchases                      | 1 933 540 |
| Payments to Creditors          | 1 812 804 |
| Purchases returns              | 21 812    |
| Cash refunded from creditors   | 1 834     |
| Bills payable                  | 7 826     |
| Debtors balances 30 April 2006 | 2 933     |
| Contras: Sales Ledger          | 5 488     |

The control account creditor balance at 30 April 2006 failed to agree with the total of the list of balances of creditors extracted from the purchase ledger. Subsequent examination revealed the following errors.

- i) Goods returned to a supplier valued at \$574 had been correctly entered in the creditor's account but entered in the purchase returns account as \$1 274.
- ii) Discount received for the month of \$959 had been posted to the debit instead of the credit side of the discount received account.
- iii) An item of \$1 302 in the purchases day book had been posted to the creditor's account as \$1 176.

- iv) The purchase day book had been under cast by \$1 400.
- v) Discount received of \$196 had been entered in the cash book and discount received account but not in the creditor's account in the ledger.
- vi) A credit balance of \$1 232 on the account of a creditor had been omitted from the list of creditor's balances.

# **REQUIRED**

- a) Show how the control account would appear in the ledger before making any corrections.
- b) Prepare a statement showing the adjustment of the balances in the control account in (a) above to the correct balance, giving details of the errors.
- c) Prepare a statement reconciling the corrected balance with the totals as shown by the list of balances before the errors were found, giving details of the relevant errors.

# **CHAPTER 7**

# **INCOMPLETE RECORDS**

# 7.1 Chapter objectives

- 1. Define incomplete records.
- 2. Outline the features of incomplete records.
- 3. Distinguish between a statement of financial position (Balance sheet) and a statement of affairs .
- 4. Calculate profit or loss using a statement of affairs.
- 5. Prepare a Statement of comprehensive income and a statement of financial position from incomplete records.
- 6. Find the missing figures and information by preparing relevant accounts.
- 7. Outline the limitations of incomplete records.

#### 7.2 Introduction

Dr. Edward Chamisa in his Book Principle of accounts define incomplete records as a situation where the transactions of a business have not been recorded using the concept of double entry system.

This can also be defined as any system that falls short of the complete double entry method of accounting is called single entry system.

In practice businesses are forced to prepare financial statements when required to do so for tax purposes or when required by the bank when seeking a loan or an overdraft facility.

It is a defective double entry system which is commonly found among many small size business enterprises. This may be due to an entire lack of records or if the records are there, they are insufficient to facilitate the preparation of final accounts. Single entry is therefore a mechanism of maintaining records whereby some transactions are either one – sided or no entry is made at all. As a general rule, under the single entry practice only the personal aspects of transactions are recorded, i.e. the personal accounts of debts and creditors are maintained and the nominal and real aspects, i.e. information relating to expenses and revenues, assets and liabilities are partially recorded or omitted altogether.

# 7.3 Features of Incomplete records

Incomplete records may be due to partial recording of transactions prevalent among small —scale enterprises such as vendors, grocers etc. In the case of large organisation, incomplete records could be a result of natural disasters such as earthquakes and floods as well as unfortunate occurrences such as theft or fire. The features outlined below characters incomplete records.

- It is an unsystematic and unscientific method of recording transactions.
   The single entry system is unsystematic and unscientific. It does not have any set of fixed rules and principles for recording and reporting financial transactions.
- ii) It is an incomplete system of keeping records. Generally records of cash transactions and personal accounts are kept and maintained properly but there is no information regarding revenue and gains, expenses and losses as well as assets and liabilities.
- iii) It violates the business entity concept
  Personal transactions of the business owners may also be recorded in the cash book.

#### iv) Lack of arithmetical accuracy

Single entry is not based on the principles of double entry and it therefore fails to prove the arithmetical accuracy achieved through the extraction of a trial balance.

- v) It does not reflect true profit or loss.
  - The true amount of profit or loss cannot be ascertained in single entry accounting as the system generally does not maintain nominal accounts. To ascertain profit or any other information one has to depend on source documents.
- vi) It does not reflect the true financial position. The single entry generally does not maintain real accounts and therefore it cannot reveal the true financial position of an entity which is achieved through the preparation of a statement of financial position.
- vii) Frauds and errors cannot be easily be detected. As the single entry system of book –keeping is incomplete, inaccurate and unscientific, it does not help to check the arithmetical accuracy of the books of accounts and it also makes it difficult to detect fraud.
- viii) Single entry is unacceptable for tax purposes because the single entry method of book-keeping has incomplete records of business transactions; it is not acceptable for a tax assessment to be made based on such records.

#### 7.4 Reasons for Incomplete records.

- i) Lack of knowledge, skill and expertise on the preparation and maintenance of accounting records using double entry and other accounting principles.
- ii) It may not be economical for the business to maintain accounting records using double entry due to the volume and nature of transactions. The cost of maintaining accounting records in single entry is low as specialist accountants are not appointed.
- iii) Deliberate omission to maintain records to evade tax or conceal fraud.
- iv) Inability to maintain proper business records because of the time, effort and cost involved.
- v) Convenience of the business owner who may only wish to record only the important transactions according to the nature of business.
- vi) Loss of records through fire, theft, natural disasters or where records have been misplaced.

# 7.5 Limitations of Incomplete Records

Incompleteness of accounting records on its own is a disadvantage. Other disadvantages are:

- i) As double entry is not followed, a trial balance cannot be prepared and therefore the arithmetical accuracy of transactions recorded in the books cannot be checked.
- ii) Internal checks cannot be enforced and this increases the chances of cheating and fraud.
- iii) The results of business operations cannot be ascertained and evaluated thus making it difficult for future decisions concerning the business to be made.
- iv) Analysis of profitability, liquidity and solvency of the business cannot be done. This may make it difficult to borrow from outside who are interested in assessing the said aspects of the business.
- v) Problems may arise with tax authorities who may not be convinced about the reliability of the computed income.

#### 7.6 Purpose of preparing Final accounts

It is necessary and important <u>to know the results of trading</u> in order <u>to evaluate the efficiency,</u> <u>failure or success of an entity.</u> This is achieved when final accounts are prepared. Final accounts disclose.

- a) The profit or losses made by the firm during a given period and this is evaluated in the Statement of comprehensive income.
- b) The amount of assets and liabilities as at the end of the financial period as shown by the Statement of financial position.

All business organisations need to evaluate this important information, even those organisations with incomplete records. Problems faced by entities which have incomplete records are those of ascertaining the profit or loss for an accounting period as well as that of determining the financial position of the entity. This problem can be solved by

- i) Preparing a statement of Affairs at the beginning and at the end of an accounting period and then using the Balance sheet equation to ascertain the profit or loss, called the net worth method.
- ii) Putting the records in order so as to prepare a full set of final accounts, called the conversion method.

# 7.7 Ascertaining profit or loss through the use of a statement of Affairs.

A statement of affairs is a statement of financial Position prepared from Incomplete records. In order to ascertain profit or loss using this method, statements of the financial period are prepared to ascertain the change in owner's equity at the end of the accounting period. The difference between the total assets and liabilities is the capital or owner's equity. The difference between owner's equity at the opening and closing dates represents the increase (profit) or decrease (loss) made in the financial period. The problem with incomplete records is that of missing information which varies from question to question. As a result, it is not possible to prescribe the specific accounting technique to use in every situation.

The following steps are to be taken to ascertain profit or loss.

#### Step 1

Calculate owner's equity at the beginning and at the end of period by using the balance sheet equation: Capital =Assets – liabilities

#### Step 2

Subtract the opening balance of owner's equity from the closing balance of owner's equity and the difference may be positive or negative.

#### Step 3

- i) Where the owner has put in additional capital, subtract the amount of capital introduce during the period from the amount calculate in step 2.
- ii) Where the owner has made withdrawals and the amount of the withdrawals made by the owner during the period to the amount calculated in step 2.

#### Step 4

If the net result is positive, it represents profit and if it is negative, it represents a net loss.

Once the amount of capital, both at the beginning and at the end is computed with the help of a statement of affairs profit or loss is prepared to ascertain the exact amount of profit or loss made during the years, as illustrated below.

Proforma Statement of profit or loss for the year ended......

Capital as at year end (from Statement of Affairs in step 1) xxx

Add drawings during the year (Step 3) xxx

Less additional capital introduced during the year step 3 <u>xxx</u>

Adjusted capital as at year end

<u>Less</u> Capital as at the beginning of the year (step2)

(from Statement of affairs at start of year step 1) xxx

Profit or loss made during the year <u>xxx</u>

The same computation can be done in the form of an equation as follows:

Profit or loss = Capital at end <u>less</u> Capital at the beginning plus drawing the year <u>less</u> Capital introduced during the year.

# Example 1

The following information was extracted from the records of Getrude

\$

Capital at the beginning of the year 01.01.11 640 000

Capital at the end of the year 31.12.11 1 800 000

Capital brought in by Getrude during the year 120 000

Withdrawals by Getrude during the year 70 000

#### Required

Calculate the profit earned or loss incurred by Getrude during the year ended 31 December 2011

# **Solution**

Statement of profit or loss for the year ended 31 Dec 2011

\$

Closing Capital 1 800 000

Add Drawings during the year 70 000

1870 000

<u>Less</u> additional capital introduced 120 000

Adjusted capital at year end 1750 000

<u>Less</u> Capital at beginning of the year 640 000

Profit made during the year 1110 000

#### Example 2

Andrew opened a carpentry shop on 1 July 2011 with a capital of \$80 000. He did not maintain a full set of accounts using double entry.

During the year he injected further capital of \$25 000 and withdrew \$8 000 for personal use. On 30 June 2012 his assets and liabilities were as follows:

Trade payable \$110 000, Trade receives \$160 000. Inventories \$42 850, Cash at Bank \$36 127

Calculate the profit or loss made by Andrew in his first year of trading.

#### **Suggested Solution**

#### Step 1

# Statement of Affairs as at 30 June 2012

| A cootes | • |
|----------|---|
| Assets:  | Ф |

Trade Receivables 160 000

Inventories 42 850

Cash at bank 36 127

238 977

Less liabilities

Trade payables <u>110 000</u>

Closing Capital 128 977

#### Step 2

#### Statement of Profit or Loss for the year ended 30 June 2012

Closing Capital 128 977

Add drawings 8 000

136 977

<u>Less Opening capital introduced</u> <u>25 000</u>

Adjusted Capital as at 30 June 2012 111 977

Less Opening Capital 80 000

Profit made during the year 31 977

# Exercise 11

Belinda Kadriya runs a small secretarial services shop where she types prints and binds documents. She maintained basic records she thinks are sufficient for her business. On 1 April 2010 she had the following assets and liabilities:

Photocopiers \$18 000, Building \$12 000 inventory of printing material \$4 000 Cash at bank \$7 300, cash in hand \$820, accrued wages \$640. Belinda withdrew \$150 every moth to meet her personal expenses .She had also introduced \$5 800 during the year as additional capital On 31 March 2011, her position was as follows "

photocopiers \$ 22 000, Buildings \$12 000 inventory of printing material \$7 000, Cash at bank \$4 750, Cash in hand \$2 145, Trade receivable \$1120, Trade payables \$832.

Using the statement of Affairs method, calculate the profit made by Belinda Kadriya during the year ended 31 March 2011.

#### Defence between statement of Affairs & Statement of financial Position

- A statement of Affairs is prepared from incomplete records where values for most assets and liabilities are based on estimates. A statement of financial Position (Balance Sheet) on the other hand is prepared from records maintained on the double entry principle and all assets and liabilities can be verified in the ledger accounts. A Statement of Financial position is therefore more reliable than a statement of affairs.
- The objective of preparing a statement of Affairs is to ascertain capital as at that date whereas the objective of preparing a statement of financial position is to determine the financial position of the entry as at that date.
- In a statement of affairs, an item of assets or liabilities may be omitted and this omission may remain unnoticed as the effect of the omission gets adjusted in the capital account balance which is derived as a balancing figure. In a statement of financial position, the possibility of omission of any item is remote because the statement of financial position will not agree thereby forcing the accountant to investigate the cause of the imbalance.

# <u>The difference between a statement of Affairs and a Statement of Financial position</u> has been summarised

| Basis of difference | Statement of affairs   | Statement of financial position  |
|---------------------|--|--|
| Reliability         | - Less reliable as it is prepared from incomplete records.   | - More reliable as it is prepared from double entry from double entry records.             |
| Objective           | - To estimate the balance on the capital account at a given date.                                      | - To show the true financial position of an entry at a given date Omission + errors in     |
| Omission & error    | Omission of assets and liabilities     as well as error in calculation     cannot be discovered easily | recording assets and liabilities can be discovered easily and traced to accounting records |

# 7.8 Preparation of Financial Accounts from Incomplete Records.

To prepare a proper Statement of comprehensive income and a statement of financial position, one needs complete information regarding expenses and incomes, assets and liabilities, where a system of double entry is in force, the information is obtained from a trial balance. In cases of incomplete records, certain balances have to be ascertained in an indirect manner as the records often do not contain such balances which among others include

Opening capital,

Credit purchases

Credit Sales

Payment to trade Creditors

Receipts from trade debtors cash drawings and any other cash / bank related items.

When dealing with incomplete records; there is a need to obtain as much information as possible about the assets and liabilities at the beginning and end of the financial period. The values of fixed assets may be ascertained from the purchase documents. A determined effort has to be made to obtain information from various source documents, together with the use of detailed information about the various business activities. If details of trade debtors and creditors, cash received, sales and cash summary of transaction are available, it may be possible to work out some of the missing figures by using the logic of double entry accounting.

# 7.9 Ascertaining credit purchases and Trade Creditors as well as credit sales and trade debtors

The credit purchases and credit sales are not usually available from the incomplete records. It is also quite possible that some other information relating to trade creditors and trade debtors may also be missing. Missing information pertaining to credit purchases and credit sales and any item relating to trade debtors and creditors can be obtained by preparing control accounts as the balancing figure. If the missing figure is credit sales or credit purchases, it is then ascertained using the control account. To get the total value of purchases one has to add the credit Purchases from the control account to the cash purchases in the cashbook, and do the same with credit and cash sales in order to get total sales.

## Example 3

M. Myself did not keep proper books of accounts. The following information relating to debtors and creditors is available.

| Opening debtors              | 61 089 |
|------------------------------|--------|
| Opening creditors            | 46 146 |
| Sales returns                | 369    |
| Cash paid to suppliers       | 44 685 |
| Discounts received           | 321    |
| Discounts allowed            | 603    |
| Cash received from customers | 39 450 |
| Returns outwards             | 201    |
| Bad debts written off        | 69     |
| Set offs                     | 300    |
| Closing debtors              | 58 158 |
| Closing creditors            | 28 164 |

You are required to compute missing figures for credit sales and credit purchases.

# **Solution**

| 0.1   | T1     | 1       | - / - |
|-------|--------|---------|-------|
| Sales | Leager | control | La/C  |
|       |        |         |       |

| Debtors b/d            | 61 089        | Returns inwards  | 369           |
|------------------------|---------------|------------------|---------------|
| Credit sales (bal Fig) | 37 860        | Cash             | 39 450        |
|                        |               | Discount allowed | 603           |
|                        |               | Bad debts        | 69            |
|                        |               | Set off          | 300           |
|                        |               |                  |               |

|                    |               | Creditors b/d       | 28 164        |

# Use of mark- up and margin to determine sales and purchases

At times the information provided is scanty and not adequate to prepare control accounts. The mark up — margin relationship can be used to determine sales and purchases. Mark- is simply profit expressed in terms of cost of sales e.g. x% of purchases found by the equation.

# Net profit x100

#### Purchases 1

Margin, on the other hand is profit expressed in terms of selling price i.e to say x% of sales and is found by the equation

Net profit x 100 Sales 1 At times the examiner can give you information relating to the selling price and may relate the profit to a mark up. You then have to be able to convert the mark up to a margin so that you can apply it to the sales. Conversely, you have to be able to convert the margin to a mark up as well.

# Converting mark up to a margin and margin to mark up

In order to convert a mark-up to a margin, the numerator does not change but in order to get the margins denominator, add the value of the numerator to the value of the denominator to the value of the mark-ups denominator as shown below.

| Mark up                     |       | <u>margin</u>                 |
|-----------------------------|-------|-------------------------------|
| $20\% = 20 \frac{100}{100}$ | = 1/5 | $\frac{1}{5+1} = \frac{1}{6}$ |

$$25\% = \frac{25}{100} = \frac{1}{4}$$

$$\frac{1}{4-1} = \frac{1}{3}$$

In order to convert a margin to a mark - up, the numerator remains the same. To derive the denominator of the margin, subtract the numerator of the margin from the denominator as shown above.

Mark up

<u>Note</u> it is important to realise that once mark up is mentioned, it needs to be applied to cost and once margin is oriented, it needs to be applied to sales.

# Example 4

Margin

The following information is obtained from the books of a business

Purchases \$285 000

Opening stock \$15 000

Closing stock \$12 000

Margin is 20%

Required: Find the sales

Solution \$

Opening stock 15 000

Add Purchases 285 000

300 000

<u>Less</u> closing stock <u>12 000</u>

Cost of sales 288 00

= Margin = 20% = 1/5

 $Mark up = \frac{1}{5-1} = \frac{1}{4}$ 

Sales = Cost + Profit

 $= 288\ 000 + (1/4\ x\ 288\ 00)$ 

 $= 288\ 00 + 72\ 000$ 

= 360 000

Proof (margin = 20% of sales

= 20% x 360 000

= 72~000

# Example 5

**Sales** \$540 000

Opening stock \$80 000

Closing stock \$ 54 000

Mark up is 20%

Required: Find purchases.

# **Solution**

Profit = 
$$540\ 000\ x\ 1/6$$

$$= 90 000$$

Purchases = Sales - Profit

 $= 540\ 000 - 90\ 000$ 

= 450 000

# Using the receipts and payments Accounting to determine missing information

The receipts and payments account is essentially a summary of the cashbook.

All monies paid out and received are recorded here just like in the cash book.

It can be used to determine amounts stolen, cash drawings or any other cash related balance of which no record exists.

# Example 6

Another, a general dealer has not kept proper books of accounts. He wishes to establish the amount of drawings he has from the business throughout the year. He supplies you with the following information:

|                           |             | \$     |
|---------------------------|-------------|--------|
| Cash at bank and in hand  | 31 Dec 2011 | 2 400  |
| и и и                     | 1 Jan 2011  | 700    |
| Cash sales                |             | 28 000 |
| Receipts from debts wages |             |        |
| Purchases of fixed assets |             | 4 000  |
|                           |             |        |
| Purchases of stocks       |             | 18 000 |
| Rent                      |             | 1 200  |

A. Another assures you that the above is a strict record of business transactions which he recorded accurately throughout the year.

Receipts and Payments a/c for the year ended 31 Dec

|                       | \$            |                    | \$            |
|-----------------------|---------------|--------------------|---------------|
| Balance b/d           | 700           | Wages              | 6 000         |
| Cash sales            | 28 000        | fixed assets       | 4 000         |
| Receipts from debtors | 3 500         | Purchases          | 18 000        |
|                       |               | Rent               | 1 200         |
|                       |               | Drawings (bal fig) | 600           |
|                       |               | Balance c/d        | <u>2 400</u>  |
|                       | <u>32 200</u> |                    | <u>32 200</u> |

## **Exercise**

## Determining the value of inventory lost due to theft or by fire.

Sometimes incompleteness of records is due to some unfortunate events such as a burglary, where records may also go missing or due to some natural disaster. If records of stock movement have not been kept or they also go missing, it is important to be able to determine the value of stock to enable the business to claim if the stock is issued, or just to get the value of the loss to be written off against the profits.

# Example 7

Alibaba sells imported household appliances and his premises suffered a burglary on the 16<sup>th</sup> of November 2009. Alibaba is not sure how much stock was stolen as he is also missing his stock control records. However, he ascertains that the value of stock is remaining is \$6 452. He also provides you with the following information;

|                               | 1 Jan 2009 | 16 Nov 2009 |
|-------------------------------|------------|-------------|
|                               | \$         | \$          |
| Stock                         | 17 452     | 6452        |
| Debtors as at                 | 37 800     | 12 100      |
| Creditors as at               | 20 000     | 23 000      |
| Payments to suppliers to date |            | 183 000     |
| Receipts from debtors to date |            | 202 000     |

Alibaba applies a margin of 20% on all sales

You are required to calculate the value of stolen stock

# Solution

Step 1
Establish sales + purchases figures workings

| i)          | Debtors C      | ontrol a/c  |                |
|-------------|----------------|-------------|----------------|
| Bal b/d     | 37 800         | Cash + bank | 202 000        |
| Sales       | <u>176 300</u> | Balance c/d | <u>12 100</u>  |
|             | <u>214 100</u> |             | <u>214 100</u> |
| Debtors b/d | 12 100         |             |                |
|             |                |             |                |

| Creditors control a/c |                      |  |  |
|-----------------------|----------------------|--|--|
| 183 000               | Creditors b/d 20 000 |  |  |
| 23 000                | Purchases186 000     |  |  |
| 206 000               | <u>206 000</u>       |  |  |
|                       | Creditors b/d 23 000 |  |  |
|                       | 183 000<br>23 000    |  |  |

# Step 2

Establish of gross profit by preparing a simple Trading account.

|             |  | \$                 | \$             |
|-------------|--|--------------------|----------------|
| i)          | Sales (WI)                                     |                    | 176 300        |
| ii)         | <u>Less</u> cost of sales<br>Opening inventory | 17 452             |                |
| iii)<br>iv) | Add purchases                                  | 186 000<br>203 452 |                |
| v)          | <u>Less Closing</u> stock (203 452 -141040)    | 62412              |                |
| vi)<br>vii) |  | 147 492            | <u>141 040</u> |
| viii)       | Gross profit (20% x 176 300)                   |                    | <u>35 260</u>  |
| Sto         | ck Stolen                                      | \$ 62 412- \$6 4   | 52= \$55 960   |

Cost of good available for sale from cost of sale to get total closing stock

Subtract stock remaining from total closing stock to find stock stolen

When preparing the trading account it is advisable to do it in the order provided by the numbers (i)-(viii).

#### Note:

- First prepare the template / layout for doing the trading account.
- Fill in the values known at this point and leave out totals.
- Work out gross profit using mark-up and margin and record it.
- Subtract gross profit from sales to get cost of sales.
- Add cost of sales to gross profit to get total sales (viii)
- Subtract (viii) from (iv) to get the value for stolen stock.

#### Accounting for destroyed, stolen or last inventory

Once the value of stolen, lost or destroyed inventory has been established, the books have to be written accordingly to reflect the prevailing state of affairs.

# 7.10 Goods stolen or destroyed by fire

- (i) When goods for resale are lost during the year, their treatment depends on whether they are insured or not. If they are insured the treatment is as follows:
  - **DR** Profit and loss account
  - **CR.** Cost of sales or purchases

When they are insured, the insurance can pay the full cost or part.

When the insurance pays the full cost, the entries are following

- **DR** Insurance, by full cost (if the amount has been received in, we debit the bank or cash account)
- **CR.** Cost of sales/ Purchases

To record the amount agreed by the insurance.

When it pays part only

- **DR** Insurance (amount agreed)
- **DR** Statement of comprehensive income(*shortfall*)
- **CR.** Cost of sales / Purchases (full loss)

#### Example 7

The following information was extracted from the books of Ali Mohammed for the month of August 2000.

- a) Sales \$80 000.
- b) Purchases \$48 500.
- c) Opening inventory \$10 000.
- d) Trading expenses \$14 500.
- e) The provisions of the insurance contract, when trading inventory is destroyed states that \$1 200 will be paid for full cover and for partial cover it is \$720.

All the entire inventory of Ali was destroyed by fire soon after the inventory taking had been done. According to the accounting records that were made available, the inventory balance as on that date amounted to \$12 000.

You are required to prepare an Statement of comprehensive income under the following scenarios

**Scenario 1** – Ali's inventory is not insured.

Scenario 2 – Ali's inventory is fully covered by insurance.

**Scenario 3** – Ali's inventory is partially insured.

Before the Statement of comprehensive incomes are prepared let's see how much was going to be Ali's profit if the Inventory were not destroyed by fire.

| \$                        | \$                       |
|---------------------------|--------------------------|
| Sales                     | 80 000                   |
| Less cost of sales        |                          |
| Opening inventory         | 10 000                   |
| Add purchases 48          | 500                      |
| 58                        | 500                      |
| Less closing inventory 12 | <u>000</u> <u>46 500</u> |
| Gross profit              | 33 500                   |
| Less expenses             |                          |
| Trading expenses          | <u>14 500</u>            |
| Net profit                | 19 000                   |

# Scenario 1 – Ali's inventory is not insured

Making the above assumptions, the Statement of comprehensive income will be prepared as follows:

|                                  | \$            | \$            |
|----------------------------------|---------------|---------------|
| Sales                            |               | 80 000        |
| Less cost of sales               |               |               |
| Opening inventory                |               | 10 000        |
| Add purchases                    | <u>48 500</u> |               |
|                                  | 58 500        |               |
| Less closing inventory           |               |               |
|                                  | 58 500        |               |
| Less inventory destroyed by fire | <u>12 000</u> | <u>46 500</u> |
| Gross profit                     |               | 33 500        |
| <u>Less expenses</u>             |               |               |
| Trading expenses                 | 14 500        |               |
| Inventory destroyed by fire      | <u>12 000</u> | <u>26 500</u> |
| Net profit                       |               | 7 000         |
|                                  |               |               |

Scenario 2 - Ali's inventory is fully covered by insurance.

Assuming that Ali's inventory is fully covered, the Statement of comprehensive income is prepared as follows.

|                                  | \$            | \$            |
|----------------------------------|---------------|---------------|
| Sales                            |               | 80 000        |
| <u>Less cost of sales</u>        |               |               |
| Opening inventory                |               | 10 000        |
| Add purchases                    | <u>48 500</u> |               |
|                                  | 58 500        |               |
| Less closing inventory           |               |               |
|                                  | 58 500        |               |
| Less inventory destroyed by fire | <u>12 000</u> | <u>46 500</u> |
| Gross profit                     |               | 33 500        |
| <u>Less expenses</u>             |               |               |
| Trading expenses                 | 14 500        |               |
| Insurance expense                | 1 200         | <u>15 700</u> |
| Net profit                       |               | 17 800        |

Please take note that the double entry relating to the Inventory destroyed is effected by debiting the insurance account (this is a current asset in the Statement of Financial Position) and crediting the cost of sales by the cost price of the goods. When the insurance claim is finally received, bank account is debited and insurance account is credited.

# Scenario 3 - Ali's inventory is partially covered

Basing on the fact that the inventory was partially covered, the Insurance Company agreed to pay Ali Mohammed \$7 200 and the Statement of comprehensive income will be prepared as follows:

|                                  | \$            | \$            |
|----------------------------------|---------------|---------------|
| Sales                            |               | 80 000        |
| Less cost of sales               |               |               |
| Opening inventory                |               | 10 000        |
| Add purchases                    | <u>48 500</u> |               |
|                                  | 58 500        |               |
| Less closing inventory           |               |               |
|                                  | 58 500        |               |
| Less inventory destroyed by fire | <u>12 000</u> | <u>46 500</u> |
| Gross profit                     |               | 33 500        |
| <u>Less expenses</u>             |               |               |
| Trading expenses                 | 14 500        |               |
| Inventory destroyed, at cost     |               | 4 800         |
| Insurance expense                | 720           | <u>20 020</u> |
| Net profit                       |               | 13 480        |
|                                  |               |               |

#### Notes

The cost of sales is credited with the full amount of Inventory destroyed by fire whereas the insurance and the profit and loss account is debited by \$7 200 and \$4 800 respectively, being the proportion of insured and uninsured goods respectively.

## **Accruals and prepayments**

Normally the examiner will provide balance of any accruals and prepayments. Adjustments have to be made accordingly. Below are the formats used to determine the amount to be recorded in the Statement of comprehensive income for expense and income accounts.

| Expense a/c  |                     |            |                                   |              |     |
|--------------|---------------------|------------|-----------------------------------|--------------|-----|
| Prepaid b/d  |                     | xxx        | Owing b/d                         | xxx          |     |
| Cash at bank |                     | xxx        | Statement of comprehensive income |              | xxx |
| Owing c      | /d                  | XXX        | Prepaid c/d                       | XXX          |     |
|              |                     | XXX        |                                   | XXX          |     |
| Bal d/d      |                     |            |                                   |              |     |
| Income a/c   |                     |            |                                   | _            |     |
| Owing        | b/d                 | xxx        | Prepaid b/d                       | xxx          |     |
| Statement of | comprehensive incom | ne         | xxx                               | Cash at bank | xxx |
| Prepaid c    | /d                  | xxx        | Owing c/d                         | <u>xxx</u>   |     |
|              |                     | <u>xxx</u> |                                   | <u>xxx</u>   |     |

The figure to be recorded in the Statement of comprehensive income for expenses is found on the credit side of the account and for income on the debit side. It is derived as a balancing figure.

# **Drawing and additional capital**

Drawing includes cash and any assets taken from the business for the owner's private use as well as money from the business used to pay for personal expenses. If the proprietor pays personal income into his business bank account e.g. dividends from investment in shares, this constitutes additional capital and is credited to the capital accounts.

# Exercise 4

The following is the Statement of financial position of Mrs Unlucky as at 31 March 2008

\$

| Non current assets | 580 000        |
|--------------------|----------------|
| Cash               | 20 000         |
| Bank               | 40 000         |
| Inventory          | 160 000        |
| Trade receivable   | <u>200 000</u> |
|                    | 420 000        |

# **Less current liabilities**

Trade payables 200 000

220 000

<u>800 000</u>

Financed by

Capital 800 000

A fire occurred on the night of 31<sup>st</sup> March 2009 destroying the accounting records as well as the closing cash. However, the following information was available.

- i) Trade debtors and trade creditors as at 31 March 2009 showed an increase of 20% as compared to the beginning of the year.
- ii) Credit period

Debtors 1 month Creditors 2 months

- iii) Stock levels were maintained at a uniform level throughout the year.
- iv) Cash sales constituted 20% of total sales.
- v) All purchases were strictly on a credit basis.
- vi) Current ratio on 31 March 2009 was exactly 2
- vii) Total expenses excluding depreciation for the year amounted to 1 000 000.
- viii) Depreciation was provided at 10% on the closing book value of non-current assets.
- ix) An evaluation of the receipt and payments account revealed the following.
- a) Payment to trade payable (creditors) included \$200 000 which related to cash purchases.
- b) \$2 360 000 was received from trade receivable (debtors) by way of cheques.
- c) Mr Unluck's personal drawings from the bank amounted to \$ 200 000
- d) \$480 000 was deposited into the bank.
- e) Non –current assets worth \$900 000 were purchased and paid for by cheque.
- f) The cash destroyed in the fire was not insured.

# Required

- i) Statement of comprehensive income of Mrs Unlucky for the year ended 31 March 2009.
- ii) A statement of financial Position as at that date.

Example 8

Where you use more than one accounting techniques

Sharon a stationery retailer who does not keep proper books of accounts provided his accountant with following:

|                          | 31/03/1999 | 31/03/2000 |
|--------------------------|------------|------------|
|                          | \$         | \$         |
| Premises                 | 100 000    | 100 000    |
| Plant & Equipment        | 60 000     | 59 200     |
| Trade Debtors            | 42 000     | 64 000     |
| Trade Creditors          | 21 000     | 32 000     |
| Wages paid in advance    | 700        | 600        |
| Telephone expenses owing | 4 500      | 900        |
| Inventory                | 24 000     | 36 000     |
| Cash on hand             | 500        | 1 200      |

The only book kept by Sharon is a cash book, summary of which for the year ended 31/03/2000 is given below;

| CASH BOOK (BANK COLUMN ONLY) |         |                       |               |  |
|------------------------------|---------|-----------------------|---------------|--|
| Bal. b/d                     | 56 000  | Drawings              | 12 000        |  |
| Cash taking banked           | 34 000  | Wages & salaries      | 50 000        |  |
| Receipts from debtors        | 59 000  | Payments to suppliers | 50 000        |  |
| Bal. c/d                     | 5 000   | Telephone expenses    | 9 000         |  |
|                              |         | Rent                  | 15 000        |  |
|                              |         | Purchases             | <u>18 000</u> |  |
|                              | 154 000 |                       | 154 000       |  |

## **Additional information**

1. The following amounts have been paid from the cash takings before they were banked.

|           | \$     |
|-----------|--------|
| Purchases | 6 000  |
| Drawings  | 13 000 |
| Wages     | 1 500  |

- 2. She had also taken goods worth 7 500 for her own use.
- 3. There was no purchase or disposal of property, plant and equipment during the year.

# Required:-

- a) Prepare a Statement of comprehensive income for the year-ended 31/03/2000.
- b) Statement of Financial Position as at 31/03/2000

## **Solution**

In this question we are expected to use the following accounting techniques;

- 1. Accounting equation to determine opening capital.
- 2. Control accounts to determine credit sales and Purchases
- 3. Cash account to determine cash sales.
- 4. Knowledge of prepayment and accruals

**Step 1 -** Determine opening capital using the equation: **Assets less liabilities** = **Capital** 

#### Assets

|                       | \$<br>\$   |
|-----------------------|------------|
| Premises              | 100 000    |
| Plant & Equipment     | 60 000     |
| Trade Debtors         | 42 000     |
| Inventory             | 24 000     |
| Bank                  | 56 000     |
| Cash                  | 500        |
| Wages paid in advance | <u>700</u> |
|                       | 283 200    |

## **Less Liabilities**

Creditors 21 000

Telephone owing <u>4 500</u> <u>25 500</u>

Opening Capital 257 700

## The mistake is to forget to include bank because it is not listed with other assets

**Step 2- Calculation of credit sales** 

| Debtors Control A/C |         |          |         |
|---------------------|---------|----------|---------|
|                     | \$      |          | \$      |
| Bal. b/d            | 42 000  | Bank     | 59 000  |
| Credit sales        | 81 000  | Bal. c/d | 64 000  |
|                     |         |          |         |
|                     | 123 000 |          | 123 000 |
| Bal. b/d            | 64 000  |          |         |

The mistake students make in the examination is to treat cash banked as cash sales which is wrong, Cash sales is included in cash banked plus any cash used to pay expenses before it was banked. Note that

Total Sales = Credit sales + Cash sales

= \$81 000 + \$55 200 = \$136 200

Note that sometimes the computations in a) and b) have to be combined. This is necessary when cash and cheque sales are not given separately from receipt from debtors. In this case the total cash and cheque received in respect of sales are credited to control account. The same principle would have to be used in cash of purchases when cash and / or cheque purchases are not given separately from cheque paid to creditors.

Step 3- calculation of credit purchases

| Creditors control A/C |               |                  |        |
|-----------------------|---------------|------------------|--------|
| Bank                  | 50 000        | Bal. b/d         | 21 000 |
| Bal. c/d              | <u>32 000</u> | Credit purchases | 61 000 |
|                       | 82 000        |                  | 82 000 |
|                       | <del></del>   |                  |        |

Total purchases  $$61\ 000 + $18\ 000\ (from\ bank) + $6\ 000\ (Cash) = $85\ 000.$ 

# **Step 4 – calculation of cash sales**

|                         | Cash book (Cash Column Only) |           |        |
|-------------------------|------------------------------|-----------|--------|
|                         |                              |           |        |
|                         | \$                           |           | \$     |
| Bal. b/d                | 500                          | Purchases | 6 000  |
| Cash sales (difference) | 55 200                       | Drawings  | 13 000 |
|                         |                              | Wages     | 1 500  |
|                         |                              | Banked    | 34 000 |
|                         |                              | Bal. c/d  | 1 200  |
|                         | 55 700                       |           | 55 700 |

Or

$$6\ 000 + 13\ 000 + 1\ 500 + 34\ 000 + 700 - 1200 - 500 = $55\ 200$$

**Total drawings** = 7500 + 12000 + 13000 = \$32500 are made up of inventories, cheque payment and in cash.

Step 4

Compute the charges to profit and loss account for those expenses with accruals or prepayments by preparing relevant ledger accounts.

|                    |                    | Telepl    | none A/c   |        |
|--------------------|--------------------|-----------|------------|--------|
|                    |                    | \$        |            | \$     |
| Bank               |                    | 9000      | Bal. b/d   | 4 500  |
| Bal. c/d           |                    | 900       | I/S        | 5 400  |
|                    |                    |           |            |        |
|                    |                    | 9 900     |            | 9 900  |
| Or                 |                    | ====      |            |        |
| 0.                 |                    |           |            |        |
| 9 000 – 4 500 + 90 | 00 = \$ 5 400      |           |            |        |

| Less drawings (12 000 + 13 000 + 7 500)       |                                    | (32 500)       |                |
| Balance at 31 March 2000                      |                                    | 223 500        | -              |
|   |                                    |                | =              |

The goods taken by the proprietor for his own use of \$7 500 should be added to drawings and deducted from purchases. In the examination, watch out for bank because it can be overdrawn.

#### Example 9

Sibongile Moyo commenced trading on 1 September 1994 with capital of \$40 000 that was all used to open a business bank account. Unfortunately, Sibongile has found it difficult to keep her business accounts properly. However the following information is available for the year ended 31 August 1995.

- 1. All business receipts and payments have been passed through the business bank account.
- 2. All business receipts are deemed to be from credit customers.
- 3. Bank payments have been summarised as follows: -

|                       | \$     |
|-----------------------|--------|
| Payments to suppliers | 64 240 |
| Fixtures and Fittings | 20 000 |
| Motor Vehicles        | 12 000 |
| Rent & Rates          | 3 200  |
| Heat & Light          | 900    |
| Wages                 | 5 600  |
| Drawings              | 8 000  |
|                       |        |

- 4. All property, plant and equipment were acquired on 1 September 1994.
- 5. Inventory in trade was valued at cost of \$6 000 on 31 August 1995.
- 6. A 20% gross profit margin is achieved on all sales.
- 7. Depreciation is provided at the following annual rates on the cost of property, plant and equipment:

Motor vehicles 25%
Other property, plant and equipment 10%

- 8. Trade Creditors at 31 August 1995 amounted to \$7 300 and trade Debtors were \$6 900 at that date.
- 9. All purchases and sales are on credit.

You are required to:

- (a) Prepare an Statement of comprehensive income for the year ended 31 August 1995 and
- (b) The Statement of Financial Position as on that date.

## Statement of changes in equity for the period ending 31 August 1995

|                             | <u>Capital</u> |
|-----------------------------|----------------|
|                             |                |
| Balance at 1 September 1994 | 40 000         |
| Add net profit              | 1 685          |
|                             | 41 685         |
| Less drawings               | 8 000          |
| Zess drawings               | 0 000          |

#### Notes

- a) The creditors control account is opened to calculate credit purchases.
- b) The trading account is opened to calculate gross profit and sales.
- c) The debtors control account is opened to calculate receipts from debtors.
- d) The bank account is opened to calculate the closing bank account.

In examination, it is common to find a question where profit to be shared by the partnership was determined before a number of errors were discovered. In this situation, a student needs to first come out with a revised profit as before the profit and loss appropriation is prepared.

#### Example 5

Matapi is a general dealer who does not keep a proper set of books of accounts. The following was the position of the business for the previous 2 years.

|                               | <b>31 December 2000</b> | <b>31 December 2001</b> |
|-------------------------------|-------------------------|-------------------------|
|                               | \$                      | \$                      |
| Inventory                     | 19 000                  | 59 800                  |
| Accounts receivable           | 34 000                  | 39 000                  |
| Accounts payable              | 26 000                  | 49 150                  |
| Balance at bank               | 3 500                   | 15 000                  |
| Non – current assets, at cost | 40 000                  | 69 000                  |

The following additional information relates to the financial year ended 31 December 2001.

1. All payments were made by cheque. A summary of the payments is as follows:

|                      | •      |
|----------------------|--------|
| Rent                 | 8 000  |
| Non – current assets | 29 000 |
| Stationery           | 5 600  |
| Creditors            | 76 000 |
| Wages & salaries     | 21 000 |
| Insurance            | 12 000 |

- 2. Discount allowed amounted to \$1 800 and discount received \$800.
- 3. Bad debts written off during the year amount to \$2 300.
- 4. All sales are on credit.
- 5. Non current assets shown on 31 December 2000 were purchased on 1.1.98 and all non current assets are being depreciated using the straight line method at 10% per year.
- 6. All cash banked is assumed to be from customers.

# **Required:**

- a) Prepare a Statement of comprehensive income for the year ended 31 December 2001
- b) Statement of Financial Position as at 31 December 2001

## Example 10

Edward Manhenga does not use the double entry system of book – keeping. On 31 December 2002 the balance of inventory on hand was \$6 000.

Sales for January 2003 totaled \$80~000; in February 2003 they increased by 50% on the January figure. This was as a result of having a clearance sale in February 2003.

Edward usually has a mark-up of 25% on cost, but during the sale he reduced this for some items so that:

\$17 600 of sales had a mark-up on cost of 10%; 40% of sales earned a gross profit ratio of 20%; The remainder was sold at the normal mark up.

Closing inventory was:

January \$6 600

February \$9 800

Trading account for January 2003

You are required to:

a) Prepare the trading account of Edward Manhenga for January and February 2003 respectively

#### **Solution**

Less closing

inventory

# 7.11 Examination type questions

## 7.12 Multiple choice questions

1. On 1 January 2004, Betty's business assets were valued at \$324 000 and her liabilities amounted to \$21 600. At 31 December 2004, her assets equaled \$513 000. This figure included her private car, which she had brought into the business on 1 November 2004. It was valued at \$81 000. Creditors at 31 December 2004 totaled \$153 000 and her drawings during the year were \$243 000. Betty's profit for the year to 31 December 2004 was:

107 720

9 800

97 920

22 080

- A. \$57 600
- B. \$219 600
- C. \$300 000
- D. \$522 000.

- 2. Ben's shop was broken into on 5 February 1987. The entire inventory was stolen. His inventory on 31 December 1986 was \$161 000. From 1 January to 5 February, sales totaled \$294 000 and purchases were \$266 000. Ben's mark-up on goods is 331/3% to arrive at the selling price. The cost of stolen inventory was:
  - A. \$196 000
  - B. \$206 500
  - C. \$231 000
  - D. \$280 000
- 3. A business owner suspects a loss of cash has occurred. He provides the data shown.

|  | \$    |
|--|-------|
| Cash balance at the start of the month | 450   |
| Cash balance at the end of the month   | 750   |
| Cash banked                            | 900   |
| Cash sales per till rolls              | 1 050 |

How much cash has been lost?

- A. \$600
- B. \$750
- C. \$900
- D. \$1050
- 4. At the end of a financial year the following information is available:

|                   | \$      |
|-------------------|---------|
| Sales             | 200 000 |
| Opening inventory | 15 000  |
| Closing inventory | 18 000  |

If the business makes a standard mark up of 25%, what were the purchases?

- A. \$147 000
- B. \$153 000
- C. \$157 000
- D. \$163 000

### 7.13 Structured questions

### **Question 1**

Samkeliso Luphahla is a retailer who makes all of her sales for cash. During the night of 9 February 1998 a fire destroyed all of her inventory in trade and her shop fittings. The fire also destroyed all of her inventory records except the unpaid invoices, which she kept at home. Samkeliso was insured against destruction of inventory by fire, up to its full amount and for her shop fittings, up to \$50 000.

On 31 December 1997, her most recent accounting year-end, her Statement of Financial Position was as follows:

| Property, plant and equipment   | \$     | \$      | \$             |
|---------------------------------|--------|---------|----------------|
| Shop Fittings at net book value |        |         | 75 000         |
|                                 |        |         |                |
| Current Assets                  |        |         |                |
| Inventory in trade              |        | 245 000 |                |
| Cash at bank                    |        | 23 000  |                |
| Cash in hand                    |        | 1 000   |                |
|                                 | •      | 269 000 |                |
| Less Current Liabilities        |        |         |                |
| Trade creditors                 | 82 000 |         |                |
| Accrued expenses                | 14 000 | 96 000  | <u>173 000</u> |
| •                               |        |         | 248 000        |
| Financed by                     |        |         |                |
| Capital                         |        |         | 248 000        |
|                                 |        |         |                |

During the period 1 January 1998 to 11 February 1998 (6 weeks) all takings were banked except for \$1 500 each week for wages to an assistant and \$1 600 for his own living expenses which were taken from the cash till. On 11 February 1998 there was \$1 000 in the till (not destroyed by the fire). Samkeliso paid all shop expenses, apart from wages, by cheque. An analysis of her bank statement for the period 1 January 1998 to 11 February 1998 showed the following:

| Receipts            |                | <u>Payments</u>     |         |
|---------------------|----------------|---------------------|---------|
| Balance on 01.01.98 | 23 000         | Trade creditors     | 179 400 |
| Cash deposits       | 211 700        | Shop expenses       | 24 500  |
|                     |                | Balance on 11.02.98 | 30 800  |
|                     | <u>234 700</u> |                     | 234 700 |

Selling prices are always based on cost plus 25%. All of Samukeliso's suppliers allowed her to deduct a 2½ % discount for prompt payment from the invoice price of her purchases of inventory. On 11 February 1998, there were accrued expenses of \$9 500 outstanding and unpaid invoices for inventory purchases totaled \$61 800.

You are required to:

- a) Prepare a statement detailing the calculation of inventory lost in the fire.
- b) Prepare a Statement of comprehensive income for the period 1 January 1998 to 11 February 1998.
- c) Prepare a Statement of Financial Position, immediately following the fire, assuming that the insurance claims will be met.
- d) Prepare a statement of changes in equity

### **Question 2**

Farai is in business as a general dealer. Although he is a successful businessman, he has not kept proper accounting records. The taxation authorities required him to state the amount of profit he made in his accounting year ended 30 September 2005. He asks you to help him calculate the profit for that year. He provides you with the following information;

|                      | 30-09-2004 | 30-09-2005 |
|----------------------|------------|------------|
|                      | \$         | \$         |
| Premises at cost     | 200 000    | 200 000    |
| Motor at cost        | 45 000     | 45 000     |
| Inventory            | 20 000     | 28 750     |
| Trade debtors        | 7 375      | 11 500     |
| Trade creditors      | 4 625      | 4 250      |
| Balance at bank      | 5 710      | 11 590     |
| Cash in hand         | 500        | 250        |
| Rent paid in advance | 2 000      | 2 500      |
| Electricity owing    | 1 040      | 575        |

### Additional information

- 1. The premises have been revalued to \$275 000 on 30 September 2005.
- 2. The second-hand value of the motor vehicle at 30 September 2004 was \$42 500, and at 30 September 2005 was \$35 000.
- 3. Inventory at 30 September 2005 included goods, which cost \$3 000, but no invoice has been received.
- 4. On 30 September 2005, inventory costing \$500 was sent on sale or return to a customer who has been invoiced with the selling price, \$700. The customer has not indicated if he wants to purchase the goods.
- 5. Trade debtors represent the total of invoices sent to customers, but unpaid.
- 6. Trade creditors represent the total of invoices received from suppliers and awaiting payment.
- 7. Farai has drawn \$750 per week from the business in cash. He has taken goods costing \$3 500 from the business during the year ended 30 September 2005.
- 8. In addition to his other liabilities, Farai borrowed \$10 000 from his aunt on 1 January 2005. The interest is payable in arrears on 1 January each year.

### You are required to:

Calculate Farai's profit for the year ended 30 September 2005.

#### **Question 3**

Minky Pink owns a retail business dealing in bathroom essentials. He is extremely busy and has not given much attention to his accounting records. He has gathered his bank statements a rough cash book and a number of invoices. Minky recognizes that if the performance of the business must be measured effectively, then details of assets and liabilities are crucial. Details of all business assets and liabilities are as follows:

At

At

|                                | 31 May 2005 | 31 May 2006 |
|--------------------------------|-------------|-------------|
| Shop premises (at cost)        | 126 000     | 126 000     |
| Fixtures and fittings original |             |             |
| Cost \$75 000                  | 45 000      | 57 000      |
| Cash at Bank                   | 86 340      | 3 690       |
| Trade creditors                | 48 120      | 47 280      |
| Accrued rent                   | 1 350       | -           |
| Prepaid rent                   | -           | 1 500       |
| Prepaid insurance              | 720         | -           |
| Accrued insurance              | -           | 480         |
| Debtors                        | 18 300      | 6 420       |
| Inventory                      | 77 430      | 78 690      |
| Van (original cost \$21 000)   | 3 600       | -           |
| Capital                        | 307 920     | ?           |
| New Van                        | -           | 27 000      |

A summary of the bank statement for the year produced the following details

| Receipts                  |                | Payments             |         |
|---------------------------|----------------|----------------------|---------|
|                           | \$             |                      | \$      |
| Cheques from debtors      | 95 100         | Cheques to creditors | 468 900 |
| Proceeds from sale of old |                | Purchase of new van  | 27 000  |
| Van                       | 2400           | Rent                 | 16 800  |
| Net cash takings banked   | 425 580        | Advertising          | 2 190   |
|                           |                | Insurance            | 1 620   |
|                           |                | Light & Heat         | 4 890   |
|                           |                | Business rates       | 5 700   |
|                           |                | New Fixtures & equip | 12 000  |
|                           |                | Drawings             | 66 630  |
|                           | <u>523 080</u> |                      | 605 730 |

It was found that prior to banking the cash taking the following items were paid:

|                              | \$     |
|------------------------------|--------|
| Staff wages                  | 70 500 |
| Purchase of goods for resale | 21 300 |
| Sundry shop expenses         | 14 850 |

### **Additional Information**

- 1) Minky Pink took goods amount to \$3 150 at cost for his own use.
- 2) The bank drawings figure includes \$150 per week paid to Minky, wife for work done by her for the business (50 weeks).
- 3) Minky has been advised that the fixtures and equipment and vans should continue to be depreciated by 10% on cost at the end of each year.

### **REQUIRED:**

- a) A Statement of comprehensive income for the year ended 31 May 2006.
- b) A Statement of Financial Position for the business as at 31 May 2006.
- c) Prepare the statement of changes in equity

### **Question 4**

Madzingira received \$350 000 from his grandfather's will which he used to open a retail outlet. On 1 January 2003, he opened a business bank account with the full amount of the legacy. However, Madzingira was unable to operate a full accounting system. Only very basic records were kept.

On 1 January 2003 again, he rented premises at a rental of \$5 250 per month payable quarterly in advance. The first payment was made on the same date.

A summary of the bank transactions for the year as at 31 December 2003 revealed the following

|             | \$        |                      | \$        |
|-------------|-----------|----------------------|-----------|
| Receipts    |           | Payments             |           |
| Legacy      | 350 000   | Rent                 | 33 750    |
| Cash banked | 1 883 000 | Fixtures/ equipment  | 151 690   |
|             |           | Rates                | 16 800    |
|             |           | Electricity          | 32 690    |
|             |           | Telephone            | 4 830     |
|             |           | Purchases            | 1 860 390 |
|             |           | Holiday in Mauritius | 23 800    |

### **Additional Information:**

1. All takings were banked after the following cash expenses were paid and personal drawings taken:

Wages \$2 870 per week (50 weeks)

Sundry expenses \$105 per week (50 weeks)

Cash purchases \$20 860 for the year

- 2. Madzingira always retained a cash float of \$1750 in the till.
- 3. Madzingira went on a 30 day holiday from mid-September. For this reason there was an oversight on the last quarters rent due on 1 October 2003 and was not paid until January 2004.
- 4. A mark –up of 40% was added to cost of sales in order to arrive at the selling price.
- 5. Business rates of \$7 000 had been paid on 3 October 2003 to cover the period 1 October 2003 until 31 March 2004.
- 6. At 31 December 2003, it was estimated that electricity accrued should be \$12 600 and accounting fees due to be paid \$1 540.
- 7. Fixtures and equipment to be depreciated by \$46 690.
- 8. Trade creditors at 31 December 2003 were \$43 750.

- 9. Trade debtors at 31 December 2003 amounted to \$266 000 and a provision for a doubtful debt of 5% was to be established at that date.
- 10. Closing inventory was valued at \$105 000.

After the final accounts for the year were prepared, Madzingira received Advise from his sister to convert his business to a private limited liability company.

### **REQUIRED:**

- a) A Statement of comprehensive income for the year ended 31 December 2003. [14]
   b) A statement showing Madzingira's drawings. [4]
   c) A Statement of Financial Position as at 31 December 2003. [14]
   d) A statement of changes in equity [10]
- e) A report from Madzingira's sister about the advice offered, citing the advantages and disadvantages of converting his business to a private limited liability company. [16]

# **CHAPTER 8**

# NON-PROFIT MAKING ORGANISATIONS

### 8.1 Chapter objectives

### After studying this chapter the student should be able to:

- 1) Explain what non-trading organisations are
- 2) Outline the objectives of non-trading organisations
- 3) Explain the purpose of a Receipts and Payment account, and Income and Expenditure account.
- 4) Draw similarities between accounts of non-trading
- 5) Outline the various sources of income for non-trading organisations
- 6) Prepare a subscriptions account showing the subscription income for the year
- 7) Prepare a receipts and payments account, income and expenditure account as well as the (Statement of Financial Position)
  - Statement of Financial Position.
- 8) Prepare a Trading account showing the profit or loss from ancillary activities.

### 8.2 Introduction

A business is formed to carry on some kind of an economic activity with the objective of making a profit and increasing the wealth of the owners of the business. On the contrary, a non- trading organisation is formed to fulfil a societal objective such as a charitable organisation, religious group (church) library, hospital, young people's football club etc. Non-trading organisations are formed for the welfare of the society and not for the benefit of an individual, a group of people, partners or shareholders, as in the case with trading organisations. The income of non-trading concerns, which is derived from the various donations, subscriptions, entrance fees etc. is used to pursue the objectives for which the non-trading concerns were set up to achieve.

### 8.3 Characteristic of non-trading organisations

- 1. They are formed to render services in the fulfillment of social objectives and not to earn a profit, although such organisations may run a trading activity such as the operation of a bar in order to make a profit.
- 2. The main source of income for a non-trading organisation is made up of, among other things, subscriptions, admission and entrance fees to functions, donations, membership fees, legacies grants etc.
- 3. The day- to-day management of non-trading organisations lies in the hands of people elected by members from among themselves, who are called the managing committee.
- 4. The accruals concept is used in the preparation of the final accounts of non-trading concerns.

### 8.4 Final accounts of non-Trading concerns.

Clubs, societies and other similar concerns which are not formed with the intention of making a profit will differs little in principle from aA Statement of comprehensive income (Statement of comprehensive income). The income and expenditure account shows either a surplus or a deficit instead of a gross profit or loss and a net profit or loss. Where the non-trading concern engages in a profit-making activity to raise income such as running a bar or conducting dances, it will often prepare a separate trading account for the bar or whatever activity it may be in which it intends to make a profit. The profit or loss on the bar or the particular activity will then be transferred to the main income and expenditure account.

In addition to the Income and Expenditure account, a receipts and payments account is often produced which is nothing more than a summary of the cash and bank transactions of the organisation in the receipts and payments account whether they belong to the current year or not. The receipts and payments account is not prepared on an accruals basis but on a cash basis. In Addition, all receipts and payments are recorded whether they are revenue or capital in nature.

| Layout of a Receipts and pay | ments a/c |                           |      |
|------------------------------|-----------|---------------------------|------|
|                              | \$        |                           | \$   |
|                              |           |                           |      |
|                              |           | Overdraft b/d             | XXX  |
| Cash in hand b/d             | XXX       | Purchases of fixed assets | XXX  |
| Cash at bank b/d             | XXX       | Purchases of fixed assets | XXX  |
| Donations-specific           | XXX       | Printing and stationary   | XXX  |
| Legacies                     | XXX       | Audit fees                | XXX  |
| Life membership fees         | XXX       | Repairs and maintenance   | XXX  |
| Sale of investments          | XXX       | Honoranium                | XXX  |
| Endowment Fund receipts      | XXX       | Telephone expenses        | XXX  |
| Sale of fixed assets         | XXX       | Sundry expenses           | XXX  |
| Subscriptions                | XXX       | Rent payable              | XXX  |
| General donations            | XXX       | Cash and Bank c/d         | XXX  |
| Receipts from ancilliary     |           |                           |      |
| Activities                   | XXX       |                           |      |
| Interest received on         |           |                           |      |
| Investments                  | XXX       |                           |      |
| Overdraft c/d                | XXX       |                           |      |
|                              | XXXX      |                           | XXXX |
| Cash and Bank b/d            | XXX       | Overdraft b/d             | XXX  |

# 8.5 Features of a Receipts and Payments account

- i) It is an asset account
- ii) Like a cash book it is opened with the opening bank and cash balance in hand or overdraft of the current years.
- iii) It is closed showing the respective balance in hand or overdraft at the end of the financial period.
- iv) All receipts whether capital or revenue in nature are recorded on the debit side and all payments whether capital or revenue in nature are recorded on the credit side.
- All receipts and payments, whether belonging to the previous year, current year or next year are recorded
- The receipts and payments account is prepared on a cash basis, Accrued expenses and incomes are not recorded.

### 8.6 Explanation of some important items of receipts and payments account

#### 1. Life membership fees

This is where members have paid a lump sum in order to become members of an organisation for the whole of their lives. Once a member has paid life membership fees, he/she does not have to pay annual subscriptions. When received, the accounting entries are;

Dr Receipts and Payments a/c

Cr deferred Income a/c

On an annual basis, the matching concept is used by making the following entries.

Dr Deferred Income a/c

Cr. Income and Expenditure a/c

With the amount calculated on an annual equal instalment covering such a period as deemed fair by the management committee. The balance of the deferred income a/c will be reflected as a capital receipt together with the Accumulated fund on a yearly basis in the Statement of Financial Position.

#### 2. Donations

These are gifts received by the non-trading organisation in order to finance various activities undertaken by the organisation. Donations can be categorised either as general or specific.

- General donations- these are meant to help finance the day-to-day operations of the organisation and are debited in the receipts and payment account and credited to the income and expenditure.
- ii) Specific donations- sometimes a gift is received to fund a specific activity, such as the financing of a team of footballers to train for specific games, such as the Africa Cup of Nations games in 5 years' time. Such a donation is capitalised by and the accounting entries will be:

Dr. Receipts and Payments a/c

Cr. Accumulated fund

In other words, in the Statement of financial Position (Statement of Financial Position) the specific donation is added to the Accumulated fund.

### 3. Legacy

This is an amount donated by a deceased person to the organisation and is found in the will of that deceased person. It is a capital receipt and is treated like a specific donation by debiting the receipts and payments account and crediting the Accumulated Fund.

### 4. Payment of an Honorarium

An honorarium is an amount paid to any person for the work done for the organisation but such person is not an employee of the organisation. It is recorded on the credit side of the Receipts and payments a/c and is recognised as an expense by debiting the Income and expenditure a/c.

### 5. Members' Subscriptions

These are periodic contributions made by the members of the organisation. It is the main source of income for non-trading concerns and is usually paid annually by members of the organisation, and is therefore an annual revenue receipt which appears on the debit side of the Receipts and Payment account. A ledger account often has to be prepared to determine the subscription income for the year like this:

|                      | Subscriptions a/c |               |      |
|----------------------|-------------------|---------------|------|
|                      | \$                | -             | \$   |
| Owing b/d            | XXX               | Prepaid b/d   | XXX  |
| Income & Expenditure | XXX               | Cash and Bank | XXX  |
| Prepaid c/d          | XXX               | Owing c/d     | XXX  |
|                      | XXXX              |               | XXXX |
| Owing b/d            | XXX               | Prepaid b/d   | XXX  |
|                      |                   |               |      |

### Comparison of a cash book and a receipts and Payments accounts

### Cash Book

- 1. It is prepared on a day to-day basis as transaction occur
- 2. An item may appear a number of times during the year depending on how many times transactions involving that items took place.
- 3. It is not presented as one of the end of year financial statements.
- 4. It does not reflect the activities of the organisation
- 5. It is prepared by all types of organisations

### Receipts and Payments a/c

It is prepared at the end of the accounting year in summary form. Every item appears only once in summary form i.e as a total for the year

It is presented as part of the end of year financial Statements.

It reflects the activities of the organisation It is prepared by non-Trading organisations only.

## 8.7 The Income and Expenditure account

The income and expenditure account contains a summary of incomes and expenditures of the current year. It can be compared to a Profit and loss account in trading organisations. Adjustments for prepaid incomes and expenses as well as accrued incomes and expenses have to be taken into account when preparing the Income and Expenditure account in order to determine the surplus or deficit which is equivalent to the net profit or net loss in a trading organisation. If the income is greater than the expenditure, that difference is a surplus and if the expenditure is greater than the income that difference is a deficit.

Ledger accounts may need to be prepared to help you determine the amount to be reported into the Income and expenditure account. This is how the ledger accounts are prepared.

| Expense a/c          |            |                        |     |  |  |  |
|----------------------|------------|------------------------|-----|--|--|--|
| Prepaid b/d          | XXX        | Owing b/d              | XXX |  |  |  |
| Cash and bank        | XXX        | Income and Expenditure | XXX |  |  |  |
| Owing c/d            | XXX        | Prepaid c/d            | XX  |  |  |  |
|                      | XXX        |                        | XXX |  |  |  |
| Prepaid b/d          | XXX        | Owing b/d              | XXX |  |  |  |
|                      |            |                        |     |  |  |  |
|                      |            |                        |     |  |  |  |
|                      | Income a/c |                        |     |  |  |  |
| Owing b/d            | XXX        | Prepaid b/d            | XXX |  |  |  |
| Income & Expenditure | XXX        | Cash and bank          | XXX |  |  |  |
| Prepaid c/d          | XXX        | Owing c/d              | XXX |  |  |  |
|                      | XXX        |                        | XXX |  |  |  |
| Owing b/d            | XXX        | Prepaid b/d            | XXX |  |  |  |
|                      |            |                        |     |  |  |  |

Note: In the exam you may not have enough time to prepare ledger accounts. Unless the examiner has specifically asked for ledger accounts, you do not need to prepare any. Workings must however always be shown in brackets where ledger accounts have not been written.

### 8.8 Features of an Income and Expenditure account

- 1. Only items of revenue nature are recorded in it
- 2. It is prepared using the accruals basis just like the Statement of comprehensive income (Profit and Loss Account), adjusting for Prepayments and accruals.
- 3. The closing balance which is a either a surplus or deficit is transferred to the Accumulated fund in the Statement of financial Position (Statement of Financial Position)
- 4. It includes non- cash items such as depreciation for the year.

### Statement of financial position

The Statement of Financial Position of non-trading entities is prepared in much the same way as that of trading entities. The major difference however is that instead of Capital, non-trading organisations report Accumulated fund in its place and adjust for the surplus or deficit from the Income and Expenditure account, instead of the net profit or loss found in trading organisations.

### Fully worked examination question

The treasurer of Knickknacks club has produced the following Receipts and payments account for the year ended 31 December 2011.

|        | <u>Payments</u>               |   |
|--------|-------------------------------|---|
|        | Bar purchases                 | 26 922  |
| 1 672  | Bar wages                     | 2 198   |
| 7 336  | Salaries & wages              | 2 730   |
| 30 784 | Office expenses               | 848   |
| 292    | Lighting and heating          | 744   |
| 630    | Rates and Insurance           | 574   |
| 656    | Miscellaneous expenses        | 606   |
|        | Investments                   | 2 800   |
|        | Office furniture (01/07/2011) | 1 800   |
| 41 370 | Balance at bank (31/12/2011)  | 2 148<br>41 370   |
|        | 7 336<br>30 784<br>292<br>630 | Bar purchases 1 672 7 336 Salaries & wages 30 784 Office expenses Lighting and heating Rates and Insurance Miscellaneous expenses Investments Office furniture (01/07/2011) |

#### **Notes**

i) The bank balance on 1 January 2011 represents the following:

\$672- current account \$1 000- deposit account

- ii) \$702 is to be transferred to the deposit account from the current account on 31 December 2011.
- iii) Investments costing \$526 were disposed for \$656
- iv) At 31 December 2010, the club owned the following assets whose details are shown below:

| Asset             | Cost   | expired economic life as |
|-------------------|--------|--------------------------|
|                   | \$     | at 31 December 210       |
| Freehold Premises | 12 000 | 12 years                 |
| Office furniture  | 2 000  | 12 years                 |
| Office furniture  | 1 600  | 5 years                  |
| Investments       | 6 000  | 4 years                  |

v) The club uses the straight line method to depreciate its non-current assets as follows:

Freehold premises  $2\frac{1}{2}$  % per annum Office furniture 10% per annum

| 4) Depreciation- furniture: | ,          |                         |            |            |
| Furniture b/d               | \$1 600    | v 100/                  |            | 160        |
| rumiture o/u                |            |                         |            |            |
|                             | \$1 800    | x 10% x 6/12 =          |            | 90         |
|                             |            |                         |            | <u>250</u> |

NB: Furniture b/d of \$2 000 is no longer subject to depreciation as its economic life is 10yrs (10% p.a for 10yrs) and it has elapsed.

### Example 1

Mujinga Burial Society was formed in 1996 with 145 members. Up to now the number of members has remained the same and each member pays an annual subscription of \$1 000. On 1 January 1998, the books of the society showed the following balances:

| Amounts owing for subscriptions   | \$14 000 |
|-----------------------------------|----------|
| Subscriptions received in advance | \$12 000 |

During 1998, subscriptions received in cash were \$160 000. This amount includes subscriptions for year 1999 for 23 members.

On 31 December 1998, subscriptions owing amounted to \$10 000.

You are required to prepare a subscriptions account showing clearly the amount to be transferred to the income and expenditure account.

## **Solution**

### Subscriptions account

|                  |                      | \$       |                  |             | \$      |
|------------------|----------------------|----------|------------------|-------------|---------|
| 1 January 1998   | Balance b/d          | 14 000   | 1 January 1998   | Balance b/d | 12 000  |
| 31 December 1998 | Income & Expenditure | *145 000 | 31 December 1998 | Bank        | 160 000 |
| 31 December 1998 | Balance c/d          | 23 000   | 31 December 1998 | Balance c/d | 10 000  |
|                  |                      | 182 000  |                  |             | 182 000 |
| 1 January 1999   | Balance b/d          | 10 000   | 1 January 1999   | Balance b/d | 23 000  |

<sup>\*\$145 000 = 145</sup> members X \$1 000/member

### Example 2

The treasurer of Tengwe Country Club has prepared the following receipts and payments a/c for the year ended 31 December 1999.

| Receipts              |        | Payments                |               |
|-----------------------|--------|-------------------------|---------------|
|                       | \$     |                         | \$            |
| Opening Bank balance  | 700    | Payments to suppliers   |               |
| Members subscriptions | 28 000 | of bar inventory        | 4 200         |
| Bar takings           | 8 000  | Printing and stationery | 1 500         |
| Donation              | 50     | Purchase of equipment   | 1 500         |
| Dinner dance receipts | 6 000  | Rent                    | 1 200         |
|                       |        | Dinner dance expenses   | 2 500         |
|                       |        | Electricity             | 5 400         |
|                       |        | Cleaning & Laundry      | 1 900         |
|                       |        | Bal. c/d                | <u>24 550</u> |
|                       | 42 750 |                         | 42 750        |
| Bal. b/d              | 24 550 |                         |               |

You are also given the following additional information: -

1. The club depreciates equipment using the straight-line method at the rate of 10% on assets held at the end of the year.

2. The following is a list of the club's assets and liabilities

|                          | 1 Jan 1999 | 31 Dec 1999 |
|--------------------------|------------|-------------|
|                          | \$         | \$          |
| Bar inventory            | 200        | 900         |
| Bar Creditors            | 1 000      | 7 00        |
| Electricity accrued      | 150        | 400         |
| Rent prepaid             | 90         | 130         |
| Subscriptions prepaid    | 6 000      | 8 000       |
| Subscriptions in arrears | 3 500      | 4 700       |
| Equipment                | 13 000 II  | 14 500      |

## Required: -

- (a) A Calculation of accumulated fund of Tengwe Country Club at 1 January 1999.
- (b) Prepare the Bar Trading A/C(c) The Income and Expenditure A/C for the year ended 31 December 1999 and a Statement of Financial Position as at that date.

# 8.9 Examination type questions

### 8.10 Multiple choice questions

1. A club charges each of its 100 members an annual subscription of \$120. At the end of a year four members had not paid their annual subscription. What will be the entries in the financial statements for subscriptions?

|    | Income and Expenditure | Statement of Financial  |
|----|------------------------|-------------------------|
|    | account                | Position                |
| A. | \$11 520               | Current asset \$480     |
| B. | \$11 520               | Current liability \$480 |
| C. | \$12 000               | Current asset \$480     |
| D. | \$12 000               | Current liability \$480 |

2. A social club whose financial year ends on 31 December receives an annual donation from a company based on 50% of total membership fees due in that year. This donation is paid on 28 February the following year. The following is provided.

|                                    | \$    |
|------------------------------------|-------|
| Subscription received in year 1    | 2 940 |
| Subscription received in year 2    | 3 180 |
| Subscription outstanding in year 1 | 60    |
| Subscription outstanding in year 2 | 70    |

How much should be recorded in the Income and Expenditure account in year 2?

- A. \$1 500
- B. \$1 625
- C. \$2 940
- D. \$3 180
- 3. The journal entry 'Debit Subscription account, Credit Creditors' was made in the accounting record of a club. What does this represent?
  - A. Subscription owed by members
  - B. Subscription received by cheque
  - C. Subscription received in advance
  - D. Subscription refunded to members
- 4. Life membership fees in club accounts are treated as:
  - A. Loans to the club
  - B. Additions to the accumulated fund
  - C. Deferred income
  - D. Income of the year in which they are received.

### 8.11 Structured questions

### **Question 1**

The Senior Citizens Social Club was formed on 1 January 1999. On 31 December 2000, the treasurer presented a list of receipts and payments as follows.

### **Receipts**

|                              | \$     | \$            |
|------------------------------|--------|---------------|
| Opening bank balance         |        | 15 000        |
| Subscriptions                |        | 28 000        |
| Net income from raffle draws |        | 12 000        |
| Donations                    |        | <u>10 000</u> |
|                              |        | 75 000        |
| <u>Payments</u>              |        |               |
| Rent of club house           | 10 000 |               |
| Printing and stationery      | 8 000  |               |
|                              |        |               |

Insurance 3 200

Closing bank balance

The treasurer reported that:

Net payment from dinner dance

Electricity and water

Telephone and postage

(a) Stationery worth \$1 000 was unused at the end of the period.

5 600

4 100

8 600

(b) Subscriptions in advance amounted to \$200 whilst subscriptions in arrears amounted to \$1 200 31 December 2000.

39 500

35 500

(c) Insurance was paid to cover the period from 1 January up to 31 October 2000.

You are required to prepare the club's income & expenditure account for the year ended 31 December 2000.

### **Question 2**

The War Vets Football Association is a social club which makes up its accounts to 31 December each year. On 31 December 2004, the treasurer left the club premises and has not been seen since then. An examination of the records showed that the books it was decided to reconstruct the figures from 1 January 2004.

A summary of the bank account for the year showed the following:

|                          | \$             |                        | \$             |
|--------------------------|----------------|------------------------|----------------|
| Palaman as at 1 Ian 2004 | 1.664          | Dant and onter         | 1 940          |
| Balance as at 1 Jan 2004 | 1 664          | Rent and rates         | 1 840          |
| Bank deposits            | 170 440        | Insurance              | 156            |
|                          |                | Light & heat           | 624            |
|                          |                | Bar purchases          | 140 268        |
|                          |                | Telephone              | 236            |
|                          |                | Balance at 31 Dec 2004 | _ 5 588        |
|                          | <u>172 104</u> |                        | <u>172 104</u> |
|                          |                |                        |                |

### The following information is also obtained:

- 1. The barman places the takings in the bank night safe on his way home for crediting to the club account. The duplicate paying in slips total \$162 448 for the year. The treasurer had no access to bar takings or inventory.
- 2. Receipt counterfoils for members subscriptions total \$12 200.
- 3. Petty cash & wages were paid for as followed:

|                                 | \$     |
|---------------------------------|--------|
| Glasses, crockery & maintenance | 5 240  |
| Wages                           | 10 632 |
| Insurance                       | 840    |
| Sundry expenses                 | 1 028  |

## 4. Outstanding amounts and prepayments at 31 December were:

|                         | 2003 | 2004 |
|-------------------------|------|------|
|                         | \$   | \$   |
| Rates prepaid           | 104  | 112  |
| Tent outstanding        | 164  | 328  |
| Electricity outstanding | 88   | 72   |

5. Bar Inventory ON 1 January 2004 was \$14 428, and on 31 December 2004, \$11 664.

### **REQUIRED:**

- a) Prepare a summary of the position for the year ended 31 December 2004 indicating the amount, if any, to be claimed under the club's Fidelity insurance Policy.
- b) An income and expenditure account for the year.

### **Question 3**

The Montrosian Young People's Social club had the following assets and liabilities as at 31 August 2004.

| \$    |
|-------|
| 7 600 |
| 3 600 |
|       |
|       |
|       |
|       |
|       |
|       |

The following is the Receipts and Payment statement for the year ended 31 August 2005.

| Receipts                    |         | <u>Payments</u>    |          |
|-----------------------------|---------|--------------------|----------|
| Subscriptions               | 216 000 | Dance expenses     | 22 500   |
| Annual dance                | 27 000  | Competition prizes | 8 550    |
| Competition entries         | 12 600  | Bar inventory      | 238 000  |
| Bar sales                   | 528 300 | Bar wages          | 153 000  |
| Takings from snooker tables | 5 850   | Caretaker's wages  | 1 35 000 |
| Donation                    | 54 000  | Maintenance        | 19 800   |
|                             |         | Deposit Account    | 54 000   |
|                             |         | Lawn mower         | 4 500    |

Their books revealed the following balances at 31 August 2005.

| <b>—</b>                 | <b># 10 500</b> |
|--------------------------|-----------------|
| Bar inventory            | \$48 600        |
| Subscriptions in advance | \$5 850         |
| Subscriptions in arrears | \$6 300         |
| Bar inventory unpaid     | \$28 800        |
| Wages due to caretaker   | \$13 500        |

Snooker Tables were depreciated at 25% at 31 August 2005 on book value. A trade-in of \$1 800 was allowed when the new lawn mower was purchased. This transaction took place on 1 September 2004 and a full year's depreciation at 25% was charged to the new mower in the final accounts in August 2005. No depreciation was charged to the old mower.

The Donation of \$54 000 which was received at the end of August was placed in a bank deposit account. The interest is to be used in future years to pay for an annual prize called 'The Best Montrosian Prize'.

### You are required to:

a) Prepare the club Bar Trading Account for the year ended 31 August 2005. [8]

- b) Prepare the club Income and Expenditure Account for the year ended 31 August 2005. [15]
- c) Prepare the club Statement of Financial Position as at 31 August 2005. [12]

### **Question 4**

The treasurer of the Bulawayo Cultural and Ballroom Dancing club has prepared the following receipts and payments account for the year ended 31 December 1998.

| Receipts                             |        | <u>Payments</u>                |        |
|--------------------------------------|--------|--------------------------------|--------|
|                                      | \$     |                                | \$     |
| Balance b/d                          | 7 040  | Purchase of amplifier          |        |
| Subscriptions (note 1a)              |        | (D1/07/98)                     | 2 800  |
| Cultural dancing                     | 9 640  | Cultural dancing               |        |
| Ballroom dancing                     | 6 760  | Musicians fees                 | 3 600  |
| Annual dinner-ticket Sales           | 1 360  | Coaching fees                  | 3 280  |
|                                      |        | Hall-rent                      | 1 320  |
| Sale of tent                         | 2 680  | Rates for the year to 31/12/98 | 3 200  |
| Cultural dancing festival-admissions | 3 760  | Decorating                     | 440    |
| Sales-clothes                        | 8 400  | Cleaning                       | 640    |
| -refreshments                        | 33 200 | Ballroom dancing               |        |
|                                      |        | Show                           | 5 280  |
|                                      |        | Annual dinner-hotel            |        |
|                                      |        | Annual catering                | 1 640  |
|                                      |        | Cultural dancing               |        |
|                                      |        | Festival-prizes                | 680    |
|                                      |        | -judgment fees                 | 360    |
|                                      |        | Purchases-clothes              | 7 200  |
|                                      |        | -refreshments                  | 28 000 |
|                                      |        | Balance c/d                    | 14 400 |
|                                      | 72 840 |                                | 72 840 |

### **Additional information**

### [a] Subscriptions

|                           | <u>Cultural dancing</u> | Ballroom dancing |
|---------------------------|-------------------------|------------------|
| Received in 1997 for 1998 | \$520                   | \$240            |
| Received in 1998 for 1997 | \$ 40                   | \$560            |
| Received in 1998 for 1998 | \$9 200                 | \$6 080          |

| Received in 1998 for 1999 | <u>\$9 640</u>          | <u>\$6 760</u>   |

- b] (i) It is not the policy of the society to take into account subscriptions in areas until they are paid.
- (ii) The tent, which was sold during 1998, had been valued at \$ 200 on 31 December 1997, and was used for the club's activities until sold on 30 June 1998.
- (iii) Immediately after the sale of the tent, the club rented a new hall at \$1 320 per annum.
- (iv) The above receipts and payments account is a summary of the club's bank account for the year ended 31 December 1998, the opening and closing balances shown above were the balances shown in the bank statement on 31 December 1997 and 1998 respectively.
- (v) All cash is banked immediately and all payments are made by cheque.
- (vi) A cheque for \$800 drawn by the club on 28 December 1998 for stationery was not paid by the bank until 4 January 1999.

(vii) The club's assets and liabilities at 31 December 1997 and 1998, in addition to those mentioned earlier, were as follows.

|   | <u>1997</u> | <u>1998</u> |
|---|-------------|-------------|
|   | \$          | \$          |
|   |             |             |
| Inventory of goods for resale, at cost: Clothes | 5 200       | 4 400       |
| Refreshments                                    | 1 240       | 2 400       |
| Sundry creditors-Annual dinner (catering)       | -           | 280         |
| Purchases-clothes                               | 2 400       | 1 600       |
| -Refreshments                                   | 1 200       | 2 000       |

The club has now instructed its treasurer to prepare an income and expenditure account for the year ended 31 December 1998, and a Statement of Financial Position at that date.

It is proposed to provide for depreciation on the amplifier at the rate of 20% per annum on cost, on a month-by-month basis of ownership.

### You are required to:

Draw up the club's income and expenditure account for the year ended 31 December 1998, and a Statement of Financial Position as at that date.

# CHAPTER 9

# MANUFACTURING ACCOUNTS

# 9.1 Chapter objectives

### After studying this chapter the student should be able to:

- 1. Explain why manufacturing accounts are prepared
- 2. Define Prime cost and calculate it.
- 3. Differentiate between prime cost and overhead
- 4. Identify the 3 types of inventory found in a Manufacturing account and differentiate them,
- 5. Prepare a manufacturing account showing the production cost of finished goods.
- 6. Adjust for work-in-progress correctly in a manufacturing account.
- 7. Determine manufacturing profit and correctly account for it in the books.
- 8. Explain what unrealised profit is and adjust closing of inventory of finished goods correctly with the unrealised profit.
- 9 Prepare the Statement of comprehensive income after the manufacturing account.
- 10 Prepare the Statement of Financial Position for a manufacturing enterprise.

### 9.2 Introduction

So far, we have looked at businesses which retail goods which they do not produce. Such firms generate profit by purchasing inventory and then selling it at a higher price thus earning profit on the other hand, there are some which manufacture and retail their own goods manufacturing concerns. These organisations have to calculate the cost of production which will then be transferred to the Trading account and be incorporated in the cost of sales so as to arrive at the profit. The calculation of cost of sales in a manufacturing business involves the identification and proper treatment of the different kinds of inventory (stocks) namely raw materials work-in progress and finished goods. It also includes the collection of all the other costs associated with production, namely prime costs and production overheads. Once the cost of production of finished goods has been established, it is then transferred to the Trading and is used to calculate the trading profit or loss.

### 9.3 Prime cost

The prime cost covers all the costs involved in physically making the products and other costs that are directly related to the level of output. Prime cost is also known as direct costs Prime costs includes,

- i) Direct materials these are raw materials purchased for production and can be directly linked to unit of output. Direct material cost includes cost of transportation of the goods ie. Carriage inwards, import duty and any other costs incurred to bring the raw materials to the factory.
- ii) Direct labour- these are wages paid to workmen for producing goods per unit. The wages paid have a direct relationship with output as they are paid per unit of output.
- iii) Direct expenses- these are any other direct expenses related to production and are paid per unit of output, such as royalties patent and licence fees etc.

### 9.4 Overheads

This is a name given to indirect expenses, ie those expenses which cannot be linked to any particular unit of output but are recognised as production expenses. Overheads include among other things

i) Indirect materials- these are materials purchased for use in the factory but are not directly linked to any unit of output e.g. cleaning materials for the factory, grease for lubricating production machinery.

- ii) Indirect wages-these are wages paid to factory employees which cannot be traced to any particular unit of output e.g. Foreman's wages, cleaners wages etc.
- iii) General overheads-there are indirect expenses relating to the factory but cannot be traced to any unit of output, such as rent, heating and lighting, depreciation of factory equipment etc.

### 9.5 Allocation of overheads

Some expenses may be split between two areas of the financial statements e.g. the rent expense may be split between the factory and the administration and this will be indicated by the split in the relevant expense in the Manufacturing account and Statement of comprehensive income.

If there are adjustments to be made on the expenses to be allocated i.e adjustments for prepayments and accruals, the adjustments should be made first before the expense is split.

### Work-in- Progress

Goods which are not finished and are still in the production process at the end of a financial year cannot be sold and are known as work-in-progress. They will be completed in the next financial period. The opening balance of work-in-progress is added on to the current year's production cost and the closing balance of work-in progress is deducted to arrive at the cost of goods completed at the end of the year.

### 9.6 Inventories (stocks) in manufacturing organisations

There are three types of stocks which are dealt within the manufacturing account and they are;

- i) **Raw materials** as is the practice in trading organisations purchases are adjusted with opening inventories and closing inventories to arrive at the raw materials consumed. Opening inventories is added and closing inventories is deducted from purchases. Raw materials stock form part of the prime cost calculation. If there are carriage inwards and returns outwards adjustment have to be made accordingly.
- ii) **Work-in progress** As stated earlier this is stock of goods that have not been competed in terms of production and are dealt with at the end of the manufacturing account.
- Finished goods- this is the end product derived from the manufacturing account and is transferred to the Trading account where it is sold to make a profit.

<u>Note</u>: All three types of stocks will appear as current assets in the statement of financial Position (Statement of Financial Position)

### 9.7 Factory cost of finished goods.

When all production costs have been accumulated, the end result is the factory cost of finished goods also known as the production cost of goods completed. The whole purpose of a manufacturing account is to determine the cost of production which is summary is derived as:

Cost of production=Prime cost + factory overheads + Opening work in progress-Closing work in progress.

### **Additional information**

1. Inventories as at 28 February 2011 were:

Raw materials30 000Work-in-progress18 900Finished goods117 000

2. Depreciation is to be provided on non-current assets at the rate of 10% per annum on cost. The annual depreciation is to be apportioned as follows:

Administration 1/10

Factory 8/10

Selling and distribution 1/10

- 3. Bad debts of \$1 800 are to be written off.
- 4. The Provision for credit loses is to be increased to \$4 500.
- 5. Accruals and prepayments as at 28 February 2011 were as follows:

|                                   | Accruals | Prepayments |
|-----------------------------------|----------|-------------|
|                                   | \$       | \$          |
| Administration expenses           | 600      | 300         |
| Selling and distribution expenses | 2 100    | 300         |

### **Required:**

- a) Prepare a Statement of comprehensive income and Statement of financial Position of Natalie Joseph as at 28 February 2011.
- b) State what is meant by the term "direct" in each of the elements of prime cost.

### **Suggested Solution**

### **Natalie Joseph**

- The module is well presented as far as information from page 108 up to the end is concerned. Just leave out the introduction and take everything else as it is. Its excellent
- Change <u>example 1</u> from the module to

### Example 2

- Add this information before example 1

### How to eliminate provision for unrealised profit from unsold stock

### Step 1

Find out what the mark-up/margin is on the unsold stock of finished goods. This is done by finding the amount of factory profit from the manufacturing account like this.

### **Transfer price less production cost of finished foods** (Optional x 100)

Transfer price of finished goods

This model will give you the margin.

Alternatively you can find the mark up by making the denominator the production cost of finished goods.

### Step 2

Because the Closing inventories of finished goods already contains an element of profit you have to use the margin to determine the amount of unrealised profit like this.

Margin 
$$\frac{x}{y}$$
 x closing inventory of finished goods

NB: If the margin cannot easily be determined, convert the mark-up to a margin by adding the numerator of the mark-up to the denominator in order to get to margin. The numerator of the margin remains the same as that of the margin e.g. If the mark up is 3/7, the margin will be derived like this.

Mark-up Margin 
$$(3/(7+3) = 3/10$$

Be sure then to deduct the unrealised profit from the inventory of finished goods in the statement of financial position (Statement of Financial Position) in line with the prudence concept. In the Statement of comprehensive income that inventory is reported as it is inclusive of the unrealised profit.

Unrealised profit in closing inventory has to be deducted from the manufacturing profit in the Statement of comprehensive income also in line with the prudence concept and this is done after the net trading profit has been reported.

### 9.8 Unrealised profit

When goods are manufactured at a price lower than the purchase price of the finished product the organisation assumes a manufacturing profit, it is the difference which is the manufacturing profit. The profit is however unrealised if goods are not sold since it is in fact not an actual profit but an assumed profit. The effect is that profits and inventory are overstated. An adjustment must be prudently made to the two, accordingly.

#### Example 1

The following was extracted from the books of Nhengu Enterprises for the year ended 31 December 2000.

|                           | φ       |
|---------------------------|---------|
| Purchases of raw material | 258 000 |
| Fuel and light            | 21 000  |
| Administration salaries   | 17 000  |
| Factory wages             | 59 000  |
| Carriage outwards         | 4 000   |
|                           |         |

| Rent & rates                                    | 21 000  |
|---|---------|
| Discount received                               | 500     |
| Sales   | 492 000 |
| Returns inwards                                 | 7 000   |
| General office expenses                         | 9 000   |
| Repairs to plant machinery                      | 9 000   |
| Inventory at 1 January 2000: Raw materials      | 21 000  |
| Work in progress                                | 14 000  |
| Finished goods                                  | 23 000  |
| Trade creditors                                 | 47 000  |
| Capital account                                 | 423500  |
| Freehold premises                               | 410 000 |
| Plant and machinery                             | 80 000  |
| Provision for depreciation on plant & machinery | 8 000   |
| Trade debtors                                   | 20 000  |
| Cash at bank                                    | 11 000  |
|   |         |

### Additional information

- a) Goods are transferred to the warehouse at cost plus 10%.
- b) Inventory in hand as at 31 December 2000

Raw materials \$25 000 Work in progress \$11 000 Finished goods \$28 600

- c) Depreciation on plant and machinery is provided at the rate of 10% using the straight-line method.
- d) 80% of fuel and light and 75% of rent and rates to be charged to the factory.
- e) Outstanding amount of \$ 4 000 on fuel and light
- f) Doubtful debts provision of 2.5 % of Debtors.
- g) Rent and Rates paid in advance is \$5 000.

### Required

Prepare the Statement of comprehensive income for the year ended 31 December 2000 and a Statement of Financial Position as at that date

## Solution

### Nhengu Manufacturing account for the year ended 31 December 2000.

|                                    | \$            | \$             |
|------------------------------------|---------------|----------------|
| Opening inventory of raw materials |               | 21 000         |
| Add purchases of raw materials     | <u>2</u>      | <u>258 000</u> |
|                                    |               | 79 000         |
| Less closing inventory             | <u>25 000</u> |                |
| Cost of materials consumed         | 254 000       |                |
| Add Factory wages                  | <u>59 000</u> |                |
| Prime cost                         | 313 000       |                |
|                                    |               |                |
| <u>Factory overheads</u>           |               |                |

#### Statement of changes in equity for the period ending 31 December 2000

 Capital

 Balance at 1 January 1999
 460 000

 Add net profit
 50 500

 Balance at 31 December 2000
 510 500

**Notes:** 

- Closing inventory must then be entered excluding the unrealised profit. Mark up on cost is  $^{1}\!/_{10}$ 

Unrealised profit in closing inventory

$$= \frac{1}{11} \times 28 600$$

= \$2 600

This must be deducted from closing inventory in the Statement of Financial Position and from profit and loss account.

Provision for credit loses =  $2.5\% \times 20000 = $500$ 

Factory Profit is debited to cost of production and credited to net profit. When it is a loss the opposite entries are made.

- a) Unrealised Profit
  - DR Statement of comprehensive income
  - CR. Provision for unrealised profit

With full amount in first year of making a provision

b) DR Statement of comprehensive income CR. Provision with increase less margin % x closing inventory less opening provision in the Tri

With increase only

- c) DR Provision
  - CR. Statement of comprehensive income

With decrease only

#### 9.9 Examination type questions

#### 9.10 Multiple – choice questions

1. Information about a business is given

|                                | \$      |
|--------------------------------|---------|
| Production overheads           | 161 000 |
| Opening inventory of raw       | 21 000  |
| materials                      |         |
| Purchases of raw materials     | 245 000 |
| Closing inventory of raw       | 14 000  |
| materials                      |         |
| Production wages               | 231 000 |
| Production supervisor's salary | 14 000  |

What is the prime cost?

- A. \$483 000
- B. \$497 000
- C. \$644 00
- D. \$658 000
- When preparing a manufacturing account, a distinction is made between direct costs and indirect costs. Categorise each of the following items as either direct or indirect costs and choose the option, B, C or D, which correctly categorise all four items.
  - Item 1 Royalties payable relating to the production process in use.
  - Item 2 The cost of acquiring raw materials
  - Item 3 Wages paid to production line operators in respect of the current accounting period
  - Item 4 Wages of a production supervisor

| Item 1                | Item 2 | Item 3 | Item 4   |
|-----------------------|--------|--------|----------|
| A. Direct B. Indirect | Direct | Direct | Direct   |
|                       | Direct | Direct | Direct   |
| C. Indirect           | Direct | Direct | Indirect |
| D. Direct             | Direct | Direct | Indirect |

- 3. Goods in a manufacturing company are charged out from the factory to the warehouse at production cost plus a mark-up of 25%. At 1 September 1998 the balance on the provision for unrealised profit account is \$182 000. At 31 August 1999 the closing inventory of finished goods is \$718 200. What is the effect of the entry in the Provision for unrealised Profit account on 31 August 1999?
  - A. A decrease in profit of \$2 450
  - B. B decrease in profit of \$38 360
  - C. C increase in profit of \$2 450
  - D. D increase in profit of \$38 360

4. A manufacturing company calculates factory profit at 20% of cost of production. The following information is available.

|                                     | Statement of<br>Financial<br>Position as at 31<br>December 2002 | Manufacturing<br>a/c for the year<br>ended 31<br>December 2002 | Trading Account for<br>the year ended 31<br>December 2002 |
|-------------------------------------|---|--|---|
|                                     | \$  | \$   | \$  |
| Inventory of finished goods         | 200 000   | -  | -   |
| Cost of goods produced              | -   | 1 200 000  | -   |
| Closing inventory of finished goods | -   | -  | 270 000   |

How much would be credited in the Profit & loss Account for the year ended 31 December 2002 as factory profit?

- A. \$195 000
- B. \$200 000
- C. \$235 000
- D. \$240 000
- 5. The following relate to a factory

Carriage inwards
Depreciation of factory machinery
Machine operators' wages
Insurance of machinery
Royalties on production

Which items make up factory overhead?

- A. 1 and 2
- B. 2 and 3
- C. 2 and 4
- D. 4 and 5
- 6. Goods in a manufacturing company are charged out from the factory to the warehouse at production cost plus a mark-up of 25%. At I September 1998 the balance on the Provision for Unrealised Profit account is \$182 000. At 31 August 1999 the closing inventory of finished goods is \$718 200. What is the effect of the entry in the Provision for Unrealised Profit account on 31 August 1999?
  - A. Decrease in profit of \$2 450
  - B. Decrease in profit of \$38 360
  - C. Increase in profit of \$2 450
  - D. Increase in profit of \$38 360

# 9.11 Structured questions

#### **Question 1**

D. Mustafa is a manufacturer of wedding and graduation gowns. On 31 December 1996, he provided you with the following information.

|                                    |                  | \$      |
|------------------------------------|------------------|---------|
| Opening inventory, 1 Jan. 1996 –   | Raw materials    | 13 600  |
|                                    | Work in progress | 14 000  |
|                                    | Finished goods   | 23 000  |
| Closing inventory, 31 Dec. 1996 –  | Raw materials    | 12 500  |
|                                    | Work in progress | 16 900  |
|                                    | Finished goods   | 19 800  |
| Raw materials purchases            |                  | 143 600 |
| Manufacturing wages                |                  | 21 300  |
| Royalties and patent fees          |                  | 6 000   |
| Factory maintenance                |                  | 10 000  |
| Sales of finished goods            |                  | 308 000 |
| Repairs to plant and machinery     |                  | 5 600   |
| Administration expenses            |                  | 14 000  |
| Factory rent and rates             |                  | 5 000   |
| Selling expenses                   |                  | 12 000  |
| Factory power                      |                  | 2 300   |
| Carriage on purchases              |                  | 1 300   |
| Depreciation of plant and machiner | у                | 3 580   |
| Bad debts written off              |                  | 500     |

You are required to prepare for the year ended 31 December 1996.

- (a) The manufacturing account, showing clearly the cost of raw materials consumed & prime cost and cost of production.
- (b) The trading account.

#### **Question 2**

Prepare a Manufacturing Statement of comprehensive income of N. Esther Ltd for the year ended 30 September 2005 from the details below.

|                                 | \$        | \$ |
|---------------------------------|-----------|----|
| Inventory at 30 September 2004: |           |    |
| Raw materials                   | 900 000   |    |
| Work in progress                | 750 000   |    |
| Finished goods                  | 780 000   |    |
| Factory wages: direct           | 1 800 000 |    |
| Indirect                        | 180 000   |    |
| Purchase: direct materials      | 4 500 000 |    |

| Indirect materials   | 90 000    |            |
|--|-----------|------------|
| Carriage inwards   | 324 000   |            |
| Factory overheads  | 486 000   |            |
| Sales  |           | 12 150 000 |
| Office salaries  | 786 000   |            |
| Other administration expenses                                | 1 350 000 |            |
| Debentures interest paid                                     | 45 000    |            |
| Dividends paid: ordinary shares                              | 30 000    |            |
| 8% preference shares   | 48 000    |            |
| Provision for unrealised profit                              |           | 156 000    |
| Freehold premises at cost                                    | 3 900 000 |            |
| Provision for depreciation- freehold                         |           |            |
| Premises   |           | 540 000    |
| Manufacturing plant and machinery@                           |           |            |
| Cost   | 2 400 000 |            |
| Provision for depreciation-manufacturing plant and machinery |           | 1 200 000  |
| Office equipment at cost                                     | 1 140 000 |            |
| Provision for depreciation-office                            |           |            |
| Equipment  |           | 300 000    |
| Trade debtors  | 1 182 000 |            |
| Trade creditors  |           | 552 000    |
| Bank balance   | 915 000   |            |
| Issued share capital:  |           |            |
| Ordinary shares of \$30 each                                 |           | 3 000 000  |
| 8% redeemable preference shares of \$15 each                 |           | 1 200 000  |
| Share premium  |           | 750 000    |
| 10% debenture inventory (2012-2014)                          |           | 900 000    |

General reserve 300 000

Retained profit b/d 558 000

#### Additional information

- (i) Inventory at 30 September 2005 valued at lower of cost and net reliable value: Raw materials \$882 000; Work in progress \$1 125 000; finished goods \$1 188 000.
- (ii) Carriage inwards relates wholly to the purchase of direct materials.
- (iii) Finished goods are transferred from the factory to the warehouse at a mark-up of 20%.
- (iv) The factory occupies 75% of the freehold premises and the administrative offices occupy the remainder.
- (v) Depreciation policies:

Freehold premises 4% per annum on cost

Plant and machinery 30% per annum on net book value

Office equipment 15% per annum on net book value.

- (vi) The freehold premises have been professionally revalued at 30 September 2005. This revaluation is to be incorporated in the accounts.
- (vii) \$300 000 is to be transferred to the General Reserve.
- (viii) The directors propose a final dividend of \$0.90 per share on the ordinary shares together with a further 6-month preference dividend, both dividends to be paid on 1 December 2005.

# CHAPTER 10

# INVENTORY VALUATION

#### 10.1 End of chapter objectives

By the end of this chapter you should be able to:

- 1. State the basis in which inventory is value and the reason thereof.
- 2. Describe the International Accounting Statement applied when valuing inventory.
- 3. Calculate the value of inventory using FIFO, LIFO and AVCO.
- 4. State the advantages and disadvantages of FIFO, LIFO and AVCO.
- 5. Distinguish between adjusting and non-adjusting events.

#### 10.2 IAS 2 - Inventory valuation

This deals with valuation of inventory. It requires inventory to be valued at the lower of cost and net realisable value. The term cost is included in any expense involved in bringing the goods to present location and condition e.g. these include the purchase price less any trade discounts plus carriage inwards, import duty, freight charges, handling costs etc. Net realisable value is the actual or expected selling price less any cost involved in selling the goods.

#### Example 1

From the following calculate the value of inventory

| <b>Product</b> | Cost | Net Realisable Value (NRV) |
|----------------|------|----------------------------|
|                | \$   | \$                         |
| A              | 200  | 230                        |
| В              | 180  | 165                        |
| C              | 90   | 120                        |

For us to choose the correct value, we compare the cost with the NRV and take the lower as the value of each class of inventory.

#### Solution

|                | \$        |
|----------------|-----------|
| A              | 200       |
| В              | 165       |
| C              | <u>90</u> |
| Required Value | 455       |

#### Example 2

The closing value of inventory for ABC LTD as on 31 December 2001 was \$28 800. Included in this is an item of inventory that cost \$800 and can only be sold for \$900 after repairing it at a total cost of \$250.

#### Required

Calculate value of inventory.

#### **Solution**

We first determine the Net realisable value of the item market price \$900 less \$250 = \$650. Since this is lower than cost, the lower value should be taken as follows.

```
$28\ 800 - 800 + 650 = 28\ 650.
```

The value of manufactured goods is determined by adding, direct material, direct labour and proportion of overhead based on normal capacity.

#### Let's consider the following example

An item was bought for \$2 000. The cost of carriage amounted to \$140. The retailer's normal mark-up is 25% but due to a technical fault on the item, it needs some attention at a cost of \$400 of which it can be sold at \$1 700 after advertising it at a total cost of \$200.

The value of inventory can be calculated as follows:

Cost \$2000 + \$ 140 \$2 140 \$1 700 - \$400 - \$200 \$1 100

The value of the item in inventory is \$1 100 since it is the lower as compared to the cost of \$2 140.

The above methods of inventory valuation should be used in conjunction with the following methods of inventory control to get the actual value of inventory at the end of the period.

#### 10.3 Methods of inventory control

There are various methods of inventory control that have been put in place by various authors. The methods of inventory control that we are looking at here are; FIFO, LIFO & AVCO. Some authors refer them as inventory valuation methods. We would want the students to see this difference by the end of this chapter.

#### First In First Out (FIFO)

Net Realisable value

The first goods to be received are the first ones to go out. The method is commonly used by retailers of perishable goods like fruits, vegetables and bread. There is however a danger of them not maintaining the quality of the goods by issuing out shoddy products. The government's tax department has recommended this method of inventory control as it does not understate taxable income, thereby more revenue to be collected by the state in times of rising prices.

#### Example

The following information relate to the movement of Mr. R. Bingo's category Z of inventory during the month of February 2002. His selling price is maintained at \$150 per unit.

| IN        |                             | OUT    |                |
|-----------|-----------------------------|--------|----------------|
| 1 Feb     | Balance b/d 14 @ \$100 each | 5 Feb  | Sold 6 @ \$150 |
| 3 Feb     | Bought 6 @ \$125 each       | 9 Feb  | Sold 5 @" "    |
| 9 Feb     | Bought 10 @ \$120 each      | 21 Feb | Sold 4 @ " "   |
| 28 Feb    | Bought 7 @ \$135 each       | 28 Feb | Sold 10 @ " "  |
| Purchases | s = \$2 895                 | Sales  | = \$3 750      |

#### Method A

The value of closing inventory will be calculated as follows using this FIFO method of inventory valuation, using the perpetual inventory approach.

| Date   | Inventory In       | Inventory Out | Inventory Value   |  |
|--------|--------------------|---------------|-------------------|--|
| 1 Feb  | Bal b/d 14 @ \$100 |               | 14 @ \$100 \$1400 |  |
| 3 Feb  | 6 @ \$125          |               | 14 @ \$ 100       |  |
|        |                    |               | 6 @ \$125         |  |
| 5 Feb  |                    | 6 @ \$150     | 8@ \$100          |  |
|        |                    |               | 6 @ \$125         |  |
| 9 Feb  | 10 @ \$120         | 5 @ \$150     | 3 @ \$100         |  |
|        |                    |               | 6 @ \$125         |  |
|        |                    |               | 10 @ \$120        |  |
| 21 Feb |                    | 3 @ \$150     | 5 @ \$125         |  |
|        |                    | 1 @ \$150     | 10 @ \$120        |  |
| 28 Feb | 7 @ \$135          | 5 @ \$150     | 5 @ \$120         |  |
|        |                    | 5 @ \$150     | 7 @ \$135         |  |

The value of inventory at the end of Feb. 2002 under FIFO is \$1 545.

Please note that the concept of cost and net realisable has been used. For valuing inventory, we were considering the lower of the two. In all cases, the cost was lower, therefore giving the value of the inventory. Suppose the cost of inventory bought on the 28<sup>th</sup> of Feb cost \$155 each unit and the selling price remains the same. The value of goods was going to be calculated at \$150 as follows:

| Date   | Inventory In | Inventory Out | Inventory Value |  |
|--------|--------------|---------------|-----------------|--|
| 28 Feb | 7 @ \$155    | 5 @ \$150     | 5 @ \$120       |  |
|        |              | 5 @ \$150     | 7 @ \$150       |  |

The inventory value is now \$1 650

#### Method B

Periodic inventory approach

| opening balance (units)   | 14        |
|---------------------------|-----------|
| Total bought              | <u>23</u> |
|                           | 37        |
| <u>Less</u> Sales (Units) | <u>25</u> |
| Units in stock at end     | <u>12</u> |

These units in stock at end (12 units) should be the last or latest stock made up of 7 @ \$135 and 5 @ \$120 = \$1545.

#### **Last In First Out (LIFO)**

Each time when goods are sold or dispatched, they are said to be from the last lot of goods just received on or before that date. When there are no enough inventories on the last lot, the balance of goods is said to come from the previous lot still unsold. This method of inventory control is commonly used on the valuation of fashionable goods like clothes, radios, motor vehicles etc. The effect of this method is that the reported profit would be low in times of rising prices.

Let's look at our example of Mr. R. Bingo's category of inventory

**Method** A – Perpetual valuation approach

| Date        | Inventory In       | Inventory Out | Inventory Value   |
|-------------|--------------------|---------------|-------------------|
| 1 Feb 2002  | Bal b/d 14 @ \$100 |               | 14 @ \$100 \$1400 |
| 3 Feb 2002  | 6 @ \$125          |               | 14 @ \$ 100       |
|             |                    |               | 6 @ \$125         |
|             |                    |               | Total = \$2 150   |
| 5 Feb 2002  |                    | 6 @ \$150     | 14@ \$100         |
|             |                    |               | Total = \$1 400   |
| 9 Feb 2002  | 10 @ \$120         | 5 @ \$150     | 14 @ \$100        |
|             |                    |               | 5 @ \$120         |
|             |                    |               | Total = \$2 000   |
| 21 Feb 2002 |                    | 4 @ \$150     | 14 @ \$100        |
|             |                    |               | 1 @ \$120         |
|             |                    |               | Total = \$1 520   |
| 28 Feb 2002 | 7 @ \$135          | 10 @ \$150    | 12 @ \$100        |
|             |                    |               | Total = \$1 200   |

The value of closing inventory is \$1 200

#### **Method B** – Periodic Inventory Approach

The Closing inventories (12 u nits) should be at the earliest / first to be bought.

12 @ \$100 = \$1 200

#### Average Cost (AVCO)

Upon the receipt of the goods, the average cost for each item of inventory is re-calculated. The new value would be the value of each item of inventory. This method is common to goods like spanners, bricks, petrol and paraffin. The method is suitable for business which do not have a policy on the issue of goods. Using this method, Mr. Bingo's Category Z product may be calculated as follows:

**Method A** – Perpetual valuation approach

| Date        | Inventory In       | Inventory Out | Inventory Value              |
|-------------|--------------------|---------------|------------------------------|
| 1 Feb 2002  | Bal b/d 14 @ \$100 |               | 14 @ \$100                   |
|             |                    |               | Total = \$1400               |
| 3 Feb 2002  | 6 @ \$125          |               | 14 @ \$ 100                  |
|             |                    |               | 6 @ \$125                    |
|             |                    |               | AVCO = \$107.50              |
|             |                    |               | Total = $20 \times 107.50$   |
|             |                    |               | \$2 150                      |
| 5 Feb 2002  |                    | 6 @ \$150     | 14@ \$107.50                 |
|             |                    |               | Total = \$1 505              |
| 9 Feb 2002  | 10 @ \$120         | 5 @ \$150     | 14 @ \$107.50 = \$1 505      |
|             |                    |               | 10 @ \$120 = \$1 200         |
|             |                    |               | AVCO = \$112.71              |
|             |                    |               | Total = $19 \times \$112.71$ |
|             |                    |               | \$2141.49                    |
| 21 Feb 2002 |                    | 4 @ \$150     | 15 @ \$112.71                |
|             |                    |               | Total = <b>\$1 690.65</b>    |
| 28 Feb 2002 | 7 @ \$135          | 10 @ \$150    | 15 @ \$112.71 \$1 690.65     |
|             |                    |               | 7 @ \$135 \$945.00           |
|             |                    |               | AVCO = \$119.80              |
|             |                    |               | Total = 12 @ \$119.80 =      |
|             |                    |               | \$1437.60                    |
| L           |                    |               |                              |

The value of inventory under AVCO is \$1 437.60.

The following is an illustration of the profit figures being reported by the three methods of inventory control

#### Method B - Periodic Inventory Approach

Calculate average purchase price

$$(14 \times \$100) + (6 \times \$125) + (10 \times \$120) + (7 \times \$135)$$

37

 $1\ 400 + 750 + 1\ 200 + 945$ 

37

<u>4 295</u>

37

= \$116.08

Total value =  $12 \times 116.08 = 1392.96$ 

#### **Trading account for the month of February 2002**

|                        | FI           | FO                | LI           | LIFO AVCO |                | CO     |
|------------------------|--------------|-------------------|--------------|-----------|----------------|--------|
|                        | \$           | \$                | \$           | \$        | \$             | \$     |
| Sales                  |              | 3 740             |              | 3 750     |                | 3 750  |
| Less cost of sales     |              |                   |              |           |                |        |
| Opening inventory      | 1 400        |                   | 1 400        |           | 1 400          |        |
| Add purchases          | <u>2 895</u> |                   | <u>2 895</u> |           | <u>2 895</u>   |        |
|                        | 4 295        | 0                 | 4 295        |           | 4 295          |        |
| Less closing inventory | 1 5452 75    | <u>0</u><br>1 000 | 1 2003 095   |           | 1 437.62 857.4 |        |
| Gross profit           |              |                   |              | 655       |                | 892.60 |
|                        |              |                   |              |           |                |        |

For all along, we have assumed that inventory taking is done on the last day of the accounting period. It is common in practice for organizations to take inventory either before or after the financial year end and reduce disruption of business activities. If stock-take is done this way, the Closing inventories figure is calculated as follows:

#### 10.4 Inventory-take done before the financial year-end

Due to various reasons, stock-taking can be done before the financial year end. If inventory take is done before the end of the accounting period, you determine your correct inventory-take figure as follows:-

#### Illustration 1

Susan Ndlovu whose financial year ends on 31 December 2006 carried out her annual stock-taking on the 25<sup>th</sup> of December in order to proceed on holiday. On that day inventory in the factory at cost price was valued at \$89 100.

#### **Additional information**

- a) The average ratio of gross profit to sales was 25%
- b) Purchases made during the period 25 to 31 December totaled \$11 900
- c) Purchases returns totaled \$2000 on 29 December
- d) Sales totaled \$60 000 during the same period
- e) Sales returns made on 28 Dec. totaled \$12 000

It was discovered that some goods included in the above figure were damaged and had cost \$900. They could be sold for \$750. Goods on sale or return (not included the inventory take figure above) were valued at \$10 000 at selling price were sent to a customer on 24 December.

#### Required

Calculate the value of closing inventory on 31 December.

#### **Solution**

|   | \$      |
|---|---------|
| Inventory as at 25 December                       | 89 100  |
| Add purchases                                     | 11 900  |
| Add sales returns 12 000 less 25%                 | 9 000   |
| Add goods on sale on return basis 10 000 less 25% | 7 500   |
|   | 117 500 |
| Less  |         |
| Sales 60 000 less 25%                             | 45 000  |
| Purchase returns                                  | 2 000   |
| Less inventory write down (900 – 750)             | 150_    |
| Inventory at 31 December                          | 70 350  |

#### 10.5 Inventory taking done after the financial year – end

When inventory take is taken after year end, the inventory take figure is determined as follows:

| Sales as per account |                       | 2 | K |
|----------------------|-----------------------|---|---|
| Add:                 | Sales reduced to cost | , | X |

|       | Purchases return                       | X        |
|-------|--|----------|
|       | Goods on sale or return                | <u>x</u> |
|       |  | X        |
| Less: | Purchases                              | X        |
|       | Sales returns                          | <u>X</u> |
|       | Value of closing inventory at year end | X        |

# 10.6 IAS 10 - Contingencies and events after the Statement of Financial Position date.

This deals with post Statement of Financial Position events. Post Statement of Financial Position events that are both favourable and unfavourable are events which occur between the Statement of Financial Position date and the date on which accounts are authorised or approved by the boards of directors. There are of two types, namely adjusting events and non-adjusting events.

#### Adjusting events

These provide additional evidence on conditions existing at the Statement of Financial Position date and require us to change the accounts, e.g. insolvent of a debtor, sale of inventory below cost, permanent decline in the value of property, plant and equipment, changes in tax rates, discovery of fraud or errors which shows that the financial statements were incorrect.

#### **Non-adjusting events**

These are post Statement of Financial Position events, which concern conditions, which did not exist at the Statement of Financial Position date. With these, we do not change the accounts but we disclose by way of note e.g. destruction of property, plant and equipment or inventory by flood, issue of shares and debentures, strikes etc.

It deals with accounting for contingencies. A contingency is a condition, which exists at the Statement of Financial Position date whose outcome will be confirmed only by the occurrence or non-occurrence of one or more certain future events. For example, corporation tax disputes, failure by another party to pay a debt which the company has guaranteed and a legal action which has been brought against the company. It requires a contingency loss. This is shown by way of note. If the probability of the event occurring is remote, ignore the event. A contingent gain should not be included in the financial statements but should be disclosed as a note, if it is probably that the gain will be realised.

#### 10.7 Examination type questions

#### 10.8 Multiple Choice

1. A company has two items in inventory, which require to be repaired before sale.

|        | Cost \$ | Cost \$ Selling price \$ Repair |     |
|--------|---------|---------------------------------|-----|
|        |         |                                 |     |
| Item 1 | 5 260   | 7 600                           | 880 |
| Item 2 | 2 360   | 2 450                           | 190 |

What is the total inventory value of these items?

A. \$6 550

B. \$7 620

C. \$7 520

D. \$8 980

2. A business was started on 1 January. The purchase and sales of inventory for January were:

| Date       | Purchases   | Sales       |
|------------|-------------|-------------|
|            |             |             |
| 4 January  | 3 @ \$800   | -           |
| 13 January | -           | 2 @ \$1 600 |
| 26 January | 3 @ \$1 000 | -           |
| 28 January | -           | 2 @ \$ 1600 |

The business used the first in first out (FIFO) method of inventory valuation.

What was the gross profit for January?

- A. \$2 600
- B. \$2 800
- C. \$3 000
- D. \$4 600
- 3. A business ends its financial year on 31 December 2004. The inventory was not counted until 10 January 2005 when it was found to be \$312 000 at cost. The following transactions took place from 1 to 10 January 2005.

\$

Inventory purchased 48 000
Inventory sold at selling 45 000
price

Inventory is sold at a mark-up of 25%

What was the value of inventory at 31 December 2004?

- A. \$297 750
- B. \$300 000
- C. \$324 000
- D. \$326 250
- 4. A company uses the Weighted Average Cost (AVCO) method of inventory valuation. During January the following transactions took place.

| January |  | Total \$ |
|---------|--|----------|
| 1       | Opening inventory of 100 units @ \$2.00 per unit | 200      |
| 12      | Received 150 units @ \$2.10 per unit             | 315      |
| 15      | Issued 100 units                                 | -        |
| 27      | Received 50 units @ \$2.20 per unit              | 110      |

What is the value of inventory at 31 January?

- A. \$440
- B. \$419
- C. \$420
- D. \$425
- 5. A company sells goods on sale or return at a mar- up of 25%. At the Statement of Financial Position date the following information is available.

Goods in warehouse \$150 000 (Cost) \$150 000 (cost)

Goods sent on sale or return \$100 000 (at invoice price)

What will be the value of closing inventory in the company accounts?

- A. \$150 000
- B. \$225 000
- C. \$230 000
- D. \$250 000
- 6. According to IAS 10, Contingencies and Post Statement of Financial Position events certain events must be disclosed in the notes to the financial statements. To which of the following does this rule apply?
  - A. An insolvency of a debtor, existing at Statement of Financial Position date
  - B. Destruction of a factory by fire after the year end, resulting in no production.
  - C. Sale of inventory after the year- end at a material loss.
  - D. Valuation of property, providing evidence of a permanent diminution in value at year-end.
- 7. Showing property, plant and equipment in the Statement of Financial Position at cost less aggregate depreciation, and inventory at net realizable value or cost, whichever is lower is in adherence to the concept of
  - A. Materiality
  - B. Money measurement
  - C. Realisation
  - D. Going concern
- 8. The value of a firm's inventory at the end of an accounting period is found by
  - A. Stock-taking physically
  - B. Taking the balance from the inventory account, inventory register or inventory sheet.
  - C. Deducing the total of the firm's purchases from that of the sales
  - D. Deducing the firm's cost of sales from the total of its sales.

#### 10.9 Structured questions

#### **Question 1**

a) IAS 10 covers Contingencies and events occurring after Statement of Financial Position date. Place each of the following events in the relevant column below.

|   | Adjusting event | Non adjusting event | Neither |
|---|-----------------|---------------------|---------|
| <ul> <li>i. Government nationalisation of<br/>property, plant and equipment on the<br/>Statement of Financial Position.</li> </ul>  |                 |                     |         |
| ii. The sale of property, plant and equipment after the Statement of Financial Position date at a much lower price than it was stated on the draft Statement of Financial Position. |                 |                     |         |
| iii. The sale of inventory after the Statement of Financial Position date a much lower price than it was stated on the draft Statement of Financial Position.                       |                 |                     |         |
| iv. The takeover of a rival company after the Statement of Financial Position date.   |                 |                     |         |

- b) Distinguish between an 'adjusting event' and a 'non-adjusting event' according to IAS 10. Limbo Ltd produces a range of pharmaceutical products. At the Statement of Financial Position date the following information is available:
  - i. Ms. Tshuma took one of the company's products and then felt drowsy when driving home from work. She crashed her car and suffered serious injury which she claims were due to the medication she took. There were no warnings on the product packaging concerning possible side effects and the company's legal advisors believe that Ms Tshuma has a good chance of winning the forthcoming court case and that the court would agree to the damages claim of \$8 000, 000, 00.
  - ii. Another company, Felix Ltd, has launched a new product which Limbo Ltd believes infringes its patent rights. The company's legal advisors are confident the current court case will find in favour of Limbo Ltd and the damages requested of \$20 000 000 would be awarded.
- iii. Mr. Ncube drank one of the company's cleaning products by mistake and became violently ill. The packaging on the product stated clearly that it was not for internal consumption. The company's legal advisors do not think that there is much chance that the claim before the courts for damages of \$3 000 000 would be accepted.

What accounting treatment and disclosure would you recommend for each of the above?

c) What is a 'contingency' as defined by IAS 10 Contingencies and events occurring after Statement of Financial Position date? How does a contingency differ from a post Statement of Financial Position event?

#### **Question 2**

Philani Sibanda's first 6 months of trading showed the following purchases and sales of inventory.

| 2003     | Purchases        | Sales            |
|----------|------------------|------------------|
| January  | 380@ \$455 each  |                  |
| February |                  | 240 @ \$574 each |
| March    | 200 @ \$483 each |                  |
| April    |                  | 290 @ \$595 each |
| May      | 330 @ \$504 each |                  |
| June     |                  | 300 @ \$630 each |

Calculate Philani's profit for the 6 months ended 30 June 2003 using the following methods of inventory valuation.

- (a) FIFO (First In First Out)
- (b) LIFO ( Last In Last Out)
- (c) AVCO (Weighted Average Cost). Calculate to 2 decimal places.

#### **Question 3**

Mary Nkosi is in business as a retailer and her financial year end is 30 June. She was ill on 30 June 2007. She was unable to carry out her end of year inventory-taking until 9 July.

On 9 July her inventory at cost was valued at \$196 000. Mary's mark-up is 25% on cost. The following transactions took place during the period 1 to 9 July:

| 1. | Sales, invoiced to customers for                 | \$67 | 440 |
|----|--|------|-----|
| 2. | Purchase of goods for resale                     | \$63 | 600 |
| 3. | Goods returned to suppliers                      | \$   | 640 |
| 4. | Goods returned by customers, originally sold for | \$   | 880 |
| 5. | Goods taken for own use at cost                  | \$ 1 | 600 |

- 6. After inventory-taking, Mary discovered the following:
- 7. Included in the valuation were goods awaiting collection by a customer. These had been sold during June for \$4 000.
- 8. Included in the valuation were goods Mary had acquired for \$1 920 on a sale or return basis. She had not yet decided whether to keep them in inventory or return them.
- 9. Included in the valuation at cost was old inventory which had cost \$5 200 but had been damaged during March and was to be sold off for \$3 200.

Draw up a financial statements to show the correct inventory valuation at 30 June 2005.

# **CHAPTER 11**

# INTRODUCTION TO PARTNERSHIP ACCOUNTING

#### 11.1 Chapter objectives

After studying this chapter the student should be able to:

#### 11.2 Introduction

Sole traders may form a partnership in most cases so that they raise more capital. A partnership is regarded as a business entity carried by at least 2 people, maximum 20 people with the objective of making profit and share it using agreed profit and loss sharing ratio, with exception firms of professionals like chartered accountant, solicitors, and etc. were there is no maximum.

#### The Partnership Deed

This is a verbal or written agreement made by the partners before entering into a partnership. The following are the common provisions of this Deed for the purpose of the examination.

- a) Capital to be contributed by each partner.
- b) Profit and Loss sharing ratios.
- c) Salary allowable to partner(s), if any.
- d) Maximum amount of drawings.
- e) Interest charged to partners' drawings.
- f) Interest allowable on partner's capital and loan.

#### 11.3 Partnership Act (1890)

In the absence of the partnership Deed, we apply the provisions of the Partnership's Act (1890) which states that:

- a) Capital contributions should be equal.
- b) Profit and Losses to be shared equally.
- c) No partner entitled to a salary.
- d) No drawings & Interest charged on drawings.
- e) 5% interest allowed to partner's loan or additional capital.

If a question is silent on an provision of the partnership Deed, the Partnership's Act of 1890 should automatically be applied.

#### **Salary**

Salaries should be credited to current account and debited to the Statement of comprehensive income as either administration or selling and distribution costs. Where a salary or part of the salary is paid during the year the amount paid should be debited to the current account, but the annual salary as per partnership agreement should be credited to the current account in full.

#### Interest on Loan from a partner

It is a business expense; it should be debited to the Statement of comprehensive income and credited to partner's current account, where you are given the Net profit before interest from a partner. In an examination, you should adjust for interest before appropriation. If the loan is received partway through the year interest should be apportioned on a time basis.

#### **Interest on Capital**

It should be debited to the Statement of comprehensive income as finance cost and credited to partner's current account. If capital is introduced in the form of cash or other assets partway through the year interest should be time apportioned.

#### 11.4 Capital accounts

Capital accounts represent the contribution made by the partners in the partnership. These contributions need not necessarily be of the same nature. They can be in any of the following from, as noted in chapter 1 of this book.

- Cash
- Assets
- Expenses paid by the partnership on behalf of the partner

A separate capital account must be opened for each partner, in the ledger. Capital accounts must not be combined with current accounts.

#### 11.5 Current accounts or drawing accounts

In addition to the capital account, which shows each partner's permanent investment in the partnership, a current account must be opened for each partner. This account is record of all income accruing to the partner and drawings made against that income. The following are some of the transactions that will be recorded in the current accounts.

- Interest on capital
- Interest on drawings
- Drawings
- Interest on current accounts
- Salary paid to the partner
- Interest on loan

#### Example 1

X and Y are in a partnership sharing profits and losses in the ratio 3:2 after charging interest on capital accounts at the rate of 5% per annum and salaries of \$9 000 and \$6 000 per annum respectively. The capital balances at the beginning of the year X: \$50 000, Y: \$40 000. In their first year of trading the partnership made a loss amounting to \$44 500. The partners do not maintain a separate current a/c.

#### Required: -

#### Prepare:

- a) Partners' Capital Accounts
- b) Statement of changes in equity

#### **Capital Accounts**

|               | X      | Y      |                     | X            | Y            |
|---------------|--------|--------|---------------------|--------------|--------------|
| Share of Loss | 26 700 | 17 800 | Bal. b/d            | 50 000       | 40 000       |
| Balance c/d   | 34 800 | 30 200 | Salary              | 9 000        | 6 000        |
|               |        |        | Interest on capital | <u>2 500</u> | <u>2 000</u> |
|               | 61 500 | 48 000 |                     | 61500        | 48 000       |
|               |        |        |                     |              |              |
|               |        | l      | Balance b/d         | 34 800       | 30 200       |

#### **Statement of changes in equity**

|                     | <u>X</u> | <u>Y</u> | <u>Total</u> |
|---------------------|----------|----------|--------------|
|                     |          |          |              |
| Opening balance     | 50 000   | 40 000   | 90 000       |
| Salary              | 9 000    | 6 000    | 15 000       |
| Interest on capital | 2 500    | 2 000    | 4 500        |
| Share of loss       | (26 700) | (17 800) | (44 500)     |
| Closing balance     | 34 800   | 30 200   | 65 000       |

#### **Notes:**

Where you are given the results of trading for partnership, which are less than a year, annual salaries and annual interest should be apportioned on a time basis. The rate of depreciation is given per annum should also be apportioned.

#### Example 2

- M, N and O are in partnership. Their partnership agreement provides for: -
- a) Interest on drawings 8%
- b) Interest on capital 10%
- c) Salary to M \$9 000
- d) Interest on loan from a partner 15%
- e) Profits or losses to be shared M:5 N:4 O:1

The following is their trial balance as at 31 December 2001 after the preparation of the Statement of comprehensive income.

|                               | DR      | CR.     |
|-------------------------------|---------|---------|
|                               | \$      | \$      |
| Capital - M                   |         | 90 000  |
| N                             |         | 80 000  |

| Drawings - M (1 May 2001)     | 18 000  |         |
| N (30 September 2001)         | 12 000  |         |
| O (31 December 2001)          | 21 000  |         |
|                               | 391 000 | 391 000 |

#### **Additional Information**

Loan from N was received on May 31. Interest on this loan has not been taken into account.

#### Required:-

- i) Profit and loss appropriation account
- ii) Partners' current account
- iii) Statement of changes in equity
- iv) Statement of Financial Position as at 31 December 2001

#### **Solution**

<u>Note:</u> in the above question, we have closing inventory in the trial balance because the Statement of comprehensive income has already been prepared and a figure for net profit is in the trial balance. In most cases it is the opening inventory which is in the trial balance.

|  | \$           |

#### Example 3

Preparing a statement of Comprehensive income account where the trading results are less than a year.

Runia and Sibongile are in partnership business. The results of the first six months ending 30 June 2005 have shown a net profit of \$30 000. The partnership provides for the following provisions: -

- a) Interest on capital 10% per annum
- b) Annual salaries of \$12 000 and \$4 500 respectively.
- c) Profit to be shared in the ratio 2:1.
- d) The opening capital Accounts balances are as follows: Runia \$70 000 and Sibongile \$65 000.

#### Required:

Prepare profit and loss appropriation account for the year ended 30 June 2005

#### **Solution**

Profit And Loss Appropriation Account for the year ended 30 June 2005

|                    |                                   | \$    | \$            |
|--------------------|-----------------------------------|-------|---------------|
| Net profit         |                                   |       | 30 000        |
| Less Salaries: R ( | 12 000 x ½)                       | 6 000 |               |
| S (4               | 4 500 x ½)                        | 2 250 |               |
| Less Interest on c | apital                            |       |               |

| Sibongile (10% x   | 65 000 x <sup>6</sup> /12)        | 3 250 | <u>15 000</u> |
|                    |                                   |       | 15 000        |
|                    |                                   |       |               |
| Share of profit:   | Runia ( <sup>2</sup> /3 x 15 000) |       | 10 000        |
|                    | Sibongile (1/3 x 15 000)          |       | 5 000         |
|                    |                                   |       | 15 000        |

Where a partner or partners guaranteed that one of the partner's share of profit should not be less than a certain figure and after sharing in the normal way. If it amounts to less than the amount agreed, the short fall should be shared by the other partners in their profit sharing ratio excluding the guaranteed partner's ratio.

#### Example 4

How to prepare profit and loss appropriation where the partners guarantee the income partner a minimum share of profit

A, B and C were in partners in construction business. Their partnership agreement provides for annual salaries of \$7 000, \$6 000 and \$5 000 respectively, share of profit 3:2:1. A and B guaranteed that C's share of profit should not be less than \$5 000. In the second year of trading they made a profit \$42 000. The partners' capital balances were:

- A \$75 000
- B \$51 000
- C \$18 000

According to their partnership agreement, they are entitled to interest on capital at 10% p.a. In the year to 30 June 2005, the net profit of the business was \$21 000.

Prepare the appropriation account of the partnership for the year ended 30 June 2005.

#### Required: -

Prepare profit and loss appropriation.

#### Solution: -

|                 | <b>Profit</b> | and loss appropriation for A, B AND C |               |
|-----------------|---------------|---------------------------------------|---------------|
| Net profit      |               |                                       | 42 000        |
| Less Salaries   | A             | 7000                                  |               |
|                 | В             | 6000                                  |               |
|                 | C             | <u>5000</u>                           | <u>18 000</u> |
|                 |               |                                       | 24 000        |
| Share of profit | A             | (12 00 - 600)                         | 11 400        |
|                 | В             | $(8\ 000 - 400)$                      | 7 600         |
|                 | C             | $(4\ 000 +1\ 000)$                    | 5 000         |
|                 |               |                                       | 24 000        |

C's share of profit is falling short by \$1 000. The shortfall should therefore be covered by A and B in proportion to their profit and loss sharing ratios as follows:

#### Example 5

The following trial balance as at 31 December 2002 was extracted from the books of Sam and Moyo after their first 10 months of trading.

|                               | \$      | \$      |
|-------------------------------|---------|---------|
| Capital : Sam                 |         | 120 000 |
| Moyo                          |         | 30 000  |
| Cash drawings : Sam (1 March) | 18 000  |         |
| Moyo (30 November)            | 11 000  |         |
| Sales                         |         | 311 800 |
| Purchases                     | 186 000 |         |
| Wages and salaries            | 36 000  |         |
| Telephone expenses            | 8 600   |         |
| Electricity and water         | 600     |         |
| Rent                          | 24 000  |         |
| Trade creditors               |         | 14 000  |
| Trade debtors                 | 39 000  |         |
| Motor vehicles                | 90 000  |         |
| Furniture and fittings        | 30 000  |         |
| Balance at bank               | 12 000  |         |
| Bank charges                  | 5 000   |         |
| Stationery                    | 15 600  |         |
|                               | 475 800 | 475 800 |

#### **Additional information**

- a) The partnership agreement provided the following
  - i. Interest on capital at the rate of 10% per annum.
  - ii. An annual salary of \$5 000 to be paid to Sam
  - iii. The partnership guarantees Moyo a minimum share of profit of \$10 000, excluding interest on capital.
  - iv. Profit and loses to be shared between Sam and Moyo in the following ratios 4:1 respectively.

- b) Non current assets are depreciated using the reducing balance method at the following rates:
  - i. Motor vehicles 20%
  - ii. Furniture and fittings 10%
- c) Included in the wages and salaries figure is a salary of \$2 000 paid to Sam during the period.
- d) Rent paid was for the year ending 28 February 2003.
- e) Inventory on hand at 31 December 2002 was valued at \$28 000.
- f) A telephone bill of \$400 was not paid until 2 January 2003.
- g) No entry was made in the books for an office desk valued at \$12 000 brought into the business by Moyo on 1 September 2002.
- h) The accounting fees for the preparation of the accounts will be \$9 000.
- i) The accounts have not been adjusted for discount received from trade creditors of \$200 during the year.

\$

\$

#### You are required to prepare

- a) The Statement of comprehensive income for the period ending 31 December 2002,
- b) Statement of changes in equity and
- c) A Statement of Financial Position as at that date.

#### **Solution**

#### Statement of comprehensive income for the period ending 31 December 2002

|   |                  | \$                  | \$        |
|---|------------------|---------------------|-----------|
| Sales                                       |                  |                     | 311 800   |
| <u>Less cost of sales</u>                   |                  |                     |           |

- 4. A partnership maintains fixed capital accounts and current accounts for its partners. What is the correct accounting entry for recording interest on capital for partner X?

|    | Account to be debited             | Account to be credited            |
|----|-----------------------------------|-----------------------------------|
| A. | Statement of comprehensive income | X's Capital                       |
| В. | Statement of comprehensive income | X's current                       |
| C. | X's Capital                       | Statement of comprehensive income |
| D. | X's Current                       | Statement of comprehensive income |

5. Mary and Anne are partners in a business and share profits in the ratio of 3:1. their net profit is \$80 000. The following information is available:

| Mary | Anne |
|------|------|
| \$   | \$   |

| Interest on capitals | 3 000 | 2 500 |
|----------------------|-------|-------|
| Interest on drawings | 500   | 1 000 |

How will the residual net profit be shared?

|   | Mary   | Anne   |
|---|--------|--------|
|   | \$     | \$     |
| A | 57 000 | 19 000 |
| В | 58 875 | 21 125 |
| C | 59 500 | 20 500 |
| D | 60 500 | 19 500 |

6. The following appropriation a/c for a partnership contains one error.

|                                   | \$           | \$             |
|-----------------------------------|--------------|----------------|
| Profit as per profit and loss a/c |              | 169 749        |
| Interest on capital Angel         | 9 000        |                |
| Belta                             | <u>4 500</u> | <u>13 500</u>  |
|                                   |              | 156 249        |
| Salary: Angel                     |              | 8 100          |
|                                   |              | <u>164 349</u> |
| Balance of profit shared          |              |                |
| Angel                             | 109 566      |                |
| Belta                             | 54 783       | 164 349        |

What should Angels' share of the balance of profit be, when the error is corrected.

- A. \$98 766
- B. \$104 166
- C. \$116766
- D. \$126 666

# 11.8 Structured questions

## Question 1

The following information relates to Pick and Spade who are trading as equal partners.

|  | \$      |
|--|---------|
| Capital accounts (fixed): Pick           | 150 000 |
| Spade                                    | 180 000 |
| Current accounts on 1 April 2005         |         |
| Pick (Dr)                                | 6 000   |
| Spade (Cr)                               | 15 000  |
| Long- term loan from Spade               | 120 000 |
| Sundry debtors                           | 159 900 |
| Accumulated depreciation on 1 April 2005 |         |
| - Furniture & equipment                  | 10 500  |

| Furniture & equipment at cost                | 105 000 |
|--|---------|
| Prov. for bad debts: Balance on 1 April 2005 | 6 000   |
| Bad debts recovered                          | 315     |
| Inventory – 1 April 2005                     | 241 500 |
| Purchases                                    | 601 500 |
| Interest on long –term loan                  | 5 400   |
| Stationery                                   | 1 800   |
| Salaries & Wages                             | 19 500  |
| Rent   | 6 000   |
| Cash at Bank                                 | 160 215 |

#### The following are noted:

- a) Make provision for:
  - Interest on capital at 9% annum
  - Interest on current accounts (opening balances) at 7% per annum.
  - A managerial salary of \$18 000 per annum to Spade.
  - A bonus equal to 10% of the distributable profit to Pick.
- b) Bad debts of \$900 are to be written off
- c) The Provisition for credit loses must be maintained at 5% of trade debtors.
- d) Interest of 12% per annum must be provided for the whole year on the long term loan from Spade.
- e) Provide for depreciation at 15% per annum on furniture and equipment on the diminished balance.
- f) Inventory on hand at 31 March 2006:

Merchandise \$183 000

Stationery 300

g) The profit mark-up is 20% on sales

#### **REQUIRED**

- a) Prepare the Statement of comprehensive income account of Pick and Spade for the year ended 31 March 2006.
- b) Prepare the current accounts of Pick and Spade in columns form.

#### **Question 2**

The following details were extracted from the books of the partnership for the year to 30 June 1993:

\$

| Receipts: Cash Sales            | 300 000 |
|---------------------------------|---------|
| Cash received from debtors      | 170 000 |
| Payments : Purchase             | 140 000 |
| Selling expenses                | 30 000  |
| Distribution expenses           | 20 000  |
| Wages and salaries              | 100 000 |
| General expenses                | 15 000  |

|                                 |         |

The following were owing at 30 June 1993

Selling expenses \$6 000

Distribution expenses \$4 000

General expenses \$1 000

Inventory at 30 June was \$20 000

Sales occurred evenly throughout the year and a uniform profit margin was earned on all sales.

# You are required to:

Prepare a Statement of comprehensive incomes of Road, Path and Street and Path and Street in columnar form for the half year ended 31 December 1992 and 30 June 1993 respectively.

**Question 3**Led and Pencil are partners in a manufacturing business who have prepared the following draft Statement of Financial Position from their books of account as at December 2005.

| Property, plant and equipment   | Cost          | Depr          | CA            |
|---------------------------------|---------------|---------------|---------------|
|                                 | \$            | \$            | \$            |
| Freehold buildings              | 24 000        | -             | 24 000        |
| Plant & machinery               | 30 000        | 14 000        | 16 000        |
| Motor Vehicle                   | <u>16 000</u> | 5 400         | <u>10 600</u> |
|                                 | <u>70 000</u> | 19 400        | <u>50 600</u> |
| <u>Current Assets</u>           |               |               |               |
| Inventory                       |               | 10 000        |               |
| Debtors                         |               | 28 000        |               |
| Cash in hand                    |               | 80            |               |
|                                 |               | <u>38 080</u> |               |
| <u>Less</u> Current liabilities |               |               |               |
| Creditors                       | 15 600        |               |               |
| Bank overdraft                  | 5 400         | <u>21 000</u> | <u>17 080</u> |
|                                 |               |               | 67 680        |
|                                 | Led           | Pencil        | Total         |
| Capitals:                       | 40 200        | 20 000        | 60 200        |
|                                 |               |               |               |
| + Profit for the year: Led      | 9 540         | 9 540         | <u>19 080</u> |
|                                 | 49 740        | 29 540        | 79 280        |
| - Drawings                      | 4 000         | 7 600         | <u>11 600</u> |
|                                 | <u>45 740</u> | <u>21 940</u> | <u>67 680</u> |

During the course of your examination of the books you ascertain that adjustments are required for the following items?:

- 1. Freehold buildings are shown at cost less \$6 000 being the proceeds of the sale during the year of premises costing \$7 000.
- 2. Plant & machinery having a net book value of \$430 had been scrapped during the year. The original cost was \$1 230.
- 3. Motor vehicle licenses for a twelve month period costing \$200 had been written off, but did not expire until 30 June 2006.
- 4. Debts to the value of \$1042 were considered to be bad, and a further \$540 doubtful requiring 100% provision. Provision had previously been made for \$1 000 doubtful debts.
- 5. Inventory included at a value of \$3 740 had a net realizable value of only \$2 600, and scrap material having a value of \$660 had been omitted from the inventory valuation. Furthermore, goods totaling \$1 700 received from a supplier on a sale or return basis have been included in closing inventory. It has now come to your attention that 50% of these goods will be returned to the supplier.
- 6. The cashier had misappropriated \$70.
- 7. The cash book included payments amounting to \$6 924, the cheques having been made out but not mailed to suppliers 1 January 2006.
- 8. Interest is to be allowed on partners' opening Capital account balances less drawings during the year at 9%.

#### You are required to

- a. Prepare a summary of adjustments to the profit and loss account for the year ended 31 December 2005 and a revised division of profit between the partners.
- b. Prepare a revised Statement of Financial Position as at 31 December 2005

#### **Question 4**

Mkhululi carriers on business as a sole trader selling office equipment and his Statement of comprehensive income for the year to 31 December 2001 was as follows:

|                           | \$     | \$      |
|---------------------------|--------|---------|
| Sales                     |        | 150 000 |
| Less cost of sales        |        | 87 000  |
| Gross profit              |        | 63 000  |
| <u>Less expenses</u>      |        |         |
| Salaries and wages        | 30 000 |         |
| Rent, rates and insurance | 5 700  |         |
| Heating and lighting      | 3 380  |         |
| Advertising               | 6 000  |         |
| Delivery expenses         | 3 000  |         |
| Sundry expenses           | 3 300  | 51 480  |
| Net profit                |        | 11 520  |
|                           |        |         |

Mkhululi's net profit for the previous two years were:

1999 18 000 2000 14 400

The forecast for the foreseeable future is not good and profits seem set to decline at the same rate as for the past three years. Mkhululi has been trading in old equipment, which is gradually becoming obsolete due to technological advancements. He has employed Sipho as a manager since January 1999 at a salary of \$12 000 per annum. Sipho previously worked for a high technology firm and has acquired considerable knowledge and experience in selling laptops, microcomputers and word processors.

In order to arrest the decline in his profits, Mkhululi is now considering taking Sipho into partnership and making him responsible for marketing laptops, micro-computers and word processors as a new line of business. Sipho would introduce \$30 000 into the business as capital and would continue to receive his present salary in addition to ½ share of the balance of profits.

The two partners agreed on interest on capital at the rate of 10% p.a. In addition, Mkhululi's capital account balance at 31 December 2001 was \$75 000. If Sipho is admitted as a partner, to manage the new line of business whilst Mkhululi continues to manage the existing business, the following results are forecast.

|              | Existing business | New business |
|--------------|-------------------|--------------|
|              | \$                | \$           |
| Sales        | 120 000           | 150 000      |
| Gross Profit | 69 600            | 30 630       |

Further, it will be necessary to engage a new sales assistant at an annual salary of \$9 000. The insurance premium will increase by \$750 p.a. Advertising and delivery expenses will each increase by 50%.

#### You are required to:

- a) Prepare a forecast Statement of comprehensive income for the year to 31 December 2002 assuming Mkhululi takes Sipho into partnership.
- b) State whether in your opinion, Mkhululi should admit Sipho as a partner with reasons.
- c) Give your views on the proposed profit sharing arrangements and, in particular, whether or not you think Sipho would be justified in accepting only 1/3 share of the balance of profits.

# **CHAPTER 12**

# PARTNERSHIP CHANGES

# 12.1 Chapter objectives

After studying this chapter the student should be able to:

- **a. A** Prepare the revaluation account.
- **b.** Prepare the capital accounts of the partner after a change.
- **c.** Prepare the Statement of Financial Position of the new partnership.

#### 12.2 Introduction

A partnership is said to have changed when there is a change in the partnership agreement. This may happen when there is an introduction of a new partner, when one partner retires or when the partners themselves mutually agree to change the partnership agreement, for example they can change the profit/loss-sharing ratio. Partners in the old partnership are regarded differently from partners in the new partnership irrespective of their previous identity. In all the cases there is a need to revalue assets, which requires the opening of Revaluation and Goodwill Accounts which are explained below.

# 12.3 Changes in the Assets and Liabilities (Revaluation)

When a partner is admitted, in most cases, the old partners revalue the assets and liabilities. When assets are revalued upwards, we debit the asset and credit revaluation A/C, when they are revalued downwards we debit revaluation account and credit the assets. A revaluation account is a temporary account where we record increases/ decreases in the value of assets before they are shared by only old partners in their old profit and loss sharing ratios.

#### Revaluation Account

| Decrease in assets Increase in Provision for credit loses                   | XXX<br>XXX | Increases in assets Decrease in liabilities                             | XXX<br>XXX |
|---|------------|---|------------|
| Increase in liabilities   | XXX        | Provision for depreciation  | xxx        |
| Costs relating to partnership changes<br>Profit on revaluation (difference) | XXX<br>XXX | Decrease in Provision for credit loses Loss on revaluation (difference) | XXX<br>XXX |
|   |            |   |            |

The profit or loss on revaluation is determined as a balancing figure. If the difference is on the debit side it is a profit, if on the left it is a loss which should be shared by the partners only in their old profit or loss-sharing ratio. The adjustment for goodwill and asset revaluation on admission or retirement of the partners should be dealt with in the partners' capital Accounts.

When a partner is admitted, he can bring

#### 1) Cash only.

In this situation, we account for it as follows:

DR. Bank / Cash CR. Capital

#### 2) Cash and other assets

A is admitted into the partnership of D and E who shared profit and loss equally. The value of goodwill agreed was \$18 000 and profits and losses to be shared in the ratio 3:2:1. He was required to bring \$60 000 including his share of goodwill. As part of his contribution he has brought into the partnership plant and machinery valued at \$40 000 and the balance in cash. The capital balances of D & E was D \$90 000, E \$80 000.

This is accounted for as follows:

| DR  | Plant and Machinery | 40 000 |
|-----|---------------------|--------|
| DR  | Cash                | 20 000 |
| CR. | Capital             | 60 000 |

### 12.4 Goodwill account

Goodwill is an intangible asset, which arises due to good reputation. When there is a partnership change, it is valued by the old partners. There are two treatments of goodwill, which are: -

- 1. Goodwill can be retained in the books of the partnership by debiting the Goodwill Account and crediting Capital Accounts of the old partners in proportion to their old profit/loss sharing ratios.
- 2. Goodwill can be written off in the books of the partnership by first recording it, as above and then write it off by debiting capital accounts of new partners in proportion to their new profit and loss sharing ratios and credit goodwill account.

Negative goodwill should be transferred to non-distributable reserve if there is no positive goodwill that can be used to make a set-off.

### Illustration

D and E are in partnership sharing profits and loss in the ratio 3:1 respectively. The following is their Statement of Financial Position, as at 31 May 2002.

| Statement of Financial  | Position, | as at 51 May 2 | 002.          |
|-------------------------|-----------|----------------|---------------|
|                         |           | \$             | \$            |
| Property, plant and equ | iipment   |                |               |
| Premises                |           |                | 80 000        |

#### **Additional information**

- 1. F was admitted into the partnership on 1 June 2002. He brought with him the following, Motor vehicle valued at \$50 000, Receivables \$25 000, cash \$15 000. Profit and loss ratio to be 3:2:1 respectively. Goodwill was valued at \$36 000.
- 2. The assets of the partnership were valued as follows:

a. Premises \$100 000b. Inventory \$35 000

- 3. A Provision for credit loses of 5% of the Receivables was required,
- 4. Goodwill was not shown in the books.

- Required
  1. A revaluation account
  - 2. Capital accounts
  - 3. The opening Statement of Financial Position of the new firm.

 $\frac{\textbf{Solution}}{\textbf{On the debit side of revaluation A/c we record decreases and on the credit side we record the increases in$ the value of assets.

# 12.5 Admission of a partner during the year

Where a partner is admitted partway through the year income and expenses should be apportioned as per question, in the absence of a specific policy, they should be apportioned on a time basis.

### **Example**

Edison and Austin were in partnership sharing profits and losses in the ratio 3:2. They admitted Sam on 30 September 1999; they agreed to share profit & Loss as follows Edison 6; Austin 2; Sam 2. The trial balance as at that date is given below.

#### Trial balance as at 31 December 1999.

| <u> </u>                                   | DR             | CR.     |
|--|----------------|---------|
| CAPITAL ACCOUNTS                           | \$             | \$      |
| Edison                                     |                | 130 000 |
| Austin                                     |                | 90 000  |
| Sam  |                | 50 000  |
| Sales                                      |                | 280 000 |
| Purchases                                  | 150 000        |         |
| Accounts payables                          |                | 20 000  |
| Inventory                                  | 18 000         |         |
| Wages                                      | 13 500         |         |
| Provision for depreciation: Plant & equip. |                | 22 100  |
| Motor vehicle                              |                | 9 000   |
| Telephone expenses                         | 5 000          |         |
| Loan from Sam                              |                | 4 000   |
| Bad debts                                  | 500            |         |
| Electricity & water                        | 41 000         |         |
| Rent                                       | 40 000         |         |
| Plant & Equipment, at cost                 | 160 000        |         |
| Motor Vehicle, at cost                     | 50 000         |         |
| Provisition for credit loses               |                | 2 000   |
| Stationery                                 | 600            |         |
| Accounts receivables                       | 79 000         |         |
| Bank                                       | <u>49 500</u>  |         |
|  | <u>607 100</u> | 607 100 |

#### **Notes:**

Closing inventory was valued at \$42 000 bad debts arose before the admission of Sam. All other expenses and incomes accrue evenly through the year. Reduce Provisition for credit loses to \$1 560. Sam brought a motor vehicle worth \$20 000 and the balance of \$30 000 in cash. Motor vehicles are depreciated at the rate of 20% on straight line, and plant and equipment at 10% reducing balance method.

#### Required

- (a) Prepare the Statement of comprehensive income for the year ended 31 December 1999.
- (b) Profit and loss appropriation account.

**SOLUTION**

|                                     |             |                |         |               |           |
|                                     |             | <u>8 913</u>   |         | 837           |           |
|                                     |             |                |         |               |           |

# Notes to the solution

- 1. Depreciation of motor vehicle brought by Sam is charged for 3 Months only.
- 2. When a partnership agreement does not cover one of the items, the Partnership Act applies. This is the reason why interest on loan from a partner was charged at 5%.
- 3. Sam is not entitled to a share of profit in the first 9 months because he was not a partner.
- 4. The expenses are apportioned on a time basis except when directed otherwise by the question.

# 12.6 Admission of partner with assets and liabilities

When a partner is admitted with assets and liabilities we make the following accounting entries.

DR assets

CR. Capital

And

DR Capital

CR. Liabilities

### **Illustration**

R and S are in partnership as retailers of blankets and they admitted T on the  $1^{st}$  of January 2002 as the  $3^{rd}$  partner. He was required to contribute \$48 000 as his capital. T brought in the partnership his motor vehicle valued at \$43 000, inventory \$15 000 and liabilities \$10 000.

# Required: -

Prepare the Capital Account for T.

| Capital | l account - 🛚 | Г |
|---------|---------------|---|
|---------|---------------|---|

| Liabilities<br>Bal. c/d | 10 000<br><u>48 000</u><br><b>58 000</b> | Motor Vehicle<br>Inventory | 43 000<br>15 000<br>58 000 |
|-------------------------|--|----------------------------|----------------------------|
|                         |  | Bal. B/d                   | 48 000                     |

# 12.7 Retirement of a partner

When a partner retires, assets should be revalued, including goodwill.

#### Example

B, C. and D were in partnership sharing profits and losses in the ratio 6:3:1. D retired from the partnership as from 28 February 2000 and the value of goodwill is agreed at \$40 000. The assets were valued as follows: -

|                      | \$     |
|----------------------|--------|
| Inventory reduced by | 2 000  |
| Accounts receivables | 20 000 |
| Premises             | 85 000 |

# The Statement of Financial Position as at 28 February 2000

| Property, plant and equip   | <u>oment</u>  |               |
|-----------------------------|---------------|---------------|
| Premises                    |               | 70 000        |
| Fixtures and Fittings       |               | 60 000        |
|                             |               | 130 000       |
| Current Assets              |               |               |
| Inventory                   | 30 000        |               |
| Receivables                 | 35 000        |               |
| Bank                        | <u>10 000</u> | <u>75 000</u> |
| Total assets                |               | 205 000       |
|                             |               |               |
| <b>EQUITY AND LIABILI</b>   | TIES          |               |

# 12.8 Retirement and admission of a partner at the same time

In this situation you should deal with retirement first before admission.

Mary, Sisa and Musa are in a partnership, sharing profit and losses equally. On 1 September 1998 Musa retired and Thabani was admitted on the same day. Thabani paid \$40 000 into the bank. The new profit and loss sharing ratio will be 3:2:1. Goodwill was valued at \$24 000. Below is the Statement of Financial Position of Mary, Sisa and Musa as at 31 August 1998.

| Property, plant and equipment    | 180 000       |
|----------------------------------|---------------|
| Net Current Assets (except bank) | 20 000        |
| Bank                             | 40 000        |
|                                  | 240 000       |
|                                  |               |
|                                  |               |
| Capital Accounts:Mary            | 150 000       |
| Sisa                             | 60 000        |

# 12.9 Examination type questions

# 12.10 Multiple choice questions

- 1. X, Y and Z are in business sharing profits in the ratio 3:2:1. At the end of the year, the balance on Y's Capital Account is \$197 000. Y retires at the end of the year and, to determine his settlement, the assets are revalued upwards by \$285 000. The partnership does not account for goodwill. If Y takes a car valued at \$24 000 as part of his settlement, what is the balance remaining on his capital account to be settled in cash?
  - A. \$197 000
  - B. \$222 000
  - C. \$268 000
  - D. \$295 000
- 2. A and B are partners in business and share profits and losses equally. They decide to admit C as a partner. The new profit-sharing ratio between A, B and C is to be 3:2:1. Goodwill is valued at \$72 000 and is not to be retained in the firm's books. What will be the goodwill in the partner's capital accounts?

|   | <u>Debit</u> |        |        | Credit |        |        |
|---|--------------|--------|--------|--------|--------|--------|
|   | A            | В      | C      | A      | В      | C      |
|   | \$           | \$     | \$     | \$     | \$     | \$     |
| A | 24 000       | 24 000 | 24 000 | 36 000 | 24 000 | 12 000 |
| В | 36 000       | 24 000 | 12 000 | 24 000 | 24 000 | 24 000 |

- 3. X and Y are partners sharing profits equally. On the admission of Z as a partner, goodwill is agreed at \$162 000 and they agree to share profits equally. What is the effect of this change on the capital account of X?
  - A. Decrease \$27 000
  - B. Decrease \$54 000
  - C. Increase \$27 000
  - D. Decrease \$54 000

# 12.11 Structured questions

### **Question 2**

On 31 March 1996 the Statement of Financial Position of X and Y who shared profits and losses in the ratio of 2:1 was as follows:

|                               | \$      | \$      |
|-------------------------------|---------|---------|
| Property, plant and equipment |         | 120 000 |
| Current assets excluding cash | 270 000 |         |
| Cash at bank                  | 30 000  |         |
|                               | 300 000 |         |
|                               |         |         |
| Less Current liabilities      | 240 000 | 60 000  |
|                               |         | 180 000 |
|                               |         |         |
| Financed by:                  |         |         |
| Capitals X                    |         | 120 000 |
| Y                             |         | 60 000  |
|                               |         | 180 000 |
|                               |         |         |

On 1 April 1996 X and Y decided to admit Z as a partner who brought in \$90 000, half of which was for his share of goodwill. It was agreed that X and Y would immediately withdraw the cash credited to their respective capital accounts for the goodwill purchased by Z.

# You are required to

- a) Prepare the partner's capital accounts.
- b) Prepare the opening Statement of Financial Position of the new partnership.

#### **Question 3**

Lee and Anita are partners sharing profits and losses in the ratio of 3:2. The business Statement of Financial Position as at 31 December 1997 was as follows.

|                               | \$      | \$      |
|-------------------------------|---------|---------|
| Property, plant and equipment |         |         |
| Property                      |         | 200 000 |
| Equipment                     |         | 50 000  |
|                               | _       | 250 000 |
|                               |         |         |
| Current Assets                |         |         |
| Inventory                     | 50 000  |         |
| Debtors                       | 25 000  |         |
| Cash                          | 40 000  |         |
|                               | 115 000 |         |
|                               |         |         |
| Current liabilities           |         |         |
| Creditors                     | 115 000 | -       |
|                               |         | 250 000 |
| Financed by                   | _       |         |
| Capitals: Lee                 |         | 150 000 |
| Anita                         |         | 100 000 |
|                               | _       | 250 000 |
|                               |         |         |

Lee and Anita agree to admit Ben, subject to the following revaluation being incorporated into the books.

- a] Properly to be revalued to \$350 000
- b] Equipment and inventory to be revalued to \$60 000 and \$40 000 respectively.
- c] A Provisition for credit loses of \$2 500 is to be created.
- d] Goodwill is estimated to be worth \$100 000.

Ben is to bring in capital of \$150 000, being represented by vehicles of \$50 000, inventory of \$25 000, debtors of \$15 000, cash of \$20 000 and goodwill of \$40 000.

The new profit sharing ratio is to be in the ratio of 3:2:2 for Lee, Anita and Ben respectively.

# You are required to

- **a.** Prepare the revaluation account.
- **b.** Prepare the capital accounts of the new business.
- **c.** Prepare the Statement of Financial Position of the new partnership.

# **Question 4**

Road, Path and Street were in partnership as general dealers. They make up their accounts annually to 30 June. At 30 June 1992, their Statement of Financial Position was as follows:

#### **Additional information**

1. The partner's policy was to provide for depreciation of property, plant and equipment on cost as follows:

Freehold Premises 2½%

Motor Vehicles 20%

Office Machinery 25%

- 2. Road received a salary of \$50 000 p.a. and the partners were allowed interest on capitals at 10% p.a. Interest on drawings is charged at 10% p.a. Profits and losses are shared in the ratio of Road ½ Path ¼ and Street ¼.
- 3. On 31 December 1992, Road retired and the partner's agreed that Road should take over one of the firm's vehicles at a valuation of \$20 000. The vehicle had been purchased for \$40 000 on 1 July 1991. Of the amount due to Road on his retirement, \$150 000 should be transferred from his capital a/c to a loan account carrying interest at 10% per annum. The balance on his capital account was paid to him on 31 December 1992.
- 4. At 31 December 1992, the property, plant and equipment should be revalued as: Freehold premises \$300 000, Motor vehicles (other than the one take by Road) \$30 000 and office machinery \$20 000.
- 5. Goodwill to be valued at \$100 000 but not to be recorded in the books.
- 6. Path and Street would continue as partners after Road's retirement on the following conditions:
  - i. The balances on their current accounts at 31 December 1992 should be transferred to their capital accounts as at that date. They would then adjust the balances on their capital accounts on that date to \$125 000 after the transfer from the current account has been completed. Partners would have to pay in or withdraw from the firms' bank account in order to adjust their capital accounts.
  - ii. Path and Street would share Road's duties between them, for which Path would receive a salary of \$35 000 and Street \$15 000 p.a.
  - iii. Profits and losses to be shared equally.
  - iv. Depreciation on the property, plant and equipment would still be charged on the old rates but based on the new valuations.

The following details were extracted from the books of the partnership for the year to 30 June 1993:

|  | \$      |
|--|---------|
| Receipts: Cash sales                     | 300 000 |
| : Cash received from debtors             | 170 000 |
| Payments:                                |         |
| Purchases                                | 140 000 |
| Selling expenses                         | 30 000  |
| Distribution expenses                    | 20 000  |
| Wages and salaries                       | 100 000 |
| General expenses                         | 15 000  |
| Drawings to 31 December 1992:            |         |
| Road                                     | 20 000  |
| Path                                     | 30 000  |
| Street                                   | 25 000  |
| Drawings from 1 January to 30 June 1993: |         |
| Path                                     | 20 000  |
| Street                                   | 25 000  |
| Trade receivables at 30 June 1993        | 25 000  |
| Trade payables at 30 June 1993           | 35 000  |

The following were owing at 30 June 1993:

- (i) Selling expenses \$6 000
- (ii) Distribution expenses \$4 000
- (iii) General expenses \$1 000

Inventory at 30 June was \$20 000

Sales occurred evenly throughout the year and a uniform profit margin was earned on all sales.

#### Required

Prepare statement of comprehensive income of Road, Path and Street in columnar form for the half year ended 31 December 1992 and 30 June 1993 respectively.

#### **Ouestion 5**

Mum and Dad, who make up their accounts to 30 September each year, carried on business in partnership under the firm name of family. Their partnership agreement provided.

- 1. Profits and losses to be shared Mum 2/3 and Dad 1/3
- 2. Interest on capital to be allowed at the rate of 6% per annum but no interest should be allowed or charged on current accounts.
- 3. On the retirement or admission of a partner:
  - (i) If the change takes place during the year, such partners share of profits or losses for the period up to retirement or from admission is to be arrived at by apportion on a time basis except where otherwise agreed.
  - (ii) No account for goodwill is to be maintained in the books.
  - (iii) Any balance due to an outgoing partner is to carry interest at 8% per annum from the date of his retirement to the date of payment.

Mum retired from the firm on 31 March 2002 and on the same day Dad took into partnership Son, an employee of the firm. It was agreed that the terms of the previous partnership agreement should apply in all respects except that, as from that date, profits or losses are to be shared Dad 3/5 and Son 2/5.

| The trial balance extracted from the books of the firm as at 30 September 2002 was as follows: |
|--|
|--|

|   | \$                      | \$      |
|---|-------------------------|---------|
| Capital accounts – 30 September 2001          |                         |         |

#### **Additional Information:**

- 1. Goodwill on 31 March 2002 was agreed to be \$36 000.
- 2. On 31 March 2002, Son had paid Mum \$15 000 on account of the balance due to her on retirement. No entire have been made in the books in respect of this payment. The balance due to Mum after taking into account this payment remained unpaid as on 30 September 2002.
- 3. Mum on retirement had taken over one of the firm's motor vehicles and it was agreed that she should be charged for it at its written down value at the date of her retirement. The vehicle had cost \$4 200 and up to 30 September 2001 depreciation of \$1 875 had been provided on it.
- 4. The inventory as on 30 September 2002 was valued at \$42 600.
- 5. Partners' drawings which are included in salaries were as follows:

  Mum \$5 400 Dad \$7 200 Son \$2 700
- 6. Salaries also included \$3 600 paid to Son prior to being admitted as a partner and which amount to be charged against the profits of the first half of the year.
- 7. Professional charges of \$750 included in trade expenses are specifically attribute\le to the second half of the year.
- 8. The whole of the charge of \$1 800 for bad debts related to the period ending 31 March 2002.
- 9. A bad debts provision specifically attributable to the second half of the year of 5% of the total debts is to be made as at 30 September 2002.
- 10. On 30 September 2002, rent paid in advance amounted to \$1 200 and traded expenses accrued amounted to \$540.
- 11. Provision is to be made for depreciation on plant and machinery and on motor vehicles at the rates 10% and 25% per annum respectively, calculated on cost.

### **REQUIRED**

- a. Prepare A Statement of comprehensive income for the year ended 30 September 2002.
- b. Prepare the partners' capital and current account covering the year ended 30 September 2002.
- c. Prepare the Statement of Financial Position as at 30 September 2002

### **Question 5**

Somandla and Thabani are partners who share profits and losses equally. At 31 December 2003 their Statement of Financial Position was as follows:

|                                     |               | \$            | \$            |
|-------------------------------------|---------------|---------------|---------------|
| Property, plant and equipment:      | Premises      |               | 50 000        |
| Motor Cars                          |               |               | 20 000        |
| Furniture                           |               |               | 3 000         |
|                                     |               |               | 73 000        |
| Current Assets: Inventory of work - | - in progress | 10 000        |               |
| Debtors                             |               | 24 000        |               |
| Bank                                |               | 6 000         |               |
|                                     |               | 40 000        |               |
| Current liabilities: creditors      |               | 4 000         | <u>36 000</u> |
|                                     |               |               | 109 000       |
| Capitals:                           |               |               |               |
| Somandla                            |               | 50 000        |               |
| Thabani                             |               | <u>50 000</u> | 100 000       |
| Current accounts: Somandla          |               | 6 000         |               |
| Thabani                             |               | 3 000         | 9 000         |
|                                     |               |               | 109 000       |

Gift, their senior clerk, was admitted as a partner on 1 January 2004 and he introduced \$25 000 as capital plus his private car which was valued at \$6 000 on the same day. The following revaluations were agreed in:

| Premised to be revalued at    | \$65 000 |
|-------------------------------|----------|
| Motor cars of the old firm at | \$17 500 |
| Furniture at                  | \$500    |

The partners agreed that a Provision for credit loses of 5% of outstanding debtors should be created.

The new profit sharing ratio was to be Somandla 2/5 Thabani 2/5 and Gift 1/5.

Goodwill was to be revalued at \$25 000 but was not to be recorded in the books.

# Required

- a) Journal entries to record the entries in the accounts of the partnership on the admission of Gift.
- b)
- The partners' capital accounts as at 1 January 2004.

  The opening Statement of Financial Position of the firm of Somandla, Thabani and Gift. c)

# **CHAPTER 13**

# DISSOLUTION OF PARTNERSHIP

# 13.1 Chapter objectives

After studying this chapter the student should be able to:

- a) Prepare a realisation account.
- b) Prepare a Bank/cash a/c
- c) Prepare partners' capital accounts

#### 13.2 Introduction

Unlike a limited liability company a partnership does not have an infinite life. At some point in time, the partnership will terminate. The following are some of the factors leading to partnership dissolution

- Low demand for product
- The death of one of the partners
- Mutual agreement of the partners The partners could decide among themselves to dissolve the partnership
- Attainment or lapse of the purpose for which the partnership was originally formed.
- Passage of time a partnership formed for a certain period of time will automatically dissolve when the time has lapsed.
- Retirement of old partners
- Insolvency of the partnership or one of the partners
- Unlawful acts by partners
- A partnership is automatically dissolved when the number of partners has exceeded 20. this will result in the formation of a company.
- Other events stipulated in the partnership agreement may necessitate the termination of a partnership.

# 13.3 Accounting procedure

Where a partnership is dissolved for whatever reasons a realization account is opened. It is debited with the net book value of assets except bank and Cash and credited with liabilities, as well as amounts realised from the dissolution.

a) Dissolution costs

**DR** Realisation

CR. Bank

b) Assets taken over by partner

c) Liabilities taken over by partner

Dr. Realisation account

Cr. Capital account

d) Discount received from creditors:

**DR** Creditors

CR. Realisation

Discount allowed to debtors e)

> **DR** Realisation CR. Debtors

f) When assets are sold

DR Bank

CR. Realisation

### Realisation A/C format looks like this:

#### Realisation account

| XXX | Sales value of assets                | XXX  |
|-----|--------------------------------------|--|
| XXX | Discount received                    | XXX  |
| xxx | Assets taken over at take over value | XXX  |
| XXX | Balancing figure (Loss)              | XXX  |
| XXX |                                      |  |
| XXX |                                      |  |

  - C. Share the amount of the loan among the partners in their profit & loss sharing ratios.
  - D. Repay the loan from the trading profits of the year when the business closes down.

# 13.6 Structured Questions

### **Question 1**

Mary and Joseph were in partnership sharing profits and losses in the ratio of 3:1 respectively. The Statement of Financial Position for the partnership at 31 March 2005 was as follows:

# Statement of Financial Position as at 31 March 2005

\$

Property, plant and equipment

Plant and Equipment 222 000

Motor cars 39 000

261 000

Current Assets

Inventory 111 600

Debtors 55 800

Bank 14 400

181 800

Less Current liabilities

Creditors 72 000 109 800

370 800

Less long-term loan from Mary 36 000

334 800

Financed by

Capitals: Mary 180 000

Joseph 126 000 306 000

**Current Accounts** 

Mary 27 000

Joseph 1 800 28 800

334 800

The partners agreed to dissolve their partnership on 31 March 2005. The loan from Mary was repaid, the creditors were paid \$70 200 in full settlement. Joseph took over one vehicle for \$6 000 and the remaining assets realised the following amounts:

| Plant and equipment | \$276 000 |
|---------------------|-----------|
| Vehicles            | \$ 21 000 |
| Inventory           | \$102 600 |
| Debtors             | \$52 200  |

You are required to prepare the following ledger accounts to record the dissolution of the business.

- d) The Realisation account.
- e) The Bank a/c
- f) The partners' capital accounts.

#### **Question 2**

Black and White have been sharing profits and losses equally in their partnership for many years. Black feels he needs to migrate and so they decided to dissolve their business on 31 March 2005. Their Statement of Financial Position on that date was as follows.

| Property, plant and equipment | \$       | \$      |
|-------------------------------|----------|---------|
| Premises                      |          | 80 000  |
| Office                        |          | 85 000  |
|                               | <u>-</u> | 165 000 |
| <u>Current Assets</u>         |          |         |
| Debtors                       | 280 000  |         |
| Cash                          | 180 000  |         |
|                               | 460 000  |         |
| Less current liabilities      |          |         |
| Creditors                     | 275 000  | 185 000 |
|                               |          | 350 000 |
| Financed by                   | =        |         |
| Capitals: Black               |          | 200 000 |
| White                         |          | 150 000 |
|                               | -        | 350 000 |
|                               | -        |         |

# Additional information

- 1. The debtors paid up \$270 000 in full and final settlement.
- Premises realised \$40 000 and office fittings \$95 000.
   Dissolution expenses amounted to \$10 000.
- 4. Creditors were paid \$255 000.

# To close the business books prepare:

- a] The realisation accounts.
- b] The capital accounts.
- c] The cash account.

# **CHAPTER 14**

# ACCOUNTS FOR LIMITED LIABILITIES

# **COMPANIES**

# 14.1 Chapter objectives

After studying this chapter the student should be able to:

- 1. State the contents of the memorandum and articles of association.
- 2. Distinguish between private and public companies.
- 3. Distinguish between the ordinary shares and preference shares, shares and debentures and issued share capital and authorised share capital.
- 4. Explain the differences between reserves and provisions as well as revenue reserves and capital reserves citing examples for each.
- 5. List the contents of the director's report and the auditor's report.
- 6. Prepare the Statement of comprehensive income and statement of changes in equity of a limited company.
- 7. Draw up the Statement of Financial Position of a limited company.
- 8. Prepare a statement of changes in equity.

#### 14.2 Introduction

A company is a legal entity, which is formed by registration under the Companies Act [Chapter 24: 03], in Zimbabwe. The registration is achieved by making an application to the Registrar of Companies, which should be accompanied by two statutory documents namely, the Memorandum of Association and the Articles of Association.

#### 14.3 The memorandum and the articles of association

The Memorandum governs the company with outside world. The following are the provisions, which should appear in the memorandum:

- a) The name of the company, which shall have *limited* as the last word.
- b) The objectives of the company.
- c) A statement that the liability of members is limited
- d) The amount of share capital with which the company propose to be registered.
- e) Registered office of the company (domicile).

The Articles of Association contain rules that regulate the internal affairs of the Company. In the absence of written down articles, the company can adopt all or any of Table A articles in the First Schedule of the Act. The following are some of the articles:

- a) The transfer of shares.
- b) Forfeiture of shares.
- c) Conversion of shares into stock.
- d) Powers and duties of directors.
- e) Disqualification of directors.
- f) Proceedings at general meetings.
- g) Votes of members.

## 14.4 Private and public companies

Two types of limited companies can be formed under the Zimbabwean Companies Act namely companies limited by guarantee and those limited by shares. At this level we only deal with companies limited by shares. A company limited by shares is one in which the liability of the member is limited to the maximum amount of capital paid or credited on the shares received. We have two types, Private Company and Public Company.

The following are some of the attributes of a private company:

- a) It is prohibited by the Act to offer its shares to the public for subscription.
- b) It restricts the transfer of shares.
- c) An individual can form a private company.
- d) The number of its members is limited to fifty.
- e) Cannot trade its shares on the Stock market.

With a public company,

- a) It is allowed to offer its shares to the public for subscription.
- b) The shares can be traded on the stock market.
- c) There is no limit to the number of members forming a public company. The limit is set by the shares on offer for subscription.
- d) A minimum of 7 members can form a public company.

# 14.5 Ordinary and preference share capital

People who buy shares in a company are known as shareholders. The capital that shareholders invest in a company is known as share capital. A limited company can be registered with different classes of share capital. The main classes of share capital are ordinary shares and preference shares. These shares give rise to ordinary and preference share capital. The following are some of the characteristics of the ordinary shares and ordinary shareholders:

#### **Ordinary shares**

- a) Ordinary shares carry voting rights.
- b) Ordinary shares do not carry a fixed rate of dividend.
- c) Ordinary share dividend is paid after preference dividend and is proposed by the directors of the company at each annual general meeting. The shareholders do not have the power to force the company to pay them a dividend if the director decides not to pay them.
- d) An ordinary share is irredeemable.
- e) Ordinary shares are traded on the stock market, in the case of a public company.
- f) Ordinary shares are used to measure the value of the company.

# **Ordinary shareholders**

- a) Ordinary shareholders are owners of the company.
- b) All reserves belong to ordinary shareholders.
- c) Ordinary shareholders vote at meetings

Preference share and preference shareholders have the following characteristics:

#### Preference shares

- a) They do not carry voting rights.
- b) If a preference share dividend is in arrears for 3 consecutive years, preference shareholders are given some voting rights.

- c) Preference shares are not always redeemable. Where they are redeemable there should have been issue on the term that there are liable to be redeemed.
- d) Cannot be traded on the stock market.
- e) Carries a fixed rate of dividend, which should be paid whether the company has made some profits, or not.
- f) Preference share dividend is paid before the ordinary share dividend is paid.
- g) Preference shares are of two types that are cumulative and non- cumulative. Cumulative preference shares are entitled to receive all the arrears dividends before ordinary shareholders receive any dividend. Non-cumulative preference shares are not entitled to any arrears dividend.

### **Preference shareholders**

- a) Preference shareholders are technically creditors to the company.
- b) Preference shareholders do not ordinarily vote at the annual general meeting unless if their dividend is in arrears for the past 3 consecutive years or are participating preference shares.

#### **Authorised share capital**

This is the maximum share capital that a company may issue as authorised by the Registrar of Companies. It is also known as the registered or nominal capital.

#### **Issued Share Capital**

These are shares issued to shareholders and can be less than or equal to the Authorised Share Capital. In return for their investment, the shareholders will receive a dividend that is a share of profit. They are of two types; interim and final.

#### 14.6 Debentures

A company, in addition to the issued share capital, can also issue debentures which represent a loan to the company carrying a fixed rate of interest per annum based on the nominal value and should be paid whether a company makes a profit or not. Debentures are not part of the share capital. These are long-term debt funding. Debenture holders are not owners of the company but rather they are creditors to the company. Debentures carry a fixed rate of interest e.g. 10% Debentures. 10% percent is the rate of interest on those debentures. The debenture interest is an expense to the company not an appropriation of profits.

### 14.7 Final Accounts of a limited company

The manufacturing and trading accounts of limited companies are basically the same as those of sole traders and partnerships. Refer to **Chapter 1** for a template of the financial statements of a company.

In addition to the normal revenue and expense, the profit and loss account of a limited company also shows the following expenses:

- 1) Directors' emoluments these are the salaries and fees paid to the company directors. They are charged to the profit and loss accounts because directors are employees of the company.
- 2) Debenture interest
- 3) Auditors' remuneration
- 4) Income from investment which is dividends or interest received from another company in which the company bought shares or debentures
- 5) Preliminary expenses or goodwill written off.

#### 14.8 Provision and Reserves

A provision is an amount of pre-tax profit set aside for a known expense whose amount is uncertain e.g. Provision for depreciation, Provision for bad and doubtful debts, and Provision for damages on a case which is before the law courts whose outcome is uncertain but there is a greater probability of our losing the case. A reserve is any post tax profit set aside which is not a provision e.g. general reserve, distribution

reserve, however, there are other reserves which do not arise from profit but from the requirement of the Company's Act e.g. share premium. Provision can be distinguished from revenue in that provisions are entered in the Statement of comprehensive income as expenses (in case of increases) and as income (in case of decreases) whereas reserves are appropriation of profits.

#### 14.9 Reserves

Reserves are of two types, capital reserve, which are non-distributable reserves, which are created as per requirements of Company's Act e.g. share premium, capital redemption reserve and revaluation reserve. While revenue reserves are distributable reserves and are created on the discretion of the directorate e.g. retained profit and general reserve.

#### 14.9.1 Revenue reserves

They are sometimes referred to as distributable reserves, in the sense that they can be used to pay for cash dividends to shareholders. They may also be used to provide for additional working capital, business expansion. As explained earlier, transferring some funds from the appropriation account to such a reserve creates a revenue reserve.

#### 14.9.2 Capital reserves

A capital reserve is sometimes referred to as a non-distributable reserve because it cannot be used to pay cash dividends. It is created by the requirements of the Companies Act. The following are some of the examples of capital reserves.

#### **Share premium**

This reserve is created when shares are issued at a price that is above their nominal value. Lets suppose that shares with a par value of \$1 are being issued at a price of \$1.50. The par value of \$1 per share should be transferred to share capital account whilst the balance of \$0.50 is transferred to a share premium account.

### **Capital redemption reserve**

This reserve is created when shares are being redeemed out of internally generated funds. It is created for the protection of creditors whose interests are secured by the fixed capital of the business. It is created by transferring an amount equal to the nominal value of shares being redeemed from a suitable revenue reserve to the capital redemption reserve.

#### **Revaluation reserve**

This reserve is created when property, plant and equipment change in value resulting in a higher value. Lets take an example of land and buildings with a net book value of \$450 000. If they are valued to \$500 000, the difference of \$50 000 should be transferred to a revaluation account.

Example 1

The Trial balance of Makuvaza limited as at 31 March 2002

| \$ \$<br>Land & Building 85 920               | 000 |

| Cash on hand                                  |     |
| 295 700 295                                   | 700 |

## Notes: -

- 1. Inventory at 31 March 2002 was valued at cost at \$ 9 000
- 2. Motor vehicles are depreciated using the reducing balance method at 20%
- 3. Rent prepaid \$500 and wages & Salaries accrued \$3 300.
- 4. Provision for credit loses to be 4 % of Receivables
- 5. Tax of \$2 200 is to be provided.
- 6. The directors proposed the following:
  - a. To transfer \$2 000 to general reserve
  - b. To pay a dividend of 10% on ordinary shares.

# Required

- 1) Statement of comprehensive income for the year ended 31 March 2002.
- 2) Statement of Financial Position as at 31 March 2002
- 3) Statement of changes in equity for the year ended 31 March 2002

The accounts should be presented in accordance with IAS 1.

# Solution

| Balance c/fwd at 31/03/02          | 85 000          | 48 000            | 2 000          | 9 880          | 144 880      |

### **Tutors Notes**

- 1) A tax provision that is provided for is a current liability because it will be payable in the next financial year. In most cases in a period of not more than 9 months from the Statement of Financial Position date.
- 2) Part of the preference dividend (final) together with the ordinary dividend will also be paid in the next financial year.
- 3) Half of the debenture interest remained unpaid at the end of the year.

Total debenture interest 10% of \$50 000 = 5 000 Less Debenture interest paid  $\frac{2500}{2500}$ Current liability  $\frac{2500}{2500}$ 

### 14.10 Published accounts

All the financial statements prepared so far for limited liability companies, were for internal use only. Large public companies, in addition to accounts prepared for internal use by management, would prepare a set of accounts for publication. It is easier to prepare accounts for publication by summarising the information from accounts for internal use. The following is how the Statement of comprehensive income for publication should be presented in accordance with IAS 1:

Revenue \$xxx

| Cost of sales                  | XXX   |
|--------------------------------|-------|
| Gross profit                   | XXX   |
| Other operating income         | XXX   |
| Distribution costs             | (xxx) |
| Administrative expenses        | (xxx) |
| Other operating expenses       | (xxx) |
| Profit from operations         | XXX   |
| Finance cost                   | (xxx) |
| Income from associates         | XXX   |
| Profit before tax              | XXX   |
| Income tax payable             | (xxx) |
| Profit after tax               | XXX   |
| Extra ordinary items after tax | XXX   |
| Net profit for the period      | XXX   |
|                                |       |

The following is how the Statement of Financial Position should be presented in accordance with the standard

|  | \$  | \$  |
|--|-----|-----|
| Property, plant and equipment                |     | XXX |
| Goodwill                                     |     | XXX |
| Long term investments                        |     | XXX |
|  |     | XXX |
| <u>Current assets</u>                        |     |     |
| Inventories                                  | XXX |     |
| Trade and other receivables                  | XXX |     |
| Prepayments                                  | XXX |     |
| Cash and cash equivalents                    | XXX | XXX |

|  |     |     |

# 14.11 Notes to the financial statements

In accordance with the standard, the following information requires minimum disclosure in the Statement of Financial Position but should be presented by way of notes:

### **Share capital**

Both authorized and issued share capital should be disclosed, in accordance to their classes.

### **Accounting policies**

Accounting policies are the specific accounting bases judged by business enterprise to be most appropriate to their circumstances and adopted by them for the purpose of preparing their financial accounts e.g. the writing off of goodwill.

### Property, plant and equipment and depreciation

A schedule of Property, plant and equipment should be prepared as follows. You should also refer to *Chapter 4* of this book, for an example of the disclosure note on property, plant and equipment.

|                               | <b>Equipment</b> | Motor vehicles | <u>Furniture</u> | Computers | Cell phones  | <u>Total</u> |
|-------------------------------|------------------|----------------|------------------|-----------|--------------|--------------|
|                               | \$               | \$             | \$               | \$        | \$           | \$           |
| Balance b/d at cost           | XXX              | XXX            | XXX              | XXX       | XXX          | XXX          |
| Add purchased                 | XXX              | XXX            | XXX              | XXX       | XXX          | XXX          |
| Less disposal at cost         | (xxx)            | (xxx)          | (xxx)            | (xxx)     | (xxx)        | (xxx)        |
| Adjustment for revaluation    | XXX              | XXX            | XXX              | XXX       | XXX          | XXX          |
|                               | XXX              | XXX            | XXX              | XXX       | XXX          | XXX          |
|                               | <b>=</b>         |                |                  |           |              |              |
| Bal. b/d of depreciation      | XXX              | XXX            | XXX              | XXX       | XXX          | XXX          |
| Add depreciation for the year | XXX              | XXX            | XXX              | XXX       | XXX          | XXX          |
| Less disposals                | (xxx)            | <u>(xxx)</u>   | <u>(xxx)</u>     | (xxx)     | <u>(xxx)</u> | (xxx)        |
| Bal. b/d of depreciation      | XXX              | XXX            | XXX              | XXX       | XXX          | XXX          |
|                               | _                | _              | _                | _         | _            | _            |
| Net book values               | XXX              | xxx            | XXX              | XXX       | XXX          | XXX          |
|                               |                  |                |                  |           |              |              |

### **Director's remuneration**

Shareholders of a company would want to know how much the directors are paying themselves. If this information is kept to the directors themselves, they might pay themselves a lot in salaries and allowances which might lead to the liquidation of the company. Directors' remuneration are the amounts paid to directors should be disclosed as follows:

- Emoluments of the chairman
- The emoluments of the highly paid director.
- The range of emoluments of other directors.

### Auditors' remuneration

The shareholders of a company would also want to know how much was paid to the auditors of the company.

#### Loan interest paid

This again should also be disclosed.

### 14.12 The directors' report

The shareholders must receive a copy of the directors' report along with the Statement of comprehensive income and the Statement of Financial Position. You are advised to get a copy of the directors' report from the press. The following are some of the issues which should be included in the directors' report:

- a) A fair review of the business.
- b) The dividends proposed.
- c) The amounts transferred to reserves.
- d) The principal activities of the company.
- e) Post balance events.
- f) The future outlook of the business.
- g) Changes in the market value of non current assets.
- h) Political and charitable contributions.
- i) Details of employment of disabled persons.
- j) Names of all persons who are directors of the company.

### 14.13 The auditors' report

This is an independent report which is prepared by an independent external auditor. The purpose of this report is to express an opinion whether financial statements show a true and fair view of the company. This report must be appended to the published financial statements of a company. The independent auditors' report should include the following:

- a) Title
- b) Date
- c) Name of the auditor or the audit firm
- d) The opinion paragraph.
- e) The scope of work undertaken
- f) Signature of the auditor

### Example 2

You are required to prepare the final accounts for Makuvaza Ltd. in *Example 1* above, for publication.

#### Solution

### Statement of comprehensive income for the year ended 31 March 2002

|                         | \$              |
|-------------------------|-----------------|
| Revenue                 | 75 000          |
| Cost of sales           | <u>24 000</u>   |
| Gross profit            | 51 000          |
| Other operating income  | 200             |
| Distribution costs      | (700)           |
| Administrative expenses | <u>(42 780)</u> |
| Profit from operations  | 7 720           |
| Finance cost            | <u>(5 000)</u>  |
| Taxation                | 2 720           |
| Income tax payable      | <u>(2 200)</u>  |
| Profit after tax        | <u>520</u>      |

### Author's note

- 1. Revenue is made up of sales
- 2. Cost of sales is made up of the following:
  - a) Opening inventory
  - b) Purchases
  - c) Closing inventory
- 3. Like other operating income items e.g. rent receivable or commission earned. Decrease in Provisition for credit loses is an adjustment to bad debts and technically is an adjustment of previously set aside profits (commonly associated with preceding trading years).
- 4. Distribution costs consists of the following:
  - a) Advertising costs
  - b) Motor vehicle expenses
  - c) Depreciation expense charged on motor vehicles
- 5. Administration expenses consists of the following items;
  - a) Rent
  - b) Wages and salaries
  - c) Light and water
  - d) Depreciation of motor vehicles
  - e) Directors' emoluments
  - f) Audit fees
  - g) Bad debts
- 6. Finance cost consists of debenture interest

### **Statement of Financial Position as at 31 March 2002**

#### Assets \$ \$ Property, plant and equipment Property, plant and equipment 111 520 Current assets Inventories 9 000 Trade and other receivables 19 200 Prepayments 500 Cash and cash equivalents 78 080 106 780 Total assets 218 300

### **Director's remuneration**

Profit before tax has been calculated after paying directors a remuneration of \$21 580.

#### **Auditors' remuneration**

Profit before tax has been calculated after paying the auditors a fee of \$5 000.

### Loan interest paid

Half of the interest on debentures of \$2 500 was paid during the year just ended. The balance of 50% will be paid during the year ended 31 March 2002.

### Example 3

The following is the trial balance of Tonde Ltd, a car dealer as at 30 June 2001.

|   | Dr      | Cr      |
|---|---------|---------|
|   | \$      | \$      |
| Issued share capital                          |         |         |
| Ordinary shares of \$0.5 each                 |         | 300 000 |
| 8% preference shares of \$1 each              |         | 30 000  |
| Buildings at cost                             | 510 000 |         |
| Motor vehicle at cost                         | 84 000  |         |
| Provision for depreciation – <i>Buildings</i> |         | 30 600  |

| Penalty fees                                  | 835     |         |
| Accumulated profits                           |         | 61 200  |
| Rent and rates                                | 8 120   |         |
|   | 845 275 | 845 275 |

### **Additional information**

- 1. Rent and rates included \$2 300 for the 6 months ending 30 September 2001.
- 2. A motor car was transferred from the showroom for permanent use by the company's sales manager in the course of his company's duties on 31 January 2001. It had a selling price of \$45 000 and had cost the company \$30 000. No entry has been made to record this transaction.
- 3. Non-current assets are depreciated using the straight line method as follows:
  - 20% on vehicles
  - 2% on buildings and assuming a nil residual value.
- 4. Bad debts amounting to \$2 000 should be written off. The company also wishes to provide against the possibility of not receiving 3% of the remaining debtors.

- 5. Audit fees outstanding amount to \$2 500.
- 6. A payment of \$800 for light and heat was incorrectly charged to insurance account.
- 7. The directors proposed an ordinary dividend of 5 cents per share and a preference dividend of 8%.
- 8. Closing inventory was valued at \$21 000.
- 9. A tax provision of \$56 700 is to be made.

### You are required to:

- 1. Prepare the Statement of comprehensive income for the year ended 30 June 2001,
- 2. A Statement of Financial Position as at 30 June 2001 and
- 3. a statement of changes in equity for the year ended 30 June 2001

### **Solution**

Statement of comprehensive income of Tonde Ltd for the year ended 30 June 2001

| ended 30 June 2001               |         |         |
|----------------------------------|---------|---------|
|                                  | \$      | \$      |

  - A. \$100 000
  - B. \$250 000
  - C. \$450 000
  - D. \$550 000.

- 5. Which of the following is not required to be disclosed in the published company accounts.
  - A. Auditors' remuneration
  - B. Depreciation policy
  - C. Legal costs
  - D. Salary of highest paid director.

# 14.16 Structured questions

# **Question 1**

With reference to a public limited company:

- (a) Outline the contents of the directors' report.
- (b) Outline the contents of an auditor's report to the shareholders.

**Question 2** 

The following is the trial balance of Sam Ltd. as at 30 September 2002

| •  | •       |         |
|--|---------|---------|
|  | Dr.     | Cr.     |
|  | \$      | \$      |
| Ordinary share capital of \$1 each, fully paid |         | 49 100  |
| Plant & equipment                              | 115 000 |         |
| Furniture & fittings                           | 32 000  |         |
| Motor vehicles                                 | 86 000  |         |
| Inventory                                      | 29 000  |         |
| Purchases and sales                            | 210 000 | 546 000 |
| Debtors and creditors                          | 71 900  | 59 600  |
| Provision of depreciation: Plant & equipment   |         | 21 850  |
| Motor vehicles                                 |         | 34 160  |
| Furniture & fittings                           |         | 3 200   |
| Fuel and oil                                   | 24 600  |         |
| Repairs and maintenance                        | 18 000  |         |
| Telephone expenses                             | 11 200  |         |
| Wages and salaries                             | 61 000  |         |
| Stationery                                     | 4 200   |         |
| Cash at bank                                   | 30 700  |         |
| Accumulated profits                            |         | 27 190  |
| Long term investment                           | 50 000  |         |
| Dividend received                              |         | 2 500   |
|  | 743 600 | 743 600 |
|  |         |         |

### **Additional information**

- 1. Inventory on hand was valued as follows: at cost at \$59 000 and at net realisable value at \$54 000.
- 2. A Provision for credit loses of 3% of debtors to be created.
- 3. Non current assets are depreciated using the reducing balance method as follows:

Plant and equipment 10% per annum.

Motor vehicles 20% per annum.

Furniture and fittings 10 % per annum.

- 4. A motor vehicle which cost \$6 500 and had a written down value of \$5 265 was traded in for a new one with a cost price of \$20 000. The supplier allowed \$4 000 as the trade in value of the old vehicle. The bookkeeper debited the motor vehicle account and credited the bank account with \$16 000. No other entries were made. No depreciation is charged in the year of disposal and a full year's depreciation is charged in the year of purchase.
- 5. A receipt of \$6 000 from a debtor was debited to the cash book and credited to the sales account.
- 6. Telephone owing amounted to \$1 500 and a salary of \$2 000 was paid to an employee going on leave in October 2002.

### You are required to prepare:

- 1. A Statement of comprehensive income for the year ended 30 September 2002 and
- 2. A Statement of Financial Position, for internal use as at 30 September 2002.

# **Question 3**

The following trial balance was extracted from the books of Daises Ltd on 31 December 2004.

|                                     | \$         | \$         |
|-------------------------------------|------------|------------|
| 800 000 ordinary shares of \$7 each |            | 5 600 000  |
| Share Premium                       |            | 2 800 000  |
| Retained Earnings                   |            | 649 600    |
| Sales                               |            | 22 252 300 |
| Bad debts provision                 |            | 60 200     |
| Creditors                           |            | 1 226 400  |
| Freehold premises at cost           | 4 550 000  |            |
| Plant at Cost                       | 4 200 000  |            |
| Prov. For depreciation-Plant        |            | 1 456 000  |
| Purchases                           | 14 119 000 |            |
| Wages                               | 2 184 000  |            |
| Salaries                            | 1 618 400  |            |
| Rent and Rates                      | 301 000    |            |
| Light and Heat                      | 108 000    |            |
| General expenses                    | 2 218 300  |            |
| Bad debts                           | 52 500     |            |
| Debtors                             | 1 524 600  |            |
| Inventory                           | 1 798 300  |            |
| Bank                                | 1 215 900  |            |
| Suspense                            | 154 000    |            |
|                                     | 34 044 500 | 34 044 500 |

# Additional information.

- 1. In preparing the trial balance, the errors below were made.
  - Debtor balances were under cast by \$140 000

-An item of plant purchased for \$7 000 had been correctly credited to the bank account but had been credited instead of debited to the plant account

- 2. It has been discovered that debts totaling \$37 100 are irrecoverable and \$55 300 are doubtful.
- 3. Inventory at the end was valued at \$2 192 400.
- 4. Plant which cost \$140 000 with an accumulated depreciation of \$126 000 at 1 January 2004 was sold for \$21 000. The only accounting entry made so far for this transaction has been to debit bank and credit the sale proceeds to the sales account.
- 5. The company's policy is to depreciate plant on the straight line method at 10% per annum. The company provides a full years' depreciation in the year of purchase and no depreciation in the year of sale.
- 6. Payments due at the end of the year were:

\$

Wages 40 600

Light and heat 13 300

- 7. Rates prepaid at the end of the year were \$22 400.
- 8. A final dividend of \$700 000 is proposed for the year.

### You are required to

- (a) Prepare a statement of comprehensive income account for the year ended 31 December 2004.
- (b) Prepare a Statement of Financial Position as at 31 December 2004.

### **Question 4**

A year ago, Maplanka a building contractor formed a limited company with his wife, Mildred. They do repair work for local householders and Mildred keeps some accounting records but not on a double entry basis. Since Maplanka Co. (Pvt) Ltd is a small family business, they did not think it was important to keep a full set of accounting books, but because the tax department has insisted on knowing what profit the business has made over the last 12 months, Mildred has approached you to help her prepare final accounts for the year ended 30 June 2007.

The assets and liabilities of the business at 30 June 2006 were as follows:

| Assets                  | \$     |
|-------------------------|--------|
| Plant & equipment: cost | 50 400 |
| : depreciation to date  | 23 200 |
| Motor vehicles: cost    | 36 000 |
| : depreciation to date  | 26 000 |
| Inventory of materials  | 56 640 |

| Debtors                               | 37 960 |
|---------------------------------------|--------|
| Rent prepaid to 30 September 2006     | 3 000  |
| Prepaid insurance to 32 December 2006 | 2 800  |
| Bank balance                          | 7 440  |
| Cash in hand                          | 920    |
|                                       |        |
| <u>Liabilities</u>                    |        |
| Creditors                             | 13 840 |
| Telephone bill owing                  | 840    |
| Electricity owing                     | 720    |

The cash and bank transactions for the year ended 30 June 2007 are given below.

# Cash and Bank Summary

| Receipts               | Cash    | Bar     | nk ]           | Payments Cas      | h Ban   | k       |

| <u>520</u>             |         |         |                |                   |         |         |

### The following further information is available:

- a) Plant and equipment is to be depreciated at 25% per annum on the reducing balance method with a full year's charge in the year of purchase.
- b) The new motor vehicle was purchased on 1 January 2007. Depreciation on motor vehicles is to be charged at 25% per annum on the straight line basis, with a proportionate charge in the year of purchase both none in the year of sale.
- c) The rent of premises was increased by 20% from 1 October 2006.
- d) The loan of \$40 000 was obtained from Maplanka's brother on 1 April 2007. It carries interest at 10% per annum, payable on 30 September and 31 March.
- e) At 30 June 2007, the following amounts were outstanding

Creditors \$16 360

Telephone \$960

Electricity \$880

Miscellaneous expenses \$1 960

- f) At 30 June 2007, amounts due from customers totaled \$43 440. Of this amount, it was considered that amounts totaling \$5 120 were bad and should be written off.
- g) Inventory of materials at 30 June 2007 was \$48 680
- h) Maplanka agreed to pay Mildred \$20 000 for her assistance with office work during the year. This amount was actually paid in August 2007.
- i) Mildred and Maplanka agree to pay themselves a dividend of \$119 200 for the year.
- j) Taxation of \$5 450 is to be provided for
- k) It is agreed to transfer \$16 000 to a general reserve.
- It was agreed that the value of Ordinary Shares in Maplanka & Co. Pvt Ltd was to be \$2.00 per share.
- m) The company made a loss last year of \$43 550.

### **REQUIRED**

- Prepare A statement of comprehensive income account of Maplanka and Co Pvt Ltd for the year ended 30 June 2007.
- b) Prepare a Statement of Financial Position of Maplanka and Co Pvt Ltd as at 30 June 2007.

#### **Question 5**

Spanky Ltd Co. had the following balances in its books at 30 June 2002.

Freehold land and buildings at cost \$750 000 in 1974, and had been revalued in 1981 at \$1 200 000

Plant and Machinery purchased on 1 July 2000 at a cost of \$720 000

Plant and Machinery purchased on 1 July 2001 at cost \$468 000

Motor vehicles purchased on 1 January 2001 at a cost of \$240 000

Motor vehicles purchased on 1 July 2001 at a cost \$150 000

The annual rates of depreciation, based on cost with estimated nil residual values and which have always been used are:

Freehold land and buildings not depreciated

Plant and machinery 20% straight line

Motor vehicles 25% straight line.

When the freehold land and buildings were purchased in 1974, the cost was allocated as land \$150,000,

buildings \$600 000. The revalued amount for this asset in 1981 was allocated as follows: land \$300 000; buildings \$900 000.

In the year to 30 June 2003, the following events took place;

- 1. Freehold land and buildings were again revalued by a group of chartered surveyors Black and Blue Surveyors on 1 July 2002 at \$3 000 000 of which \$600 000 related to the land. The freehold buildings were estimated to have a residual life of 20 years.
- 2. The following disposals took place:
  - 1 January 2003; plant and machinery, which had been, purchased on 1 July 2000 at a cost of \$300 000.
  - 1 April 2003; plant and machinery, which had been, purchased on 1 July 2001 at a cost of \$18 000.
  - 1 April 2003; motor vehicles which had been purchased on 1 January 2001; at a cost of \$60 000.
- 3. The following acquisitions took place.
  - 1 July 2002, A lease on property for 20 years for \$300 000 was secured.
  - 1 October 2002; motor vehicles for \$96 000
  - 1 January 2003; plant and machinery for \$330 000.

The directors decided to depreciate freehold property and to amortise the lease as from 1 July 2002 in accordance with accepted accounting practice. The depreciation policy for the other items of property, plant and equipment remained in force as before.

### You are required to:

Prepare notes to the published accounts Of Spanky Ltd Co. to show the information that should be disclosed concerning the tangible property, plant and equipment in the Statement of Financial Position at 30 June 2003.

### **Question 6**

Using the information in Example 3, you are required to prepare the published Statement of comprehensive income of Tonde Ltd, for the year ended 30 June 2001

# **CHAPTER 15**

# AMALGAMATION AND ABSORPTION OF

# **BUSINESSES**

# 15.1 Chapter objectives

After studying this chapter the student should be able to:

- (1) Demonstrate an understanding of the forms of amalgamation and absorption.
- (2) Determine the opening capital account for each partner upon amalgamation and absorption.
- (3) Make journal entries to record the takeover of a sole trader and partnership businesses by a limited company.
- (4) Prepare: The realisation account, The partners' capital accounts and The partnerships bank account in the books of the acquiree.
- (5) Prepare the business purchase account (showing clearly any Goodwill arising) and the Statement of Financial Position of acquirer immediately after the takeover.

#### 15.2 Introduction

Two or more businesses may amalgamate into a large one. Aquisition is when one business is formed to take over another business or when an existing business takes over another business. In both cases, one business is wound up. Amalgamation is when two businesses pool their resources together to form one business entity. Amalgamation and absorption can take the following forms.

- 1. A partnership may admit a sole trader.
- 2. Two sole traders may form a partnership.
- 3. Two or more partnerships may form a larger partnership business.
- 4. A limited liability company (a new form of enterprise to be covered in detail in later chapters) taking over a sole trader or a partnership.
- 5. A limited liability company taking over another limited liability Company.

In each of the above situations, the assets are usually revalued. Where assets are revalued, the amount should be used to determine the capital accounts of the individual partners and should be recorded in the books of the new partnership business. It is quite common for partners to agree on the value of goodwill.

#### How to determine the opening capital of each partner

| The opening | capital accounts | are determined | by the accounting equation = |
|-------------|------------------|----------------|------------------------------|
| Assets –    | Liabilities      | =              | Capital                      |

Only assets (including goodwill) and liabilities taken over by the new business are included. Assets must be included at the revalued amount.

The following are the Statement of Financial Positions of two sole traders as at 31 December 1995.

|                        | Evelyn |        | Evelyn |        | E | sther |
|------------------------|--------|--------|--------|--------|---|-------|
|                        | \$     | \$     | \$     | \$     |   |       |
| Property, plant and    |        |        |        |        |   |       |
| <u>equipment</u>       |        |        |        |        |   |       |
| Premises               |        | 30 000 |        | 22 000 |   |       |

|                        |        | 40 500 |        | 40 000 |   |       |
|                        |        |        |        |        |   |       |
| Capital                |        | 40 500 |        | 40 500 |   |       |

### Additional information:

Evelyn and Esther agreed to amalgamate their businesses to form a partnership known as Moyondizvo with effect from 1 January 1996. The partners agreed upon the following valuations.

|                      | Evelyn | Esther |
|----------------------|--------|--------|
|                      | \$     | \$     |
| Goodwill             | 12 000 | 8 000  |
| Premises             | 38 000 | 25 000 |
| Motor vehicle        |        | 8 000  |
| Inventory            | 7 500  | 3 900  |
| Accounts receivables | 1 800  | 3 100  |

All other assets were taken over at book value. Evelyn decided not to bring into the new business cash at bank while Esther paid creditors \$1500 out of her private resources.

### Required

- 1. Calculate the capital contributed by each partner
- 2. Prepare a Statement of Financial Position of Moyondizvo as at 1 January 1996

### **Solution**

### Calculation of capital

|                      | Evelyn         | Esther       |
|----------------------|----------------|--------------|
|                      | \$             | \$           |
| Furniture & Fittings | 5 000          | 8 000        |
| Goodwill             | 12 000         | 8 000        |
| Premises             | 38 000         | 25 000       |
| Motor vehicle        |                | 8 000        |
| Inventory            | 7 500          | 3 900        |
| Receivable           | 1 800          | 3 100        |
| Bank                 | <u></u>        | <u>2 000</u> |
| Total assets         | 64 300         | 58 000       |
| Less Liabilities     | <u>(5 000)</u> | (4 500)      |
| Capital              | 59 300         | 53 500       |

### Moyondizvo

| Statement of Financial Position as at 1 Jan | <u>uary 1996</u> |        |         |
|---|------------------|--------|---------|
|   | \$               |        | \$      |

| Motor vehicle                               |                  |        | 8 000   |
| Goodwill                                    |                  |        | 20 000  |
|   |                  |        | 104 000 |
| <u>Current assets</u>                       |                  |        |         |
| Inventory (7 500 + 3 900)                   | 11 400           |        |         |
| Receivables (1 800 + 3 100)                 | 4 900            |        |         |
| Bank  | 2 000            | 18 300 |         |
| Total Assets                                |                  |        | 122 300 |
|   |                  |        |         |
| <b>Equity &amp; Liabilities</b>             |                  |        |         |
| Capital                                     |                  |        |         |
| Evelyn                                      |                  |        | 59 300  |
| Esther                                      |                  |        | 53 500  |
|   |                  |        | 112 800 |
| Creditors (5 000 + 4 500)                   |                  |        | 9 500   |
| Total Equity & Liabilities                  |                  |        | 122 300 |
|   |                  |        |         |

The accounting procedure we have adopted above also applies when a partnership takes over the business of a sole trader. Goodwill can be written off against capital accounts of the new partners in proportion to their profit and loss sharing ratios.

# 15.3 Limited liability companies taking over other businesses

An incorporated business entity can take over other business entities. In this chapter we are going to look at a situation whereby a limited company takes over a sole trader and a partnership. This business combination is termed absorption.

# 15.4 A Limited company taking over a sole trader

A Limited Company can take over a sole trader by paying the sole trader cash or issue shares and / or debentures.

### Example 1

The summarised Statement of Financial Position of Shadow Ltd. as at 31 December 2001 is given below.

| Property, plant and equipment<br><u>Current Assets</u> |         | \$<br>280 000  |
|--|---------|----------------|
| Bank   | 84 000  |                |
| Inventory and accounts receivable                      | 129 000 | <u>213 000</u> |
|  |         | 493 000        |
| Capital & Reserves                                     |         |                |
| Ordinary share capital of \$1 each                     |         | 200 000        |
| Capital reserves                                       |         | 175 000        |
| Revenue Reserves                                       |         | 75 000         |

On the same date, they took over a business owned by Wabaya, paying him \$17 800 in cash and issuing him 15 000 ordinary shares of \$1 each at par.

Wabaya's assets & liabilities were taken over at the following agreed values.

|                     | Book Value | Agreed Value |
|---------------------|------------|--------------|
|                     | \$         | \$           |
| Motor Vehicles      | 30 000     | 23 000       |
| Inventory           | 1 700      | 2 920        |
| Accounts receivable | 3 900      | 3 900        |
| Accounts payables   | 2 200      | 2 200        |

### **Required:**

Prepare Shadow LTD's Statement of Financial Position soon after the takeover.

 $\frac{\textbf{Solution}}{\textbf{Since the purchase consideration (cash and shares} = 17\ 800 + 15\ 000) \ \textbf{exceeds the agreed takeover value of}$ net assets, the excess is goodwill.

### **Calculation of Goodwill**

| Business purchase account |        |                       |        |
|---------------------------|--------|-----------------------|--------|
|                           | \$     |                       | \$     |
| Accounts payable          | 2 200  | Motor vehicles        | 23 000 |
| Purchase consideration    | 32 800 | Inventory             | 2 920  |
|                           |        | Accounts receivable   | 3 900  |
|                           |        | Goodwill (difference) | 5 180  |
|                           | 35 000 |                       | 35 000 |

**Please Note**: The assets in the Ltd. Company's Statement of Financial Position are shown at the agreed value, **NOT** at their Net Book Value (CA) in the sole trader's books.

# 15.5 Taking over of a partnership by a limited company

In partnership conversion the accounting entries are just the same whether a limited liability Company is taking over the partnership or the partners themselves mutually agree to convert their business into a limited liability company. In actual fact, there is an element of partnership dissolution and the formation of a new company. The following accounts should be opened.

### 15.6 Realisation account

It is in this account that the profit or loss on conversion is calculated. **Only** those assets and liabilities being taken over by the company should be entered in this account. The purchase consideration being the cash, shares or debentures paid by the purchasing company should be credited to the realization account and the corresponding debits to the capital accounts of the partners. Assets taken over by the partners should be credited to this account at agreed value. The corresponding entry will be debited to the capital account of such partner.

### Example 2

Susan and Tarisai have been in partnership for 2 years sharing profits & losses in the ratio 2:3 respectively. On 31 December 2001, they sold their business to a company – ST Ltd. such that they would enjoy the limited liability. Their Statement of Financial Position as at that date is given below:

### Statement of Financial Position for Susan and Tarisai as at 31 December 2001

| Property, plant and equipment Land & buildings Motor vehicles  Current Assets Inventory  |  | \$<br>84 000                         | \$ 200 000 100 000 300 000             |
|--|--|--------------------------------------|--|
| Receivables Bank Total assets  |  | 39 400<br>14 000                     | 137 400<br>437 400                     |
| EQUITY AND LIABILITIES  Susan Tarisai  | Capital<br>190 000<br>160 000<br>350 000 | Current<br>8 680<br>(1 200)<br>7 480 | Total<br>198 680<br>158 800<br>357 480 |
| Long term loan from Tarisai  Current Liabilities - Payables Total equity and liabilities |  |                                      | 50 000<br>407 480<br>29 920<br>437 400 |

#### **Notes:**

1. The new Company will take over the assets and liabilities with the exception of bank account and one motor vehicle (note 2). The assets will be taken over at the following valuation.

|    |                  | Ψ       |
|----|------------------|---------|
| a. | land & buildings | 230 000 |
| b. | motor vehicles   | 40 000  |
| c. | inventory        | 80 000  |

- 2. Susan took over one of the vehicles at an agreed value of \$25 000. The cost of the vehicle was \$60 000 and had a written down value or (CA) of \$45 000.
- 3. The purchase consideration of \$390 000 is to be satisfied as follows:
  - a. A cash payment of \$50 000
  - b. An issue of 200 000 Ordinary shares of \$1 each to be shared in proportion to their profit & loss sharing ratio.
  - c. An issue of 10% Debenture inventory that will enable Tarisai to earn as much interest as she earned from her loan to the partnership. The loan was carrying an interest of 8% per annum.
- 4. At the same date, the company issued 20 000 12% Preference shares of \$2 each at par that were fully taken up.

### Required

- 1) In the partnerships books prepare:
  - i) The realisation account
  - ii) The partners' capital accounts
  - iii) The partnerships bank account
  - iv) ST Ltd. Account
- 2) In ST Ltd. Books, prepare
  - i) The business purchase account (showing clearly any Goodwill arising)
  - ii) The Statement of Financial Position of ST Ltd. Immediately after the takeover.

| •                         |                |               | 340 000               |
| 40 000, 10% Debenture in  | nventory       |               | 40 000                |
|                           | •              |               | 380 000               |
| Current liabilities –     | Payables       | 29 920        |                       |
|                           | Bank           | <u>10 000</u> | <u>39 920</u>         |

Care should be taken when determining the value of shares to be debited to capital account and credited to Realisation account. The amount to be entered is the issue value of shares; this is not always the par value.

419 920

# 15.7 Issue value of shares.

The questions in almost all situations do not show the amount of the premium

To get the premium, we say

Total equity and liabilities

| Total purchases consideration     | XXX   |
|-----------------------------------|-------|
| <u>Less</u> cash payment (if any) | (xxx) |
| <u>Less</u> debentures (if any)   | (xxx) |
| <u>Less</u> par value of shares   | (xxx) |
| Premium at issue                  | XXX   |

At times, it is not easy to determine the value of goodwill, this can be determined as follows:

| Total Purchase consideration   | XXX |
|--------------------------------|-----|
| Less Net Assets acquired       | XXX |
| Goodwill                       | XXX |
| Where Net assets is equal to   |     |
| Asset acquired at agreed value | XXX |
| Less liabilities assumed       | XXX |

When the purchase consideration is not given, we determine it be adding goodwill to Net assets acquired.

# 15.8 Examination type questions

# 15.9 Multiple Choice

1. The table shows the assets and liabilities of a company.

|  | Book value | Market value |
|--|------------|--------------|
|  | \$000      | \$000        |
| Tangible property, plant and equipment | 120        | 140          |
| Current Assets                         | 100        | 90           |
| Goodwill                               | -          | 30           |
| Share Capitals                         | 80         |              |
| Retained Profits                       | 80         |              |
| Current liabilities                    | 60         | 50           |

What would be the purchase price of the net assets of the company?

- A. \$190 000
- B. \$210 000
- C. \$220 000
- D. \$260 000.
- 2. A company has just purchased a business with net assets of \$220 000. in addition, the goodwill of the business is valued at \$20 000. The purchase price of the business is settled by the issue of 80 000 \$2.00 ordinary shares in the company. What will be the entry in the company's share premium account?
  - A. Debit \$80 000
  - B. Credit \$80 000
  - C. Debit \$60 000
  - D. Credit \$60 000
- 3. A Ltd purchases the business of B White by issuing 40, 50 cent shares at a premium of \$0.10. A Ltd agrees to take over B White's assets and liabilities at the date of the acquisition as follows.

\$

- C. \$17.00
- D. \$18.00
- 8. In relation to the purchase of a business, when the purchase price exceeds the values ascribed to the assets taken over, the difference is known as
  - A. Goodwill
  - B. A capital reserve
  - C. Negative goodwill
  - D. A premium
- 9. A company with an existing issued capital of \$800 000 \$2 ordinary shares made a 1 for 5 Bonus issue. This was later followed by a 1 for 3 Rights Issue.

What will be the balance on the Share Capital Account after these transactions?

- A. \$800 000.00
- B. \$960 000.00
- C. \$1 226 666.00
- D. \$1 280 000.00

### 15.10 Structured questions

# Question 1

Sam & Gamu and Vimbai & Upenyu are two partnerships. The profit sharing ratios were 3:2 for Sam and Gamu and 2:1 for Vimbai and Upenyu. They decided to amalgamate their businesses under the name of E.S. Accounting Services from 1 October 2000.

The Statement of Financial Positions of the two partnerships as at 30 September 2000 were as follows:

# Sam and Gamu

\$

65 000

### Assets

Property, plant and equipment

| Premises       | 30 000 |
|----------------|--------|
| Machinery      | 10 000 |
| Current assets |        |
| Inventory      | 9 000  |
| Receivable     | 6 000  |
| Bank           | 10 000 |

# **Equity & Liabilities**

The assets of the two partnerships were revalued as follows:-

|            | Sam & Gamu | Vimbai & Upenyu |  |
|------------|------------|-----------------|--|
| Premises   | 50 000     | 100 000         |  |
| Machinery  |            | 30 000          |  |
| Vehicles   | 60 000     |                 |  |
| Inventory  | 8 500      | 28 000          |  |
| Receivable | 5 100      |                 |  |
| Goodwill   | 12 000     | 28 000          |  |

Other assets and liabilities were taken over at their book values and goodwill should not be shown in the books. Current accounts are to be capitalised.

# Required

- a) Open, post and balance the following accounts:
- b) Goodwill account
- c) Capital accounts of partners
- d) Prepare the Statement of Financial Position of the new partnership as at 1 October 2000

### **Question 2**

Pink and Blue had been trading as a partnership for several years, sharing profits and losses in the ratio of 3:2. Their Statement of Financial Position as at 31 May 2003 was as follows:

|   | \$      | \$      |
|---|---------|---------|
| Property, plant and equipment at net book value |         | 432 000 |
| Current Assets                                  |         |         |
| Inventory                                       | 180 000 |         |
| Debtors   | 108 000 |         |
| Bank  | 24 000  |         |
|   | 312 000 |         |
| <u>Less</u> Creditors                           | 18 000  | 294 000 |
|   |         | 726 000 |
|   |         |         |
| Financed by                                     |         |         |
| Capitals : Pink                                 |         | 288 000 |
| Blue  |         | 384 000 |
|   |         | 672 000 |
|   |         |         |
| Current Accounts: Pink                          | 2 400   |         |
| Blue  | 3 600   | 6 000   |
|   |         | 678 000 |
| Add loan from Blue                              |         | 48 000  |
|   |         | 726 000 |

### **Additional information**

- 1. On 1 June 2003, Pink and Blue converted their partnership business to a new limited company, Browns Ltd. The business was valued at \$840 000. The purchase consideration was to be satisfied by the issue of \$10 500 ordinary shares of \$8 each, fully paid.
- 2. The issued and authorised share capital of Browns Ltd is \$420 000. The preference shares, issued at par, were distribution between the partners in proportion to their capital accounts at 31 May 2003. The ordinary shares were allocated in their partnership profit and loss sharing ratios.
- 3. All the partnership assets were transferred to Browns Ltd, with the exception of debtors and the bank balance. The loan from Blue and the creditors were repaid in full on 1 June 2003, and the debtors paid \$104 000 in full settlement on the same date.
- 4. The partners paid in or withdrew cash to close their capital accounts.

#### You are required to:

- a) Prepare the partnership realisation account, showing the entries necessary to transfer the business to Browns Ltd. [8]
- b) Prepare the capital accounts of the partners, showing entries required to close off the partnership books. [12]
- c) Show the Bank account of the partnership. [5]
- d) Show the opening Statement of Financial Position (including any goodwill arising) of Browns Ltd.[5]

### **Question 3**

Two sole traders, Den and Norton, agreed to amalgamate their businesses to form a partnership to be called Tin- tan Suppliers, with effect from 1 January 2005. Their separate Statement of Financial Positions disclosed:

Statement of Financial Positions as at 31 December 2004

| Den    |               |   | Norton        |               |

|        |               | <u>Less Current Liabilities</u>           |               |               |
| 5 800  |               | Creditors                                 | 9 000         |               |
|        | _             | Bank overdraft                            | 4 400         |               |
| 5 800  |               |   | 13 400        |               |
|        | 9 000         | Working Capital                           |               | 7 800         |
|        | 73 800        | Net Assets employed                       |               | 92 400        |
|        |               | Finances by                               |               |               |
|        | 73 800        | Capital                                   |               | <u>92 400</u> |
|        | <u>73 800</u> |   |               | 92 400        |

The assets and liabilities of the two parties were revalued as part of the amalgamation procedure and the following figured were agreed.

|                       | Den    | Norton  |
|-----------------------|--------|---------|
|                       | \$     | \$      |
| Premises              | 80 000 | 100 000 |
| Equipment             |        | 17 600  |
| Fittings and fixtures | 15 200 |         |
| Inventory             | 10 200 | 15 200  |
| Debtors               | 1 200  | 1 800   |

All other assets were taken over by Tin- Tan Suppliers at their book values.

Den agreed to pay creditors amounting to \$2 400 out of his private resources. The partnership assumed responsibility for the remainder and for the loan from Bingo. Norton settled the bank overdraft privately. It was agreed that the capital of Tin- Tan suppliers should be subscribed by Den 2/3 and Norton 1/3.

## **REQUIRED:**

Prepare the Statement of Financial Position of Tin- Tan Suppliers immediately after the amalgamation has taken place.

## **Question 4**

Bukhosi, Masi and Thandi have been in partnership for a number of years sharing profits and losses in the ratio 3:2:1 respectively. The partners have decided an offer of \$210 000 from ABC Ltd to buy all the assets of the company except for debtors and three of the vehicles which have been used by the partners over the last year. The summarized Statement of Financial Position of the partners as at 28 February 2004, before the takeover was as follows:

|                                 |              | \$     | \$            | \$             |

| Debtors                         |              |        | <u>37 000</u> |                |
|                                 |              |        | 59 000        |                |
| <u>Less</u> Current Liabilities |              |        |               |                |
| Creditors                       |              | 28 000 |               |                |
| Bank overdraft                  |              | 19 000 | 47 000        | 12 000         |
|                                 |              |        |               | 214 000        |
| <u>Less</u> Long term loan from | m Masi       |        |               | 10 000         |
|                                 |              |        |               | <u>204 000</u> |
| Capital Accounts:Bukho          | si           |        |               | 100 000        |
|                                 | Masi         |        |               | 60 000         |
|                                 | Thandi       |        |               | 36 000         |
|                                 |              |        |               | 196 000        |
| Current Accounts:               | Bukhosi      |        | 6 200         |                |
|                                 | Masi         |        | 3 800         |                |
|                                 | Thandi       |        | (2 000)       | 8 000          |
|                                 |              |        |               | 204 000        |

The purchase consideration was settled by the issue of 75 000 ordinary shares of \$1.00 each and the payment to the partnership of \$120 000 cash. The shares were divided equally between the partners. The final balances on the partners' capital accounts were settled in cash.

Each partner agreed to take over personally the vehicle which he had been using during the year. Details of these vehicles were:

|         | Book Value | Agreed take- |
|---------|------------|--------------|
|         | Of vehicle | over price   |
| Bukhosi | \$10 000   | \$12 000     |
| Masi    | \$10 000   | \$10 000     |
| Thandi  | \$14 000   | \$16 000     |

Cash collected from debtors amounted to \$35 800 and the partners paid \$25 000 to creditors in full settlement of the amounts due to them. Dissolution costs amounted to \$9 000 and were paid by the partnership.

## **REQUIRED**

- a) A calculation of the profit or loss on the dissolution and sale of the partnership.
- b) Write up the capital accounts of the partnership recording the dissolution ad sale.
- c) Calculate the agreed value of an ordinary share in ABC Ltd and explain why it may be different from the nominal value.
- d) Explain why the partners may have accepted shares in ABC Ltd rather than insisting on a full cash settlement.
- e) What was the premium on the issue of shares.

# CHAPTER 16

# ISSUE AND REDEMPTION OF SHARES, CAPITAL RECONSTRUCTIONS AND REDUCTIONS

## 16.1 Chapter objectives

After studying this chapter the student should be able to:

- 1. Explain the differences between public issue, right issue and bonus issue.
- 2. Draw up the journal entries to record the issue of shares through public issue, right issue and bonus issue.
- 3. State the reasons why a company buys back its shares.
- 4. Give reasons why there is legislation to govern redemption of shares.
- 5. Distinguish between capital redemption and capital reconstruction.
- 6. Open, post and balance the capital reduction and share capital amounts to record the reorganization arrangements.
- 7. Prepare the Statement of Financial Position of the company immediately after the reorganization has been effected.

#### 16.2 Introduction

A Company raises capital by issuing shares by means of

- a) Public issue
- b) Rights issue and
- c) Bonus issue.

The shares can be issued at par or at a premium. It may also issue its shares at a discount but this requires court approval. The shares whether offered for subscription at par or at a premium, may be payable either in full on application or by installment.

The accounting entries where shares are payable in full on application are: (for both public and rights issue)

DR -Bank

CR. -Applicant account with amount of application money (including premium if any received.)

DR -Application Account

CR. -Share capital account with nominal value of the shares allotted.

No of Shares the company wants to issue x par value per share

No. of applications received multiplied by issue price per share

Where shares are issued at a premium further entry is required:-

**DR-Application account** 

CR. -Share premium account with the amount of the premium on the share allotted.

No. of shares the company proposes to issue x premium per share

Where an applicant is unsuccessful and the applicants are not allotted any shares and the application money is refunded.

The entry is:

DR -Application account

CR. -Bank

Nº of shares in excess x issue price Being the amount of the application money (including premium if any) refunded.

#### Issue of shares at par, Payable in full 16.3

Shares that are issued at par are issued at the same price as their nominal value i.e. if a share with a nominal value of \$1 is issued at par, the company receives \$1.

#### Illustration

A new company is to issue 60 000 \$1 ordinary shares payable in full on application. Applications were received for 70 000 shares.

## Required

Show the Journal and Ledger entries to record the share issue including the return of excess application moneys.

## 16.4 Issue of shares at a premium payable in full on application

Companies that have been operating profitably for some years may issue additional shares at a premium. For example a company with ordinary shares of \$1 each may offer them for sale for \$1.50. The \$1 represents the nominal value and the 50 cents represent the premium. The Companies Act provides that when shares are issued at a premium, the premium should be transferred to a share premium account.

#### Illustration

A company has already issued 80 000 \$1 ordinary shares. It now proposes to issue 20 000 additional \$1 ordinary share at a premium of 20%. Applications for 30 000 shares are received.

#### Required:

Prepare the relevant ledger accounts to record the above transactions.

## 16.5 Bonus and right issue

Bonus issue is the issue of additional shares to existing shareholders in proportion to their current shareholding for free of charge by the utilization of capital reserves.

Rights issue – is the issue of shares to existing shareholders in proportion to their current holdings at a lower price than the market value of shares.

## **EXAMPLE**

The summarised Statement of Financial Position of Mudzingwa (Pvt) Ltd. as at 31 December 2000 is as follows:

|                                     |               |        | 160 000       |      |
| Additional information              |               |        |               |      |

#### Additional information

The directors proposed to:

- 1. Revalue property upwards by \$30 000
- 2. A bonus issue was made on 1 January 2001 on the basis of one bonus share for every six shares held on 31 December 2000 utilising the share premium account.
- 3. On 30 March 2001, a right issue of 2 shares for every 5 shares held on 31 January 2001 was made.

## Required

Prepare the Statement of Financial Position after the above transactions as on 31 December 2001 assuming that there are no other transaction that took place.

\$

## **Statement of Financial Position as at 31 December 2001**

|  | Ψ             |

#### Notes

1. When we revalue an asset upwards, we make the following entry

| DR  | Property, plant and equipment | (With an increase only) |
|-----|-------------------------------|-------------------------|
| CR. | Revaluation Reserve           | (With an increase only) |

2. When we issue bonus shares the entry is as follows:

DR Capital Reserve

DR Revenue reserve

CR. Bonus/ scrip issue

made only if capital reserves are insufficient

3. Dr. Bonus issue account

Cr. Ordinary share capital account

## 16.6 Redemption and Purchases by a company of its Shares

Redemption means buying back its shares, which were issued as redeemable while purchase is buying back, shares, which were not issued as redeemable.

## Reasons why a company buys back its shares

- 1. It may have a contractual obligation to do so e.g. debenture or redeemable shares may have a redemption date.
- 2. It may provide an efficient means of using surplus cash resources.
- 3. It may be a convenient method of buying out a dissented shareholder.
- 4. To reduce the gearing ratio of an enterprise when it is the preference shares or debentures being redeemed.

#### The reason why there is legislation to govern redemption

Redemption of shares reduces the resources available to meet the claims of the creditors. Cash leaves the company to repay shareholders who in the event of liquidation would be paid after the creditors. This safeguard is to ensure that funds are available for creditors are not reduced by the redemption.

The law [Companies Act] only permits a company to redeem its shares as follows:

- 1. Out of proceeds from a fresh issue of shares or debentures for that purpose (of redemption) including any premium received. There is no problem with this method as the money paid out is replaced by money coming in from the new issue. With this method, the nominal value of the shares redeemed must be covered by the proceeds of the fresh issue (including any premium on that issue). The idea is that cash coming in should be enough to pay the nominal value of the shares to be redeemed.
- 2. A Company can also redeem its shares by the use of internal resources e.g. by utilising general reserves. If this method is used to redeem shares, the company must transfer profit from the accumulated profits enough to cover the nominal value of the shares to be redeemed to a capital reserve known as capital redemption reserve. The effect of the transfer is to reduce profit that could have been used to pay a dividend. This is sometimes referred to as the capitalization of profits.
- 3. Or by a combination of the above two methods

Method 2 above is sometimes referred to as the capitalisation of profits. If the redemption is by the capitalisation of profits, this requires the creation of a capital redemption reserve; this reserve is created by transferring an amount equal to the nominal value shares being redeemed to this reserve from a suitable distributable reserve like profit & loss account.

Shares can be redeemed at a premium and the premium on redemption can be charged to the share premium account only if any of the following conditions are present:

1. The shares being redeemed were originally issued at a premium or

2. The redemption is financed by proceeds from a fresh issue of shares or debentures, for that purpose.

If any of the above conditions are not met, a premium on redemption should be financed by a suitable distributable reserve. Any amount that can be charged to the share premium is limited to the following:

- 1. The amount of premium received when the shares were originally issued.
- 2. The amount of premium presently standing on the credit side of the share premium account including any premium receivable from new issue of shares, for that purpose.

## Redemption/Purchases involves basically three things.

- 1. Provide finance for redemption
- 2. Cancel shares being redeemed
- 3. Pay the shareholders whose shares have been redeemed.

## **Illustration 1: Redemption plus new issue of shares.**

The following is a summarised Statement of Financial Position of Mlambo Ltd. as at 31 March 2002

| Sundry assets<br>Bank   | \$ 180 000 120 000 300 000                       |
|---|--|
| Ordinary share capital of \$1 each 7% Redeemable preference shares of \$1 each Share premium Retained profits | 200 000<br>60 000<br>10 000<br>30 000<br>300 000 |

The company decided to redeem all of the 7% preference shares at \$1.10. In order to provide for redemption finance the company issued 50 000 ordinary shares at \$1.20 per share. The preference shares were originally issued at a premium.

#### Required: -

Show the Statement of Financial Position, as it would appear immediately after the above transactions.

#### **Solution**

## Statement of Financial Position as at 31 March 2002

| Sundry assets Bank (120 000 – 66 000 + 60 000)   | \$ 180 000 114 000 294 000                    |

Below is the Statement of Financial Position of Makuweza Ltd. As at 31 December 2000

|   | \$      |
|---|---------|
| Property, plant and equipment           | 270 000 |
| Current Assets                          | 80 000  |
|   | 350 000 |
| <b>Equity and Liabilities</b>           |         |
| Ordinary share capital of \$0.50 each   | 130 000 |
| 9% redeemable preference of \$1.00 each | 80 000  |
| Share premium                           | 10 000  |
| General reserve                         | 22 000  |
| Profit & loss                           | 78 000  |
| Current liabilities                     | 30 000  |
|   | 350 000 |

## Additional information

- 1. The preference shares were redeemed at \$1.25 prior to the issue of 40 000 Ordinary shares at a premium of 25c each. The preference shares were originally issued at a premium of 20c per share.
- 2. An item of plant with a book value of \$50 000 was revalued to \$60 000.
- 3. The directors proposed an ordinary dividend of 5 cents per share. The new shares do not rank for this dividend.

## **Required:**

Prepare the Statement of Financial Position of Makuweza Ltd. soon after these transactions assuming that they all took place on the 31st of December 2000.

## **Solution**

## Statement of Financial Position of Makuweza Ltd. as at 31 December 2000

|  | \$                  |
|--|---------------------|
| Property, plant and equipment (270 000 + 10 000) | 280 000             |
| Current Assets (80 000 + 30 000-100 000)         | 10 000              |
|  | 290 000             |
| Equity and liabilities                           |                     |
| Ordinary share capital of \$0.50 each            | 150 000             |
| Capital redemption reserve                       | 50 000              |
| Share premium (10 000 – 16 000 + 10 000)         | 4 000               |
| Revaluation reserve (60 000 – 50 000)            | 10 000              |
| General reserve                                  | 22 000              |
| Profit & loss (78 000 – 13 000-50 000 – 4 000)   | 11 000              |
| Current liabilities (30 000 + 13 000)            | 43 000              |
| ,  | <del>290 00</del> 0 |
|  |                     |

#### Transfer to capital redemption reserve this way:

Nominal value of the shares to be redeemed minus proceeds of issue (less  $\$80\ 000 - (\$40\ 000\ x\ 0.75)$ ) the premium to be partly covered by the share premium account.

The maximum share premium to be used

(a)  $\$80\ 000\ x\ 0,20$  =  $\$16\ 000$ 

And

 $$10\ 000 + ($40\ 000\ x\ 0,25) = $20\ 000$ 

The lesser is 16 000

The required or redeemed amount is more than the amount we are required by law, the balance has been taken from the profit and loss account.

#### 16.7 CAPITAL REDUCTIONS AND RECONSTRUCTIONS

## 16.8 Reorganization

- involves carrying out an internal reconstruction of the company. A special resolution is passed which is confirmed by the High Court.

#### Possible option schemes:

- (i) Paying off paid- up share capital held surplus to the company's requirements.
- (ii) Cancelling paid- up share capital not represented by assets.
- (iii) Reducing the liability on share capital not paid-up.

## 16.9 Capital Reduction

There are cases where the reorganization scheme cannot suffice. A company with a different capital structure is formed through capital reduction. A special resolution is passed which is confirmed by the High Court.

A capital reduction usually occurs where losses have been incurred and the share capital is no longer represented by available assets. It may also occur if

- (a) The company finds it has surplus cash funds and wishes to repay part of the capital to the members.
- (b) The company has issued shares as party paid up and does not intend to call up the uncalled capital.

## 16.10 Reasons for reduction

- (i) When substantial trading losses have accumulated.
- (ii) When the company is over- capitalized, it being impossible to remunerate adequately all the existing capital.
- (iii) When the whole of the paid up capital is not represented by valuable assets for example inventory in-trade depreciated by market conditions or property, plant and equipment may have become absolute.

#### 16.11 Legal aspects

Zimbabwean Companies Act, Chapter 24:03 require the following:

- (i) Authority in the articles
- (ii) Special resolution
- (iii) Approval of the court

# 16.12 Double entry – Journal Entries

A special account, called a capital reduction account is opened through which are passed the amounts written off assets and share capital, accumulated losses as shown by the following journal of entries.

|   | DR                            | CR  |
|---|-------------------------------|-----|
| Capital Reduction                                   | xxx                           |     |
| Individual Asset accounts                           |                               | xxx |

Individual liabilities accounts

XXX

Share capital / share premium account

 $\mathbf{X}\mathbf{X}\mathbf{X}$ 

Being settlement of liabilities by an issue of shares

**Example** 

The financial position of ABC Ltd was as follows:

Statement of Financial Position as at 30 September 2002

\$

Property, plant and equipment

Freehold property 61 800

Equipment 48 350

Vehicles <u>23 600</u>

133 750

Current assets

Inventory 41 150

Receivable 22 250

Bank and cash <u>6 200</u> <u>69 600</u>

<u>203 350</u>

Equity and liabilities

Capital and reserves <u>authorised</u> <u>issued and fully paid</u>

7% preference share of \$1 per share 50 000 50 000

Ordinary shares of \$1 per share <u>250 000</u> <u>175 000</u>

<u>300 000</u> 225 000

Reserves

Retained profit (39 200)

185 800

Current liabilities

Accounts payables 17 550

<u>203 350</u>

#### **Additional Notes**

The preference dividends are two years in arrears. A reorganization scheme had been devised which had secured the necessary approval and contained the following provisions which were to become operative on 1 October 2002.

- 1. The ordinary shares are to be written down to \$0.4 per share and then to be converted into new ordinary shares of \$1.00 per share fully paid.
- 2. The preference shareholders are to receive 25 000 new ordinary shares of \$1.00 per share, fully paid at par, in exchange for the preference shares.
- 3. The preference shareholders have also agreed to waive their rights to the dividend in arrears and to accept 4 000 new ordinary shares of \$1.00 per share, fully paid, in all settlement.
- 4. The creditors have agreed to accept 10 000 new ordinary shares of \$1.00 per share, fully paid at par in part satisfaction of the sums due to them.
- 5. The debit balance on Statement of comprehensive income is to be written off.
- 6. Certain costs are to be revalued at the under noted amounts.

|                      | \$     |
|----------------------|--------|
| freehold property    | 51 300 |
| equipment            | 32 200 |
| vehicles             | 15 350 |
| inventory            | 23 800 |
| accounts receivables | 20 800 |

## Required

- (a) Open, post and balance the capital reduction and share capital amounts to record the reorganization arrangements.
- (b) Prepare the Statement of Financial Position of ABC Ltd on 1 October 2002 immediately after the reorganization has been effected.

## 16.13 Examination type questions

## 16.14 Multiple choice

- 1. A company with an existing issued capital of \$800 000 of \$2 ordinary shares made a 1-for -5 bonus issue. This was later followed by a 1-for -3 right issue. What will be the balance on the share capital account after these transactions?
  - A. \$800 000
  - B. \$960 000
  - C. \$1 226 666
  - D. \$1 280 000
- 2. A company which had initially issued 20 000 \$5 redeemable preference shares at par has now redeemed those shares at a premium of \$1.50. There is no issue of shares to finance the redemption. What are the effects on the profit and loss Account and the Capital Redemption Reserve?

| Profit and loss account | Capital redemption reserve |
|-------------------------|----------------------------|
| A. Decrease \$130 000   | Increase \$100 000         |
| B. Decrease \$130 000   | Increase \$130 000         |
| C. Increase \$100 000   | Decrease \$100 000         |
| D. Increase \$130 000   | Decrease \$100 000         |

- 3. The share capital of a company consists of 150 000 ordinary shares of \$150 each. It makes a rights issue of 1 ordinary share for every 3 already held at \$3.60 per share. It then makes a bonus issue of 1 share for every 5 held. Which amount will be shown in the Statement of Financial Position for share capital?
  - A. \$360 000
  - B. \$435 000
  - C. \$465 000
  - D. \$495 000
- 4. From which of the following to revenue reserves arise.
  - A. The issue of new shares by a company
  - B. The revaluation of property, plant and equipment
  - C. The share premium received on shares issued by the company.
  - D. The trading activities of a company
- 5. When may a company issue redeemable preference shares?
  - A. When it has already issued non-redeemable preference
  - B. When it has already issued non-redeemable shares

- C. When it has already redeemed its debentures
- D. When it has sufficient reserves to fund the issue
- 6. A company may repay part of its share capital when
  - A. its cash reserves exceed its requirement for the foreseeable future.
  - B. its shareholders need cash
  - C. its shares are valued below their nominal value on the open market.
  - D. it wishes to decrease its gearing.
- 7. When a company redeems shares, it may create a capital redemption reserve. Why does it create this reserve?
  - A. to make the Statement of Financial Position balance
  - B. to protect the creditors' rights
  - C. to provide cash for the redemption
  - D. to replace the cash used in the redemption
- 8. A company Statement of Financial Position extract is given

Share capital and reserves

Ordinary share capital (shares of \$500) 5 000 000

Profit and loss account (1 500 000)

3 500 000

It has been decided to write off the debit balance on the profit and Loss account together with goodwill of \$500 000. The shareholders agreed to exchange their shares for new ordinary shares of \$2.50. How many shares would the directors have to issue to the shareholders?

- A. 600 000
- B. 700 000
- C. 1 200 000
- D. 1400000
- 9. A company regularly pays a dividend. It has converted \$60 million 10% loan inventory into ordinary shares. Which describes the likely effect of the conversion on its financial statements?

|    | Dividend | Interest | Gearing  |
|----|----------|----------|----------|
| A. | Decrease | Increase | Decrease |
| В. | Decrease | Increase | Increase |
| C. | Increase | Decrease | Decrease |
| D. | Increase | Decrease | Increase |

## 16.15 Structured questions

## **Question 1**

The chief accountant of Baswells Ltd prepared the following Statement of Financial Position as at 1 July 2005.

|   | \$'000 | \$'000 |
|---|--------|--------|
| Property, plant and equipment                       |        |        |
| Freehold property                                   |        | 600    |
| Other property, plant and equipment                 |        | 2 880  |
|   | -      | 3 480  |
| Current Assets (including bank)                     | 2 640  |        |
| <u>Less</u> current Liabilities                     | 1 200  | 1 440  |
|   |        | 4 920  |
| Financed by   | =      |        |
| Issued and paid up share capital                    |        |        |
| 400 000 ordinary shares of \$6 each                 |        | 2 400  |
| 150 000 8% redeemable preference shares of \$6 each |        | 900    |
|   | -      | 3 300  |
| Reserves  |        |        |
| Capital redemption                                  | 600    |        |
| Share premium account                               | 300    |        |
| General reserve                                     | 270    |        |
| Profit and loss account                             | 450    | 1 620  |
|   |        | 4 920  |
|   | -      |        |

The directors decided to carry out the following transactions during July and August 2005.

- 1. **3 July 2005.** A rights issue of one ordinary share for every four held was made at \$7.20 per share. All shareholders took up their rights.
- 2. **1 August 2005.** A bonus issue of one ordinary share for every ten held, based on the revised ordinary share capital was made. This was carried out by utilising equal amounts from the revenue reserves.

- 3. **August 2005.** 40 000-preference shares were redeemed at a premium of \$0.30 per share. This was achieved out of profits with the exception of the premium, which was covered up by the share premium account.
- 4. **21 August 2005.** The freehold property was revalued at \$780 000.
- 5. **28 August 2005.** Property, plant and equipment costing \$60 000 were purchased on credit.

## You are required to

- a) Prepare a Statement of Financial Position as at 28 August 2005 after the completion of all transactions indicated above.
- b) Describe the features of:
  - i. A rights issue
  - ii. A bonus issue
- c) Explain the difference between capital and revenue reserves.

## **Question 2**

The following is the Statement of Financial Position of P. Panther Ltd as at 30 April 2007.

|  | \$'000     | \$'000       |
|--|------------|--------------|
| Goodwill                               |            | 200          |
| Tangible property, plant and equipment |            | <u>2 600</u> |
|  |            | 2 800        |
|  |            |              |
| <u>Current assets</u>                  |            |              |
| Inventory                              | 128        |              |
| Debtors                                | 320        |              |
| Bank                                   | _24        |              |
|  | 472        |              |
| <u>Less</u> creditors                  | <u>168</u> | <u>304</u>   |
|  |            | <u>3 104</u> |
|  |            |              |
| Share capital and reserves             |            |              |
| Ordinary shares of \$4 each            |            | 4 000        |
| Profit & loss                          |            | <u>(896)</u> |
|  |            | <u>3 104</u> |

For the past five years, P. Panther Ltd has traded at a loss and no dividends have been paid to the shareholders during that time. An extra- ordinary meeting has been held with the shareholders who have agreed to the director's proposals to effect a capital reduction scheme where the following matters have to be taken into account.

- 1. Goodwill is now valueless.
- 2. Tangible property, plant and equipment are now overvalued by \$600 000
- 3. Inventory which cost \$40 000 is now valueless.
- 4. Included in debtors is an amount of \$64 000 from a customer who has now become insolvent.

The directors have expressed confidence that as a result of improved efficiency and the introduction of new products which is planned for the coming financial year the company can look forward to annual net profits of \$200 000. In the proposed scheme of capital reduction, the nominal value of each ordinary share already held will be reduced by \$1.80. This will enable the debit balance on the Profit and Loss Account to be eliminated.

## **REQUIRED**:

- a) Prepare a capital reduction account.
- b) Prepare the Statement of Financial Position as it will appear immediately after the capital reduction.

**Question 3** 

The financial position of Amigos PLC as at  $30^{\text{th}}$  September 2007 was as follows:

|   |     | Cost  |    | Depr. |    | CA           |
|---|-----|-------|----|-------|----|--------------|
| Property, plant and equipment                 |     | \$000 |    | \$000 |    | \$000        |
| Freehold premises                             |     | 200   |    | 40    |    | 160          |
| Plant & equipment                             |     | 500   |    | 120   |    | 380          |
| Vehicles                                      | 90  |       | 30 |       | 60 |              |
|   |     | 790   |    | 190   |    | 600          |
| <u>Current assets</u>                         |     |       |    |       |    |              |
| Inventory                                     |     |       |    | 80    |    |              |
| Debtors                                       |     |       |    | 60    |    |              |
| Bank  |     |       |    | _20   |    |              |
|   |     |       |    | 160   |    |              |
| LessCurrent liabilities                       |     |       |    |       |    |              |
| Creditors                                     |     |       |    | 280   |    | (120)        |
|   |     |       |    |       |    | <u>480</u>   |
| Share Capital & Reserves                      |     |       |    |       |    |              |
| Authorized Share Capital                      |     |       |    |       |    |              |
| 150 000 7% Preference Shares of \$2 each      |     |       |    |       |    | 300          |
| 400 000 Ordinary shares of \$2 per share      |     |       |    |       |    | 800          |
|   |     |       |    |       |    | <u>1 100</u> |
| Issued and fully paid share capital           |     |       |    |       |    |              |
| 100 000 7% Preference Shares of \$2 each      |     |       |    |       |    | 200          |
| 400 000 Ordinary shares of \$2 each, \$1,50 p | aid |       |    |       |    | <u>600</u>   |
|   |     |       |    |       |    | 800          |
| Reserves                                      |     |       |    |       |    |              |
| Profit and loss (debit balance)               |     |       |    |       |    | (320)        |
|   |     |       |    |       |    | 480          |
|   |     |       |    |       |    |              |

## **Additional Information**

The 7% preference dividends are two years in arrears. The company has formulated an approved scheme of capital reduction/reorganization to take effect on 1 October 2007 which contained the following:

- 1. The ordinary shares are to be written down to \$0.50 per share and then to be converted into new ordinary share of \$2.00 per share fully paid.
- 2. The preference shareholders are to receive 50 000 ordinary shares of \$2.00 per share, fully paid at par, in exchange for their preference shares.
- 3. In consideration for waiving their rights to arrears of preference dividend, the preference shareholders have agreed to accept 10 000 new ordinary shares of \$2.00 per share, fully paid, in full and final settlement.
- 4. The creditors have agreed to take 100 000 new ordinary shares of \$2.00 per share, fully paid at par, in part satisfaction of the sums due to them.
- 5. The debit balance on the profit and loss account is to be written off.
- 6. The following revaluations are to be incorporated into the accounts.

|                     | \$      |
|---------------------|---------|
| Freehold premises   | 200 000 |
| Plant and equipment | 210 000 |
| Vehicles            | 50 000  |
| Inventory           | 72 000  |

7. A Provision for credit loses is to be created at \$2000.

#### **REQUIRED:**

- a) Prepare journal entries to effect the capital reduction.
- b) Prepare a capital reduction account.
- c) Prepare the Statement of Financial Position of Amigos PLC immediately after the capital reduction scheme.

# CHAPTER 17

# STATEMENT OF CASH FLOWS

## 17.1 Chapter objectives

#### After studying this chapter the student should be able to:

By the end of this chapter you should be able to:

- 1. Define the term, 'cash flow'
- 2. Explain the essence of drawing up the Statement of cash flow to all stakeholders.
- 3. Identify the International Accounting Standard applied in the preparation of the Statement of cash flow.
- 4. Distinguish between the direct method and indirect method of preparing the Statement of cash flow.
- 5. Prepare the sales ledger control account and the purchases ledger control account to determine the receipt from debtors and payments to trade payables.
- 6. Draw up the disposal account to determine the profit of loss on the sale of property, plant and equipment.
- 7. Prepare the Statement of cash flow form the given information.
- 8. Draw up the statement of financial position using information from the Statement of cash flow.

#### 17.2 Introduction

A Statement of cash flow is a summary of a business's cash receipts and cash payments during an accounting period.

## 17.3 The importance of a Statement of cash flow.

IAS 7 (*Statement of cash flows*) requires companies to include a Statement of cash flow alongside with the Statement of comprehensive income and Statement of Financial Position in their published financial statements.

The benefits and uses of a Statement of cash flow are:

- 1. It shows which types or part of the business used more cash, or (put in other words)-what was most of the cash used for. How did the business raise most of its cash.(NB we can make a loss but still increase our bank balance) e.g. we sell idle machinery for twice the loss.
- 2. The liquidity of the business can be evaluated.
- 3. Helps users see how much cash did the day-to-day operations raise.(besides other means like issuing shares or borrowing loans).
- 4. It shows the manner in which the capital expenditure, additions on property, plant and equipment has been financed. (e.g. we raised enough money through (trading) operating activities or we borrow a lot of money or we issued more shares or debentures).
- 5. It can be used to project future cash flows, assess the future ability of the business to pay debts, dividends and interests.

## 17.4 IAS 7 – Statement of cash flows

This deals with Statement of cash flow.

The standard requires a Statement of cash flow to be reported under the following standard headings.

## **Operating activities**

This refers to the net increase/decrease in cash, and cash equivalents that results from the Company's trading activities.

## **Investing activities**

This is the cash paid or received from the acquisition and disposal of property, plant and equipment.

## **Financing**

This refers to cash received or paid to providers of Finance when shares and debentures are being issued or redeemed.

International Accounting Standards (IAS) 7 cash-flow statement is presented under the following three standard headings. All the 3 headings should be shown in this sequence and the final total/net of the three subtotals represent the net cash increase/decrease during a period.

Cash flows from operating activities Cash flows from investing activities Cash flows from financing activities

#### 17.5 Direct and indirect methods

In accordance with IAS 7, there are two ways of presenting a Statement of cash flow. We have the direct and the indirect method, and the standard however emphasises that Statement of cash flows should be presented using the direct method. The difference between the two methods is the presentation of the first section i.e. cash flows from operating activities.

## 17.6 Direct Method

This method should be used when we are provided with the bank and cash summary. The student should prepare this summary if it is not provided. The following is a pro forma of a Statement of cash flow presented under the direct method utilising information from the bank summary.

| Cash flows from operating activities                                       |               |     |
|--|---------------|-----|
| Cash sales   | XXX           |     |
| Cash received from customers   | XXX           |     |
| Less cash paid for: -  |               |     |
| Payments to creditors  | (xxx)         |     |
| Cash purchases   | (xxx)         |     |
| Payments for operating expenses (rent + Electricity + Insurance paid etc.) | (xxx)         |     |
| Cash paid to employees (wages + salaries paid)                             | (xxx)         |     |
| Cash (used) or generated from operations                                   | (xxx)         |     |
| Less Interest paid   | (xxx)         |     |
| Less preference dividend paid  | (xxx)         |     |
| Less debenture interest paid   | (xxx)         |     |
| Less Cash drawings (in case of sole trader or partnership)                 | (xxx)         |     |
| Less Tax paid  | (xxx)         |     |
| Net cash in/(out) flow from operating activities                           |               | XXX |
| Cash flows from investing activities                                       |               |     |
| Less cash paid for purchase of non – current assets /fixed investments     | (xxx)         |     |
| Add loan Interest received and other investment income                     | XXX           |     |
| Add disposal proceeds (the actual cash received)                           | XXX           |     |
| Net Cash in/(outflow) from investing activities                            | <del></del>   | XXX |
| Cash flows from financing activities                                       |               |     |
| Add loan acquired or addition to capital                                   | XXX           |     |
| Add issue of shares and debentures (including premium)                     | XXX           |     |
| Less cash paid for redemption of share (including premium)                 | (xxx)         |     |
| Less loan repayment  | <u>(</u> xxx) |     |
| Less Equity interim (this year) dividend                                   | XXX           |     |
| Less Final dividend (last year's dividend)                                 | XXX           |     |
| Net Cash in /(outflow) from financing activities                           |               | XXX |
| Net cash increase/(decrease) during the year                               |               | XXX |
| Add opening balance of cash & cash equivalents                             |               | XXX |
| Closing balance of cash & cash   |               | XXX |
|  |               |     |

The common problem is to find receipts from debtors and payments to creditors. We overcome this by using control accounts.

#### Receipt from debtors

| Receipt from debtors     | Debtors                         | Control A/C                                    |
|--------------------------|---------------------------------|--|
| Bal. b/d<br>Credit sales | xxx<br><u>xxx</u><br><b>xxx</b> | Bank (as a balance figure)xxx Bal. c/d xxx xxx |
| Bal. b/d                 | xxx                             | <del></del>                                    |

## Payment to creditors

#### Creditors Control A/C

| Bank (as a balancing Figure)<br>Bal. c/d | XXX<br>XXX | Bal. b/d<br>Credit Purchases | xxx<br><u>xxx</u> |
|--|------------|------------------------------|-------------------|
| =  | XXX        |                              | XXX               |

#### **Balancing figure**

If debtors are shown less Provision for credit loses these should be treated separately. Increase or decrease in debtors should be determined by using the figure before Provision for credit loses and bad debts written off.

#### 17.7 Indirect Method

This is the common method with examiners and here you take the Net profit before Interest and tax then adjusts it for non-cash items that are charged in the Statement of comprehensive income. You also adjust for working capital movements. An increase in inventory might mean we used more money to purchase more inventories, thus is a cash outflow. A decrease in accounts receivable might mean we received more cash when our accounts receivable paid up more of their bills, thus a cash inflow.

The opposite happens for liabilities e.g. a decrease in accounts payables means we made more payments to our creditors and thus cash outflow

There are basically two approaches that examiners can use, you may be required you to prepare a Statement of cash flow where you are given two Statement of Financial Positions and a part of an Statement of comprehensive income or two Statement of Financial Positions only. As explained earlier, the difference between the direct and the indirect is on the presentation of the first section. The following is a pro forma of the cash flows from operating activities under the indirect method. The other sections are just the same as if the cash flow is prepared under the direct method.

#### Cash flows from operating activities.

| Net profit after tax   | XXX       |
|--|-----------|
| Add back tax   | XXX       |
| Add back interest charged  | XXX       |
| Net profit before interest and tax   | XXX       |
| Adjustments to profit  |           |
| Add back loss on disposal (it was initially deducted from profit)          | XXX       |
| Add back depreciation charged during the period                            | XXX       |
| Add back bad debts written off   | XXX       |
| Add back Increase in Provision for credit loses                            | XXX       |
| Add back amount of goodwill written off                                    | XXX       |
| Add back preliminary costs (initially capitalised now written off)         | XXX       |
| Add back research development cost (initially capitalised now written off) | XXX       |
| Less decrease in Provision for credit loses                                | (xxx)     |
| Less profit on disposal of property, plant and equipment                   | (xxx)     |
| Less investment income (interest and dividend received)                    | (xxx)     |
| Net cash in/outflow before working capital adjustment                      | XXX       |
| Working capital Adjustments  |           |
| Add decrease /(less increase) in current assets                            | xxx/(xxx) |
| Add increase /(less decrease) current liabilities                          | xxx/(xxx) |
| Cash (used) or generated from operations                                   | XXX       |
| Less interest paid   | (xxx)     |
| Less preference dividend paid  | (xxx)     |
| Less debenture interest paid   | (xxx)     |
| Less cash drawings (in case of trader or partnership)                      | (xxx)     |
| Less tax paid  | (xxx)     |
|  |           |

#### Net cash in/(out) flow from operating activities

XXX

## **Notes:**

1. Where you are given only two balances sheets without an Statement of comprehensive income, we determine the profit and loss or the year by the use of profit and loss appropriation account as shown:

Profit and loss appropriation account

| Transfer to reserve Tax Current Year |     | xxx<br>xxx | Bal. b/d Profit for the year (as a balance figure) | xxx<br>xxx |
|--------------------------------------|-----|------------|--|------------|
| Interim Dividend                     |     | XXX        |  |            |
| Final Dividends current year         |     | XXX        |  |            |
| Capital redemption reserve           |     | XXX        |  |            |
| Balance c/d                          |     | XXX        |  |            |
|                                      | XXX | _          | xxx  |            |

The problem with the Statement of cash flow is in finding figures to be used in its preparation.

How to find items for the operating section.

2. Calculation of depreciation for the year (if not given)

Provision for depreciation account

| Disposal ( if any)<br>Bal. c/d | XXX<br>XXX<br>XXX | Balance b/d P & L (as a balancing figure) | XXX<br>XXX<br>XXX |
|--------------------------------|-------------------|---|-------------------|
|--------------------------------|-------------------|---|-------------------|

| Asset account (at net book value) |     |                           |     |
|-----------------------------------|-----|---------------------------|-----|
| Balance b/d                       | XXX | Disposal                  | XXX |
| Bank - additions                  | XXX | Depreciation (difference) | XXX |
|                                   |     | Balance c/d               | XXX |
|                                   | XXX |                           | XXX |
|                                   |     |                           |     |

## 3. Changes in working capital items

With these, you simple take the difference between the two Statement of Financial Positions. An increase in a current asset is an outflow and a decrease in is an inflow. An increase in a current liabilities is an inflow whilst their reduction is an outflow because we would have used some money to pay liabilities. However there are some items which require special care e.g. when bad debts are written off you do not simply take the difference, you derive the bank figure through a T account. See below:

Debtors account

| Bal. b/d<br>Payable sales | XXX<br>XXX | Bad debt written off Bank (balancing fig.)* Bal. c/d | XXX<br>XXX<br>XXX |
|---------------------------|------------|--|-------------------|
|                           | XXX        |  | XXX               |

<sup>\*</sup>The cash in/(out) flow is represented by the bank figure.

The following items should not be used in the determination of changes in working capital because they are considered somewhere else in the Statement of cash flow.

1. Cash and cash equivalents

- 2. Taxation
- 3. Proposed dividends

## 4. Profit and loss on sale of property, plant and equipment

If it is not given on the question it is determined by the use of asset disposal account.

# Disposal A/C

|                               | •   |                          |            |
|-------------------------------|-----|--------------------------|------------|
| Property, plant and equipment | xxx | Dep.<br>Proceed of sales | XXX<br>XXX |
| Profit                        | XXX | Loss                     | XXX        |
|                               | XXX |                          | XXX        |

The profit or loss is determined as a balancing figure, if on the right it is profit and if it is on the left it is a loss.

## 4. Investing activities

The problem is to determine property, plant and equipment purchased during the year. If property, plant and equipment account are stated at cost we use property, plant and equipment T. A/C

|                    | Property | y, plant and equipment A/C |     |
|--------------------|----------|----------------------------|-----|
| Bal. b/d (at cost) | XXX      | Disposal (at cost)         | XXX |
| Purchases          | XXX      | Bal. c/d (at cost)         | XXX |
| XXX                |          | XXX                        |     |
|                    |          |                            |     |

## If stated at CA

|   | Proper | ty, plant and equipment A/C |     |
|---|--------|-----------------------------|-----|
| Bal. b/d at CA                          | XXX    | Disposal at CA              | XXX |
| Asset Purchased (as a balancing figure) | XXX    | Depreciation for the year   | XXX |
|   |        | Balance c/d at CA           | XXX |
|   | XXX    |                             | XXX |
|   |        |                             |     |
| Balance b/d                             | XXX    |                             |     |

If property, plant and equipment are revalued we use the T account for property, plant and equipment at cost (except when figures are given only at CA) as follows:

## Property, plant and equipment A/c

| Bal. b/d Revaluation Asset purchased (belonging fig.) | XXX | Disposal | XXX |
|---|-----|----------|-----|
|   | XXX | Bal. c/d | XXX |
| Asset purchased (balancing fig.)                      | XXX |          | XXX |

## 5. Equity dividends paid during the period

This is ordinary dividend **paid**. This is normally the **final dividend** for last year and **interim dividend** for this year. This is determined as follows: -

|     |      | _   |      |      |
|-----|------|-----|------|------|
| Div | vide | nd. | acco | nınt |

| Dividend paid (as a bal. figure) | XXX | Bal. b/d      | xxx |
|----------------------------------|-----|---------------|-----|
| Bal. c/d                         | XXX | Profit & Loss | XXX |
|                                  | XXX |               | XXX |
|                                  |     |               |     |

## **Financing**

To find capital issued during the year when there is bonus issue, we draw up the ordinary share capital account:

| Share Capital A/C   |     |                    |     |
|---------------------|-----|--------------------|-----|
| Redemption (if any) | xxx | Bal. b/d           | xxx |
| Bonus issue         | XXX |                    |     |
| Bal. c/d            | XXX | Bank (bal. figure) | XXX |
| XXX                 |     | XXX                |     |

## Example 1

# 17.8 Cash flow of a limited Company

The following information relates to the business of Qualitex Pvt Ltd.

## Statement of Financial Position as at

|                                 | 28/02/06   | 28/02/05   |
|---------------------------------|------------|------------|
| Issued share capital            | 420 000    | 360 000    |
| Share premium                   | 42 000     | 36 000     |
| Retained profits                | 17 400     | 17 400     |
| Long- term loan (Cr)            | 100 800    | 240 000    |
| Trade creditors                 | 9 000      | 6 900      |
| Bank                            | (Cr) 1 500 | (Dr) 4 500 |
| Land and buildings at cost      | 450 000    | 450 000    |
| Machinery at cost               | 180 000    | 180 000    |
| Furniture and equipment at cost | 12 000     | 9 000      |
| Listed investments at cost      | 56 100     | 51 600     |
| Trade debtors                   | 7 020      | 8 400      |
| Inventory – merchandise         | 24 000     | 24 000     |
| Shareholders for dividends      |            | 9 000      |
| Tax payable                     | -          | 39 000     |
| Provision for bade debts        | 702        | -          |
| Accumulated depreciation:       |            |            |
| Machinery                       | 36 000     | 18 000     |
| Furniture and equipment         | 2 400      | 1 200      |
|                                 |            |            |

The following balances were extracted from the Statement of comprehensive income before any adjustments had been effected the year ended 28 February 2006.

|                                       | \$      |
|---------------------------------------|---------|
| Sales                                 | 426 000 |
| Purchases                             | 247 500 |
| Administrative expenses               | 49 200  |
| Dividends earned on investments       | 7 500   |
| Interest expense re- long – term loan | 36 000  |
| Bad debts                             | 1 482   |

## **Additional Information**

- (i) Depreciation on machinery \$18 000 and on furniture and fittings \$1 200, were mistakenly debited to administrative expenses.
- (ii) On 28 February 2006, a dividend of \$18 000 was declared and it was calculated that the company tax for the year will be \$48 000.
- (iii) On 28 February 2006, the inventory of merchandise amounted to \$27 000.
- (iv) No property, plant and equipment were sold or scrapped during the financial year. All additions were paid for in cash.
- (v) All purchases were on credit

## **REQUIRED**

Prepare a Statement of cash flow of Qualitex Pvt Ltd for the year ended 28 February 2006.

#### **Solution**

Qualitex Pvt Ltd: Statement of cash flow for the year ended 28 February 2006.

| Cash flow operating activities            | \$<br>\$  |
|---|-----------|
| Cash receipts from customers (a)          | 426 600   |
| Cash paid to suppliers and employees (b)  | (275 400) |
| Cash generalized from operations          | 151 200   |
| Interest paid                             | (36 000)  |
| Dividends received                        | 7 500     |
| Dividends paid (c)                        | (9 000)   |
| Tax paid (d)                              | (39 000)  |
| Net cash inflow from operating activities | 74 700    |

Cash flows from investing activities

Acquisition of investments (56 100 – 51 600) (4 500)

Additions to furniture & equipment

 $(12\ 000 - 9\ 000)$   $(3\ 000)$ 

Net cash outflows from investing activities (7 500)

Cash flows from financing activities

Proceeds from issue of share capital (e) 66 000

Repayment of long - term loan (\$240 000-

100 800) (139 200)

Net cash outflow from financing activities (73 200)

Net decrease in cash and cash equivalents (6 000)

Cash & cash equivalents at start of yr 4 500

Cash & cash equivalents at year end (1 500)

# Notes

1. Reconciliation of profit before tax with cash generated from operations.

|           |                                     |             | \$             |  |
|-----------|-------------------------------------|-------------|----------------|--|
| Profit b  | efore tax                           |             | 102 318        |  |

|    | Opening inventory                           | 24 000         |                 |
|    | ± Purchases                                 | <u>247 500</u> |                 |
|    | - Closing Inventory                         | <u>27 000</u>  | <u>244 500</u>  |
|    | Gross profit                                |                | 181 500         |
|    | <u>Less</u> administrative expenses         |                |                 |
|    | (49 200 – 19 200)                           | 30 000         |                 |
|    | Depreciation                                | 19 200         |                 |
|    | Bad debts                                   | 1 482          | <u>50 682</u>   |
|    | Net operating profit                        |                | 130 818         |
|    | Add investments income (dividends recd)     |                | 7 500           |
|    | <u>Less</u> finance costs: interest payable |                | <u>(36 000)</u> |
|    | Net profit for the year                     |                | <u>102 318</u>  |
|    |   |                |                 |

g) Both the increase in Provision for credit loses and actual bad debts are non- cash items which must not be taken into account. Therefore bade debts of \$1 482 must be added back to profits and must be omitted in the calculating changes in the debtors.

The effect is that the closing balance of the debtors increases with \$780 which is bad debts written off against trade debtors = 7020 + 780 = 7800.

#### Example 2

## 17.9 Cash flow of a Sole Trader

The following information relates to the business of Angela, a sole trader.

|        | Statement of comprehensive inco          | me for the    |                    | 1 December 1999     |                     |

#### **Additional information**

- i. All sales and purchases were on credit
- ii. An item of machinery with a written down value of \$5 000 was disposed of during the year.

#### Required:

- 1) Prepare a Statement of cash flow using the following methods for the year ended 31 December 1999.
  - a) The direct method.
  - b) The indirect method.
- 2) Comment on the liquidity and profitability of Angela's business.

## **Solution**

#### The direct method

If a Statement of cash flow is to be prepared using this method, a summary of the bank transactions should be prepared as part of workings if not supplied. A summary of bank transactions is the cash book. A Statement of cash flow can then be prepared by utilising all the figures in the summary of bank transactions. Other necessary workings are to be shown as we go on.

#### Workings

| The bank summary                 |                  |                       |         |  |

#### Comments on the Statement of cash flow

- A Statement of cash flow measures the liquidity of the business, whilst a Statement of
  comprehensive income shows the profitability of the business. Profitability does not necessarily
  mean that cash is available. The answers are explained in a Statement of cash flow as below in
  relation to the business of Angela.
- During the year, there was a significance decrease in net trading profit contrary to an increase in cash and cash equivalents of \$3 000. This was caused partly by cash and non-cash operating expenses that were provided for during the year.
- Cash flows from operating activities, which are the principal revenue producing activities of the business amounted to \$33 000. This amount was too little to meet purchase of machinery.
- In a bid to improve the liquidity of the business, Angela brought in additional capital of \$98 000. Part of the money was used to repay a long-term loan.

#### 17.10 STATEMENT OF CASH FLOW FOR A PARTNERSHIP BUSINESS

The following information pertains to the partnership of Water and Oil as at 31 December 2005.

#### STATEMENT OF COMPREHENSIVE INCOME FOR THE YEAR ENDED 31 DECEMBER 2005

#### Additional information

- 1. The investment was made on 31 December 2005
- 2. No land and buildings were purchased during the year 50% of the selling price of the land and buildings was received in cash and the balance will be received during the next financial year.
- 3. No furniture or equipment was sold or scrapped during the year. All purchases were paid for in cash.
- 4. All purchases of inventory were made on credit. All of the other expenses, except the accrued expenses, were paid in full.
- 5. Drawings of the partners were made in cash.
- 6. Inventory is recorded at cost.
- 7. Debtors in the book on 31 December 2004 were trade debtors and those in the books on 31 December 2005 pertained to trade debtors and the debtor in respect of the sale of land and buildings.

#### **Disposals of Motor Vehicles**

|                              | \$000       |
|------------------------------|-------------|
| Cost                         | 120         |
| Proceeds                     | (15)        |
| Loss on sale                 | <u>(18)</u> |
| Depreciation on date of sale | <u>87</u>   |

#### (W4) Ordinary dividends

|                        | \$000       |
|------------------------|-------------|
| Accrued at 31 May 2005 | 60          |
| Paid in 2005           | 90          |
| Debited in P & L a/c   | <u>(90)</u> |
| Accrued at 31 May 2004 | <u>60</u>   |

(W5) Revaluation Reserve should be included in the Statement of Financial Position of 31 May 2004 although it did not exist at that date. Examiners require a positive response if a mark is to be awarded for correct recognition of the situation. Omission of the item from the answer could suggest that the candidate had overlooked it or had not understood how to deal with it.

#### 17.12 Examination type questions

#### Multiple choice questions

- 1. When preparing a Statement of cash flow, which of the following would be classified as an investing activity.
  - A. dividends paid
  - B. a new long term loan taken out to finance the purchase of property, plant and equipment
  - C. interest paid on a long-term bank loan
  - D. the cost of purchasing a patent
- 2. The data given relates to the business of Bingo Ltd for the year ended 31 December 2006

\$

| Operating profit              | 1 000 |
|-------------------------------|-------|
| Depreciation charges          | 60    |
| Profit on sale of vehicle     | 10    |
| Receipts from sale of vehicle | 50    |
| Interest paid                 | 100   |
| Increase in inventory         | 150   |
| Increase in debtors           | 35    |
| Increase in creditors         | 50    |
| Dividend paid                 | 25    |
|                               |       |

What is the net cash inflow from operating activities?

A. \$915 B. \$935 C. \$1015 D. \$1090

3. A company wishes to prepare a Statement of cash flow. The following information is known concerning dividends.

Proposed dividends owing year 1 \$75 000

Proposed dividends owing year 2 \$120 000

Dividends paid and proposed in year 2 \$170 000

What is the amount paid as dividends by the company to be included in the Statement of cash flow?

- A. \$25 000
- B. \$215 000
- C. \$125 000
- D. \$170 000
- 4. The following information concerning tax, is extracted from the books of Springles Ltd.

| 2005 | 2006 |
|------|------|
| \$   | \$   |

Current liabilities

Taxation 180 000 172 000

The profit and loss extract for the year ended 2006, includes a tax liability of \$160 000.

What is the amount of tax paid to be included in the Statement of cash flow of 2006?

- A \$160 000
- B \$168 000
- C \$180 000
- D \$182 000

## 17.13 Structured questions

#### **Question 1**

The following information pertains to the business of Jane White, a general dealer.

|                             | 31 August 2002 | 31 August 2001 |
|-----------------------------|----------------|----------------|
|                             | \$             | \$             |
| Equipment at cost           | 216 000        | 180 000        |
| Land and Buildings at cost  | 300 000        | 270 000        |
| Inventory at cost           | 60 000         | 48 000         |
| Trade debtors               | 51 000         | 57 000         |
| Cash at Bank                | 6 000          | -              |
| Creditors                   | 57 000         | 60 000         |
| Bank overdraft              | -              | 18 000         |
| Long – term loan (Cr)       | 240 000        | 225 000        |
| Capital – Jane White        | 252 600        | 175 200        |
| Accumulated depr- equipment | 36 000         | 29 400         |

#### **Additional Information**

- 1. No property, plant or equipment was sold or scrapped during the year ended 31 August 2002. Equipment costing \$21 000 was purchased on credit during the year. This amount is included in creditors' figures and no payments for the equipment had been made by year end. All other additions to property, plant and equipment were paid for.
- 2. Interest paid on the long- term loan during the year amounted to \$36 000.
- 3. Cash drawings which have been deducted from the capital a/c during the year ended 31 August 2002 amounted to \$30 600.
- 4. Profit for the year amounted to \$78 000 and has already been added to the capital a/c.
- 5. Creditor's in respect of 31 August 2002 pertain to trade creditors and a creditor in respect of an investment activity.

#### REQUIRED

PREPARE THE STATEMENT OF CASH FLOW OF JANE WHITE FOR THE YEAR ENDED 31 AUGUST 2002.

**Question 2** 

The following information is available from XYZ Ltd

| 2003      | Balances at 31 December                             | 2004      |
|-----------|---|-----------|
| \$        |   | \$        |
| 3 304 000 | Turnover for the year                               | 2 875 200 |
| 1 944 800 | Cost of Sales                                       | 1 690 400 |
| 2 200 000 | Issued 10% Redeemable preference shares of \$2 each | 1 800 000 |
| 1 840 000 | Issued ordinary shares of \$2 each                  | 2 440 000 |
| 368 000   | Share Premium                                       | 116 000   |
| 112 000   | Other revenue reserves                              | 132 000   |
| 3 938 400 | Property, plant and equipment at book value         | 3 976 000 |
| 168 400   | Inventory   | 147 200   |
| 194 560   | Trade debtors                                       | 384 560   |
| 218 320   | Bank (dr. balance)                                  | 58 120    |
| 509 680   | Creditors   | 466 880   |
| 240 000   | 9% Debenture Inventory                              | 168 000   |
| 900 000   | Long-term investments                               | 840 000   |
| 150 000   | Profit and loss account                             | 283 000   |

#### **Additional information**

- 1. Depreciation of property, plant and equipment for 2004 was \$146 400
- 2. Creditors include dividends proposed of \$404 000 for 2003 and \$375 200 for 2004.
- 3. During 2004, investments were sold at a profit of \$10 000, which has been deducted from the administration costs for the year.
- 4. At 1 January 2003 there was a Provision for credit loses of \$12 800. This provision was reduced in December 2003 to \$10 240 and was increased in December 2004 to 5% of the debtors. The debtors shown in the accounts are net of this provision.
- 5. In May 2004 a bonus issue of shares was made of 2 new \$2 Ordinary shares for every 10 held.
- 6. New \$2 ordinary shares had been issued at a premium of \$1.00 each in October 2004.
- 7. No property, plant and equipment had been sold during the year.

Prepare a Statement of cash flow for the year ending 31 December 2004.

## **CHAPTER 18**

## **ACCOUNTING RATIOS**

#### 18.1 Chapter objectives

#### After studying this chapter the student should be able to:

- 1. State and explain the users of accounting ratios.
- 2. Explain the importance of liquidity ratios, profitability ratios, efficiency ratios, capital structure ratios and investment ratios.
- 3. Describe the factors that may lead to a low gross/net profit percentage.
- 4. Calculate liquidity ratios, profitability ratios, efficiency ratios, capital structure ratios and investment ratios.
- 5. Comment briefly on the comparison of each ratio as between the two companies.
- 6. State which company appears to be more efficient, giving what you consider to be possible reasons?
- 7. Prepare the Statement of comprehensive income using information from the ratios calculated.
- 8. Prepare Statement of Financial Position using information from the ratios calculate.
- 9. Give five reasons why making a profit does not necessarily mean having cash.
- 10. Explain the limitation of accounting ratios.

#### 18.2 Introduction

The purpose of accounting is to convey information. The Statement of comprehensive income will indicate the profit or loss made by an organisation in a period, while the Statement of Financial Position will provide a summary of its assets and liabilities at a given date.

Ratios enable users of accounting information and management to gain better understanding of how an organisation has performed. However the calculation of ratios is not in itself adequate. Comparisons must be made.

Common bases of Comparisons are:

- 1) an industrial average
- 2) other businesses in the same line of business
- 3) trends in the same business over a number of years
- 4) management forecasts or anticipated results

#### 18.3 Users of ratios

#### Management: -

- 1) to analyse results of their companies
- 2) to plan for the future
- 3) to control their business
- 4) to facilitate management by exception

Investors

- 1) to compare their investments with alternative forms of investment in terms of share price growth
- 2) ability of business to maintain or increase their current dividend
- 3) make informed decisions when investing in a particular company
- 4) bankers and finance houses, to assess credit worthiness of businesses
- 5) government statistics for national statistics compilations
- 6) financial Analysts working for trade unions to enable them negotiate salary rises, conditions and so on

#### 18.4 Commonly used ratios

- 1) Liquidity
- 2) Profitability
- 3) Use of Assets/efficiency ratios
- 4) Capital Structure
- 5) Return to investors

#### Example:

Growth ratios.

#### Financial statement analysis

The following are financial statements of Enzo Ltd. for the trading period ended 31 December 2001

#### FINANCIAL STATEMENT FOR ENZO LTD AS AT 31 DECEMBER

|                          |            | 2000        |            | 2001       |

| <u>Liabilities</u>                       |           |           |               |    |           |           |             |
| Payables                                 | 70        |           |               |    | 110       |           |             |
| Taxation                                 | 40        |           |               |    | 60        |           |             |
| Dividends unpaid                         | <u>35</u> |           | 145           |    | <u>65</u> |           | 235         |
| 10% Debentures                           |           |           | <u>40</u>     |    |           |           | <u>100</u>  |
|  |           |           | <u>520</u>    |    |           |           | 975         |
| Additional information                   |           |           |               |    |           |           |             |
| 1. Average inventory                     |           | \$65 00   | 00            |    | \$        | 70 000    |             |
| 2. Market price of ordinary shares       |           | 120 ce    | nts           |    | 19        | 0 cents   |             |
| 3. Opening inventory was as follows:     |           | Yr. 20    | $00 = 65 \ 0$ | 00 | Y         | r. 2001 = | = 60 000    |

#### **REQUIRED**

Calculate

- (a) liquidity ratios
- (b) Profitability, efficiency and investments ratios and comment on the results.

## 18.5 Liquidity ratios

Liquidity ratios measure the ability of a business to meet its short-term financial commitments using its current assets.

#### The Importance of liquidity ratios

- 1. Before new suppliers may extend credit to a customer, the liquidity situation of the customer is considered to assess the risk for non-payment.
- 2. For management, liquidity ratios may help identify working capital items, which are poorly, managed e.g. Capital being tied up in inventory, Receivables or cash lying idle in the bank instead of being invested to achieve profit.

#### Current ratio or working capital ratio

Shows the number of times current liabilities are covered by current assets.

| Current ratio | = |   | ent Assets<br>ent Liabilities |                |
|---------------|---|---|-------------------------------|----------------|
|               |   |   | 2000                          | 2001           |
| Current ratio |   | = | <u>220</u>                    | <u>245</u>     |
|               |   |   | 145                           | 235            |
|               |   |   | 1.52: 1 times                 | 1.042: 1 times |

## **Tutorial** note:

A mere mention that a ratio has decreased or increased is not obvious but meaningless. Students are advised to give explanations that should suit the question being considered.

#### Comment

The liquidity position of the business seems barely satisfactory in 2000 and has fallen to a very low level in 2001. This has been caused by an overly increase in the investment on receivables. It is generally accepted that a current ratio of between 1.5:1 and 2:1 is reasonable.

#### Factors that influence the current ratio

- 1. The nature of the business. A business may require large inventories to be carried.
- 2. Or where sales are mainly on credit, a large amount of Receivables is carried in the Statement of Financial Position.
- 3. Where sales are seasonal, working capital will also fluctuate.

#### Acidity test ratio

Sometimes referred to as liquidity ratio that measures the ability of the business's current assets other than inventory to meet current liabilities. Inventory includes work in progress, materials and finished goods. The rationale of inventory is that it is the least liquid working capital assets. In other words it cannot be readily converted into cash.

|                    | = | 1,10: 1 times   | 0,74: 1 times   |
|--------------------|---|---|-----------------|
| Quick ratio<br>145 | = | <u>220 – 60</u><br>235                                | <u>245 – 70</u> |
| =                  |   | Current assets – inver<br>Current liabilities<br>2000 | 2001            |
|                    |   |   |                 |

#### **Comment**

A quick ratio of 1:1 is generally considered satisfactory while Enzo Ltd's quick ratio for 2 000 is satisfactory. It has been allowed to fall too low in 2001. The situation in 2001 can be blamed on the large dividend declared in 2001.

### 18.6 Profitability ratios

These ratios indicate the performance of a business. Investors are interested in knowing whether or not to invest in a business based on the return to their capital. For management, they need to assess their efficiency in terms of their ability to control expenses.

#### a) Gross Profit / Sales or Margin

It expresses the gross profit as a percentage of total sales.

Gross profit percentage =  $\frac{\text{Gross profit x 100\%}}{\text{Sales}}$ =  $\frac{2000}{350 \times 100}$  =  $\frac{350 \times 100}{1000}$  =  $\frac{500 \times 100}{1300}$ 

#### Comment

The business has achieved a higher margin in 2001. It is likely that the business factors that may lead to a low gross profit percentage. However, such an increase should not be a satisfactory measure of the performance of the business without relating it to other targets set by management and or other similar business in the same line.

#### Factors that may lead to a low gross profit percentage

- 1. An increase in the cost of sales not passed to customers.
- 2. Reductions in selling price to dispose of slow moving, damaged or obsolete inventory.
- 3. Stolen inventory not identified
- 4. A price cutting policy usually as a measure to combat competition.
- 5. Bulk discounts being given to major customers.
- 6. The owner may have taken goods for private consumption.
- 7. Opening inventory overstated
- 8. Closing inventory understated
- 9. Sales being understated
- 10. Purchases being understated.
- 11. Changes in product mix resulting in selling more of low margin products than the previous period.

#### b) Net Profit Percentage

This expresses an organisation's net profit as a percentage of total sales.

| Net Profit % |     | = | Net profit before interest & t<br>Sales |                      |
|--------------|-----|---|---|----------------------|
| Net profit % |     | = | 2000<br>200<br>1 000                    | 2001<br>300<br>1 300 |
| =            | 20% |   | 23%                                     |                      |

#### **Comment**

The net profit to sales ratio has improved in 2001. Possible explanations could have been:

- 1. A deliberate reduction of costs
- 2. An increase in the selling price without a corresponding increase in costs.

#### Notes

A significant decrease in the net profit percentage that is not accompanied by a similar change in the gross margin might indicate that an organisation needs to improve control of its expenses.

#### c) Return on Capital Employed

Measures the return or profit made by the total assets employed in the business

The second method is more detailed and may assist users to analyse how well the assets are being utilised (turnover) and the general profitability (margin).

#### Enzo Ltd.

| Method 1 |   | 2000                     | 2001                     |
|----------|---|--------------------------|--------------------------|
| ROCE     | = | 200 x 100%<br>(335 + 40) | 300 x 100%<br>(640 +100) |
|          | = | 53%                      | 40%                      |
| Method 2 | = | Margin x turnover        |                          |
|          | = | 200 x 1000<br>1 000 375  | 300 x 1 300<br>1 300 740 |
|          | = | 20% x 2,67 times         | 23% x 1,76 times         |
| ~        | = | 53%                      | 40%                      |

#### **Comment**

The ratio indicates a falling return on capital. Method 2 will indicate that more capital has been employed but have failed to raise reasonable sales to support it. There is need to dispose of excess property, plant and equipment.

#### Importance

- Investors can assess in percentage terms, the level of profit that can be generated by every dollar that they invest, use ROCE.
- Investors would be satisfied with a return that is higher than what they expect to be compensated for the capital they would contribute in the business.
- Investors & management can apply it to evaluate alternative forms of investment.

## What does a low or declining ROCE means?

- An increase in the cost of borrowing may turn the business into a loss making company.
- Additional borrowings may have an adverse effect on profitability.
- Can be used as a base of evaluating investment projects, those with low ROCE would certainly be undesirable.

#### **Tutorial Notes**

A common pitfall for students is when asked to distinguish between liquidity and profitability. A business may be profitable but having liquidity problems, the following may contribute to such a situation.

- 1. too large a balance for accounts receivable due to slow paying debtors
- 2. A poor inventory control policy due to inventory held in excess of requirements.
- 3. Use of short-term loans and overdrafts to finance the acquisition of assets.
- 4. Where long term debt was used to finance the acquisition of inventory this results in serious problems, as the business may find itself without money to pay off its long-term debt. Companies are required to match short term debt with short term assets, long-term debt with long term

- assets. Capital is a long term fund normally used to finance the acquisition of property, plant and equipment or to repay long term debt now due.
- 5. Over trading occurs where a business expands too quickly without adequate working capital to support the expansion. To support the high demand for its products, the business builds up inventories, sales increase so do receivables, there is an overly dependence on payables to finance acquisition of inventory. Without a comprehensive policy a business may find itself failing to meet its running costs.

#### 18.7 Assets utilisation

These ratios are used to measure the efficiency with which the resources have been used.

#### a) Sales to property, plant and equipment ratio

- Measures how effectively an organisation utilises its property, plant and equipment to generate sales.
- It measures how much each dollar invested in property, plant and equipment generates sales.

Sales / property, plant and equipment ratio  $= \frac{\text{sales}}{\text{Property, plant and equipment}}$ Property, plant and equipment ratio  $= \frac{1000}{300}$ Sales/Property, plant and equipment ratio  $= \frac{1}{300}$   $= \frac{1}{3}$  1,78 times

#### **Comment**

There has been a fall in the sales / property, plant and equipment ratio a testimony of poor property, plant and equipment utilisation. It is probably that the business has non-property, plant and equipment in excess of requirements.

#### b) Sales/ Total assets

Model = <u>Sales</u> Total assets

Where total assets is non-current plus current assets.

#### Enzo Ltd.

| 2000         | 2001                |
|--------------|---------------------|
| 1 000<br>520 | <u>1 300</u><br>975 |
| 1.92 times   | 1.33 times          |

#### **Comment**

This ratio confirms merely investment the business has made in assets, which seem to be failing to generate adequate sales to justify the level of investment made. However, care should be taken as an investment in assets made part-way in the year may not be expected to yield the same results as an investment in assets made at the beginning of the year.

#### c) Inventory turnover ratios

Holding unnecessary high levels of inventory may be expensive for a business in terms of storage and security costs and the greater the risk that goods would perish or become obsolete. Furthermore there could be pilferage going on in the business.

This ratio measures the number of times, in a year a business sells its average inventory. The higher the figure the better to the business.

#### Enzo Ltd.

|   | 2000              | 2001         |
|---|-------------------|--------------|
|   | 650               | 800          |
|   | 62.5              | 65           |
| = | <b>10.4 times</b> | = 12.3 times |

#### **Comment**

There has been a slight improvement in the inventory turnover. A meaningful comparison of this ratio should be made with the average inventory turnover in the industry; business in the retail industry should be expected to have a very high inventory turnover. Business in electrical appliances, hardware and furniture are expected to have lower turnover ratios as inventory will be converted into amounts receivable and ultimately cash.

Rate of inventory turnover is also called ROST

Inventory turnover (in days) = Average inventory x 365 Cost of sales

Inventory turnover (in weeks) = Average inventory x 52 Cost of sales

Measures in days the length of time a business holds inventory. The shorter the period the better as less money is tied up in inventory and inventory will be converted into cash more quickly.

#### Enzo Ltd.

#### ROST =

| 2000        | 2001     |
|-------------|----------|
| 62.50 x 365 | 65 x 365 |
| 650         | 800      |

= 35 days and 30 days

#### **Comment**

The business is now taking less time to sell inventory. Inventory turnover can also be calculated on months and the model is adjudged as follows:

\*Inventory turnover (months) = <u>average inventory x 12</u>
Cost of sales

\*Inventory turnover (weeks) = <u>Average inventory x 52</u>
Cost of sales

#### d) Debtors Collection period

Measures the period taken on average by debtors to pay. It can be calculated in days, weeks and months like the inventory turnover ratio. The shorter the period the better. It means business collects the money quite early from debtors and hence it becomes easy to pay its debts and other commitments (wages, bills and accounts payables).

#### Enzo Ltd.

|                            |         | 2000                              | 2001               |
|----------------------------|---------|-----------------------------------|--------------------|
| Receivables collection (in | n days) | Receivables x 365<br>Credit sales |                    |
| (in weeks)                 | =       | Receivables x 52<br>Credit sales  |                    |
| (months)                   | =       | Receivables x 12<br>Credit sales  |                    |
| Collection in days         | =       | 80 x 365<br>1 000                 | 120 x 365<br>1 300 |
|                            | =       | 29,2 days                         | 33,9 days          |
| In weeks                   | =       | 80 x 52<br>1 000                  | 120 x 52<br>1 300  |
|                            | =       | 4,16 weeks                        | 4,8 weeks          |
| In months                  | =       | 80 x 12<br>1 000                  | 120 x 12<br>1 300  |
|                            | =       | 0,96                              | 1,1 months         |

#### Comment

The collection period of the business has been extended in year 2001 from the year 2000 levels. Perhaps the business extended its credit period to increase its sales. However the business may need to critically analyse the credit period offered to it by its creditors and to assess whether or not there are no pressures for quick availability of cash.

In general, it is good for a business to have as short as possible a debtor's collection period. It is not surprising for a business to find itself technically in solvent with money tied up in debtors who pay very late. Wages will need to be paid as well as creditors, it is an imprudent practice to source short – term loans and overdrafts to finance receivables. A comprehensive credit policy is very necessary, as it would:

- establish the maximum credit period perceived in the industry or by the company as best suited to its environment.
- establish who should be given credit based on the calibre of customers attracted.

#### e) Creditors payment period

Measures the period a business takes before paying its creditors. The average for the creditors for the period is used. Where the discount is not meaningful, it is better to avail the full credit period. This will certainly help boost the business's cash flow position.

| Payables turnover (in days) | = | Payables x 365<br>Credit purchases |
|-----------------------------|---|------------------------------------|
| (In weeks                   | = | Payables x 52<br>Credit purchases  |
| (In months)                 | = | Payables x 12 Credit purchases     |

#### Enzo Ltd.

|                          |   | 2000            | 2001             |
|--------------------------|---|-----------------|------------------|
| Payables turnover (days) | = | 70 x 365<br>645 | 110 x 365<br>810 |
|                          | = | 39.6 days       | 49,56 days       |
| (Weeks)                  | = | 70 x 52<br>645  | 110 x 52<br>810  |
|                          | = | 5,6 weeks       | 7,06 weeks       |
| (Months)                 | = | 70 x 12<br>645  | 110 x 12<br>810  |
|                          | = | 1,3 months      | 1,6 months       |

#### **Comment**

The business is now taking longer to pay its creditors. This assists the cash flow position of the business. However it is only hoped that the delay to pay is within the period given otherwise, this indicates a potential problem for the business.

#### Note:

Where a business fails to pay on time its credit lines may be cancelled and may result into forced liquidation.

## 18.8 Capital Structure

Investors, lenders and potential investors are interested in an organisation's capital structure or long – term funding arrangements. The higher the ratio of debt to equity the more dependent an organisation is on borrowed funds, and the greater the risk that it may be unable to meet interest payments on these funds when they fall due.

#### Note:

This could cause serious liquidity problems for an organisation.

#### **Gearing Ratio**

Means the relation between long – term loan (or fixed cost capital) and total capital. In other words, it indicates the level of borrowing in the business.

Fixed cost capital - includes preference shares, debentures and any long term loans

#### Enzo Ltd.

| 2000        |           | 2001            |  |
|-------------|-----------|-----------------|--|
| <u>50</u> + | 40 x 100% | 100 + 50 x 100% |  |
| 335         | 5 + 40    | 640 + 100       |  |
| =           | 24 %      | 20%             |  |

#### **Comment**

- 1. There has been a slight decrease in debt financing. The company is still low geared. A company whose gearing exceed 50% may be said to be highly geared and this can be risky.
- 2. As profit increases, the rate of return to equity (ordinary) shareholders also increases. Certainly the vice versa is true. A decrease in profits also means the return to equity shareholders goes down.
- 3. Investors and bankers are usually reluctant to support highly geared companies because the risk of failure is quite high.

#### **Debt/Equity**

Measures the relationship between debt and equity.

Model

Debt / equity =  $\frac{\text{Debt x } 100\%}{\text{Equity}}$ 

Where equity refers to shareholders` funds.

- Ordinary share capital
- Plus all reserves

#### Enzo Ltd.

| D/E | = | $\frac{40 + 50}{335 - 50}$ | $\frac{100 + 50}{640 - 50}$ |
|-----|---|----------------------------|-----------------------------|
|     | = | 31,57%                     | 25.42%                      |

### **Comment**

In proportion to total equity funds there has been a decrease in the level of borrowing. This is a good sign for the debenture holders who should feel better placed and less exposed to the risk of default.

#### 18.9 Investors' ratios

This group of ratios is commonly used by listed Companies to assist investors with more information.

#### 18.10 IAS 33 - Earnings per share

Earnings per share is an important ratio. It was issued to spell out its calculation, presentation and disclosure. It applies to entities that are listed on the stock market.

This is commonly used measure to assess the success of a business. It indicates the profits, in cents each share has earned in a given accounting period. This is the profit available to ordinary shareholders after the payment of interest, tax and preference dividend.

Investors are usually interested in a steady growth in the EPS

#### **Basic EPS**

This should be calculated by dividing the net profit or loss for the period attributable to ordinary shareholders by the weighted average number of ordinary shares during the period.

The model is: Net profit after tax and preference share dividends

Number of ordinary shares ranking for dividend

If a company has any preference shares in issue then it should be dealt with as follows

The cumulative preference dividend should be deducted even if it is not paid or proposed. The cumulative preference dividend should always be deducted before anything is available to ordinary shareholders. If preference shares are non-cumulative, it should only be deducted from net profit after tax if declared or proposed. If the question does not specify whether preference shares are cumulative or non-cumulative always assume that they are cumulative.

#### Example 1

H Ltd. made a profit after tax of \$1.6m and it had in issue the following on 1 January 2000:

| 8% cumulative preference shares of \$1 each | \$100 000 |
|---|-----------|
| Ordinary share of \$1 each                  | \$300 000 |

The company's year end is 31 December

#### Required

Calculate the basic EPS

#### **Solution**

| Net profit after tax                  | 1 600 000             |
|---------------------------------------|-----------------------|
| Less preference dividend 8% x 100 000 | 8 000                 |
|                                       | 1592 000              |
| EPS                                   | \$1592 000<br>300 000 |
|                                       | \$5,31 per share      |

Note: EPS is to be expressed in cents per share.

#### Example 2

Ndlovu Ltd. made a profit of \$1 800 000 after tax for the year ended 31 December 2000. It has issued the following:

531 cents

6% non-cumulative Preference shares =  $200\ 000$ Ordinary share of 50c each = $750\ 000$ 

No shares were issued during the year.

#### Required

Calculate the basic EPS for the year ended 31 December 2000

#### **Solution**

| Net profit after tax |         |   | \$1 800 000<br>1 500 000 |
|----------------------|---------|---|--------------------------|
| Number of shares     | 750 000 | = | 1 500 00 shares          |
|                      | 0.5     |   |                          |
|                      | EPS     | = | 120 cents                |

Note that now preference dividend has not been provided because it has not been paid or declared. The number of shares should be determined by formula which goes like

Total value of shares Nominal value of each share

In the first illustration this formula was not used but because the normal value was \$1.00 therefore total value of shares was the same with number of shares. To get the correct number of shares you should always use this formula.

#### Issue of shares during the year

When extra shares are issued during the year the basic EPS is calculated by dividing the earnings by the weighted average number of shares outstanding during the year. The weighting is on a time basis.

#### Example 3

A company has in issue 100 000 ordinary share of \$1 each on 1 January 2002. It issued a further 20 000 shares on 1 July 2002 at par and payment was received in full on application.

#### Required

Calculate the weighted average number of shares by 31 December 2002

## Solution

$$\begin{array}{rcl}
100\ 000\ x & \underline{12} & = 100\ 000 \\
& & 12 & = \underline{10\ 000} \\
\end{array}$$

Therefore the weighted number of share = 110 000.

 $110\ 000$ 

#### Example 4

XYZ Ltd., whose year ends on 31 December each year made a profit after tax of \$900 000. It has in issue 50 000 ordinary shares of \$1 each on January 2001. It issued a further 40 000 ordinary shares as follows:

1 April 2001, 30 000 shares 30 June 2001, 10 000 shares

12

#### Required

Calculate the basic EPS for the year ended 31 December 2001

#### **Solution**

Weighted number of shares

$$500\ 000\ x\ 12/12 = 50\ 000$$
 $20\ 000\ x\ 9/12 = 22\ 500$ 
 $10\ 000\ x\ 6/12 = 5\ 000$ 
 $77\ 500$ 

Basic EPS =  $900\ 000$ 
 $77\ 500$ 

= \$11.61 per share
= 1\ 161 cents per share

#### Issue of shares for free

If shares are issued for free (bonus issue) during the year, there is no time apportionment. Simply add the shares to the existing ordinary shares.

ABC Ltd. made a profit after tax of \$1 200 000. It had an issued 80 000 ordinary shares of \$1.00 each. On January 2000 the company made a bonus issue of 2 for every 5 held on 1 July 2000. The company's year end is 31 December 2000

#### Required:

Calculate the basic EPS

#### **Solution**

$$\frac{\$1\ 200\ 000}{112\ 000\ (\text{weighted shares})}$$
= \begin{align\*}
\pm 10.71\ \text{per share} \\
= \begin{align\*}
1071\ \text{cents per share}
\end{align\*}

#### **Earnings yield**

Expresses the earnings of a Company as a percentage of the market price of its share

#### Enzo Ltd.

Earnings Yield = 
$$\frac{2000}{EPS}$$

$$= \frac{94 \times 100\%}{120}$$

$$= 78.3\%$$

$$\frac{2001}{MPS (Market price / share)}$$

$$\frac{75 \times 100\%}{190}$$

$$\frac{39.5\%}{MPS}$$

### **Comment**

There has been a decrease in the earnings yield. It is probable that the price of the share is not properly valued or based on the strengths of management plans and future forecasts, investors could be confident of better times ahead.

#### Price earnings ratio (PER)

The E/P ratio relates the market price of a share to the earnings per share.

| Price earnings ratio = | Market Price /Share |
|------------------------|---------------------|
|                        | Earnings per share  |

#### Enzo Ltd.

| 1.28 times | 2.53 times       |
|------------|------------------|
| 120<br>94  | <u>190</u><br>75 |
| 2000       | 2001             |

#### **Comment**

The E/P ratio has moved higher an indication of growing confidence in the business. The higher the P/E ratio, the higher the confidence investors have in the future of the business.

#### **Dividend Cover**

It indicates the number of times the current dividend can be paid out of the company's profit after tax. A comprehensive dividend policy must be adopted by a business to ensure that:

- 1. investors are satisfied with the dividend declared
- 2. adequate profits are retained to fund future growth of the company

#### Enzo Ltd.

| Dividend Cover = |   | 2000 Profit after tax less Preference divided Gross dividend on ordinary shares |                      |  |
|------------------|---|---|----------------------|--|
|                  |   | <u>156 – 5</u><br>30  | <u>230 – 5</u><br>60 |  |
|                  | = | 5 times   | <b>3.75 times</b>    |  |

#### **Comment**

A dividend cover of 5 times could be very high and indicative of a comparative dividend policy.

#### Dividend per share

This is concerned with dividend paid in an accounting period per share

| Dividend per share | = | Gross dividend for the year     |
|--------------------|---|---------------------------------|
|                    |   | No. of ordinary shares in issue |

|                    |   | 2000        | 2001             |
|--------------------|---|-------------|------------------|
| Dividend per share |   | 30<br>160   | <u>60</u><br>300 |
|                    | = | 18.75 cents | 20 cents         |

#### Comment

The dividend has remained unchanged at 21 cents. However investors will certainly be happier with an increase in the company dividend.

#### **Dividend Yield**

This expresses the shareholder's dividend as a percentage of the market value of the share. It shows investor's return on investment.

| Dividend Yield = |   | Dividend/ Share x 100%<br>Market price per share |                   |  |
|------------------|---|--|-------------------|--|
|                  |   | 2000   | 2001              |  |
| Dividend Yield   | = | 18.75 x 100<br>120c                              | 20 x 100<br>190 c |  |
|                  | = | 17.63 %  | 11.53%            |  |

#### **Comment**

There has been a sharp decrease in the dividend yield. Probably shareholders may not be happy with lack of growth in the Company's dividend. However whether this satisfies the shareholder will depend upon the yield that could be earned elsewhere.

#### Note

The dividend yield indicates the return that an investor earns from holding share in a particular company. The higher the dividend yield the better. A low dividend yield may convince shareholders to dispose of their shares.

#### **Interest Cover**

This measures the number of times interest payments on long –term debt can be paid out of profit before interest & tax. The higher the level of interest cover the less likely the chance that interest payments will not be met, hence the lower level of financial risk to ordinary shareholders associated with an organisation.

| Interest Cover | = | Profit before tax & interest<br>Interest charges | <u>erest</u> |  |
|----------------|---|--|--------------|--|
|                |   | 2000   | 2001         |  |
| Interest Cover | = | <u>200</u><br>4                                  | 300<br>10    |  |
|                | = | 50 times   | 30 time      |  |

## 18.11 Limitation of ratios

- 1. Ratios can only show results of carrying on a business. They do not explain what caused the ratios, hence further explanations by management is necessary.
- 2. Ratios are based on accounting information that may be subjective as different businesses may use different policies and accounting conventions for treating the same transaction.
- 3. For meaningful analysis of ratios, like should be compared with like. In other words, a company in the motor industry cannot be compared to an insurance company or a company's performance in 2001 cannot be compared to its performance in 1985.
- 4. Ratios ignore seasonal fluctuations.
- 5. Ratios may be misleading if not adjusted for inflation.
- 6. Ratios are snap shots; as at the end of the year, in the case of a Statement of Financial Position.

#### 18.12 Ratios & incomplete records

If given summarised account (details and ratios), it is possible to prepare final accounts utilizing those summaries. Some of the techniques used in incomplete records should be applied. In the previous section, we have demonstrated the calculation of ratios. In this section, we have a motive of preparing final accounts from those ratios. Students should therefore have the formulae of calculating the ratios at hand.

#### Example 1

B. Sam plans to go into business on 1<sup>st</sup> June 2001 and has \$60 000 to invest. He intends to use the money to buy the following:

The remainder will be deposited in the business bank account. Sam's projected figures for the first year of business are:

Sales \$140 000 of which 20% will be on credit

Gross profit ratio 40% Net profit ratio 20%

Sales commission 4% of total sales

Depreciation on furniture 45% reducing balance
Discount allowed 1½% of total sales

Discount received 2½% of credit purchases

Bad debts 2 ½% of sales Wages \$13 250 Sundry expenses \$6 600

Drawings \$5 000 plus 5% of total sales

## Projected balances at 31 May 2002 are:

\$ Inventory 16 000
Receivable 6 000
Payables 5 000

No accruals or prepayments are expected at that date, and the balance at bank has not been estimated.

### Required

- 1. Draw up a projected Statement of comprehensive income for the year ending 31 May 2002
- 2. Draw up a projected Statement of Financial Position as at 31 May 2002

#### **Solution**

#### Sales ledger Control A/c

| Sales    | 28 000<br><u>28 000</u> | Bank (difference) Disc. Allowed Bad debts Bal. c/d | 19 200<br>2 100<br>700<br><u>6 000</u><br>28 000 |  |

### Example 2

R. Show is in business and at 31 December 1994 his capital was \$65 000. All his sales and purchases were on credit. At 31 December 1995, Show's inventory was valued at \$20 000, which was \$8 000 less than at the end of the previous year.

The following ratios have been calculated from the Statement of comprehensive income for the year to 31 December 1995 and his Statement of Financial Position at that date:

| 1. | Rate of inventory-turn                        | :         | 7 times            |
|----|---|-----------|--------------------|
| 2. | Mark up                                       | :         | 33 1/3%            |
| 3. | Selling & Distribution expenses               | :         | 8% of sales        |
| 4. | All other overheads – administration          | :         | ?                  |
| 5. | Net profit percentage                         | :         | 15%                |
| 6. | Sales / property, plant and equipment         | :         | 5 times            |
| 7. | Sales / current assets                        | :         | 4 times            |
| 8. | Average period of credit taken by receivable  | es:       | 30 days            |
| 9. | The only current assets are inventories, rece | ivables a | nd balance at bank |

10. Average time taken to pay creditors : 45 days

# Required

Prepare R. Show's Statement of comprehensive income for the year ended 31 December 1995 and his Statement of Financial Position as at that date (Make all calculations to the nearest \$)

### **Workings**

| 1. | Rate of inventory-turn | =             | Cost of Sales Average inventory |   |           |
|----|------------------------|---------------|---------------------------------|---|-----------|
|    |                        | $\Rightarrow$ | Cost of sales<br>24 000         | = | 7         |
|    | Cost of sales          | $\Rightarrow$ | 24 000 x 7                      | = | \$168 000 |

| 2.            | Mark-up                   | $\Rightarrow$        | Gross 1                |               | $\Rightarrow$       | G.P<br>168 00 |          | 3 1/3%   |          |

## 18.13 Examination type questions

# 18.14 Multiple choice questions

1. During an accounting period, a company earned a profit, after tax, of \$1 440 000. Its capital was as follows:

| Ordinary share capital (\$3 shares)        | \$600 000 |
|--|-----------|
| 12% preference share capital (\$ 3 shares) | \$120 000 |
| 10% debentures                             | \$180 000 |

The company's earnings per share for the period was:

- A. \$6.00
- B. \$7.128
- C. \$7.20
- D. \$7.50
- 2. A company's inventory turnover ratio is calculated using the cost of goods sold and the average of opening and closing inventory. In each of the last two financial years, closing inventory was valued at \$5 000 more than the corresponding opening inventory. In both years, the rate of inventory-turn was 10 times and in the earlier year the cost of goods sold was \$125 000.

What was the cost of goods sold in the second year?

|    | A. \$200 000<br>B. \$175 000<br>C. \$150 000<br>D. \$125 000                          |  |
|----|---|--|
| 3. | The following information has been can Days taken to pay creditors                    | lculated from the accounts of a business: 36   |
|    | Days taken by debtors to pay  | 65   |
|    | Inventory turnover in days  | 14   |
|    | What is the cash operating cycle?   |  |
|    | <ul><li>A. 15 days</li><li>B. 29 days</li><li>C. 43 days</li><li>D. 79 days</li></ul> |  |
| 4. | The following balances are found in th  | e Statement of Financial Position of a business.   |
|    |   | \$   |
|    | Inventory   | 192 000  |
|    | Debtors   | 378 000  |
|    | Creditors   | 261 000  |
|    | Bank (debit balance)  | 63 000   |
|    | Bank loan (repayable in 2 years)  | 150 000  |
|    | What is the quick (acid test) ratio?  |  |
|    | A. 1.1:1<br>B. 1.2:1<br>C. 1.7:1<br>D. 2.4:1  |  |
| 5. |   | is \$5 000 and the cost of sales is \$100 000. Using the average ry, what value of closing inventory is needed to give a inventory |
|    | A. \$5 000<br>B. \$10 000<br>C. \$15 000  |  |

D. \$20 000

# 6. The following items appear on a Statement of Financial Position

\$

| Inventory                    | 30 000 |
|------------------------------|--------|
| Provisition for credit loses | 6 000  |
| Cash and bank                | 12 000 |

Creditors 30 000

The current ratio is 2:1

How much are the debtors?

- A. \$12 000
- B. \$18 000
- C. \$24 000
- D. \$30 000
- 7. A company has the following information:

Price earnings (P/E) ratio 14

Earnings per share (EPS) \$0.60

Dividend per share \$0.40

What is the market value of an ordinary share?

- A. \$2.80
- B. \$5.60
- C. \$8.40
- D. \$14.00

|                                  |           | <u>577 200</u>    |           | <u>589 000</u>    |
|                                  |           |                   |           |                   |
| Share Capital & Reserves         |           |                   |           |                   |
| Ordinary shares of \$3 full paid |           | 540 000           |           | 540 000           |
| Retained profits                 |           | 37 200            |           | 49 800            |
|                                  |           | <u>577 200</u>    |           | <u>589 800</u>    |

## Below is the Statement of comprehensive income for the year ended 30 June:

|                              |                | 2006           |                | 2005           |
|------------------------------|----------------|----------------|----------------|----------------|
| Turnover                     |                | 900 000        |                | 852 000        |
| <u>Less Cost of Sales</u>    |                |                |                |                |
| Opening inventory            | 180 000        |                | 150 000        |                |
| + Purchases                  | <u>720 000</u> |                | <u>705 000</u> |                |
|                              | 900 000        |                | 855 000        |                |
| - Closing inventory          | 201 000        | <u>699 000</u> | <u>180 000</u> | <u>675 000</u> |
| Gross profit                 |                | 201 000        |                | 177 000        |
| <u>Less</u> expenses         |                |                |                |                |
| Administrative expenses      | 69 600         |                | 86 400         |                |
| Depreciation                 | <u>21 000</u>  | 90 600         | <u>24 000</u>  | <u>110 400</u> |
| Net operating profit         |                | 110 400        |                | 90 600         |
| Add investment income        |                | 4 500          |                | 3 000          |
|                              |                | 114 900        |                | 93 600         |
| <u>Less</u> interest charged |                | <u>18 000</u>  |                | <u>18 000</u>  |
| Net profit before tax        |                | 96 900         |                | 75 600         |
| Less tax                     |                | 42 000         |                | 33 000         |
| Net profit for the year      |                | 54 900         |                | 42 600         |

All purchases and sales were made on credit.

a) Calculate the following profitability and liquidity ratios.

## **Profitability**

- i) Return on Ordinary equity (ROE)
- ii) Return on assets (ROA)
- iii) Net profit percentage
- iv) Gross profit percentage

# Liquidity

- (i) Current ratio
- (ii) Acid test ratio
- (iii) Debtors collection period
- (iv) Creditors payment period
- (v) Rate of inventory turn

b) Comment on the performance of Electronics Unlimited over the past two years.

### **Question 3**

An extract from a company's Profit and Loss Account for the year ended 30 April 1998 was as follows:

|                                       | \$000 | \$000 |
|---------------------------------------|-------|-------|
| Operating profit                      |       | 3 000 |
| Debentures interest (12½%)            |       | 750   |
|                                       |       | 2 250 |
| Ordinary dividend paid and proposed   | 1 050 |       |
| Preference dividend paid and proposed | 360   |       |
| Transfer to general reserve           | 600   | 2 010 |
| Retained profit for the year          |       | 240   |

The company's issued share capital and reserves at 30 April 1998 consisted of:

| Ordinary shares of \$30      | \$12 000 |
|------------------------------|----------|
| 8% Preference shares of \$15 | \$4 500  |
| Capital and revenue reserves | \$2 700  |

The market price of the ordinary shares at 30 April 1998 was \$90.

- (a) Calculate the following ratios:
- (i) Interest cover
- (ii) Dividend cover
- (iii) Earnings per share
- (iv) Price earnings ratio
- (v) Dividend yield
- (vi) Gearing
- (b) Explain why each of these ratios above is important for investors in ordinary shares in the company.

#### **Question 4**

India Indigo is a general dealer with the data below for the year ended 30 September 2005.

Net profit percentage 15.5%

Mark-up 25%

Selling overheads 2.5% of sales

Other overheads ?

Inventory turnover 10 times

Sales: current assets 5.3:1

Sales: property, plant and equipment at net 5:1

book value

Average period taken by debtors to pay 28.8 days

Average period taken to pay creditors 45 days

#### <u>Notes</u>

- (i) Included in current assets are debtors, inventory and prepayments.
- (ii) The bank account was overdrawn.
- (iii) Inventory at 30 September 2004 was valued at \$210 000 which was \$140 000 less than that at 30 September 2005.
- (iv) All sales and purchases were on credit.
- (v) Capital at 30 September 2004 was \$647 500
- (vi) Indigo made drawings equal to 7.5% of his sales.
- (vii) The shop opened for 360 days during the year.

#### You are required to:

- (a) Prepare a Statement of comprehensive income of Indigo for the year ended 30 September 2005. Round off your calculations to the nearest \$.
- (b) Prepare Indigo's Statement of Financial Position at 30 September 2005. Your answers should be rounded off to the nearest \$
- (c) Give five reasons why making a profit does not necessarily mean having cash.
- (d) What method can a company use to distribute profit if there is no cash available.

# **CHAPTER 19**

# COMPUTERSED ACCOUNTING

## 19.1 Chapter objectives

After studying this chapter the student should be able to:

- 1. Explain what computerized accounting is
- 2. Distinguish between computer software and computer hardware
- 3. Give an outline of some computerized accounting packages
- 4. Explain the advantages and disadvantages of computerized accounting systems
- 5. Describe the components of a computer hardware used in a computer system.

### 19.2 Introduction

With the advent of technological developments and advances, nowadays computers have common places and are commonly used in business for various purposes. Book-keeping and accounting are also now computerized in most businesses for the scope of our syllabus it is important to note that practical 'hands-on' experience of computers is not required. In this chapter we will therefore look at the theory which will give you an understanding of what computerized accounting systems are and how they benefit a business accounting system.

## 19.3 Computer systems

A complete computer system consists of two main parts, the hardware and the software

#### 19.4 Computer hardware

These are part of the computer which you can touch and handle, as shown below. They include input devices, the central processing unit (CPU), output devices and the memory.

#### i) <u>Input devices</u>

These are used to enter data and instructions into the computer for the CPU to process e.g. keyboard and mouse.

#### ii) The Central processing Unit (CPU)

It is the brain and the heart of the computer. Its function is to carry out all operations and it also stores information. It contains the primary memory of the computer

#### iii) Output devices

These are used to communicate and record information after it has been processed in the CPU. Output devices include the visual display unit (VDU) also known as the monitor or screen which looks like a television set and provides output in the form of screen displays. The printer is another output device which gives a hard copy of results produced by the computer in the form of print-outs.

### 19.5 Computer Software

This is a set of programs which enable us to use the computer hardware by controlling the functionality of the computer. These programs are loaded into the CPU so that data can be processed. In accounting, software programs include those that are designed to enter invoices into debtors accounts, prepare payrolls i.e. wages and salaries prepare final accounts maintain stock records etc. Appropriate and relevant data must be input into the system so that appropriate output is derived otherwise if misleading data is recorded the output will also be misleading. A computer does not have an independent brain of its own. Its brain

function depends on what is fed into the system thus care must be taken in data input so that reliable outcomes are achieved. A computer system uses two kinds of software, namely systems software and application software.

# 19.6 Operating systems/Systems software

An operating system also known as the system software is a program that controls the hardware directly, such as the memory and control devices such as printers. Without an operating system, a computer would be useless.

# 19.7 Applications software

This software is used to perform specific tasks. In accounting applications packages include the use of spreadsheet software such as Excel and software used for entering, invoices in debtors accounts, preparing a payroll, stock control etc.

## 19.8 Computerised Data Processing

Putting information into a structure in which it can be processed by the computer is called data capture. This is commonly done using the keyboard but other methods such as Magnetic ink character recognition (Mick), optical mark reading (OMR), barcode readers and optical character recognition (OCR) are used. For accounting purposes, mainly the keyboard is used. You need not worry much about the other methods of data capture at this level.

Once data is captured, it is collected in a record called a data file such as the data file for the purchases ledger which will contain the individual records of each creditor, showing the personal details such as the name address ,account number,terms of payment, balance outstanding etc. The data file is then stored either on the machine or on a memory stick or a disc, and it can then be accessed using computer applications software.

# 19.9 Uses of Computers in Accounting

Application of computer fall into two main categories

- i) Financial accounting
- ii) Management accounting

#### **Financial Accounting**

Computers and electronic data processing can be used to replace monotonous aspects of a book-keeper's job by cutting down on the amount of labour needed in manual data capture right up to the compilation of final accounts. Computers can be used with the appropriate packages, to write up the books of account with less effort and time. With a full system of computerized accounting which rates from originating source documents write up to the extraction of a trial balance a business can then be provided with an Statement of comprehensive income and a statement of financial position as frequently as required by simply using commands to perform the necessary tasks.

#### **Management Accounting**

Computerized accounting is very useful in the area of analysis and decision making. A properly run organization which is efficient desires to have up-to-date information being readily available. For decisions to be done efficient variances for instance, need to be reported timeously. In addition more specialized programs can be used to aid decision- making Computers can be used to generate frequent variance reports, to enable management to act upon adverse variances quickly and possibly averse adverse results. A spreadsheet is quite useful in managerial accounting. A spreadsheet is simply a large area of row and columns which make up a grid of cells, into which text numbers or formula may be placed via the keyboard A spreadsheet enables arithmetical and statistical operations to be performed on the contents of the cells. Managers commonly use spreadsheets for budgeting forecasting and statistical analysis of results. Spreadsheets are windy renowned for what if calculations that is sensitivity analysis this their biggest advantage i.e. if the sales price is reduced by 10% what is the effect on the budgeted profit. Charts can also

be printed as a result of using spreadsheet giving a graphical view of outcomes to be included in management reports. Spreadsheet applications include functional budgets master budgets cash flow charts, capital expenditure appraisal stock, records CVP analysis etc.

# 19.10 Advantages of using a computerised Accounting system

- 1. Data is processed at a very high speed as compared to manual methods.
- 2. Huge volumes of data can be processed by a single computer manned by one person where several accounts clerks would be used if manual methods are employed.
- 3. Computers are extremely accurate and do not create errors of their own. Errors are a result of human/ use error.
- 4. Computers enable the compilation of financial and statistical information easy, which would be time-consuming expensive and tedious if manual methods are used
- 5. They make management by exception easy to implement by reporting on items which deviate from agreed standards of acceptability.

# 19.11 Disadvantages of using computers in accounting

- 1. The cost of acquiring computer systems and their installation is quite high at first
- 2. Training of staff in the use of computers and the software is expensive
- 3. As computers do not think independently of their users, an error in inputting data produces faculty unreliable results.
- 4. If a need arises to change a computer system, the costs are very high.

# 19.12 Examination type Questions

- 1. Define hardware and software in a computer system giving two examples of each.
- 2. What is exception reporting? State what accounting systems are available to enable management by exception.
- 3a) A small business wishes to convert its manual accounting system to a computerized accounting system. Write a brief report to the owners of the business, identifying the advantages that a computerized system would bring to the accounting functions of the business and distinguish between
  - i) The clerical aspects of accounting
  - ii) The management accounting function
  - iii) State three limitations of a computerized accounting system

#### **Suggested Solutions**

- 1. Hardware- the physical part of the computer system, e.g. keyboard, VDUs, processing unit printers etc.
- 2. Software-programs or set of instructions given to the computer telling it what operations to perform and how to perform them.

### **Example of hardware**

- i) Keyboard to input accounting data such as credit sales transactions
- ii) VDU to display of debtors' analysis by region.

## **Examples of software**

- i) Payroll program to calculate wages and produce pay slips
- ii) Sales ledger program to produce invoices and statement
- 2. This is whereby a report on activities which deviate adversely from the budget is compiled and management focuses its attention on those variances for corrective action to be taken.
- The use of spreadsheets enables management by exception through the use of applications such as CVP analysis, cash flow, charts records etc.

#### 3. Report: Computerised Accounting System

#### **Clerical Accounting-Advantages**

A computerised accounting system enables clerical staff to become more involved in their tasks as their focus shifts from just a single aspect of the job e.g. sales clerk to a whole task approach as the computer does the bulk of the work. Likely, this will improve motivation. In addition, clerks will not have to spend a lot of time doing manual calculations as they are automatically done by the computer.

### **Advantages for management Accounting**

Access to accounting information, with the advantage of production of exception reports becomes instant.

#### b) Limitation of a computerised accounting system

- i) GIGO-garbage in, garbage out. A computer can only process data it is ed. If it is fed inaccurate data results are also inaccurate and therefore of no value in decision-making
- ii) If a business operations charge significantly, it results in expensive modifications to software and at times additions to hardware
  - iii) A breakdown in the equipment which is not resolved timeously can leave management stranded, without information for decision-making
